W. D. CRICKSHANK,

Secretary and Treasurer.

No. 8.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Storekeeper-General's Office at Madras) will be received up to 1 o'clock on Tuesday, the 25th October 1887, by the Commissariat Storekeeper-General at Madras, for the supply, by contract, of 19,824 Imperial gallons of matured rum 5° overproof and 21,971 Imperial gallons of new rum 5° overproof, as mentioned in the subjoined schedule, to be delivered at the Commissariat Stores at Madras, to the Commissariat Storekeeper-General, free of all charges whatsoever, from 1st April 1888 to 30th September 1888. The above quantity is subject to a possible deduction of 10,099 Imperial gallons of matured rum and 10,359 Imperial gallons of new rum, or less, if favourable tenders for Rangoon (free of all charges whatsoever), as per paragraph 3, are received.

2. Tenders will be opened by the Commissariat Storekeeper-General at Madras in presence of those interested who may choose to attend.

3. Tenderers have the option of tendering for the supply of the whole quantity of rum at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given under each station. In the latter case the amount inserted under each station is the earnest-money to accompany such tenders as shown in the schedule.

SCHEDULE.

DESCRIPTION OF ARTICLE.	PROBABLE QUANTITY.		Period of delivery, specifying quantities.	Place of delivery and to whom to be made.	Amount of deposit.	Amount of security in cash, currency notes or Government promissory notes.	Compensation to be paid to Government for each breach of contract.
	Matured rum.	New rum.					
MADRAS.	IM. GALS.	IM. GALS.					
Best sugarcane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	9,725	The whole quantity must be delivered between 1st April and 30th September 1888 in such quantities and by such dates as the Storekeeper-General at Madras shall in writing from time to time direct.	To be delivered in to the vans at the General Armek Depot, Commissariat Storekeeper-General's Office, Madras.	Rupees 500 to be paid to the Secretary and Treasurer, Bank of Madras, his receipt being produced as a voucher of payment, or Government promissory notes to the same value, duly endorsed in his favour, to be handed to the Commissariat Storekeeper-General, Madras, with the tender.	Ten per cent. on the value of the articles contracted for.	Not exceeding Rs. 2 per gallon rejected or not delivered.
Best sugarcane new rum of Indian manufacture, 5 degrees over London proof.	11,612					
RANGOON.							
Best sugarcane new rum of Indian manufacture, 5 degrees over London proof.	10,359	Ditto to the Store and Shipping Officer, Rangoon.	Ditto Rangoon	Rupees 850 ditto		
Best sugarcane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	10,099					
Total Imperial gallons	19,824	21,971			Total Rs. 1,750		

The rum is subject to the approval of a Committee, and must be in all respects equal to the sample to be seen in the Commissariat Storekeeper-General's Office.

4. Each tender must be accompanied by the deposit shown in the schedule, and in default of such deposit the tender will be rejected, nor will any tender be received after the time fixed for the opening of tenders.

5. No person making a tender shall be allowed to withdraw his tender for the space of sixty days from the date thereof, and, in the event of his so doing, he will be considered as having committed a breach of his contract, and will be held responsible for all damages which Government may sustain thereby.

6. Tenders should be superscribed "Tenders for rum" for Madras and Rangoon, or for Madras or Rangoon separately.

7. All needful information may be had on application at the Commissariat Storekeeper-General's Office at Madras.

8. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

9. The Commissary-General reserves to himself the right of rejecting tenders without assigning any reason for so doing.

10. Offers by telegram will not be accepted.

11. Rates offered in tenders are to be inserted in words as well as in figures, and the column "Amount" should also be filled up.

12. Parties at out-stations who may be desirous of forwarding their tenders will do so post-paid (so as to ensure their reaching the Commissariat Storekeeper-General on or before the date and before the hour named above), accompanied by a receipt from civil treasuries at those stations to the effect that they have lodged the required deposit money for the article tendered for. Cash, currency notes, or cheques will not be accepted.

13. Each tender must also be accompanied by the deposit of the further sum of Rs. 20, being the fee of the Government Chemical Examiner for analysing the samples forwarded with the tender. In default of such deposit the tender will be rejected. Should the samples not be analysed by the Government Chemical Examiner, the deposit will be returned, but if analysed by that officer, the deposit will be paid to the Government Chemical Examiner.

14. Each person tendering must submit with his tender a sample of not less than five gallons of the spirit he proposes supplying.

15. Intending tenderers are strongly recommended to examine the sample of rum in the Commissary-General's Office.

By order of the Commissary-General,

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;

Madras, 17th August 1887.

B. GOMPERTZ, Major,

Commissariat Storekeeper-General.

Notice

IS hereby given that, in pursuance of the provisions of the Chota Nagpore Encumbered Estates Act (as amended by Act V of 1884) and the Deo Estate Act, the undermentioned properties will be sold by public auction to the highest bidder at the Gya Collectorate for the settlement of debts and liabilities against the Deo Estate on the 11th of November 1887 at 1 P.M. and the following days if necessary.

One-fourth of the purchase-money will have to be deposited by the purchaser at auction on the date of sale. The remainder will be payable after a fortnight on confirmation of the sale, which will principally depend on the highest offer in consideration of the estimated sir jumma. If the full purchase-money is not paid on confirmation of sale, the money deposited will be forfeited.

The purchaser will get deduction from the purchase-money for any money remaining still unpaid on account of peshgi of thicadars.

Any application for purchase by private contract offering reasonable price for all or any of the undermentioned properties will be received by the Manager till the 10th of November 1887:—

List of properties appertaining to Deo Estate in Gya district proposed for sale by public auction for the liquidation of debts against the Estate.

CALCUTTA.
The 4th October 1887.

P. MCGUIRE,
Secretary.

Oudh Forest Department.

BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of *s&l* beams and scant-
lings supplied from this depot will be as follows:—

BEAMS—21 feet length, at Rs. 2-10 per cubic foot.

22 " " 2-12 "
23 " " 2-14 "
24 " " 3 "

Above the length given two annas per foot run will
be charged. Any inches over the foot will be charged as
a foot.

SCANTLINGS—From 12 to 20 feet, at Rs. 2-8 per c. ft.
Under 12 and over 7, at " 2-4 "
Under 7 feet at " 3 "

The above prices are for ordinary building purposes.
For *Planking, Sleepers, &c.*, special rates will be
fixed by agreement.

The Department will still take orders for buildings all
over at Rs. 2-4 per cubic foot, provided the scantlings
are taken in fair proportion.

Second and Third Class Timber will be sold and price
fixed by agreement.

Auction Sales will be held from time to time to clear
off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N. W. P.
and Oudh, Oudh Circle.

KANHYA LAL,

Sub-Assistant Conservator of Forests,
Bahramghat Division.

Bahramghat, the 1st April 1886.

Crystalline Cinchona Febrifuge.

A NEW and improved preparation made at the Go-
vernment Factory from Red Cinchona Bark. This
is a more perfect substitute for Quinine than the ordi-
nary uncrystallized Febrifuge. It can be purchased by
Government officers for public and charitable purposes,
and by any one taking *twenty pounds and upwards* at a
time, from the Superintendent, Royal Botanic Garden,
Seepore, near Calcutta, for *cash only*, at the following
rates:—Per four ounce tin *Rs. 6 ans. 8*, per eight
ounce tin *Rs. 12 ans. 8*, per pound tin *Rs. 24*. The
general public can be supplied by the Superintendent,
Royal Botanic Garden, for *cash only*, at the under-
noted rates:—Per four ounce tin *Rs. 8 ans. 8*, per
eight ounce tin *Rs. 16 ans. 8*, per pound tin *Rs. 32*.
This medicine is also sold by the principal European
and Native druggists in Calcutta. Postage four annas
per 4 oz. tin, eight annas per 8 oz. tin, and twelve annas
per pound tin, in addition to the foregoing rates.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine
and can be purchased by Government officers for
public and charitable purposes, and by any one taking
twenty pounds at a time, from the Superintendent, Botani-
cal Garden, Calcutta, for *cash only*, at the following
rates:—per four ounce tin, *Rs. 4 ans. 8*; per eight
ounce tin, *Rs. 8 ans. 8*; per pound tin, *Rs. 16 ans. 8*.
The general public can be supplied by the Superintend-
ent, Botanical Garden, for *cash only*, at the undernoted
rates:—per four ounce tin, *Rs. 5 ans. 8*; per eight ounce
tin, *Rs. 10 ans. 8*; per pound tin, *Rs. 20*. This medicine
is also sold by the principal European and Native drug-
gists in Calcutta. Postage eight annas per 4 and 8 oz.
tins, and twelve annas per pound tin, in addition to the
foregoing rates.

Commissioners for making Improvements in the Port of Calcutta.

NOTICE

UNDER SECTION 69 OF ACT V (B.C.) OF 1870.

THE following packages, landed at the Jetties from the undermentioned ships, have been removed to the Commissioners' Import Warehouse, where they remain at the risk and expense of the owners. If not cleared within two months from the date stated against each item, they will be sold under section 72 of the said Act:—

Jamooi School, District Monghyr, 7th October 1887.

(697—3)

Notification.

IT is hereby notified, under section 5 of the Indian Treasure Trove Act (VI of 1878), that in May 1887 a treasure consisting of twenty-five (25) old gold coins (Virarayan fanams), valued at Rs. 10-15, was found in field No. 1032, in the village of Punnam, Karur taluk, Coimbatore district.

All persons claiming the treasure or any part thereof are required to appear in person or by agents before

the Collector at Coimbatore on Monday, the 6th February 1888, with a view to the matter being enquired into and disposed of in accordance with the provisions of the said Act.

J. STURROCK, Acting Collector.

Coimbatore Collector's Office, the 28th September 1887.

Messrs. W. Newman & Co., "Limited."

NOTICE is hereby given that the Sixth Ordinary General Meeting of Shareholders of the above Company will be held at the Registered Office, No. 4, Dalhousie Square, Calcutta, on Monday, the 31st October 1887, at 4 P.M., to pass the accounts for the year ended 30th June 1887, and to transact such further business as may be brought before the Meeting.

By order of the Directors.

Calcutta, the 11th October 1887.

JOHN ELIOT, M.A., Meteorological Reporter
to the Govt. of Bengal.

CALCUTTA, the 26th August 1875.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, i.e., from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. PEDLER,

Offg. Meteorological Reporter to the Govt. of Bengal.
Meteorological Office, Bengal, the 17th March 1886

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884:—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance

For the complete series, including postage, Rs. 22-8.

Without postage. With postage.

In modification of the Notice, dated the 7th November 1882, published in Part II, page 1686 of the *Calcutta Gazette*, the following notice is published for information:—

Notice is hereby given, that the terms for the purchase of publications from, and for all work done in, the Bengal Secretariat Press for other than Government offices or offices under the control of Government Officers, are strictly cash.

In future no publication will be supplied, or advertisement notice, &c., inserted in either of the *Gazettes*, except for the offices mentioned above, unless the cost thereof has been remitted to the Accountant, Bengal Secretariat. In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil

courts or offices, and for those forwarded by the Official Assignee, cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

R. H. WILSON,

Offg. Secy. to the Govt. of Bengal.

The 24th February 1886.

NOTE.—Rate for advertisements in the *Calcutta Gazette*:—

	Rs.

RESOLUTION ON THE REPORT ON THE LUNATIC ASYLUMS IN BENGAL FOR THE YEAR 1886.

MEDICAL.

Darjeeling, the 21st September 1887.

RESOLUTION.

READ—

The Report on the Lunatic Asylums in Bengal for the year 1886.

Read also—

The Report for the year 1885, and the Resolution recorded upon it.

Although the Report, which was due on the 1st May last, was not received by Government till the 14th July, yet no explanation of the delay in its submission has been furnished. The Lieutenant-Governor trusts that the Inspector-General of Civil Hospitals will in future pay more attention to the orders of Government regarding the punctual submission of reports.

2. The total number of persons who were in confinement in all the asylums in Bengal, with the exception of the European Asylum at Bhowanipore, on the 1st January 1886 was 955, of whom 757 were males and 198 females. The numbers of admissions and re-admissions during the year were 200 and 18 respectively. Of all those under treatment, 87 persons were discharged cured, 41 were transferred to the care of friends, 4 were discharged and 85 died, leaving 956 persons in the asylums on the 31st December 1886. The daily average population was 963.9 against 939.62 in 1885. The percentage of recoveries calculated on the daily average strength was 9.02 against 9.89 in the previous year.

3. The number of criminal lunatics in the asylums on the 1st January 1886 was 387, of whom 349 were males and 38 females. During the year there were 81 new admissions and 12 re-admissions; 60 persons were discharged or transferred, and 23 died, leaving 397 in the asylums at the close of the year. This number is the highest on record within the past decade. In 1876 the number was only 232, and there has been a steady increase since that year, the number having increased by nearly 100 during the last quinquennial period from 1882 to 1886. In drawing attention to the steady increase in the number of this class of lunatics, the Inspector-General of Civil Hospitals observes that the figures are open to objection, as they represent not altogether cases of genuine insanity, but possibly cases in which insanity has been successfully pleaded in Court, and cases of crime committed under mere intoxication. The Superintendent of the Dullunda Asylum, referring to the increase in the number of criminal lunatics in that institution, remarks that "the increase in the criminal population is due to the necessity of retaining a prisoner in the institution after he has been declared sane longer than is the case with the non-criminal." Sir Steuart Bayley thinks it possible that non-homicidal lunatics have in some cases been detained for longer periods than was necessary. The statement of admissions and "crimes charged" shows that out of the total number of 81 admissions, 25 were charged with murder and attempts to commit murder, five with culpable homicide, four with grievous hurt, two with hurt, one with attempt to commit suicide, 20 with theft, one with receiving stolen property, three with trespass, one with mischief by fire, one with exposure of child, two with house-breaking, one with criminal trespass, one with lurking house trespass, five with house trespass, and one for each of the following offences:—namely, forgery, hurt, vagrancy, highway robbery, trespass and assault, wrongful confinement, obstruction on railway, and exposure of person. It is evident that many of these offences were comparatively trivial, and if the lunatics were harmless, there was no necessity for sending them to an asylum at all; in any case, if they are not dangerous, there appears to be no reason for prolonged detention. During the year 17 per cent. of the non-criminal population and 8 per cent. of the criminal class were discharged from the Dullunda Asylum. From this the Superintendent concludes that, while the non-criminals form, as it were, a floating population, the criminals are gradually, but surely, filling the asylums. He suggests the advisability of establishing a separate criminal asylum, as it is difficult to segregate, manage or control criminal lunatics in an ordinary asylum. The Inspector-General of Civil Hospitals agrees in this view, but he does not think that the want of an asylum for criminal lunatics is so much a question of importance as separate accommodation for dangerous lunatics, or those whom it is found troublesome and difficult to manage. The Lieutenant-Governor is of opinion that it would be advisable to have a separate asylum for criminal lunatics only, but the expense both directly and indirectly caused by transfers would be so large, that the proposition is one which cannot be entertained at present.

4. The usual difficulty was experienced in regard to the classification of the insanes. During the year, however, 97 persons were returned under the head of "Acute mania," 78 under "Chronic mania," 11 under "Melancholia," 1 under "Acute dementia," 15 under "Chronic dementia," 2 under "Imbecility," and 14 as "not insane."

5. The health of the asylums was fairly good. Of the principal diseases treated during the year, dysentery was most prevalent and increased in all the asylums, particularly in Dacca and Patna. Next in order come phthisis, fever, pneumonia and cholera. The last-named disease was reported only from the Berhampore Asylum. The number of injuries sustained by the lunatics in confinement was comparatively few. There were only two cases of injuries inflicted by one lunatic on another. As regards the causes of insanity, 256 cases are said to have been due to ganja, 5 to bhang and churras, 53 to spirits, 7 to opium, 26 to fever, 38 to heredity, 25 to epilepsy, and 6 to childbirth. The mortality in the asylums increased from 73 in 1885 to 85 in 1886. Of the total number of deaths, 30 were returned from Dullunda, 16 from Dacca, 18 from Patna, 10 from Cuttack, and 11 from Berhampore. The principal causes of death were dysentery, phthisis, exhaustion from mania, apoplexy and diarrhoea. The high rate of mortality in asylums is of course partly due

to the fact that all the patients are lunatics, and also to the advanced age and chronic infirmities of many of them.

6. The space available in the Dullunda, Dacca and Cuttack Asylums was found to be insufficient to accommodate all the lunatics sent to those asylums during the year. In Dullunda the deficiency of accommodation was in the female ward. Under recent orders the number of districts supplying insanes to the asylum has been considerably reduced, and it is hoped that this will have the effect of preventing any over-crowding for some time to come. In Dacca and Cuttack additional accommodation is being provided to meet the increased demand. No over-crowding was reported from Patna, but some of the lunatics are said to have been accommodated in the verandahs of the building, and this has been taken into account in calculating the capacity of the asylum. The Lieutenant-Governor would wish to be informed of the extent to which the verandahs have been so utilized, and whether the lunatics are subjected to any discomfort by being so lodged. The remarks of the Inspector-General of Civil Hospitals regarding the condition of the asylum building at Patna, and the improvements required to be made in it, will be communicated to the Public Works Department for consideration.

7. The receipts and expenditure of the asylums for the year are shown in the following statement:—

Receipts and Expenditure of each Asylum for the year 1886.

1	2	3	4	5	6	7	8	9	10	11	12	13
Asylums.	Daily average strength.	Total expenditure.	Realised from friends of patients.	Actual profit from manufacture department.	Average cost of each patient as per column 3.	Average cost of each patient deducting columns 4 and 5.	AVERAGE COST OF EACH PATIENT IN RELATION TO—					
							Establishment.	Diet.	Bazar medicine.	Clothing.	Contingencies.	Other charges.
		Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
...	271-2	20,297 5 7	1,190 15 7	503 14 8	108 0 5	94 5 9	41 11 1	45 15 1	0 2 9	4 8 9	11 14 11	3 11 10

...	241-57	17,372 13 5	257 15 9	2,637 11 0	71 14 7	62 6 7	34 15 0	27 4 10	0 0 4	2 15 8	2 8 2	4 8 1
...	54-75	4,018 14 7	41 13 3	535 2 2	90 15 0	80 0 6	50 9 8	25 9 2	0 0 9	1 13 10	1 5 0	2 9 0
Berhampore ...	175-90	15,636 11 10	927 14 8	88 13 10	81 14 2	45 10 2	28 9 10	0 1 4	1 4 1	3 13 1	9 7 4
Total ...	983-9	88,109 11 7	1,972 14 10	5,041 8 7	91 6 6	82 8 4	39 14 5	34 7 5	0 1 2	2 14 2	5 11 10	8 5 4

The total expenditure was Rs. 88,110 against Rs. 86,279 in 1885. The increase was due to extraordinary expenditure on repairs and alterations to the asylum buildings during the year. The cost of establishment and superintendence was Rs. 20,061 and Rs. 18,400, respectively, or nearly the same as it was in the previous year. Dullunda is still by far the most costly of all the asylums. The total amount expended on diet was Rs. 22,060 against Rs. 20,613 in 1885, showing an increase of Rs. 1,447, which was distributed among the Dullunda, Dacca, Cuttack, and Berhampore Asylums, and was mainly due to the rise in the price of provisions. The value of articles of diet made over from the Manufacture Department during the year was less than that of the previous year. The average cost of a lunatic's daily diet was one anna and five pies, against one anna and six pies in 1885. The cost of clothing and bedding, including articles received from the Manufacture Department, was Rs. 2,780, against Rs. 3,103 in 1885. The expenditure on account of manufactures was Rs. 22,791 against Rs. 29,248 in the previous year.

8. The foregoing paragraphs do not refer to the European Asylum at Bhowanipore the figures for which are given separately. There were in this asylum on the 1st January 1886, 29 lunatics, of whom 13 were males and 16 females. During the year 17 persons were admitted and 1 readmitted; of these 16 were from the civil population and two soldiers; four persons were discharged cured, one was made over to the Military authorities, four were despatched to Europe under the Merchant Shipping Act, six were transferred to the care of friends, one was sent to Europe as still insane, and two died, leaving 29 patients under treatment in the asylum at the close of the year. "Heredity" and

"Intemperance" were found to be the chief causes of insanity. The total expenditure incurred in the asylum during the year was Rs. 20,271 against Rs. 19,731, the expenditure of the previous year. The receipts from paying patients fell from Rs. 9,233 in 1885 to Rs. 6,722 in 1886.

9. The management of the asylums appears to have been conducted with efficiency, and the subordinate establishments are favourably reported on. The insanes were well cared for and kindly treated.

ORDER—Ordered that a copy of this Resolution, together with a copy of the Report, be submitted to the Government of India, in the Home Department, for information.

Ordered also that a copy of this Resolution be forwarded to the Inspector-General of Civil Hospitals, Bengal, for information and guidance; and that extract paragraph 6 of the Resolution, and paragraph 5 of the Report, be forwarded to the Public Works Department for consideration.

By order of the Lieutenant-Governor of Bengal,

J. WARE EDGAR,

Offg. Chief Secy. to the Government of Bengal.

LOSS OF THE S. S. "SIR JOHN LAWRENCE."

MUNICIPAL DEPARTMENT.—MARINE.

RESOLUTION.

Darjeeling the 30th September 1887.

READ—

A report dated 8th instant, from the President and Members of the Court appointed under Government Resolution of 29th July to enquire into all the circumstances connected with the loss of the *Sir John Lawrence*.

At daybreak on the morning of the 25th May, the *Sir John Lawrence*, Captain Irvine, left her moorings and steamed down the Hooghly bound for Chandbally, with over 700 passengers on board. For several days previous to this, it had been notified day by day, in the Meteorological Report published every afternoon, that a cyclone had formed in the Bay and was moving in a north-westerly direction. As the *Sir John Lawrence* proceeded down the river, the weather became thick and squally and exceedingly threatening, and at the safe anchorage of Kedgerree she passed the *Curlew* and the *Tyrone*, which had anchored in consequence of the appearance of the weather; no signals were exchanged, but she went, under steam and with her sails set, out to sea. Further down she is reported to have been observed by the telegraph signal-master off Saugor Island, and this was certainly the last seen of her.

2. In a few days it became apparent that the vessel had been lost with all on board, and in view of the strong public feeling which the disaster had excited, and the fact that at the same time statements regarding the seaworthiness of the vessel, which had previously been enquired into departmentally, were repeated, the Lieutenant-Governor decided to hold a thorough and public enquiry. Accordingly a Special Court was appointed, under section 7 of Act V of 1883 (the Indian Merchant Shipping Act), to enquire into "all the circumstances connected with the loss of the steam-ship *Sir John Lawrence*."

3. The object of this enquiry was twofold. It was desired, in the first place, to have the opinion of the Court on the causes which actually led or contributed to the disaster. And it was desired, in the second place, to ascertain whether any improvements in existing practice could be suggested whereby the risk of danger to seagoing vessels under certain meteorological conditions might be lessened, or the security of the passengers of the different steamers plying between Calcutta and Orissa might be enhanced. The report of the Court is now before the Lieutenant-Governor. Although the enquiry was greatly protracted, the voluminous record of the depositions has been submitted without the revision necessary to make them readily intelligible. Before proceeding to notice the report in detail, the Lieutenant-Governor must first advert to an

observation of the Court that, when such an enquiry is likely to involve a protracted hearing, a firm of solicitors might be entrusted with the duty of preparing the case beforehand. The circumstances, however, of this case were very exceptional, and rendered it necessary for the Court to examine all the evidence which might be offered. What was required, in fact, was an enquiry into the evidence at first hand, and not a trial of a case prepared on behalf of Government. The object of the enquiry was not merely a decision on evidence known to be available, but the discovery of such further evidence as might prove to be available, and it was impossible for Government to foresee that the task imposed on the Court would be so protracted and arduous as it proved to be.

4. The following are the conclusions of the Court:—

1. That the *Sir John Lawrence* foundered at sea with all hands on board, probably between the Ridge Light and Palmyra Point; that Captain Irvine, who perished in the vessel, committed an act of foolhardiness, almost criminal in its nature, in taking the vessel out to sea on the morning of the 25th of May.

2. That the vessel, with the exception of the plating in her upper structure, which was abnormally thin, was in other respects seaworthy.

3. That the *Sir John Lawrence* carried more than her proper complement of passengers when she started on her last voyage, but that such overcrowding, in the face of the violent cyclone she encountered, aided very little, if anything, in hastening the disaster which befell her.

4. That the method of survey adopted under the auspices of the Port Commissioners and Port Officer is extremely unsatisfactory, and in urgent need of speedy and thorough reform.

5. That the Storm Signal Code can be amended with advantage; that cable communication should be established between the Andamans and main land; and that the cable already in existence between Diamond Island and Bassein should be overhauled and placed in a state of thorough repair.

5. The first two findings practically dispose of the first part of the enquiry, and, with the modification which will be noted below, the Lieutenant-Governor fully accepts them. It is clear that the vessel was seaworthy, that she foundered because the Commander rashly took her out into a cyclone in spite of the clearest indications of danger, and that no fault of those responsible for her equipment contributed to her loss. It is conclusively shown that the storm which she encountered was one of unusual violence. In the same storm perished the *Retriever*, a new and powerful tug-steamer; and there can be no question that the temerity of the Commander, Captain Irvine, was the cause of the lamentable destruction of life which attended the loss of the *Sir John Lawrence*.

The allegations of Mr. Nuestein, a dismissed servant of the owners of the vessel, were considered by Sir Rivers Thompson some months ago, but were not credited by him. As, however, they were reiterated after the loss of the vessel, Sir Stuart Bayley deemed it right to cause them to be laid before this Court of Enquiry in order that there might be no possibility of evasion or concealment. The result is that on all material points the correctness of Sir Rivers Thompson's judgment has been established.

The Court have come to the conclusion that the plating in the upper structure of the vessel was "abnormally thin," though it is not suggested that this defect was the cause of the disaster. The finding of the Court is based mainly, but not entirely, on the evidence given as to the condition of one of the plates. The evidence both as to the thickness and as to the position of that plate is described as hopelessly conflicting, and though the Court incline to accept Leech's evidence that it was only one-eighth of an inch thick, they finally decide that this particular plate was nearer three-sixteenths than one-fourth of an inch. For a plate in that position one-fourth of an inch is accepted by Lloyds' Surveyor as quite safe. The evidence is perhaps somewhat slender to support the assertion that the plates in the upper structure of the vessel were below the standard of safety.

6. The conclusion of the Court regarding those responsible for the vessel's equipment is that she "was supplied with all needful stores and material, and that the owners and agents did not on any occasion exhibit the slightest reluctance to comply with any reasonable request for repairs or stores made upon them by the Chief Engineer or Captain." The Government is therefore now mainly concerned with the second part of the enquiry.

7. The points which call for notice are—

- (1) The Police and Sanitary arrangements connected with the passenger traffic;
- (2) The system of survey of Native passenger vessels; and
- (3) The system under which meteorological observations at selected points in and on the coast of the Bay of Bengal are communicated and published to the shipping.

8. (1) *Police and Sanitary Arrangements.*—The number of passengers which “Native Passenger Ships” are authorized to carry on short voyages is regulated by section 18 of Act X of 1887. This number was for the *Sir John Lawrence*, in seasons of fair weather, 735. The Police Corporal states that the full number was carried on her last voyage. It appears, however, from the evidence of Mr. Mackenzie, the representative of the firm of Agents, that a considerable number of these passengers cannot have held tickets. On this point the Court make the following observations:—“Mr. Mackenzie tells us that the sale of tickets to passengers for the *Sir John Lawrence* on the occasion of her last voyage began at Rs. 3 and gradually rose to Rs. 6. He also informs us that his firm sold 710 tickets for that voyage: of these some 30 or 40 passengers went by the *Mahratta*. He also tells us that he refunded money on 21 of these tickets after the vessel had started. It is therefore obvious that the *Sir John Lawrence* started that morning with only 669 passengers holding tickets. The police, however, tell us that the *Sir John Lawrence* left with her full complement—735 all told. It must therefore follow with mathematical certainty that there were at least 66 passengers on board who had no tickets.” The Court here appear to have misapprehended Mr. Mackenzie’s evidence. Mr. Mackenzie says that he sold 731 tickets and gave refunds on 21 of these, leaving 710 passengers still holding tickets. Of these 30 or 40 went by the *Mahratta*, and the remaining 670 or 680 by the *Sir John Lawrence*. The number of passengers on board without tickets would, therefore, on the theory that the full number of 735 was carried, be between 55 and 65.

Baboo Chandra Kumar Bhattacharjee states that he, with a party of 20 persons holding tickets, was refused admission to the vessel at 9 or 9-30 P.M. on the night before she started. The Court have not correctly described this gentleman’s evidence as “quite uncontradicted.” The Corporal denies that any one was turned away before 3 A.M., though he states that eight or ten boats full of passengers were then compelled to return to the shore. There can, however, be no doubt that Baboo Chandra Kumar Bhattacharjee’s statement should be accepted, and it is a reasonable inference that he was refused admission because there was no space available. The aggregate fares to be collected on board from the passengers who would thus appear to have been received without tickets would, at the rate of Rs. 6, the price to which the tickets had risen in the evening, amount to between Rs. 330 to Rs. 390, not to Rs. 396 as stated by the Court. Mr. Currie, on behalf of the Agents, states that the “deck collections” paid in by the Captain on his return from Chandbally only occasionally amounted to as much as Rs. 100. The Court remark on the “ominous contrast” between these figures, and appear to draw the conclusion that the Captain carried a larger number of passengers than was authorized, and that he appropriated a portion of the profit. They seem to have overlooked the special circumstances of the occasion both in regard to numbers and in regard to price. Mr. Currie says: “The morning of the 25th May was the first big rush of the season.” And it would appear that the increase in the price of the tickets from the ordinary rate of Rs. 2 to Rs. 6 was quite exceptional and was the result of this pressure. He also says:—“In competition times the deck collections were infinitesimal, because passengers could get tickets for 4 annas, and they could not go on board without them, when they would have to pay Rs. 2;” and it is in evidence that competition, *i.e.*, the competition of steamers for passengers, had ceased before the occasion in question. In the Lieutenant-Governor’s opinion these considerations leave open to doubt the inference which the Court would apparently draw from the contrast between the deck collections habitually paid in by Captain Irvine and the amount which he may be supposed to have collected on this particular trip; the more so as such an inference would be distinctly at variance with the evidence which has been offered of Captain Irvine’s character and of the estimation in which he was held by his employers and his friends.

Similarly the Lieutenant Governor finds the view of the Court that the *Sir John Lawrence* carried on her last voyage a number of passengers which exceeded the legal limit to be based rather on an inference of what was *a priori* probable than on actual evidence; but he admits the *a priori* probability of the view. Quite enough has certainly been shown to prove that the police arrangements for the control of this traffic, both at Calcutta and at Chandbally, and both on the departure and arrival of the vessels, are most unsatisfactory, and that facilities are offered for disregarding the requirements of the law. As regards counting on arrival in Calcutta, there is a distinct conflict between the evidence of Captain Moore and that of Superintendent Robertson. The Commissioner of Police, Calcutta, and the Commissioner of Orissa, have been asked to report fully upon the whole subject with a view to the early introduction of more stringent regulations.

The Court are of opinion that in no case should passenger space have been permitted between decks on the *Sir John Lawrence*. The reason given is that the ventilation was imperfect. The Lieutenant-Governor does not fully understand the recommendation, as the provision of this accommodation is recognized in the law. The Health Officer of the Port will be required to report generally on the sanitary arrangements of the vessels plying to Chandbally.

It is stated in the evidence of Mr. Augier, late Customs Officer at Chandbally, that no reports of deaths which occur on the voyage are made to the authorities at the port of arrival. Under section 21 of Act VIII of 1876 (section 20 of Act X of 1887) the Port Officers were, by notification of 5th October 1877, appointed to receive such reports. Orders will now be issued to ensure that the penal provisions of section 34 of the present Act are strictly enforced in case of default by the commanders.

9. 2) *Surveys*.—The Court observe that “the requirements of the law as they obtained on the date when the *Sir John Lawrence* foundered at sea are to be found in the *Inland Steam-vessels’ Act* of 1884, the *Indian Steam-ships’ Act* of the same year, the *Native Passenger Act* of 1876, and in the *Indian License Act Amendment Act* of 1880.” They proceed to state that they are not aware whether the officer to whom the duty of delivering certificates under Act VII (*Indian Steam-ships’ Act*) is assigned is the Vice-Chairman of the Port Commissioners or the Port Officer. After remarking that they are informed by Mr. Bushby that the officer authorized by the Local Government “under the *Native Passenger Act* of 1876” to receive from masters, owners, or agents notice of an intention to carry Native passengers “happens to be the Port Officer, Captain Stiffe,” they proceed: “The conclusions we draw from this exposition of the law as it existed at the time is that at any rate so far back as the year 1884 it was the intention of the Legislature that there should be two separate and distinct surveys made in the case of steam-ships which at the same time happened to be Native passenger steam-ships—one conducted by a Surveyor under the direct control of the Port Commissioners, and the other conducted by Surveyors (not one surveyor, as in the former case, for which the Port Officer is directly responsible.” And they animadvert on the action of the Port Officer in accepting for the purposes of Certificate A under “the Act of 1876” materials furnished to him by the Port Commissioners’ office, “and apparently taken from the declaration made by their Surveyor after his survey held under one or other of the Steam-ship Acts of 1884.”

The reference to the “*Inland Steam-vessels’ Act*, 1884,” is unnecessary, as that Act could not apply to the *Sir John Lawrence*, which was not “a steam-vessel which ordinarily plies on inland water.” The Vice-Chairman of the Port Commissioners was appointed under Notification dated 6th July 1886 to be the officer to deliver certificates under section 13 of Act VII of 1884, and the Port Officer was appointed under Resolution dated 7th September 1877 to be the officer authorized under section 7 of Act VIII of 1876 (section 7 of Act X of 1887) to receive notices that ships are to carry Native passengers. Two surveys are not required under Act VII of 1884 and Act X of 1887 (Act VIII of 1876). Every steam-ship, with the exceptions noted in section 5, is required to obtain a certificate of survey under Act VII of 1884; and, under sections 13 and 14 of Act X of 1887 (sections 13 and 14 of Act VIII of 1876), such a certificate, if it is in force and if it states, as such certificates must practically state, “that the ship is seaworthy and properly equipped, fitted and ventilated, and the

number of passengers that she is capable of carrying." takes the place of Certificate A under that Act, unless the Port Officer considers that the certificate has, from any cause, become invalid after its issue. It was in view of these considerations that Government issued the orders dated 16th January 1884, to which the Court refer.

The only questions for consideration, therefore, are (a) the system under which and the manner in which surveys are performed and certificates granted by the Port Commissioners and their officers under Act VII of 1884, and (b) the manner in which Certificates B are prepared by the Port Officer under Act X of 1887.

10. The Court remark upon the circumstance, disclosed in the evidence, that Mr. John MacKellar makes independent surveys of vessels, both as Engineer-Surveyor and as Ship Surveyor. It would appear that Mr. MacKellar was appointed to be Assistant Engineer-Surveyor to the Port Commissioners in accordance with the sanction conveyed in Government order No. 2707T—G, dated 23rd October 1884. He was not, however, gazetted to exercise the powers of a Surveyor. In June 1885 the Port Commissioners decided to grant three months' leave to Mr. Bushby, their Engineer-Surveyor; and in their letter No. 854, dated 25th June 1885, they asked that Mr. John MacKellar "should be gazetted to enable him to perform so much of Mr. Bushby's duties as relate to the entire survey of inland steamers and the survey of the engines and boilers of ocean-going steamers." In the Notification published in the Gazette Mr. MacKellar was by inadvertence appointed "Surveyor of steam-vessels in the Port of Calcutta under Acts V of 1862 and I (B.C.) of 1868, and of steam-vessels under Act VIII of 1876," without any proper limitation either as to the duties to be performed or as to the period for which they were to be performed; but the Government letter referred fully to the limitations. It is apparently under this Notification that he has continued to exercise independent powers since Mr. Bushby's return. The Port Commissioners will be asked to submit a report on the full and permanent exercise by Mr. John MacKellar of powers which, as the correspondence with Government shows, it was only intended that he should exercise partially and as a temporary expedient.

11. As regards the payment of Rs. 1,000 to Mr. Bushby by Messrs. Macneill and Company, for professional advice given by him in regard to the alterations required in the hull of the *Sir John Lawrence*, the Lieutenant-Governor must abstain from passing any orders till he has received the explanation of Mr. Bushby, which the Port Commissioners will be desired to submit. The Lieutenant Governor observes, however, that though the Court sat for two days after Mr. Mackenzie's evidence on this point had been taken, they did not recall and examine Mr. Bushby on his action. Such an examination might have enabled them to express a matured opinion on the transaction with a full knowledge of the surrounding circumstances.

12. It has already been observed that under the provisions of sections 13 and 14 of Act X of 1887 (sections 13 and 14 of Act VIII of 1876), a certificate under Act VII of 1884 takes the place, in ordinary circumstances, of certificate A. For certificate B, however, the responsibility rests entirely with the Port Officer. Captain Stiffe states that he makes the survey personally for the purpose of this certificate when the vessel concerned is about to start on a long voyage. As regards ships going on short voyages, he sometimes goes on board. As a rule, however, it appears that, on a declaration being submitted by the Agents that the requirements of the law have been complied with, a certificate in his name is issued by his Chief Clerk. The Lieutenant-Governor cannot consider that this lax system of procedure is a sufficient compliance with the requirements of the law. If Captain Stiffe found it impossible to inspect personally every steamer starting for Chandbally to ascertain if the necessary provision of fuel, water and the like had been made, he should have represented the matter to Government; but he should certainly not have allowed a formality prescribed by the law to degenerate into a mechanical device.

13. (3) *Meteorological Observations and Storm Signals*.—The fifth conclusion of the Court relates to the storm signals, and on this they submit their recommendations that the Storm Signal Code can be amended with advantage; that cable communication should be established between the Andamans and

the main land; and that the cable already in existence between Diamond Island and Bassein should be overhauled and placed in a state of thorough repair.

14. These three questions have been recently under the consideration of Government, and on the day following that on which Mr. Pedler gave his evidence, a revised code of storm signals was published in the *Calcutta Gazette*, on the recommendation of the Meteorological Reporter, the Port Officer and the Port Commissioners, amending and simplifying the former Code, and bringing into force in the port of Calcutta the system of signals used for the river approaches to the port. Mr. Pedler in his evidence observes that it might be desirable to have one or two more general signals, and the subject will be further considered with reference to this question. The recommendation of the Court is that a new signal should be added to the Code, which, irrespective of the nature and probable position of an approaching cyclone, should, when hoisted, serve as an imperative prohibition to any ship, whatever her draft or size, from going to sea. When the Code of Storm Signals was originally drawn up, it was at first proposed to issue as prohibitions the warnings which were finally added to each signal. A correspondence on this subject took place between Government and the Chamber of Commerce, and it was ultimately decided that only warnings, and not prohibitions, should be issued. The Lieutenant-Governor has carefully considered the subject in the light thrown on it by the evidence in the present case, and especially by the evidence of the Commander of the *Tyrone*, one of the passenger steamers plying between Calcutta and Chandbally. Captain Spence says: "I considered the conduct of the Captain a little rash on the ground that he had a large number of passengers on board, and however well the ship itself would weather the storm, the passengers might be put not only to inconvenience, but be knocked about and even killed." This evidence, coming as it does from the Commander of one of these steamers is entitled to much weight, and it shows that in some cases the Captain may safely put to sea so far as the steamer is concerned, but not so far as the passengers are concerned. The Lieutenant-Governor has directed, therefore, that the subject should be reconsidered and that the opinions of the Port Commissioners, the Chamber of Commerce, the Port Officer, the Commissioner of Police, Calcutta, and the Commissioners of Chittagong and Orissa should be obtained on this question. Should it be found desirable to introduce penal provisions, a change in the law would be necessary.

15. The question of establishing cable communication between the Andamans and the main land has been fully considered. The Government of India is fully alive to the importance of this; but hitherto financial considerations have not admitted of any action in this direction. The recommendation of the Court will, however, again be brought to the notice of the Government of India.

16. The Court consider that the cable already in existence between Diamond Island and Bassein should be overhauled and placed in a state of thorough repair. The repeated interruption of communications with Diamond Harbour at the most critical times is a very important question and affects every port which benefits by the storm warnings from Calcutta. It has been ascertained, however, that these interruptions have been due, not to any injury to the submarine cable, but to rupture of connection on land caused by the fall of trees in the forest through which the line passes. This question is at present the subject of a correspondence between this Government and the Government of India.

17. The acknowledgments of the Government are due to the Court for their careful and laborious investigation of this case, which extended over 27 days, and was carried out in the face of great difficulties.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Government of Bengal.

Proceedings of a Marine Court of Enquiry held under Section 7 of Act V of 1883 (The Indian Merchant Shipping Act), at the instance of the Government of Bengal, to investigate all the circumstances connected with the loss of the S.S. "Sir John Lawrence" in the Bay of Bengal on the 25th May 1887.

PORT OFFICE, CALCUTTA, THE 11TH JULY 1887.

PRESENT :

C. H. REILLY, Esq., Chief Presidency Magistrate ... President.

CAPTAIN H. DESMIDT, Marine Surveyor ...

E. TRELAWNY, Esq., Superintendent, Peninsular and Oriental Steam Navigation Company ... } Members.

MR. G. C. KILBY, Deputy Legal Remembrancer, appears to conduct the enquiry on behalf of Government.

MR. ORR, Attorney-at-Law, appeared on behalf of Messrs. Macneill & Co.

Roxborough Spence sworn, saith to Mr. Kilby.—I am in command of the *Tyrone*. She is a native passenger steamer which plies between Calcutta and Chandbally. I went down the river with my steamer on Wednesday, the 25th May, the day of the cyclone. I anchored at Kedgeroe. I did so because the weather was threatening and the storm signals were up. I first saw the storm signals at half-past 10 a.m. when at Mud Point. The signals were visible from Kedgeroe for half an hour after I anchored there. After that time the weather became thick, and then I could not see them. The *Curlew* followed me, and anchored about ten minutes after I did at Kedgeroe. I anchored about 11 o'clock. The warning signals were then still visible with a powerful glass. No. 8 signal was hauled up; it indicated that a small cyclone, such as is usual in the rains, was passing to the westward of Saugor. There are several other signals which indicate severer cyclones. The *Sir John Lawrence* passed us at 1 p.m. while we were anchored. She must have come past Mud Point; it may have been too thick for the Master to have seen them when he passed Mud Point. When the *Sir John Lawrence* passed me the weather was very threatening, the wind was from the north-east increasing. I have been a number of years on this river, since 1871 in command. Before that time I was in command of the *Night Hawk* for a year. I have been in country vessels trading out of Calcutta since 1864. I have been in two or three cyclones. When the *Sir John Lawrence* passed me, the weather in my opinion indicated that a cyclone was coming up. The *Sir John Lawrence* passed us between a quarter and a half mile off. The river was smooth. The river gave us no indication what the sea was like outside. When storm signal No 8 is up it is optional for vessels of light draughts to go to sea. The directions say that only light vessels can go to sea. The signal was an inverted cone over a ball. I did not signal the *Sir John Lawrence*. After the *Sir John Lawrence* passed, the squalls increased gradually in strength from the north-east, and the barometer fell steadily until 4 a.m. in the morning, the 26th May, 29.34; it fell from 11 a.m. on the 25th from 29.60 to 29.34 at 4 a.m. on the 26th May. The wind from 8 p.m. on the 25th gradually hauled south-east through east in very heavy squalls. At 4 a.m. the wind went still more to the southward, and the barometer began to rise again a little. The wind increased in force from that till noon, when the barometer registered 29.45. From noon hauled to S. S.-W. and gradually abated. I remained at anchor till the morning of the 27th, and I then got underweigh at 6 a.m. and proceeded on my voyage, reached at eleven that night. We had a very heavy sea in the Western channel; much smoother to the westward. I had no reason to suppose that *Sir John Lawrence* would founder judging from the specimen of the weather we experienced, but we were not in the centre of the storm. I thought she would have drifted down the coast, so hardly expected to find her at Chandbally. I saw no wreckage on my way to Chandbally or on my way back. The following week I passed a few dead bodies, three altogether, in the Western Channel. The following week they had turned white. I imagine they were natives. The *Sir John Lawrence* has not been heard of since. I do not think there is a doubt that she foundered in that cyclone. I have always believed the *Sir John Lawrence* to be a good sea-boat: she has a ways proved herself to be so. I have been on board her several times. I believe the *Sir John Lawrence* was well fitted, and found, so far as I could see, this was so. In foul weather season we carry 886 passengers. The tickets to passengers are sold at the office of various companies to whom the steamers belong. No one on board sells tickets or on vessels; tickets are not supplied us for that purpose. If the full complement of tickets has not been sold at the office, we take in passengers who pay their money on board. We receive instructions directly the full complement of tickets has been issued. I know of no instance where an application has been made by a passenger without a ticket for a passage before we receive intimation as to the sale of the tickets at the office. We do not usually, indeed very seldom, get our full complement of passengers. We generally receive a notice in the evening from the office as to the number of tickets sold, about 5 o'clock. After 5 or 6 o'clock no more tickets are sold at the office. If any one comes for a passage after that time we take the money on board and receive him as a

passenger. We take our passengers in after our cargo. It so happens that we usually begin taking in our passengers at 8. p. m., it may be a bit earlier sometimes; it all depends on the time when we have finished taking in cargo. I have never taken* a passenger on board the *Tyrone* without a ticket during the time when the office is open. The police invariably count every passenger on board before we start.

*Witness substitutes "I do not remember to have taken" for the words "I have never taken."

The police count the passengers as they come up to the gangway. The passengers are counted by the police, so it would be impossible for a Master to carry more than the authorised amount of passengers without the police knowing it. It did once happen some years ago that I carried more than my authorised number of coolies. I was heavily fined for doing so. The police counted out 60 more at Chandbally. I was fined Rs 990. I do not remember the Captain of the *Sir John Lawrence* being fined for carrying excess passengers.

To the President—I saw no storm signals at Diamond Harbour. I passed Diamond Harbour at 8-30 a. m. If I had proceeded on my voyage on the 25th, I should have expected to see signals at Saugor. The *Sir John Lawrence* ought to have been near enough to have seen the storm signals on that day at Saugor at quarter past 2. Taking the ordinary course down the western channel, the *Sir John Lawrence* would have been 8 miles distant from the signal station at Saugor. In my opinion the weather was too thick to permit the *Sir John Lawrence* to see the storm signal hoisted at Saugor. According to my calculation the *Sir John Lawrence* must have been passing the signal station at Mud Point about half-past 1. She would have passed them about 4 to 5 miles off. I think it is quite possible that the Master of the *Sir John Lawrence* did not see the storm signals at Mud Point. I had made up my mind before I saw the storm signals at Mud Point that I would anchor at Kedgerce, and I should have done this, whether the storm signals were up or not. I had made up my mind to do this before I had got to Fisherman's point. When I saw the *Sir John Lawrence* continuing her voyage on the 25th, I did think the conduct of the Captain was a little rash and that wholly unconnected with the fact whether the Captain of the *Sir John Lawrence* saw the storm signals or not. I thought the conduct of the Captain a little rash on the ground that he had a large number of passengers on board, and however well the ship itself would weather the storm the passengers might be put not only to inconvenience, but be knocked about and even killed. Though I did not think the vessel would founder. I thought it would be put to a severe strain which would do her no good, and there was in my opinion no serious necessity for exposing the ship or the passengers to those risks. In my opinion up to half-past 11 when I saw the last of the storm signal, I thought No. 8 was the most appropriate signal which could be hoisted to indicate the state of the weather at that time. On one occasion last year I went out to sea when storm signal No. 7 was hoisted at Saugor. I should not in any case have gone out to sea if I saw No. 8 signal hoisted. If I had been in command of the *Sir John Lawrence* on the morning of the 25th May, I should not have gone to sea whatever had been the nature of the cargo and passengers I carried. The *Sir John Lawrence* was in light trim. I could see this when she passed us that morning. The counting of the passengers on board a ship is done by a native jamadar and a constable crew. The police boat stays alongside till we start. The police invariably count the passengers out at Chandbally. This precaution is very strictly carried out. I had some conversation with the Captain of the *Curlew* at Mud Point. We made up our minds to go back to Diamond Harbour if the storm signals were up. This was before I saw the storm signal at Mud Point. Half an hour after we saw the storm signal, the *Curlew* turned round with the intention of going back. I kept on with the intention of making Kedgerce, No. 8 being hoisted. I thought I should be perfectly safe there; the *Curlew* afterwards followed me.

To Captain deSmidt—I don't know the draught of water the *Sir John Lawrence* drew. On the 25th May the *Sir John Lawrence* did not appear crank, she had a jib and two trysails set. She had her awnings spread over the upper deck. Her decks did not look overcrowded. She seemed to have the usual complement of passengers on board. The *Sir John Lawrence* had an open deck with a rail round it; the only protection against a sea breaking over the open deck would be the rail and nettings. She had an open deck and main deck as far as I know.

To Mr. Frearney.—There was no rivalry at that time between the different companies carrying native passengers to Chandbally. There is no inducement held out to Captain to make "smart" passages irrespective of weather.

To Mr. Orr.—I knew the Chief Officer of the *Sir John Lawrence*, Mr. Smith; he was about three years in the Chandbally trade. Immediately before, he was in charge of a tug boat. I consider him a man experienced in navigating a vessel at the Sandheads and the Bay of Bengal. The name of the Captain was Peter Irvine. We had a 'tween-deck; the passengers were on deck and 'tween-decks. We did not batten down hatches. I remember the *Sir John Lawrence* being in one cyclone before in 1874—in October 1874. The 1874 was a more extensive cyclone. Captain Baldwin was in command of the *Sir John Lawrence*. Peter Irvine was the Chief Mate I believe. The *Sir John Lawrence* was missing for some days, but came out of it with the loss of her boats.

Re-examination.—I do not think any lives were lost on the *Sir John Lawrence* in the cyclone of 1874.

The 11th July 1887.

R. SPENCE.

William Henry Neustein, sworn, saith to Mr. Kirby.—I was Chief Officer on board the *Sir John Lawrence* for over 13 months. I left that service on the 25th October 1886. On

the 28th of October 1886 I sent in a letter addressed to the Lieutenant-Governor of Bengal, put in and marked B. The letters attached to B are --

- (1).—Letter addressed by me to the Health Officer.
- (2).—Letter addressed by me to Assistant Government Surveyor.
- (3).—Letter addressed by me to Port Officer.
- (4).—List of repairs I was ordered to make out by the Captain in order to instruct Messrs. Maeneil & Co. what repairs were necessary at the coming docking of the vessel.

I wrote another letter to His Honour the Lieutenant-Governor of Bengal, dated 4th June 1887, after the loss of the *Sir John Lawrence*. With it I enclosed two copies of letters previously sent in, viz. to the Port Officer and the Assistant Government Surveyor, put in and marked (C).

I consider the state of the windlass on board of the *Sir John Lawrence* as contributing to the general unseaworthiness of the vessel. I last saw the windlass on the evening of the 25th October 1886. The starboard side of the gipsy had worn itself some three quarters of an inch with the wooden bits which supported the spindle. In consequence the windlass would not go round, and you could not get up chain or use the starboard anchor. The metal casting which supported the spindle in the centre was also broken, and the whole body of the windlass forced over to starboard. On or about the same date, on attempting to moor the ship at the Salt Golahs, we were compelled to take all the chain up from the port side, as it was impossible to use the starboard chain. Mr. Mathewson, the Harbour-Master in charge of the vessel at the time, tried all he could to make the starboard side of the windlass work, and failed to do so. The Harbour-Master said it was a fiscally condition for a vessel to be in just after survey. It was a double windlass working on a screw, working on a diagonal cog-wheel. This is the most serious charge I have to bring against the owners of *Sir John Lawrence*. I next wish to say something of the state of the scuppers. The leaden pipe was just flanged out over the iron plate, and had no iron lip-guards to clamp them to the side. These were in existence when the ship was new. They had long since been knocked away. If necessary when the ship was new, they were a great deal more necessary as the ship grew older. The ship had three decks: I am speaking of the main deck. The bolts of the lip guards were left in the side; in some cases broken off half through the plate; hence the leaden pipe might be forced in at any moment by the sea, as it was repeatedly pushed in by boat-hooks used against it in port. These leaden pipes led into the hold. There were holes in one of them

* Witness adds, as far as I can remember. at the time of the survey. There were four leaden pipes on each side.* In a rough sea, the state of these leaden pipes constituted in my opinion, a great danger to the ship. On occasions I had to build them up with cement: it was an easy matter to mend those.

Witness substitutes "gumds" from a pattern I had made. Nothing was done in my time beyond casting one of the pipes. The next thing is the state of the pumps. There

was a survey of the vessel held shortly after. I joined about the first week in September 1885. In order to try the pumps, water was poured down them. The after-pump worked fairly well: the forward pump the water ran through as fast as you poured it in. Subsequently I discovered that the pipes had never been connected with the pumps. They were laying over the beams bent and dented in. About the end of March 1883† the *Sir John Lawrence* was supposed to have undergone thorough repair. Before that, for about a twelve‡ month she lay at the buoys doing nothing. Before

† Witness adds or 1884.

‡ Witness substitutes "thirteen."

these repairs were effected, the pumps had three connections--one to each bilge, and one to the sea; the latter to be utilized for the purpose of washing deck, or on the occasion of a fire. After the ship's repairs were completed, I discovered that the connection with the two bilges and the sea were done away with; one single pipe to the centre of the vessel substituted instead. The pumps bore on to the main deck. There are no connections at all with the forehold pump; the pipes had never been attached. Under these circumstances, the vessel could only be pumped out when she was on even keel, and that by the after-pump only. Subsequently the forward pump was connected. The forward pump was before the engine-room; the after-pump abaft the engine-room. The *Sir John Lawrence* collided with the *Indore* shortly before I joined, or about September 1885, and had a hole knocked in her starboard bow between wind and water. The patch, which was irregular in shape, was about two feet square; an iron patch. The plating to which patch was rivetted was too thin to support the patch. I learnt this from the engineers employed who assisted us in putting on the patch (identifies Mr. Leech). I saw the *Sir John Lawrence* shortly before she foundered on her last voyage. At that time I noticed the patch; this was about three months before she foundered. I saw the patch still on and the lip-guards unrepaired. The proper way to repair the damaged plate would have been to remove the plate and put a new one. Had one plate been pulled out, it would have been necessary to pull out 10 plates, the ship was so old.

The 11th July 1887.—Court adjourned till to-morrow.

W. H. NEUSTEIN.

C. H. REILY.

The 12th July 1887.—Examination continued.—On or about the 25th of October 1886 when the last survey was held the *Sir John Lawrence* lost a boat in the collision with the *Indore*. It was replaced by another good boat until the day when we passed the survey

when it was removed shortly after and an utterly useless boat was sent by Mr. Young's orders alongside. This boat was leaking so badly, we had to hoist up one end to get the water out. All subsequent efforts to make it water-tight failed, and on attempting to land passengers by this leaky boat, it filled alongside, and this boat passed two subsequent surveys in that condition. The last of these two surveys was on the 28th October 1886. The collision was about three months or so before I joined, which was in September 1885. Six or eight months before I left the *Sir John Lawrence* she grounded on the shoal at the entrance to the river Dhamrah. We were on shore four or five days. Some of the passengers were landed by the ship's boats. We had over a thousand passengers on board. It was on this occasion that the bad boat sank alongside. It would have gone to the bottom but for the tackle to which it was attached. The boat was the cutter. We had two life-boats. They were both in good order, also the jolly-boat. The passengers became clamorous and threatened my life. They wanted to be put on shore. We put some of them on shore. In the same collision the bowsprit was carried away—the end of the bowsprit, and with it the band, bobstay, and bowsprit shrouds. These were never replaced. It is impossible for any ship which carries a bowsprit to be equipped properly without these fittings. There was a bowsprit, without band, bobstay and bowsprit shrouds. The span was bent up on the edge of the bow-plate without any support below. The bobstay is the key and support to all masts, more especially the raking masts of a steamer which, like the *Sir John Lawrence*, depends so much on sail. The removal of iron bulkhead took place, I believe because I could see marks where these bulkheads had been fixed, and the bulkhead had disappeared when I was on board. I mean bulkhead between the stokehole and the engine-room, not an entire bulkhead, because it has a passage to the stoke-hole through it. As a matter of fact, the steamer has a collision bulkhead, a bulkhead before the stoke-hole, another one abaft the engine-room, and a small collision bulkhead aft. There are no rudder braces. There had been rudder braces previously. I know this because of the shackle and the places still existed where they were braced up. These were the more necessary, because the rudder head was old and worn in the trunk gearing and the pintles were old, patched up, and might have been carried away at any moment. I am speaking of the after-part of the rudder. By braces I mean the stays on the after-part of the rudder. The inner keelson in the wake of the hatchways, the angle-irons on both sides have been long since knocked off. I heard the surveyor remark this. The rails round the vessel on the upper deck, which were meant to protect passengers in case of heavy rolling, was so ill-supported, it was not safe to lean against them in the wake of the gangway; the covering board with which the stanchions were fixed were so rotten that the screws would not hold. On one occasion a cow rolled overboard through the rails carrying away the stanchion. There is no wire-netting on the rail: it was a rotten rope-netting. The windlass has been gradually getting worse through a period of eight months before the last survey I witnessed on board. It passed two surveys in this condition. About five months before I left we were in a cyclonic storm fifteen miles to the northward of Chandbally. We anchored in about eight fathoms water and dragged to about five fathoms till we were almost in the breakers, because I could not use the starboard anchor because the chain would not revolve round the windlass. I ordered steam at 2 o'clock, and had the wind not shifted we should all have been lost. There were a large number of native passengers on board; many of these passengers were knocked about. I was in hospital myself for a fortnight after, through illness brought about by exposure and anxiety. I understood, when the Harbour-Master took charge of the ship, that the survey had been completed. I believe it was Mr. Bushby who tried the pumps on the occasion when water was

* Witness adds assisted by Mr. McKellar.

surveyed the vessel. It was said at the time you cannot get water out of the ship when there is none in it. The surveyor was satisfied with the experiment and nothing was done. The pump-hoses were afterwards taken ashore and repaired, and the pipe was connected below. When I was on board the *Sir John Lawrence*, I frequently thought she would roll over. I considered her a lively ship, top heavy. I never was in a ship which rolled so much. This was in my opinion owing to extra deck and house added. I could see that a deck had recently been added. I always felt nervous when the steamer was driving into a heavy sea. I do not think her hull was in a safe condition. The Captain (Irvine) ordered me not to go near the surveyor. Mr. Young said to me I will get you sacked, you know too much about the ship. Mr. Young is the Superintending Engineer of Macneill and Company. I was dismissed by a letter dated the 23rd October. It was not, however, given to me till after the survey at 10 o'clock on the night of the 25th. I saw three surveys made while I was on the steamer. The deck survey was made by Mr. Bushby.*

* Witness adds Mr. Bushby assisted by.

Mr. McKellar did the engine-room survey as assistant to Mr. Bushby. The second survey was carried out exactly in a similar way. In the last survey Mr. Bushby did the hull and part of the deck survey on the 24th October the steamer being in dock, and when the steamer came out of dock the next day† Mr. McKellar finished the deck survey. He then went into the engine-room. During the whole of the thirteen months I never saw Mr. Bushby below the hatches.‡ He went out of the engine-room. I put lamp rockets, life-buoys, buckets, fire-engine and hose, and appliances of a similar kind, which he looked at. He had the boats lowered to the rail, so that he could look into them. He went round the deck, then went on the main deck, looked down the hatches. He never went below the main deck hatches

† Of the main deck in the Nautical Department.

‡ Witness adds in correction "the same day."

He then went down into the engine-room. I did not follow him there. This survey occupied ten or fifteen minutes. When the ship was in dock Mr. Bushby walked round the deck and examined the outside of the ship. On the first occasion the chains were got out. The chains were not surveyed in the last survey in dock. On the third survey I was not permitted to accompany the surveyor; so I do not know whether the state of the windlass was pointed out to him. Captain Irvine attended to the passenger business entirely himself. I was told not to take part in the matter. The passengers began to drop alongside in boats from about 3 p.m., and at Poojah times there were several hundreds on board by 5 p.m. In fine weather, on those days, the *Sir John Lawrence* was entitled to carry 1,038 exclusive of crew. During Poojah times the deck was so crowded at 4 p.m. it was difficult to move about or clear a space opposite the hatchway to allow the cargo to be taken in. About 5 p.m. a large boat used to come alongside the gangway and a police boat lay alongside the boat, but often when they arrived there were many passengers on board. The Captain had a staff of old hands who were used to his way of doing business, with whom I was requested not to interfere. One man nominally stood at the gangway and was supposed to tally the men on board, but since passengers were taken in at all the ports where the dinghy might happen to come and by tipping the lascars the passengers were allowed to come in through the port. Nominally an order was given to the ghat serang not to allow passengers to come aboard till a stated time, generally 6 or 7 p.m. There were generally thirty or forty boats moored to the buoys and hanging about the ship. The passengers on these boats were, after bribing the lascars, permitted to get on board through the ports. The passengers continued to come on board during the whole of the night; tickets were not looked at. No one was prevented from coming on board. If 730 tickets were sold, that number would probably represent two-thirds of the passengers actually on board. The Captain used to collect the tickets after the ship had gone down the river. He went round the vessel with an attendant called a *panneewalla*. Those who had not tickets had to pay. Invariably the number of tickets sold was no criterion whatsoever of the number of passengers who actually travelled. The police boat was there, but I never saw the police attempt to count the passengers. The police boat stayed alongside pretty late. As far as I know the whole arrangement of the passenger traffic on board the vessel was left to the Captain. On Poojah days the crowd of passengers are so dense on the steamers, I could not walk along the deck without treading upon them, and had to walk on the rail holding by the awning and so get on to the bridge. The crowd was composed of men, women, and children, the majority were women. In process of time the deck became a seething mass of humanity and filth. I consider this crowd on board did endanger the safety of the steamer, so that it completely hampered the crew on the upper deck in carrying out the orders of the Captain and officers in dirty weather. When the steamer reached Chandbally, she was supposed to moor herself opposite a landing stage. A constable would come on board with a board and a piece of chalk, but it was absolutely impossible to count the living stream of passengers as they rushed by, so the counting was a farce. When the excess number was very palpable, a number was concealed about the cabin and saloon and let out after the policeman had gone. Sometimes we struck on a sand bank, and then there was no attempt at counting the passengers. They landed as they could. On Poojah days I should say we carried between thirteen to fourteen hundred passengers. The steamers on these occasions are properly full; completely full. The free board of the steamer, if she was deeply laden, say up to 13 feet 5 inches, would be about 3 feet from the main deck to the water. In heavy weather the water broke over the steamer. The after-part of the main deck was quite unprotected at the sides. I have seen half a dozen bodies thrown overboard between Diamond Harbour and Garden House Point.

To Captain deSmidt.—I cannot tell you how much dead weight we required to go to sea. We sometimes carried about 30 tons of cargo. Six hundred maunds of coal took us to Chandbally and back. Our draught aft, when run light, was 10 feet 6 inches to 11 feet. The screw was fairly under the water. If we broke down we had sufficient sail to take us into port. With a propeller disconnected, she might have gone two knots in the hour. On a favourable trip we get to Chandbally steaming twenty hours. Two four-hundred gallon tanks with water were carried between-decks. The *Sir John Lawrence* has a Master and the Mate. I believe Captain Irvine had a Master's certificate. I say it is impossible for one man, the Captain, to do Harbour-Master, Pilot, and Captain's work alone. The Captain of the *Sir John Lawrence* had so much to do that I have seen him frequently asleep on the bridge on the most dangerous parts of the river, crossing the James and Mary for instance. When the *Sir John Lawrence* was deep, she drew 13'4". I heard that the boilers had been renewed. Some parts of the engine were worn. I had a sextant and navigating instruments on board. There was a barometer and aneroid in the Captain's cabin. There were seven openings on the upper deck. It would be quite a guess, but I think the steamer had ten lascars, three seacunnies, a serang, a tindal, a plumb-walla, two topazes, a Chinese carpenter, a masalchee, two saloon boys, and the butler. We had not enough lascars to properly man four boats in case of accidents. No life rafts, but six life buoys on board. All the boats were hanging on davits.

W. II. NEUSTEIN.

Case adjourned till Tuesday, the 19th July at half-past 12 o'clock.

C. H. REILY.

Mr. Kilby for the Government.

Mr. Lal Mohun Ghose to watch the case on behalf of the relatives of Mr. O. C. Mullick and others, who are alleged to have been lost at sea.

William Henry Neustein recalled, to Mr. Kilby.—I never knew any European official come on board the *Sir John Lawrence* with the object of satisfying himself whether the vessel was overcrowded or not. I am speaking of the Calcutta end of the voyage. On the Chandbally end a European, a Mr. Augier, used to come on board, and was supposed to see that the police constables did count the passengers. I believe he did this spontaneously. I know Mr. Augier made a report to the Calcutta Police. After he sent in that report he was suspended.

To Mr Ghose.—Since the *Sir John Lawrence* was certified to carry passengers, a number of houses, cabins, and lockers were built on deck which encroached on the main deck curtailing passenger space. Two hundred superficial feet of space was encroached upon. As far as I know there were no deductions made in the number of passengers permitted to be carried by the vessel. There was no condenser on board in my time. There had been one before. I had no pilot's certificate. The Captain was the only man who had a Pilot's certificate, and therefore the Captain had to be on watch all the time we were on the river. The *Sir John Lawrence*, two* years before she came under the supervision of Mr. Young,

* Witness substitutes "some."
carried a Captain, 1st, 2nd, and 3rd Officers. She was not generally employed in the Chandbally trade at that time. There would be water enough on board for four days' consumption if the passengers consented to drink it. My letters to the Local Government, which are put in this enquiry, were not acknowledged any way. I was not prosecuted by Messrs. Macneill and Company for defamation. I have the best testimonials from Messrs Macneill and Company; also from the deceased Captain. His testimonials put in, marked (D) and (E). My letter of discharge was dated the 23rd October and handed to me not till 10 p.m. on the 25th October after the survey was over.

Cross-examination to Mr. Orr.—I should not be surprised to hear that an enquiry was ordered upon the receipt of my complaints, an enquiry by the persons implicated in my strictures. I never heard of any Government Resolution on the results of those enquiries. I should not be surprised to hear that Government made the remarks you allege them

+ Witness adds of those people implicated in the negligence.

to have made under the advice of the whole of the people implicated on the negligence I had commented upon. If it was a malicious libel, I am surprised I was not prosecuted at the time, for the vessel was then afloat to corroborate the truth of my statement. I hold a certificate of Master Mariner since 7th March 1874. I came out to this country in 1861, as an apprentice. I was Chief Officer of the *Gosforth* belonging to W. Smith of London, in 1873-74. I think I next went as Chief Officer in the *Abigail*, a brig. I cannot remember when I left the *Abigail*. I was afterwards in some steamers trading up the Baltic. I came to Bombay in 1878. I came as second officer in a steamer called the *Proponis* to Bombay. I came from England to Bombay. I left her in March 1878. I joined the British India Steam Navigation Company in March 1878. I went up the Persian Gulf; then carried troops to Malta. In April 1882, so far as I can remember, I left the service of the British India Company in London. I left of my own accord most emphatically. When I arrived in Calcutta I discovered that instructions had been sent to the Agents here that I was not to be employed again by the Company. I had previously received a legal discharge certifying to my good conduct and ability—a copy from the ship's log-book. I heard various reasons given for the refusal by the Company to employ me further. I was not aware that I lost six months' seniority while in the service of the British India General Steam Navigation Company in my grade as Chief Officer; my service in the British India Steam Navigation Company was one of constant promotion. I heard a rumour to the effect that I had lost six months' seniority. Before I heard this rumour there had been a sort of fracas between myself and the junior officer on board the *Henzada* at Rangoon or Moulmein. I have no official intimation of my loss of seniority conveyed to me. I left the *Henzada*. I was removed to the *Arabia* because I would not serve on board the *Henzada* without a rise in pay. Captain Flower was my Captain at the time. He told me I would not get an increase of pay for six months, because I had lost my seniority for that period. When I found myself standing in Calcutta without a farthing, I applied to the Agents of the British India Steam Navigation Company for employment. On my arrival at Madras I heard for the first time that I was dismissed. I received a letter from Captain Atkinson, the Marine Superintendent of the British India Steam Navigation Company at Madras. I can best describe its contents by saying it contained almost every possible slander you could address to a nautical man. None of these, however, had been entered in the official log-book. I did not make any attempt to vindicate my character because I was penniless.

Witness adds—I was about five months fitting out the S.S. *Arabia*, and was after this promoted to Chief Officer of the S.S. *Navarino* and proceeded to Europe. It was when I returned to India as a passenger in the S.S. *Merkara*, I found myself without a farthing.

Witness adds—Of sufficient importance to be entered in the official log-book.

A few days after I got employment in the Eastern Bengal Railway. I was a Flat Commander for about eight months. I then got command of a steamer on Rs. 300 a month. This was in 1884-85. I held that post for a year and six months, as far as I can remember. I had a number of engineers, one more obstreperous than the other—one in particular, whom I informed the Eastern Bengal Railway, if they sent with me, a collision between us must inevitably take place. In spite of my protest the man Gordon was sent on board. In 20 minutes I had to put him off duty, and as he refused to go into his cabin, I had to attempt to put him there. I was not dismissed till about seven months after this occurrence. This was some four or five months after the Government took over the Eastern Bengal Railway. I have, I think, applied for work since to the Eastern Bengal Railway. I next took a return ticket

* *Witness adds*—Acting as the surveyor did when he received my letter dated 28th October 1886.

in the P. & O. *Kaisar-i-Hind*. I was in England 20 days, and came back in the same vessel. On my return I was in hospital with a broken leg for some time. I had lots of money when I came back. I had better sense than to try and vindicate my character.* When I got well, I got the post of Chief Officer to the *Sir John Lawrence*. I believe I joined the *Sir John Lawrence* on the 1st September 1885. A few months after I joined the *Sir John Lawrence*, she went into dock. I do not think she was in dock more than two nights and a day. The *Sir John Lawrence* might have been in dock a week on that occasion. I have absolutely forgotten who were the surveyors on that occasion. With the exception of Mr. Bushby and Mr. McKellar, I have seen no other surveyor on board that I can remember. I was on that occasion in attendance upon the surveyors during the time they were investigating the deck department. I attempted to follow them when they continued their investigation on the outside of the vessel, but was told to go and look after a dog. I cannot tell you the name of the person who told me to look after the dog. Mr. Young was in attendance on the surveyors on this occasion, I believe. I remember well it was not Mr. Young; he was away in England at the time. To the best of my belief, Mr. Taylor is the man who accompanied the surveyor on that occasion. I am not quite certain whether the deck survey on that occasion was held when the ship was in dock; it may have been the next day. On that occasion I recollect many things which ought to have been done at the survey, but which were not done—the ceiling of the vessel in the main hold. A large part of the ceiling was in a fearfully rotten condition, although I believe it was supposed to have been new about 18 months before. Just before I left there were some 30 or 40 planks sent down for the purpose of repairing the ceiling. The ceiling is the planking which follows the curve of the vessel, and keeps the cargo from contact with the iron hold of the vessel. The removal of the ceiling would materially tend to weaken the stability of an old vessel like the *Sir John Lawrence*. I would not consider the *Sir John Lawrence* a first class vessel without a ceiling. At the survey of the steamer in October 1885, I suggested that the ceiling should be repaired. The ceiling was not repaired after the first survey: a patch may have been put in here and there. I also complained about the star-board water-tank as not being connected with the deck; also the forward pump. I brought nothing to the notice of the surveyors, because I am not permitted to speak to them on the threat of instant dismissal. I never communicated in any way with the surveyors, because I dared not do so. I was not positively told not to speak to the surveyors, but my own common sense told me what would be the result if I did. I hold this belief on the fact that the condition of the vessel was such in October 1885, that to mention the matter even to Mr. Young or Mr. Taylor would be to court instant dismissal. Mr. Young never paid any attention to my suggestions about nautical repairs. I, at the instance of the Captain, previous to the first survey of the *Sir John Lawrence* in October 1885, drew up a list of required repairs. The list was signed by the Commander and was handed over to Mr. Taylor. The list was, I believe, addressed to Mr. Taylor. I have no copy of that list. The following items were included in that list to the best of my belief.—A bowsprit required the band bobstay and bowsprit shrouds. Next the tanks' lids required repairing. I do not remember any other items. The bowsprit was never repaired, nor were the bobstays and bowsprit shrouds ever refitted. The tank lids were repaired some months afterwards. The next survey of the *Sir John Lawrence* was held six months after April 1886. I do not know whether that was a survey afloat or a dry-dock survey. The last and third survey during my time was held about two days before I left, about 24th or 25th October 1886. The last survey was in dry-dock. Part of the deck survey was completed after we came out of dock. I do not think the intermediate survey was a dry-dock survey. I do not know when Mr. Young returned. I am inclined to think that Mr. Young had returned before the second survey was held. I was in the habit of sending a monthly letter of indent directed to the Superintending Engineer, and in that indent I entered what I required for the ship in the shape of stores. Besides this, a carpenter on behalf of the firm used to come on board often to take orders. I used to point out to him the nature of the repairs required. His name was Mr. McDougal. There was also an engineer who came on board in the same way about the metal part of the ship. The indents were certainly confined to stores. From time to time I made out repair lists also under the Captain's orders. I made out these repairs certainly once a month—sometimes oftener. The indents I sent in were sometimes complied with. I cannot remember any of the particular stores I asked for being refused; but the impression left on my mind that there were items I was refused. I most emphatically pledge my oath to the statement that one article was refused me. I think I may have included the lip-guards in my indent of stores. This document is in my handwriting. This is a list of repairs calling attention to the materials required to effect those repairs. List put in on behalf of the owners of the *Sir John Lawrence*, marked (1).

This document is in my handwriting. I call it a repair indent. This is one of the leaves of the store indent book. Put in and marked (2). It is dated 25th January 1886. This document is in my handwriting. It is an indent for stores, dated February 1st. To the best of my belief the items mentioned in the indent were all supplied to the ship, except two items—5 gallons of oil and wood for carpenter to work with. Put in and marked (2). These five documents are all in my handwriting. They are indents for stores. As far as I know, the items mentioned in those store indents were supplied. In some instances the amount asked for was cut down, as indicated by the red ink figures. I cannot remember whether Mr. Young had come back at the time of the intermediate survey. My impression is that he had come back. I cannot say whether Mr. Young or Mr. Taylor was present at the intermediate survey. I believe that Mr. Bushby and

Mr. McKellar was the Government Surveyors on that occasion. Mr. Leech was the engineer who gave me the information about the thinness of the plates at the bows. I am perfectly positive as to that, I made the statement about the difficulty involved in putting in a fresh plate where the patch was, because if one plate was removed it would be necessary to move 40, perhaps, on the information derived from Mr. Leech, and the engineers who were working on and belonging to the ship at the time. I believe the other two engineers were Mr. Thorpe and Mr. Sansoni, and the second engineer who was drowned. The *Sir John Lawrence* had two boats abreast the mizzenmast and two other boats abaft the foremast; the life-boat was abaft the foremast on the starboard side: the other life-boat was on the port side. We have a small boat used for running lines to the shore abreast the mizzenmast on the starboard side, which was the jolly-boat; on the port side was a cutter. There was no one of the name of Henderson as an engineer on board the *Sir John Lawrence* during the time I served on the ship. A Mr. Lindsay put on the patch to the steamer bows. The engineer, of the ship assisted, I believe. I say this from hearsay. I deduced that the plates were thin because the frames which I could see were nearly eaten through in many places. I tried the plates by sound. I did not bore them. I deem myself capable of guessing at the thickness of the plate of any iron ship by sound. I can tell whether it is a thin plate or thick plate when it is palpably thin. If you took off one-eighth rust from the inside of one of the iron plates of the *Sir John Lawrence*, and about one-eighth of an inch of paint and rust from the outside, there would be $\frac{3}{4}$ of a healthy plate left: that is the conclusion I arrived at. I should be very much surprised to hear the engineers who were instrumental in placing that patch on to the *Sir John Lawrence* say that the thickness of the plate was above the regular thickness required for ships' plates. By being between wind and water, I mean that part of the vessel which is not continually immersed, and that part which is only occasionally immersed according to the freight carried. Where the ship is very deep, the patch is half under water. If the *Sir John Lawrence* was drawing 13 feet forward, the patch would be almost entirely under water. The patch would be almost continuously under water, whatever the draught of the vessel when she was moving. I should say the patch was below the main deck of the vessel, not much below—about 2 feet 6 inches below the main deck. I think it was below the main deck. I do not know which boat was smashed in the collision. I heard of the collision and damage to a boat, probably the starboard boat forward, but I do not know. When I was on board, I was told that the cutter belonged to the *Medina*. Ultimately I returned the boat. Captain Irvine told me that the cutter belonged to the *Medina*. I am not aware that the boat damaged in the collision was replaced from one taken from the *Medina*. The rotten boat I spoke of was sent on board before the intermediate survey; it passed both the intermediate and the final survey. At the conclusion of the last survey the Captain informed me that it was over, and under his instructions I hoisted up the boats in their places, put down the limbers, and adjusted the ballast, making everything ready for cargo. The rotten boat I lowered down, and it immediately filled with water: it was sent away to the yard. The rotten boat I call the cutter. I do not know whether the cutter passed the last intermediate survey, because I did not hear what the surveyors may have said about it; but this I will swear to, that the rotten boat remained on board for six months after the intermediate survey. The boat was a sinking boat when it was brought alongside. I did say that I made a remark to those on board they want a new bailer for this boat and pass a rotten boat on the other. I perfectly remember making the remark at the time of the intermediate survey, they insist on the trivial thing in respect of one boat, and pass a rotten boat on the other. Remembering this, I am almost prepared to swear that the rotten boat was on board at the time of the second survey. This is a store indent in my handwriting. Marked (27).

W. H. NEUSTEIN.

The Court adjourned till to-morrow.

C. H. REILLY.

The 20th July 1887.—Cross-examination continued to Mr. Orr.—There were two tanks on the between-decks for water, capable of containing 400 gallons each; they were placed on the main deck. They were tommed off from the top, and a couple of chocks nailed on each side of them. They did not actually break adrift in my time, but they worked loose, and I had to secure them; the tom frequently fell down and had to be replaced, the nails of the chocks got shifted by the working of the vessel. These loosenings were not the result of ordinary wear and tear. I say this because the loosenings were caused by the abnormal rollings of the vessel caused by the extra top hamper put on her, and the compensating ballast necessary below the rolling of a vessel does cause a certain amount of wear and tear. It was my duty as Chief Officer to see to all defects caused by wear and tear. If I had not been very careful, these tanks would have been carried away. Besides these two tanks on the main deck, there were two tanks below—one on each side of the mainmast in the lower hold of the vessel. Only one of these was connected with the deck; the other one remained unconnected nearly the whole time I was on the vessel. These tanks in the lower hold were each capable of containing 600 gallons, as far as I can remember. I cannot swear they were not tanks capable of holding 1,200 gallons each. These tanks were larger than those on the main deck. I was not asked about these tanks in the lower hold in my examination-in-chief. I was simply asked about the tanks containing the water intended for passengers: the tanks in the lower hold contained water for the ship's people. The two tanks on the main deck were supposed to be filled with Hooghly water by a high caste Brahmin. If there was no other water, the passengers would get water from the tanks in the lower hold. There was a rule given by

Captain Irvine, which prevented the water in the lower hold being given to the passengers. I never knew any passenger demanding water from the tanks in the lower hold. The one which was not connected I kept whitewashed, but it was dry usually. The tank which was not connected was on the starboard side. The tank on the starboard side in the lower hold was not connected for many months after I joined the steamer. There was no pipe from the tank to the between-decks. I indented for that communication. Whether the communication was made, I cannot remember. The tank in the lower hold on the port side was connected by a pipe through both between and main decks; there was no connection between the two tanks in the lower hold by a pipe. I can take my oath to that. If the passengers wanted water, they had to get it themselves, or fee some of the sailors to get it for them. I have frequently seen the lascars tipped with this object. I am sure all the native members of the crew were not Mahomedans only. The Captain had two or three Uriyah factotums. The paneewalla did not supply the passengers when they asked for water; he was the biggest man on board, and could have bought two or three ships of the same sort. I never saw the paneewalla supply any of the passengers with water, and I was on board thirteen months. There were many pumps in the engine-room. I believe there is a donkey pump in the engine-room. That donkey pump would be available in case of fire if the donkey fires were alight. There was also Downton pump on board, a pump worked by four men, a portable one. That could be used for working the main deck and for fire. You could not wash the upper deck with that pump. There was a canvas hose connected with the portable pump. The portable pump was not strong enough to force the water up on to the upper deck with any force. You would get about a bucket of water a minute on the upper deck. It wanted about eight lascars to work the pump effectually. I still adhere to the statement that the pump connection in respect of the forward pump was not made when I joined the ship. The leaden pipe was lying just as it fell on the beams, dented by the cargo. The treble action plunger of the pump was in a totally unserviceable condition and was sent ashore for repairs. The plunger of the forward pump was sent ashore after the first survey. The forward pump led from the main deck to a broken rose box at the bottom of the vessel. The plunger was brought on board, but when it came on board again, duly repaired, I do not know; but it came back within a reasonable time. The connection was made with the forward pump about four weeks after I called the attention of the Superintending Engineer to the matter. The after-pump had its new connection in lieu of the three which had been cut off. That connection was in the centre of the vessel abaft the engine. The two connections which were not replaced led to the bilges. In my opinion the bilge connection was a necessity in a ship like the *Sir John Lawrence*. I did experience inconvenience for the want of these bilge connections when I was on board the *Sir John Lawrence*. Several hundred bags of salt were damaged through the want of those connections. This damage to salt has occurred frequently. Many of the bags came out nearly empty. I should be very much surprised to hear that there have been no claims for damage to cargo, considering that over two hundred bags of cargo I have seen come out damaged from the steamer. I allude to bags containing salt.

The Court adjourned for half-an-hour.

Cross-examination continued.—There were no lip-guards to the scuppers except broken bolts all the time I was on board the *Sir John Lawrence*. I called attention to the state of the scuppers about six weeks after I joined the steamer. I drew Captain Irvine's attention to the scuppers. As far as I know, I did draw Mr Taylor's attention to the state of the scuppers. I do not remember what reply Mr Taylor made. I think it very likely that I called the attention of the carpenter visitor to the state of the scuppers more than once; the man's name was McDougal. I think I called Mr Lindsay's attention to the holes made by boat-hooks on the scupper pipes; he had them soldered up. This was after the last survey on the same day after the surveyors had left. I did not leave the ship on the 25th October. I left on the morning of the 26th. I did not see the holes soldered up myself. The Captain told me the survey was completed on the 25th, and under his orders I put every thing back in its place. I was continually mentioning the state of the scuppers to persons on board—engineers and others. They all told me I better mention the matter to Mr. Young, for they dared not do so. I did not mention the matter to Mr. Young, because the Captain advised me not to do so for peace sake, because all these things were supposed to have been repaired in the repairs of 1884. Several times Captain Irvine told me this; he did so whenever I spoke to him of about any serious repairs necessary in the ship. He advised me in this way shortly after I came on board. He said if I wished to remain on board I had better not apply for these serious repairs, as the ship was supposed to have been thoroughly put to rights in the repairs of 1884. I did mention repairs to Mr. Young. The last time I remember calling the special attention to the danger attending the condition of these scupper pipes, saying that, if the ship were lost, the chances are the pipes would be forced in by the sea and the vessel would be lost like the *Vingorla*. I think it was a day or two after I made out this list No (1), which is dated 17th October 1886. This is the only time I mentioned the state of the scupper pipes to Mr. Young. Mr. Young in reply told me I knew too much about the ship, and that he would get me sacked. This interview took place on board the steamer. It is not usual for scuppers to be protected with cement. Whenever I put fresh cement I mentioned the fact to the Captain. I am prepared to swear that I put cement round some of the scupper pipes more than once, in order to support them in their places. The starboard pipe aft had been stowed in already. There were four scupper pipes on each side of the ship. I applied cement to two of them, both on the after-hold: one on the starboard the other on the port side. The starboard after-scupper pipe had been stowed in. The cement was put inside the vessel round the leaden pipe. I don't think I did mention the state of

the scuppers in any of the repair lists I sent in. except in the list (1), dated the 17th October 1886. I may have sent in a dozen, fifteen, twenty—any number of repair lists before that date. I am quite sure I did send in other lists always before survey and before docking. The Captain signs the repair lists and is responsible for its contents. I wrote the repair lists merely. The list is made in this way: I talk over the matter with the Captain and suggest; those suggestions he does not approve of are cut out. I make a list of those which remain, and he signs that list. I had a copy of list (1) in my hand when I spoke to Mr. Young about the state of the scuppers. I don't know what the sheer strake of a vessel is. The bowsprit was never repaired all the time I was on board. The band is of iron which has three eyes—one at the bottom and one on each side. From the lower one to a shackle on the stern, the bobstay is set up. From the eyes on either side the bowsprit shrouds are set up to shackle on either bow. I never measured the bowsprit. I should say about 30 feet. It is not a fact that the bowsprit was about five to seven feet long. I swear it was more than ten feet,—nearer 15 feet. I should say it was much more than 15 feet. As far as I can say, there were 15 feet or more outside the ship before the end was broken. The fracture was at the sheave hole. Knowing that I can form a pretty accurate idea how much of the bowsprit was broken off. I should say that the bowsprit projected about 15 feet beyond the knighthead. Allowing $2\frac{1}{2}$ feet as the length of the piece broken off, the length of the bowsprit as it was when I went on board was $12\frac{1}{2}$ feet. The forestay was fastened to the knighthead. In every steamer I have been in there has always been a bulkhead below the engine-room and the stoke-hole. The dust from the stoke hole damages the brass bearings. A partition bulkhead, it is a bulkhead with door in it. I was never down in the engine-room of the *Sir John Lawrence* before I went on board her as Chief Officer. I am not certain whether there were two coal side pockets or one. There is one athwart ship bunker port in front of the stoke hole; the pockets were probably between the bunker and partition bulkhead which I said had been removed. When I was on board, the side pockets had been removed. I cannot remember whether there was a iron partition at the end of these pockets. The rudder had no rudder chain fitted on to the afterpart of the rudder, as a substitute in case the upper part of the rudder was damaged or broken. I did not bring the absence of these rudder chains to any one but the Captain; he told me not to press for them. As far as I can recollect, I never included the rudder chains in my list of repairs. Mr. Bushby, assisted by Mr. McKellar, made the survey of the vessel in October 1886. The last day only Mr. McKellar was there; that was the 25th, I think. The day we went to the Salt Golahs Mr. McKellar was on board both before and after the vessel left the dock. Mr. Young and Captain Irvine went round with the surveyors. After that survey I wrote to the Surveyor of the Port. I wrote to Mr. McKellar alone, because he was the last to finish the survey on decks, boats, windlass, and such like gear. They were 10 minutes walking round the deck. After that they went down into the engine-room. I saw them go down below off the upper deck. I did not follow them. This list (1) was made up by the Captain after we consulted on the subject. I wrote out the list; it was signed by Captain Irvine and sent to Mr. Young. The list I sent to the Government was as near as possible a copy of list (1)—perhaps not a verbatim copy; one or two items more or less. With the exception of these four items, *viz.*, Nos. 11, 12, 13, and 19 in the list, I forwarded to the Local Government all the repairs mentioned in that list remained unexecuted for more than a year to my own knowledge, and probably remained unexecuted for several previous years. The vessel had during the year passed three surveys. When in my letter I alluded to the survey as "walk round" occupying only ten to fifteen minutes, I intended to confine that remark to the deck survey alone. I did not call the attention of the Surveyor to these serious defects throughout the year in obedience to the instruction of my Commander, Captain Irvine. I am quite sure I told my Commander I worried the carpenter McDougal and Mr. Lindsay, the Engineer, constantly to see these repairs done. They told me to go to Mr. Young. Mr. Young was very seldom on board. He came on board often just before the survey. Mr. Young did not come on board after or even after nearly every trip. Most emphatically no. Whenever I got hold of Mr. Young disengaged I brought something to his notice; that is how I got into such ill blood with him.

W. H. NEUSTEIN.

Case adjourned till to-morrow.

C. H. REILY.

The 21st July 1887.—William Henry Neustein recalled for further cross examination.—To Mr. Orr.—My authority for asserting that the *Vingoria* was lost through pipes being forced in was the general opinion of the officers with whom I associated. I did not know that the Court of Enquiry failed to come to any definite conclusion how that vessel was lost. I have seen teakwood in very good condition about thirty years after it has been put into the deck. This remark, however, would not in my opinion apply to the covering boards now on board the *Sir John Lawrence*; but with respect to covering boards generally, I do not think there would be any difference in respect of the wood used for them and for deck purposes. The covering board of the *Sir John Lawrence* was raised above the deck, hence the water would not lodge or remain on it, so it was not so liable to deterioration from wet and the action of iron corrosion round the stanchions. I would be very much surprised if it can be shown that the covering boards on the *Sir John Lawrence* were of teakwood even in 1884, except where the new deck had been added in that year. The rails in the wake of the main hatch were unsafe—about twelve feet of railing in the wake of the main hatch and about five feet of railing in the wake of the fore hatch. I mean the gangway on each side of the ship. As a matter

of fact most of the stanchions attached to the covering board had their screws more or less torn out by the weight of the awning stanchions, caused by the contraction of the canvas in wet weather. This applies to the covering board all round the vessel. The covering board was so rotten you could not put a screw into it at all in the wake of the gangway. The covering boards were more rotten in the wake of the gangway than in any other part. In the other parts, however, the screws had been forced out by the strain of the awning. The water had got into the holes; in consequence the wood rotted in the neighbourhood of the screws. I weighed 18 stone more or less a year ago. I have lost a considerable amount of flesh since I never walked on the gangways because I knew a man had fallen overboard doing so; he weighed about 3 stone or 4 stone. On the occasions when the deck was so crowded with passengers that I could not get along in the usual way, I walked along the rails which were supported by the awning stanchions and the permanent part of the awning ridge chain, carefully avoiding the gangways. My feet rested on top of the permanent rails, and my hands holding the ridge chains, till I came to the gangway. The gangway is closed by two iron bars bent at right angles at the end, which fitted into eye bolts attached to wooden stanchions. The top of the rail was iron: there was generally a light at the gangway. I got down on the deck, leaving my shoes on the awning to try if I could find a place to put my feet between the prostrate forms of the passengers; the people were so closely packed, and I was so heavy, I was afraid of doing some damage to body or limb: and if the howling *Baba! Baba!* was not too acute, I would go to the other side of the gangway; then proceed as before. If the protests and the crowding prevented me, I got on to the awning, and scrambling on my hands and knees got along as well as I could, taking my chance of coming through. We have double awnings, else I could not have done this. My experience has been more in connection with iron than wooden ships. I have scaled and painted a good many iron ships in my time, among them the steamer *Arabia*. The scaling and painting of an iron ship should take place every three or four years. The process should be a thorough one. Any steamer could not have got into the condition which I described the *Sir John Lawrence* to be in in my letter to Government, viz., that "the holds below and above the orlop deck are one mass of rust, the scales can be taken off in large flakes by the fingers, and some of the frames are nearly eaten through for want of paint," except from thorough neglect extending over four or five years. If the *Sir John Lawrence* had been thoroughly scaled and painted in 1884, she could not have been in the condition I described her in when I wrote that letter to Government. The date of the letter is the 28th October 1886. The statement contained in my letter to Government about the state of rust was most emphatically true. When I first joined the *Sir John Lawrence* she was not so rusty; she naturally accumulated rust during the 13 months I was on board. These indents produced are written by me, marked (2₈) to (2₁₅). I did not use one-thirtieth part of the paint I used on the *Arabia* in less than half the time. I made several attempts to have the holds cleaned out, and I painted the between decks, fore and aft. I painted the between decks a few months after I joined the *Sir John Lawrence*. Before each survey I took up the limbers as far as I could in the time allowed with the few men left under my command. I cleaned the dirt out of the limbers and cement-washed them, so that they might have a good appearance from the upper hatchway. This was not eye-work: it simply represented all I could do with the materials afforded me and within the time. What I did, I did thoroughly. While I was in the ship, I had all the ballast shifted at different periods in order to examine the state of the ceiling and remove the tons of coal-dust accumulated round the foot of the main pump, under the ballast, which had apparently remained there for many, many months. I did not mention the rust in the hold in my list of repairs (1) because you could not indent for removal of rust. The *Sir John Lawrence* went on to be docked, to be overhauled, and examined for the half-yearly survey. I called the attention of Captain Irvine and Mr. Young to the state of the holds, and proposed to have the outsides cleaned; but I was only permitted to have the paint scaled off lightly outside with scrapers. Chipping hammers were not allowed to be used. If I had made a proper list, it would have been five times the length of No. (1). As it was, Captain Irvine cut a great many items off No. (1), and even hesitated to sign it in its present form. I did not attempt to suggest the scaling of the inside of the holds, after hearing Captain Irvine say that when he attempted to do so in 1884 he was prevented peremptorily from doing so. I should be very much surprised to hear that the *Sir John Lawrence* was properly scaled and painted, inside and out, in 1884. She may have received coats of paint in the bad places over the rust. She may also have been scaled when it was safe to do so. If scaling had been attempted in some places in the hold, between wind and water in the fore peak, for instance, the hammer used for the purpose would most infallibly have gone through. I could have demonstrated this by an experiment with a chipping hammer at the time when I sent in that letter to the Government in October 1884, when the *Sir John Lawrence* was at the buoy. I am certain I could have put my chipping hammer through the side of the ship in more than one place. I think the hammer would have gone through in some places in the forepeak and between the frames, just before the bunkers. On the port side, at about from 20 to 25 fathoms, there were two or three links of the chain cable bent partially round and some without studs. This occurred when checking the ship round in strong tides in arriving off town in Calcutta. The starboard chain defects existed between the 60 and 75 fathom shackle, which had suffered in the same way, being bent and in many cases links minus of studs. I did not include the state of the chains in the list because Captain Irvine would not permit me to do so. In coming into port we always, when we got there, made fast to the same buoy.

When the tide was against us, we were allowed to proceed and steam right up to the buoy. When the tide was running up, we turned round and dropped our anchor in whatever spot the Captain thought it most judicious to do so. I was not prepared to leave the ship. If I had been so prepared, I should have gone to the Agent and made my complaint as to the state of the ship in opposition to the Captain and Mr. Young. As a matter of fact, I did complain to the Agents—to Mr. Mackenzie—when I landed from the steamer, after I got information of my dismissal. I did not attempt to make any complaints to the Agents before my dismissal from their service. Mr. Young never at any time did anything to deter me going to the Agents with my complaints, had I chosen to do so. Captain Irvine did tell me to address all my complaints to the Superintending Engineer only, and not to the Agents. The Captain went every day when we were in port to the office of the Agents to know as much about the requirements of repairs on board. It was not part of my duty to go to the Agents about the repairs. I did not think it necessary to supplement list (1) with more items when I sent it to Government. List (1) was authenticated by the signature of the Captain, with the exception of the two last items, which were added afterwards by me and a remark made to that effect. I thought there was quite enough in that list to show the extent of the neglect of the vessel. The copy of list (1) which I sent to the Government was, I believe, copied by me from a duplicate list in my possession. I have not that duplicate in my possession. I gave it to a fellow-lodger of mine—a clerk in an insurance office. I don't know his name. I have kept no copies of the other lists I have sent in. I think we came out of dock about the 25th October. I believe the Harbour-Master was Mr. Mathewson. We dropped down to the Salt Golahs. We tried to get up the starboard chain with the windlass, and after much trouble and delay found it impossible to do so in the time required to move the ship. This was on account of the defective state of the windlass. We had to get the chain up from the chain locker down below. We got the whole of the chain for mooring the ship aft on both sides entirely up from the port locker. We had not laid the chain out in lengths on the deck before we left the dock. In this vessel, the *Sir John Lawrence*, it is not necessary to range the chain on the deck. The anchor is let go from the cathead and carries the chain with it over the gipsy of the windlass, to which there is attached a compressed break, which is useful to stop the chain at will. There is no occasion to have any chain lying on deck. As it comes in the windlass pays it down into the locker. The Harbour-Master is not bound under the rules of the port to have the chain laid out in lengths on the deck in a steamer carrying a windlass of the kind I have described. I don't know the Harbour-Masters' rules.

Did you not on the 23rd of October 1886 sign a certificate given to the Harbour Master certifying amongst other things that there were 30 fathoms of chain laid out on deck ready to be paid out?

Answer.—I do not remember whether I or the Captain signed the Harbour-Master's certificate on the occasion you mention. It is a paper which is usually signed without being read: a purely formal affair. I have never read a Harbour-Masters' certificate through yet, and I speak with an experience of 20 years. It was impossible to lay out 30 fathoms of chain before the windlass on the *Sir John Lawrence*. There was no room, and even if I could have done so, it would have proved a source of danger to the biscuits.

Cross-examination continued.—This certificate is signed by me. (Certificate put in and marked X) When we left port in the morning, the Captain, acting as Harbour-Master, dropped the vessel under steam down the river. I have known this operation take up two or three hours. The Captain would then turn the ship, and then in his capacity of pilot take the *Sir John Lawrence* down the river; and if the tide were not favourable for entrance into the Western Channel, he would take the ship down the Eastern Channel, and would arrive at the further end, according to the state of the tide, at any time between 8 p.m. and 12 midnight. From the moment the ship turned off towards Chandbally the Captain navigated her as Master. If we left Calcutta at daybreak on Wednesday, and took the Eastern Channel course, we generally arranged matters so that we reached Chandbally on Thursday morning, the entrance of the Dhamra river, the Kanaka buoy. If we went the Western Channel course, and if we made a very favourable voyage, reached the Kanaka buoy about 11 p.m. on Wednesday night. We used the Western Channel most frequently. Starting at daybreak with the wind and tide favourable, we might make Saugor by 1 p.m. Saugor light-house would be about nine miles off. When we had Saugor light-house abeam, we should be through the greater part of the Western Channel. I was Captain of the *Medina*, a vessel in the Chandbally trade. I did not hold a pilot's certificate. My Chief Officer was a tug pilot, and he therefore had command of the vessel. I only made one voyage to Chandbally in the *Medina* as Master. On that occasion I took the ship through the Eastern Channel. I assumed command of the ship just below the Lower Gaspar. Had I gone by the Western Channel, I should have assumed command as Master at the Upper Auckland buoy. We got to Chandbally generally between 10 a.m. and midday. The Captain was the obliged to be up during the whole of that day. The mooring often took one hour or an hour and a half. We lay at Chandbally all Thursday night. I supervised the taking in of cargo during the night.

We never used a Chandbally pilot. Leaving Chandbally (if the tide be favourable) at daybreak we made the Kanaka buoy in $3\frac{1}{2}$ hours; with the tide unfavourable, 4 $\frac{1}{2}$. In the *Sir John Lawrence* we invariably returned by the Eastern Channel. We got to the Apex buoy between 1 and 2 in the morning. The Captain was obliged to act as pilot from the Kanaka buoy to the Apex buoy, taking the track we usually adopted. We anchored at the Apex buoy and proceeded to Calcutta at daylight on the following morning.

W. H. NEUSTEIN.

Court adjourned till to-morrow.

C. H. REILLY.

*The 22nd July 1887.—Cross-examination continued.—To Mr. Orr—*I wrote the ship's log on board the *Sir John Lawrence*, and the official log when requested by the Captain to do so. Captain Irvine may have made some entries in the official log himself without my knowledge. I may say he invariably asked me to make such entries. If he did make any entries of any importance, they must have been added after I left the ship, or I should have seen them. Every entry of any importance made in the official log while I was there was made by me. The entries related principally to the discharge and shipping of sailors, or death, if it was palpable. I did not enter the fact of six dead bodies being thrown overboard between Diamond Harbour and Garden house. I was not asked to do so by the Captain. I made a note in my own log book for future reference. I made shorthand notes in my log book from time to time. The Captain used to tell me the number of passengers to enter in the ship's log, and I so entered them. That was done in every trip if the Captain happens to tell me the number of passengers. If not, I put down the number I happened to tell the police on their making an enquiry from a boat an hour or two after the passengers had left the vessel. I entered the number of passengers on board in each trip going and returning from Chandbally when the Captain furnished me with the number. The Captain furnished me with this information from a rough pocket-book which he had. Never to my knowledge did the police count the passengers on board prior to starting from Calcutta. During festival times this work, if efficiently carried out, would have taken the police several hours to perform. A lighter would also be necessary to put some of the passengers into, so that they might be divided for the purpose of counting. I heard what Captain Spence said about counting the passengers on board the *Tyrone*. If the same surveyors who surveyed the *Sir John Lawrence* in my time, and passed her in that condition, were consulted by the Government, and the Resolution of the Government is based on their opinion, I am not surprised at any conclusion the Government might come to under their advice. I do not remember any altercation with Mr. Young on the 23rd October 1886, but I remember nearly all the words which passed between us, which were very few. Mr. Young asked me why I was not down below in the tunnel getting the shaft along. I said I was too old in the thorn to do that sort of thing. I said there were four of the ship's engineers, three or four extra engineers, all my crew, and all the extra hands, which were supposed to be paid by the deck department, were all below. What should I be doing then, as Chief Officer acting gunner to the engineers. Mr. Young did not order me to go down and lend a hand with the shaft. I did not tell Mr. Young I was a d—d sight too old to do that sort of thing. I did not refuse. Mr. Young had no right to give any such order. I did not continue using bad language. I used no bad language at all; had no quarrel and no words on that day. Captain Irvine told me not to go down into the tunnel, nor did he tell me not to obey Mr. Young's order.

Question.—Did you not, then, ask Mr. Young if he wished you to thrash him?

Answer.—No.

I did not say to Mr. Young "I suppose you want to get me dismissed." I don't remember Mr. Young saying to me that I dismiss you then and there: he had not the power to do thise I had a six months' agreement. After I left the ship, I went to Messrs. Macneill and Company's office. I went there to tell the Agents that Mr. Young was annoyed at my assisting the Commander in making out such an extensive repair list, and calling Mr. Young's attention to these defects mentioned in that list and pressing for their immediate repair. I saw Mr. Mackenzie at that interview. He said that's Mr. Young's business, not yours, or words to that effect. I then said I shall be glad if you give me a testimonial, stating the time I have been on your vessel, as to my conduct and ability during that period, as I think, of going up to pass for the river tug. Mr. Mackenzie gave the order and I got the certificate. Mr. Currie handed it to me.

Did you not ask simply for a certificate of service only, showing the time you had served on board the *Sir John Lawrence*, as you wanted it to enable you to go up and pass for the river?

Answer.—I did nothing of the sort. I did ask for a *bond fide* testimonial which would express the opinion of the firm as to my conduct and ability while I was in their service.

I don't remember the exact words I used. I applied for a testimonial in the ordinary terms a servant would to an employer. I will not pledge my oath to the exact words I used. I don't remember to whom Mr. Mackenzie gave instructions about my certificate. Mr. Mackenzie did not direct Mr. Currie to give me a certificate of service only: he certainly did not do this in my presence. After getting my certificate, I went two or three days after to the Agents to get my wages. I don't remember seeing Mr. Mackenzie on that occasion. I saw him on the date I served him with a summons. I remember presenting Mr. Mackenzie with a letter which formally tendered to him my services as Chief Officer. I did this under the advice of my Solicitor. I cannot remember whether I actually presented the letter to Mr. Mackenzie. I do not remember stating orally. I have come to tender my services as Chief Officer of the *Sir John Lawrence* to Mr. Mackenzie or any one else. I don't remember Mr. Mackenzie or any one else saying having already dismissed you, we do not require your services. My former shipmates, Captain Irvine and Mr. Turner, the second engineer, were the "valued friends" I alluded to whom I had lost through the foundering of the *Sir John Lawrence*. In my opinion the *Sir John Lawrence* having had a lot of heavy extra iron beams, large quantity of deck and houses added to her, about eight feet above a portion

of the vessel where there was none before, it must have considerably altered the stability of the ship with reference to the calculations made on the original construction of her hull. I also knew that large quantities of ballast were thrown overboard at different periods, which, as a matter of fact, were not wholly replaced in my time. I did not cause the ballast to be thrown over board, nor do I know the quantity which was thrown over board.

To Captain deSmidt.—The windlass was on the main deck. It could be worked by steam or by hand from the upper deck. The centre casting of the windlass was broken, and the whole body of the windlass forced over to starboard, so that the starboard gipsey had worn itself deep into the wooden bitts which supported it: it got into a state which made it difficult to work some two or three months before I left the ship. I don't know whether the windlass was ever repaired. I have seen the plates out above the upper part of the stern: those plates were in good order. In the fore peak particularly, I think, the thickness of the plates were above $\frac{3}{4}$ of an inch. No rivets were driven out of the vessel during my time in the hull under deep water-mark. If I tried to beat a rivet with a hammer so as to remove the rust between the frame and the plates, in many cases there would be a distance of $\frac{1}{4}$ th of an inch between the frame and the plate. The *Sir John Lawrence's* plates were alternately outside and inside above light water-mark. The outer plates have a liner between the frame and the plate. What I allude to was rust, and not liner I could not see the floor plates, the depth between the floors would be about one foot. I can't tell you how high she was cemented in those chambers; she carried ballast then; the ballast was on the ceiling. I have known the *Sir John Lawrence* go away boarded as full as she could hold; at other times not a very great deal. The amount varied considerably between 40 to 50 tons upwards. There was enough water to damage bags of salt. I think the water came through a defective sluice in the engine room. The sluice hole was stopped up with rags. I don't know whether the cargo was insured. On the main deck, besides, the tanks on the starboard side cabins were very much enlarged. Three fresh cabins were added—larger cabins—the older ones being removed. The new cabins occupy very much more space than the older cabins. On the starboard side, nearly abreast the gallery, were the additional places taken up built for the purpose, but never used as latrines. On the port side, just abaft the main hatch, was a cabin built for the carpenter, and about three feet further on a large engineer's store-room had been built. I do not know how many superficial feet was left on the main deck for the accommodation of passengers. The horse-power was something over 90 and not under 90 for the second engineer could run her. Her speed under steam alone with a moderate head wind was about 7 miles an hour. I saw in the papers that the *Sir John Lawrence* was not classed at Lloyds; this was in 1878. The *Sir John Lawrence* was a very lively boat in bad weather.

To the President.—My acquaintanceship with Captain Irvine led me to consider him a man who placed very little value on his own life. I myself have heard him say I expect to go down in the old *Lawrence* if I stop on her long enough. On one occasion we received peremptory orders signalled to us to return. We obeyed that order; but if it had not been for me, we should never have seen that order, for I prevailed upon Captain Irvine to wait and read the flags. He waited reluctantly, and but for my protest he would have gone on. On one occasion when storm signals were up and large steamers had anchored, Captain Irvine proceeded out to sea in opposition to my advice. The Captain looked upon his passengers as so much living freight, worth so much a head. I do not believe that he would have permitted the question, whether or not his passengers would be inconvenienced or their lives endangered, influence him in any way when he came to decide whether he should return or go out to sea. If Captain Irvine had succeeded in getting to Chandbally before the *Seagull* and the *Tyrone*, he would most assuredly have swept up all the passengers who had not taken tickets for passages in the other ships. As a matter of fact, independently of the passengers who had tickets, Captain Irvine carried a larger number of passengers, who paid their money on board. That money was collected by Captain Irvine. In my opinion Mr. Currie, knew all about it. He was the Agent of Macneill and Company at Chandbally. My belief, induced by what I saw, was that the Captain obtained some pecuniary advantage out of the fares of these passengers. The interest he took in these passengers confirmed this belief. One of the motives which, in my opinion, induced Captain Irvine to venture out to sea was to secure the larger number of those passengers on the return voyage.

Re-examination to Mr. Ghose.—No account to my knowledge was kept of these passengers who took no tickets. If the Captain handed over the money to the agents they would only have the word of the Captain as to the amount. The proceeds which under an amicable arrangement might be the subject of division between the owners of the various steamers plying between Calcutta and Chandbally would only be in respect of money paid on the sale of tickets. The only thing which could be checked would be the money obtained on the sale of tickets. In my opinion this practice of receiving passengers on board without tickets was the chief cause of the crowding of the steamer with numbers beyond the amount the steamer was allowed to carry. In my opinion the person directly associated with the collection of the money from these passengers would be interested in getting as many of these passengers as they could on board. This practice obtains on both sides, more particularly from Chandbally. At Poojah during the Puri festival we carried quite 1,400 passengers. I have known the *Sir John Lawrence* when, during the time of the year and ho was only permitted to carry 700 and odd passengers, according to what Captain Irvine told me, carry about a thousand passengers. I emphatically reassert that I have frequently seen the *Sir John Lawrence* overcrowded; and the overcrowded state of the ship interfered with the management of the ship, and in rough weather it would decidedly endanger the vessel.

and all on board. I have never seen the upper awnings blow away; the curtains would go and the rain pelt in. I have seen the passengers wet all through the night. The distance between Calcutta and Chandbally is between 150 to 160 miles. My decided opinion is that it is not possible for one officer performing the treble duties of Captain and Pilot and Harbour Master to get through the accumulation of work efficiently. Captain Irvine was 60 years of age at least, too old in my opinion to discharge these duties efficiently. I have frequently seen him for hours together asleep on the bridge when on duty. On the occasion when we were on shore at the mouth of the Dhamra river, the passengers threatened to throw me over board because they could not get food, and the Brahmins would not take the water from the tank, as that was used by Mahomedans. The two four-hundred gallon tanks had been exhausted. We got up cocoanuts from the cargo. In scrambling for these the women and children got trodden on. Had not been for Mr. Yakkie, I should have been thrown overboard. On one occasion, when our steamer was dragging her anchor, if one of the defective tanks had given way we should have been in pieces in two or three minutes. We had six or seven hundred passengers on board. When we anchored the Captain said that will do; steam, the fires were banked; finding ourselves slowly dragging, I informed the Captain. I also reminded him that, owing to the defective windlass, we could not let go the second anchor. I then with the consent of the Captain ordered steam to be got up as fast as possible. I have never known a passenger vessel go to sea with such an unsightly patch on her. I have noticed passengers stay behind till after the counters had left, and on leaving Chandbally after the counters had left and the vessel off in the stream underweigh, the pancewalla would bring down some hundred or more passengers who had been concealed in houses, and in spite of the efforts of the native agents to stop them to see whether they had got tickets, force them into boats and bring them off. The pancewalla shipped a large amount of freight on board the steamer; the freight were stowed in the best place; he saw it done, having great influence with the crew. I do not think there is any screw steamer which carries within one third of the amount of passengers as carried by the *Sir John Lawrence*, even if they be of the same tonnage as the *Sir John Lawrence*. The *Medua*, a much better ship, carries nothing like the amount of passengers. I believe the *Mahratta* has been running in the place of the *Sir John Lawrence*. We often carried horses, carriages and cows; the space occupied by these encroached upon the space set apart for the passengers. The space set apart for the hospital was not used for the benefit of the passengers, but was a store place for hawsers, ropes and ship's gear. The space occupied by the cows, horses and carriages was part of the space reserved in the survey for passengers. I remember one or two occasions when passengers were refused admittance because the deck was so choked no room could be found for more. The last item in exhibit (2^d) is the most important item in the paper. We had a carpenter at Rs. 40 a month, and not enough wood on board to make a boat's rudder. The item of oil was also important; it might have resulted in having to run without side-lights. This item, No. 12 in exhibit (1), is written and understood by me; it refers to the boat which passed its survey in the presence of Mr. Young and Mr. Bushby, and I made the remark particularly to Mr. Leech, the Chief Engineer. They lowered the two new life-boats into the water, and let the rotten one remain hanging at the davit. What sort of a survey do they call that. On the 17th October, when I wrote exhibit (1), I had no prospect of quitting my post. I attribute my discharge intimated to me on the 25th to the fact that I insisted on the repairs mentioned in exhibit (1) being done. Before making out this list, I had often made verbal reports to the carpenter and blacksmith sent on board to look after the repairs, and also to Mr. Young, when opportunity offered. I have known 4 annas taken as a fare for a passenger. I have also known as much as Rs. 5 paid for a single passage.

Case adjourned till Monday, half-past 12 P.M.

W. H. NEUSTEIN.

C. H. REILY.

The 25th July 1887.—William Henry Neustein to Mr. Kilby on re-examination.—It was only our casual conversation in hotels that the *Vingorla* went, through the defective state of her soil pipes. I cannot give you the date or month when the *Sir John Lawrence* proceeded to sea in defiance of the storm signals. I cannot give you the date or the month when we were overtaken by a cyclonic storm; could not use the starboard anchor through our defective windlass. It was about two or three months. It may be four months before I left the ship.

W. H. NEUSTEIN

John Leech—Sworn saith to Mr. Kilby.—I was Chief Engineer at one time on board the *Sir John Lawrence* from the 22nd September 1884 up to the 25th September 1886. Mr. Neustein was on board as Chief Officer for part of the time. Whilst I was running to Chandbally, weekly one trip a week, I had six firemen, four coal-trimmers—it may have been two coal-trimmers—a serang, two tindals, and two oil-men. I had engineers besides myself. When we began to run tri-weekly that is two steamers making three trips a week, I had eight firemen, four coal-trimmers that no extra fire-men, two extra coal-trimmers, and an extra engineer. In my opinion these were a sufficient crew for the work the *Sir John Lawrence* had to do. I cannot tell you anything about the deck crew. When I went on board the *Sir*

John Lawrence, she had been recently repaired. I believe she had a new spar deck from the bridge up to the poop flush deck. I was in the vessel 13 years ago, and can therefore say that the *Sir John Lawrence* had two side bunkers and a bunker athwart ship, also a bulkhead separating the stokehole from the engine-room; the two side bunkers and the bulkhead I have mentioned have been removed. I should say the more bulkheads the ship has the stronger she is; in my opinion the removal of that bulkhead did to a certain degree weaken the vessel. I joined the *Sir John Lawrence* in 1874, and left her in 1877. In 1874 the *Sir John Lawrence* was a staunch vessel; everything good about her. The forepart of the *Sir John Lawrence* was not staunch in my opinion in 1884. The plates down in the fore peak were all encrusted with rust and the frames also. In 1874 she was properly painted in the fore peak and everywhere else, inside and out. In 1885 after the collision occurred with the *Indore*, there was no paint, all rust on the fore peak. I was sent by the Captain to go and have a look at the hole made by the collision on the fore peak on the starboard side; the hole was above water—a good deal above water. When the ship was light she was drawing about 8 feet forward at the time of the collision, the hole was about 4 feet above the water line. I went down to look at it and came back and told the Captain that there was a large hole in the bow, and that he could not go to sea and must take her back to be repaired. The hole may have been above 18 inches to 2 feet square when the ragged parts were cut off. My engineers cut off the ragged parts under my superintendence. Mr. Turner was second engineer, Mr. Thorpe, third engineer, Mr. Sansoni, fourth engineer. The plate was one-eighth of an inch thick. I did not measure it, but I could see by the edges of the plate. The plate when new must have been a quarter of an inch thick: this is merely a guess. The plate looked much corroded. We came back to Calcutta to the workshop at Garden Reach. The collision occurred in the morning between 6 and half past 6 A.M., I cannot give dates. Mr. Taylor, the Superintending Engineer, came on board; he afterwards sent workmen on the same day. They brought a plate off with them, punched holes in the ship's side round the hole, and fixed the patch with putty and made a bolt patch of it: we steamed away the same evening to Chandbally. We had passengers on board when the collision occurred—a large number of passengers—they remained on board all that day, and we took them to Chandbally that evening. When the patch was on, Mr. McKeller, the Assistant Surveyor, came on board and had a look at the patch. I saw Mr. McKeller on deck forward. I did not see him go down below. I think he must have gone down below. Mr. Taylor was on board with him. An engineer of the name of Henderson was sent off with the men to put the plate on. I saw the plate put on. I was there all the time. No Government surveyor was on board when the patch was being put on. You could easily feel the thickness of the plate from the inside after the patch was put on; it was an outside patch. After we came back from that trip, Mr. Taylor came on board the next day. He said if Mr. Bushby ordered the plate to be taken out that there would be no stopping, the plates on both sides of the bow would have to be taken off. By "stopping" I meant that, according to Mr. Taylor if one plate was taken out, the whole affair would be exposed, and a good number of plates; the whole of the fore peak on both sides would have to be renewed. Mr. Taylor further said he would see Mr. Bushby about it, and get him to leave the patch where it was with the exception of the bolts; he would take out the bolts and put in rivet and make a rivet joint of it. The bolts were subsequently taken out and rivets put in. The remaining of the plates on the fore peak would have been an expensive business, it would have taken over a month at the very least to have done. The *Medina* was running in conjunction with us, she had been chartered by Messrs. Macneill and Company. She belonged to the British India Steam Navigation Company. I could not tell the number of passengers the *Sir John Lawrence* certified to carry, or the *Medina*. No other part of the skin of the ship was examined by me. I do not know the condition of the holds or ceiling. I don't know whether the holds were painted. In 1884 the engines were 90 horse-power nominal. They were compound direct acting horizontal engines, so far as the shafting and the cylinders were concerned they were all right. The condenser was pretty much worn. Very much worn, the rest of the machinery were in good order and condition. The boiler was a new one. The donkey boiler was also a new one. It must have been put in the ship on the last repair of 1883-84. There was one unserviceable boat on board, a boat on the port side close to the mizzenmast, the after port boat; there were three other boats in good order. The starboard life-boat was smashed in the collision, and while the patch was being put on a new boat was sent from the yard, and was lashed alongside. In the evening the damaged life-boat was sent ashore in charge of five lascars, it was towed ashore by the jolly-boat. During the day the unserviceable after fore boat had been taken away, and a new boat had been brought in its place and lashed alongside but not hoisted on the davits. We also received a brand new life-boat sent us in exchange for the one which was smashed. The boat which was lashed alongside and not hoisted on to the davits filled with water, and got under the ship, the painter parted and we saw it no more. I could not swear to the fact that the after port boat was unserviceable at that time. On our return trip the after port boat came back to us again and was hung up on the davits. I saw that after port boat come alongside, it was an unserviceable boat, it used to leak very bad. It remained with us for some time till just before the survey when it was taken away and a brand new boat put in its place. After the survey was over we ran a trip or two, and then the new boat was taken away and the old unserviceable boat sent back to us. I saw the unserviceable boat come alongside after the survey, it was in a leaky condition, as it was hoisted up the plug was taken out and the water ran out of it. I was on board the *Sir John Lawrence* when she went ashore at the mouth of the Chandbally river; we had lots of passengers on board; the

ship was very crowded. The passengers wanted to go ashore to cook in the jungle. The after port boat was let down, it was found to be leaking so much that it would be dangerous to send passengers in it, so it was hoisted up again. When I left the *Sir John Lawrence* the unserviceable boat was still there: I left on the 25th September 1886. The collision I think occurred in May 1885. The unserviceable boat remained on board the *Sir John Lawrence* with the exception of the short time when she was sent ashore from the time of the collision to the time I left the steamer in September 1886. After the occasion when the unserviceable boat was removed to make way for the new boat, there were two additional surveys held in my time. I never saw the Surveyor's order that boat to be put into the water. It passed two surveys so I am wrong. Now I come to think of it the unserviceable boat passed one survey, the surveyor was Mr. Bushby. There were four surveys held while I was on board the ship: they were made by Mr. Bushby and Mr. McKellar; the latter does the engine-room, Mr. Bushby did the first engine-room survey. Mr. Bushby did all the deck surveys. The survey on deck and the survey on the engine-room was going on at the same time. I cannot say whether the Surveyor went down into the hold or not. When Mr. Bushby himself surveyed the engine-room he went into the boiler; he had a look at the cylinder, he looked at the shafting and made me take off the bearings when we went on deck. We looked at the safety valves, the whole affair was finished in half an hour. I did not see the deck survey. We were aground three or four days going to Chandbally, it was very early in the morning. There was a moon but it was clouded, it must have been on account of the darkness. Where we were aground the sand was not visible; the nearest shore from us must have been about six lengths of the steamer off. The passengers were short of food. I have seen the steamer crowded as full as it will hold. The people could not move about; the crew could not have got about through the passengers; the passengers had to cramp their legs up. At night it was utterly impossible for a woman to move towards the water-closets in day time, if she had male friends she might manage to do so. There were two passenger decks, the spar deck and the main deck. The spar deck was flush from the stern to before the foremast, then there was a break where the male closets were. Before the spar deck was the main deck. In 1874 there was no spar deck, there was poop, bridge deck and fore-castle. The distance between the old poop and the bridge deck was about 60 feet and 120 feet about from the bridge deck to the fore-castle; I cannot say for certain. The only alteration is that the space between the poop and the bridge deck has been decked over; there had been high bulwarks between the poop and the bridge deck. These high bulwarks were done away with altogether; the new spar deck was supported by iron frames; the distance between the main and spar deck is about 7½ feet. The old bulwarks are replaced by new bulwarks about 3½ to 4 feet high; the space between these bulwarks and the spar deck is open. The top of the bulwark was distant between 7 to 8 feet from the water when the *Sir John Lawrence* had a full complement of passengers and full cargo when she had a draught of 13 feet; the bulwarks were seven or eight feet out of the fathom. We did not get any very heavy weather on the last occasion. I was in the *Sir John Lawrence* in ordinary monsoon weather; the seas broke into the main deck—heavy seas. I have seen the passengers wetted through. I have seen six inches of water right up to the saloon door and the passengers lying in it. I have never seen passengers injured by the force of the sea. The sea would just douse the passengers and nothing more. If there had been a storm all the passengers on the spar deck would have been sent down on the main deck, and if the main deck had not sufficient room the passengers would have been sent on to the between deck; if they stayed on the spar deck they might roll over board. There was an iron rail, there was strong netting between the rails; these rails were pretty shaky through the lascars walking along them necessitated by the crowded state of the upper deck. I have seen ballast taken out of the ship to lighten her. I found the *Sir John Lawrence* rolled a great deal more on the second occasion I was in her than she did on the first. There was an awning over the spar deck. There were curtains when the weather was unfavourable; the curtains were down there were no curtains or anything else to cover the spaces above the bulwarks on the main deck. Captain Irvine was not always a sober man. I have not seen him the worse for liquor when on duty. I have seen him asleep when on duty. I have not seen him asleep when coming by the James and Mary. There was no counting of passengers when shipped in Calcutta. They would generally start coming on board at 5 p. m. in spite of an order occasionally given by the Captain that they should not come on board till 7 or half-past 7; some used to get on board and others remained in boats, about 50 to 60 boats alongside. There was no showing of tickets when they came on board. Those that did get on board from the boats got in by the ports or up the gangway ladder. The Captain used to collect the tickets while the steamer was going down the river. After we had gone a good way down about 10 or 11 o'clock, a good many of the passengers had no tickets—money was taken, the price fixed for the trip: this price varied in different trips. The Captain issued no tickets. There was no one to check the amount which the Captain took. I never saw any of the European officers of the river police on board the *Sir John Lawrence*. I am not aware of any attempt or pretence made by the police to count the passengers who went on board at Calcutta. In Chandbally the passengers were counted when we got there. Stage planks were placed from the jetty, five or six planks, about a foot broad each, were placed side by side, a policeman stood either at the end of the jetty, sometimes in the steamer a native officer, and counted the passengers as they went ashore. There was no order kept. They were allowed to scramble ashore over these planks in any order. It was difficult for the officer to count them, but I think he was able to count them. I am not aware that Captain Irvine was ever fined for carrying excess passengers. I have myself seen twelve to thirteen hundred passengers on board. The police officer at Chandbally would be able to count them. I believe on

one occasion we did go to sea when the storm signals were up. We thought we would have very bad weather. I did not talk to the Captain about it. We did not think it prudent on the part of the Captain going out to sea on this occasion. I cannot remember whether we had many passengers on board. Mr. Young accompanied by Mr. Bushby or Mr. McKellar when they came into the engine-room for survey. Mr. Young gave me no directions to keep silent when the surveyors were on board. Nor did he even tell me to mention anything that might be wrong with the machinery. It is a practice with all ship engineers to answer any question which may be asked, but to volunteer no information.

JOHN LEECH.

Court adjourned till to-morrow, half-past 12 p.m.

C. H. REILLY.

The 26th July 1887.—Examination of witness John Leech continued to Mr. Kilby.—Mr. McKellar when he used to come down and examine the engine-room used to do it satisfactorily, by that I mean thoroughly, but as regards the condenser Mr. McKellar would not be able to find out what was wrong with the condenser unless he was told. I did not tell him. I heard no one else tell him. The condenser had ram pumps. The chambers in the condenser into which those ram pumps worked were eaten away by galvanic action; we had to put in copper pipes and the rams worked in these copper pipes, the seating of the suction valve of the after circulating pump had no landings to bolt the seatings to the landings. The landing or cast iron flange was all corroded and eaten away, so that we had to fix brass flanges in its place, cutting away what remained of the rusty cast iron flange for that purpose. These defects did not endanger the safety of the ship and was not detrimental to the working of the engines. They gave us a good deal of trouble. We had to keep rectifying it constantly. Mr. Bushby's survey also was a thorough survey. I wish to correct a mistake I made yesterday, the boat which was sent on board the *Sir John Laurence* on her return from Chandbally after the collision was one belonging to one of the Inland River Steam-boats. I also wish to say that during our bi-weekly service we had four coal trimmers on board and during the tri-weekly service we had six coal trimmers on board. I also omitted to mention a store-keeper.

To Captain de Smidt.—I was Chief Engineer on board the *Sir John Laurence* between 1874 and 1877. When I first joined her we were put on the Chandbally trade. Messrs. Macneill and Company were agents to the ship at that time. She was chartered by the British India Steam Navigation Company; she was afterwards employed and was run between Calcutta, Chittagong, Akyab, Kyauk—Phyu and Sandoway. Throughout the time we were employed in the Bay of Bengal and on the west or Malabar coast. I was Chief Engineer again from 1884 to 1886, I was not in Calcutta in 1883. The *Sir John Laurence* between 1884 and 1886 was surveyed twice in dock. The *Sir John Laurence* was not scaled inside on either of these surveys, she was scraped outside. I never went out on the dock and examined the bottom. I have, however, been at the bottom of the dock working at the steamer's propeller, when I could see the bottom looked staunch. I believe the pinties were changed. I cannot say whether at the first or second time we went into dock. I examined the roses of the sea connections, they were all in perfect order. The bolts of our sea connections were all right, I examined them myself. I never examined the cement at the bottom of the boilers. The after scupper on the starboard side leading through the after hold to the side of the ship was leaky. I on one occasion took down a Mr. Gill, the out-door foreman of Messrs. John King & Co to rectify the scupper. When we got down into the hold we found Captain Irvine there with a lascar busy cementing the scupper. Gill looked at the scupper, the cement was on it and said—"If I were you, Captain, I would do nothing more to it, the cement will get as hard as iron." I said the *Sir John Laurence* was not staunch when I joined her in 1884 because the plates of the fore peak were corroded and thin. Previous to the date of the collision I heard no one speak about the thinness of the fore peak plates. I did not examine the plates of any other part of the steamer. I am aware that our sea connections bolted on to a plate only $\frac{1}{4}$ th of an inch thick would be attended with great danger; knowing this I did not think it necessary to examine the plates to which the sea connections were bolted. The surveyors never examined the sea connections, none of the bolts were taken off in their presence. I never at any time saw the surveyors test or bore any of the plates of the *Sir John Laurence*. When the surveyor came down into the engine-room he went first to the boiler, everything is open and ready for inspection. He went first into the furnaces and examined the crown of the furnaces, then he goes into the combustion chamber, then he comes out and goes into the boiler through the manhole. The cylinder covers are taken off, we do not disconnect the piston, but the surveyor looks to see whether the cylinder is smooth and not scored. Then he examines the slides, then the journals of the shafting, the condenser doors are open if he wished to look inside. It would not have been possible for the surveyor to have noticed the defects, I have mentioned in the condenser unless I took the sealing off. There was no other ventilation except small port holes on the main deck; there are no ventilations whatsoever in the between decks. I heard of no deaths occurring through suffocation or over-crowding on board. I could not tell you whether the upper deck was covered with a double awning. I do not know whether the railings and string netting was strong enough and is sufficient protection to the passengers in bad weather. The railings were loose and the string netting were no doubt rotten though I did not examine them. All the time I was on board I heard of no trouble with the windlass, the messenger

chain once parted and we had to work the capstan by hand for a short time; it might have been for a trip or two. There was a new gipsy given us, but the messenger chain was bad. I have no knowledge of the scantling employed in building a ship.

To Mr. Treloarney.—I never had any difficulty about stores as long as Mr. Young was there; whatever I indented for I got.

To the President.—I discovered that the *Sir John Lawrence* was more crank than she was when I first became acquainted with her 1874. Mr. Taylor, the Acting Superintending Engineer to Messrs. Macneill and Company, himself examined the hole in the plate made by the collision, he ordered me to cut the "ragged edges off." There was no conversation between Mr. Taylor and Mr. Bushby in my presence about the condition of the fore peak plates. In my opinion the plates should have been taken out. There was no condenser on board in 1884. During the time I was on board between 1884 and 1886 nothing occurred during our frequent voyages to and from Chandbally which led me to suspect that the ship was not in other respects sound and of a seaworthy condition. As far as I can recollect the port anchor was always used. I do not remember the starboard anchor being used. There were four scupper pipes as far as I can remember. I cannot tell whether the other three scupper pipes had been cemented or not. I cannot tell what the condition of the cast iron lip guard was on the outside of the scupper. I took Mr. Gill to see. Mr. Neustein was on board with me about ten months. Mr. Neustein and I had frequent conversations about the condition of the ship whilst on board. I have had nothing to do with Neustein since I left the ship. Mr. Young indeed gave me to understand that it was through Mr. Neustein I was dismissed. I told Mr. Neustein about the thinness of the plates in the fore peak. I can remember both Captain Irvine and Mr. Neustein speaking to me about the state of one scupper. I can swear that Mr. Neustein never complained to me about the other three scuppers. I can swear Neustein never spoke to me about the band of the bowsprit or the bobstay or the bowsprit shrouds. I do not remember Neustein saying anything to me about the condition of the starboard side of the windlass. On the morning of the survey held in April 1886 Mr. Neustein called my attention to the fact that the two after boats had not been lowered into the water. He said, "Is this what you call a survey?" they lowered the two new life boats into the water and would not lower the other two. The main deck pumps were connected with the sea and the bilge in 1874; in 1884 there was no sea connections. The shaft of the after pump was discovered broken and had been lying in that condition for a long time. Mr. Hannah, the chief officer, discovered this, I sent it ashore about a couple of months after the discovery. A new shaft was made and fitted to the pump. Some portion of the forward pump was also sent ashore for repair by the chief officer, either Mr. McDonnough or Mr. Neustein. I have read the rules attached to Act V 1862, which indicate the nature of the examination to be made by the surveyor of the engine-room and machinery thereon, and I say that with the exception of the condenser the surveyors who surveyed the engine-room and machinery on board the *Sir John Lawrence* on the four occasions, I was there did their duty thoroughly, and quite in accordance with the requirements of those rules. With respect to the condenser, if I had been in their place, I should have insisted upon having all the valves taken out, and also the ram pumps; this was never done on any of the four occasions. I was present at the survey. Mr. Young was aware of the condition of the feed and bilge pump chamber, and the seating and landing. Mr. Young was present at the first, second, and fourth survey. Mr. Taylor was present at the third survey. My repair was only a makeshift, nothing more, the chambers wanted fresh boring, and a proper tube put in. To do those repairs properly the vessel would have to lie up a week or ten days, it might be more. This repair ought to have been done when the steamer was thoroughly repaired before I joined her. During my time the ship was not laid up for repairs. If these makeshift repairs of mine had given way, it might have resulted in the breaking of the pump rod. The engines would have to be stopped long enough to enable that pump to be disconnected. This would take quarter of an hour. I should then have to work with only one pump. This would not have caused any loss of power. I don't know whether the *Sir John Lawrence* is classed at Lloyd's.

Cross-examination to Mr. Orr.—I was dismissed from the service of Macneill & Company. This was the letter which dispensed with my services. Letter put in and marked (4). I had no communication with Mr. Neustein in September or October 1886; he came over to my house in January 1887. Since January 1887 I have had nothing to say to Mr. Neustein, nor has Mr. Neustein said anything to me within the last two months. I have had no conversation with Mr. Neustein about this enquiry on the nature of the evidence to be given here. I have had no communication with Mr. Neustein through others. I have spoken of this enquiry with my relations, but with no one else. The bridging over the space between the poop and the bridge deck are one of the alterations I noticed when I rejoined the *Sir John Lawrence* in 1884. My estimate of the length was a guess. It may be nearer 20 feet than 60 feet. I cannot form any idea as to the added weight given to the vessel by this alteration. Before I joined the *Sir John Lawrence* in 1874, I believe she had been running with pilgrims between Bombay and Jeddah. When I joined the *Sir John Lawrence* first she had a saloon under the poop; apart from the saloon she had houses on the fore part of the main deck, between the fore hatch and the middle hatch; there was one cabin for the Chief Officer, one for the second Officer, one for the Chief Engineer, one for the second Engineer, and one for the third Engineer. These cabins were all on this house. They were so small that in my cabin I could not lie with my legs stretched out. There were no other houses that I remember. Two water-closets

were added by the British India Steam Navigation Company when we were running for them. There were two store-rooms on the starboard and port side, respectively, near the fore-castle.

JOHN LEECH.

The Court adjourned till to-morrow at 2 P.M

C. H. REILLY.

The 27th July 1887.—John Leech.—Cross examination continued to Mr. Orr.—The officer's house was on the spar deck, the water-closets were on the main deck, the store-rooms were in their old places when I rejoined the ship in 1884. The water-closets had disappeared; the officer's house on the spar deck has also been removed. I cannot estimate the difference in weight which would be caused by the removal of the officer's house. I cannot estimate what weight would be added to the vessel by bridging the space between the poop and the bridge deck. The donkey boiler was on the port side of the stokehole in 1874. It occupied much the same place—perhaps the difference of a few feet—in 1884. It was on the same platform as the stokehole. I can't say what the weight of that donkey boiler would be. There was on the spar deck under the bridge a small room called the chart room: it was made by the carpenter while I was on board. The steamer in 1874 had a saloon, the same as she had in 1884. The saloon in 1884 was some feet smaller than what it was before. The saloon had one main entrance. The saloon was shorter in length—about five to six feet. There was no other alteration with respect to cabins on the main deck. In 1874 the *Sir John Lawrence* had three masts and yards on the foremast. In 1884 she had no yards on the foremast. I am not a nautical man, but taking down her foreyards would make her less top-heavy. I can't say what kind of a bowsprit the *Sir John Lawrence* had in 1874 nor in 1884. The new bulkheads in 1884 were not more than four feet high. The cargo ports on the main deck were always shut: they were wedged up by the carpenter. There were scuppers. The coal bunkers were three in number in 1874. They were ranged on the three sides of the boiler. You could walk round them inside. There was a bulkhead between the boiler and the thwart ship bunker. The bulkhead did not extend right across the ship. At the after end of the side bunkers there was a partition bulkhead separating the boiler space from the engine-room. In this partition bulkhead there were doors leading into the stokehole. When I rejoined the ship in 1884 these doors and the side bunkers had disappeared with the bulkhead. The coal bunker bulkheads were extended on each side till it touched the side of the ship. The result was the bulkhead abaft the boiler was taken away, bodily and the coal bunker bulkhead extended till it reached the side of the steamer. The only occasion when I examined the plates of the ship was the day when I assisted to patch the hole made on the starboard side of the forepeak by the collision with the *Indore*. I was down there the whole day in the forepeak, not the fore-castle. The hole was four feet above the water line; the hole was below the main deck; the crew live in the fore-castle on the main deck; the hole was below the fore-castle. Mr. Bushby came alongside, about the length of the room away from the side of the ship; he was in a steam-launch. I heard Mr. Bushby give no orders. I was on the fore-castle at the time. I don't know what is meant by the superstructure of the vessel. The leak would be up to the main deck. The thick plate which runs along the side of a ship is called the sheer strake. I learnt this lately. The hole must have been below the sheer strake. There were port holes in the saloon. This hole was below the line of those port holes. I saw the steamer that collided with the *Sir John Lawrence*. I saw the collision take place. I was on the main deck standing by the engine-room door. I can't tell you what part struck. I was not forward enough. We went into the *Indore*: she was at anchor. We struck the *Indore* and cannoned or bounced off. The plate put over the hole was a quarter of an inch thick; they had no difficulty in punching the holes. They were punched with a round-nosed chisel; the ratchet was not used. The plate was too thin for that. I did not measure the thickness of the ship's plate. I don't remember whether I told Mr. Neustein that the ship's plate was so thin it was with the greatest difficulty I got the plate on. I can't swear one way or the other. The statement about the plate made to me by Mr. Taylor was made the day after our return from Chandbally: the rivets were put on, or rather begun to be put on, on that day. I did not supervise the work. It might have taken half a day to a day and-a-half. The frames may have been two feet apart in the forepeak. I did not measure the distance. I did complain to Mr. Young about the condition of the condenser. I showed him the old tube, not fit for use, which was replaced by the new one made by John King and Company. The chambers of all four pumps were in a bad state. They all had pipes in them. It was very nasty for a bilge pump to be discharging condensed water over board through leakage. The pipe would not last long, and had to be constantly renewed. I can't tell you how much coal the *Sir John Lawrence* burnt. It is nine months since I was in her. She used Rancegunge and then Assam coal. She used more coal than she ought to have done for a ship of her class. Mr. Bushby must have done all the deck surveys. I did not take particular notice of the state of the covering boards. The rails on the spar deck, before the Captain's house, right away forward, on both sides were loose. I don't mean the rails on the poop. I can't account for the increased rolling in the ship in 1884. I saw Captain Irvine asleep on duty when we were coming up the river. I have seen him asleep more than once on duty. The Chief Officer on these occasions was on deck—not on the bridge. The Chief Officer was doing nothing in particular; he was walking. I did not count the 1,200 to 1,300 passengers I spoke of. It is not my place to bring the state of the condenser to the notice of the surveyors. The surveyors never on any

occasion asked me if there was anything in the ship which required their attention. I don't think it was part of my duty to bring the state of the condenser to the notice of the surveyors. The Superintending Engineer answers all questions the surveyor chooses to ask. I am not spoken to. If I am asked, I answer. It is not my business to point out defects. I had never been forbidden by the Superintending Engineer to speak to the surveyors.

Re-examination. To Mr. Kilby.—The letter No. (4) talks about a "false" statement sent in by me as to the quantity. There was an error in the account—an unintentional one. We received a certain amount of coal which lasted us five trips. At the end of five trips I should have had 200 maunds remaining, whereas I only had 60 maunds. I mentioned this to the Captain and also to the Chief Officer. I also told them that I had my bunkers cleaned out and painted. I arranged the coal 30 maunds on each side of the stokehole: it was Assam coal. I was 140 maunds short on Monday morning. I was down the engine-room at work. The Mate came to me and said the Captain had been sent back by the office to bring the coal statement. I immediately came out of the engine-room and went to my cabin and washed my hands and started to make it out on the one column. I put down consumed by engines so much: the remainder I put down in the next column as remaining, whereas I ought to have had another column—deficient. I did not know anything at all about this mistake. The Captain took the coal statement to the office, and I heard nothing more about it till the Tuesday morning, when Mr. Young came on board to see the coal bunker. He found this 60 maunds on each side of the stokehole. He went into the bunker and found it cleaned and painted. I was on shore at the time and did not know that Mr. Young had been on board till my return. It was then told to me by the second engineer who saw that Mr. Young had told him I had made a mistake in my account, and that he had come on board to see how much coal I had on board. I wrote a letter to Mr. Young to explain; when I came back then I received my discharge. I had probably used more coal over the five voyages than I actually put down; the coal was dusty Assam coal, and therefore very hard to judge the daily consumption; the coal was given me as a trial. The real reason of my discharge was not connected with the coal incident—that was only a pretence. Mr. Young told me that Mr. Neustein was the cause of my dismissal; that Neustein had stirred the Captain to go to the office and make much of the mistake. The real reason why I was dismissed was economy. Two months previous to my dismissal there were rumours that Mr. Ogg, second engineer of the *Medina*, was to get my place in the *Laurence* on Rs. 200 a month. My pay was Rs. 300. This rumour proved true, for Mr. Ogg was appointed in my place: he had just passed as Chief Engineer. I had great trouble to get this certificate. Mr. Young put me off from time to time he eventually told me that he would have given me one long ago, but he was told by the office people not to do so, as they were afraid I would take them to Court. I told Mr. Young I had no intention to take the office people to Court: I never had any such intention, as I knew which side my bread was buttered. I then got this certificate put in and marked (F). I was under articles to serve up to the 31st December. I left on the 25th September. Mr. Young accused me of being in league with Neustein. As a matter of fact I had nothing to do with Neustein. I could see that he meant in respect of the letter Neustein was writing. Mr. Young was pumping me: I could see that. If I had taken upon myself to point out defects on board to the Surveyor, I would not have been one hour on board: I should have been instantly dismissed. This would have been in any Company, the India General for instance; they would not give that as a reason, but I should have been dismissed. Mr. Ogg was appointed in my place on Rs. 200 a month.

To Mr. Orr by permission of the Court. These are my indents, the bundle marked 5.

JOHN LEECH.

Court adjourned till tomorrow, the 28th July.

C. H. REILY.

The 28th July 1887.—James Oliver Thorpe.—Sworn Saith to Mr. Kilby.—I was third engineer on the *Sir John Lawrence* from March 1885 to January 1886. I was on board the *Sir John Lawrence* at the time of the collision with the *Indore*. A hole was knocked into the fore part of the *Sir John Lawrence*. I helped to mend that hole, the hole was in the fore peak below the main deck on the port side: I am not exactly sure. The right hand side is the port side: the hole was on the right hand side of the steamer: the hole was about four feet above the water when I mended the hole; the hole was about 2 feet square. The collision occurred in the morning when we were going out. We came back to Garden Reach to have the hole patched up. I and the second engineer, Mr. Turner, clipped off the ragged edges of the hole. Mr. Turner went down in the *Sir John Lawrence*. The thickness of the plate was between $\frac{1}{4}$ th and $\frac{1}{6}$ th of an inch: a bolt patch was put on. Mr. Henderson, in charge of Messrs. Macneill's workshop, put on the bolt patch. We proceeded to sea the same afternoon for Chandbally. When we came back a rivet patch was put in the place of the bolt patch. The surveyors came on board after we had put on the bolt patch. Mr. McKellar—I do not remember exactly whether Mr. McKellar went down into the fore peak. I can say nothing as to the thickness of the plates in any other part of the skin of the ship; I saw nothing wrong with the tunnel casing. The steamer did not leak in my time. The pumps were never used to pump out the ship to my knowledge. I know nothing about the condition of the ceiling. I remember a boat which would not swim; it was returned to the yard and we got a new one in its place. I do not remember how long that boat that would not swim remained on board.

the steamer. During poojah times there is always a big crowd of passengers on board the *Sir John Lawrence*; during these occasions the passengers walked about and had room to circulate. There was not room to lie at full length. After we had started some of the passengers on the main deck would make their way to the spar deck. To prevent over-crowding and interference with the movement of the crew these passengers were sent down again to the main deck: there was no difference in the fare for passengers on the main and spar deck. I am aware that main deck passengers have a right to stay on the spar deck. I never exactly noticed whether the crowd on the spar deck was too dense to prevent the crew working the ship. On the main deck the passengers occupied space from the foremast to the mizzenmast, the main deck was closed up from forward till near the engine-room. There were bulwarks about five feet high, the spar deck was about 10 feet from the main deck, the opening above the bulwarks was about 3 feet. I have been in the *Sir John Lawrence* in monsoon weather; the seas broke in through the open space above the main deck bulwarks once in a way. I have seen the seas break on when there was a big crowd of passengers on the main deck; there were woman and little children among the passengers. I never saw any of the passengers injured by the force of the sea. Captain Irvine was about 60 odd years of age.

To Captain deSmidt—I never saw any of the rivets or bolts leak in my time. I never saw any of the rivets taken out; I never heard any one speak about the plates being very slight; the engines never gave us any trouble during the voyage. We never had to lie to on the way to Chandbally or back on account of a defect in our engines. I do not remember having anything to do with a defective condenser. It is my duty to make myself acquainted with every part of the engines. I saw nothing defective about the condenser. I saw it opened, not exactly in perfect order; it was an old condenser, there were no new tubes put in my time.

Cross examination to Mr. Orr.—I did not measure the thickness of the plate.

To the President.—I do not hold any engineering certificate. The *Sir John Lawrence* was the only steamer I worked on as engineer, before and after that time my duties have been always on shore. I am now an assistant at the water-works. I left because I wanted more pay and they would not give it to me.

JAMES OLIVER THORPE.

Henry Lindsay sworn saith to Mr. Kilby.—I am a foreman, in the Rivers Steam Navigation Company. Messrs. Macneill and Company are Agents of the Company. Mr. Young is the Marine Superintendent. I remember Mr. Young ordering Mr. Neustein to have wooden templates made for the lip-guards to the scuppers: these lip-guards were made of cast-iron, I think at Messrs. Burn and Company. At the second survey Mr. Bushby and Mr. McKellar came on board and examined the scupper pipes, all of them. I was walking round with the surveyors. They said the scupper pipes were all right, and that the new lip-guards need not be put on. Mr. McKellar said this. Mr. Neustein had left the ship. Just before Mr. Neustein left there had been a survey while the ship was in dock. Shortly after Mr. Neustein had left there was a second survey. It was on this occasion Mr. McKellar said the new lip-guards need not be put on. I once put a patch on the *Sir John Lawrence* on the port side: this was in October last: it was a small patch on the port bow. The hole was a slit about 4 to 5 inches long, about an inch and a half wide. The plate was a quarter of an inch thick. I know nothing of the thickness of the plates of the *Sir John Lawrence* except what I have mentioned. I have been in the Rivers Steam Navigation Company's service since 1871.

To the President.—I repaired the windlass; that was after Mr. Neustein had left. It was in October. There was a bracket broken at the bottom, and the whelp was jammed on the shaft I put on a new bracket. I repaired the winches. I took the windlass to pieces, the whelp was jammed on the starboard side. I took the windlass to pieces while the ship was in dock; the orders were that the vessel should come out of dock, so I put back the windlass as it was before. The ship came opposite Koila Ghat. I then a second time took the windlass to pieces and put it right. I was ordered to mend the windlass the very morning Mr. Neustein left the ship. I put it right that very night. I took it down in the afternoon. The oil hole was jammed, that was all that was wrong with the windlass. This list No. (1) was given to me by Mr. Young when Mr. Neustein was still on board. Mr. Young told me to carry out all the repairs mentioned in list (1). I did the repairs indicated in items (2), (9), (13), (21), (22), (23), (4), (14), (17), (7), the gipsey which works the messenger chain (it purchases the anchor by steam) was worn. A new one was made by Burn and Company, and put in after the first trip the vessel had after the survey. The steamer made one trip with the worn out gipsey. I fitted in the new gipsey myself. I left Messrs. Macneill of my own accord in April for an appointment on board a boat making voyages, there was no vacancy. I then left Messrs. Macneill's service for about two months. Mr. Young took me on in June, on the 9th June, and I am now in their service.

Cross-examination to Mr. Orr.—I first joined the workshop at Garden Reach on the 18th September 1886. I went on board the *Sir John Lawrence* in September and October that year before she went into dock. Once or twice I was sent by Mr. Young on board. He sent me to the Chief Engineer to see if any work was to be done. When I went by myself I saw Mr. Neustein on the poop. Mr. Neustein never spoke to me, never came near. Mr. Neustein never spoke to me about the state of the scupper pipes. Mr. Neustein never drew my attention to holes in the scupper pipes made by boat hooks. In 1885 I was second engineer of the steamer *Behar*. This is the letter which I wrote to Mr. Young, letter put in and marked No. (6). No one had drawn my attention to the state of the windlass before I saw it when the

ship was in dock. It is the Chief Officer's duty to look after the windlass and see that it is kept in order. The windlass was dry; there was no oil at all. The windlass had been neglected, not looked after.

To Captain deSmidt.—I did work at suction valve and seating of the after circulating pump. The cast iron grating was broken; there was a brass grating on. Mr. Young went on board, examined and condemned the old brass grating. He ordered the Chief Engineer to make a tem-plate, one in two halves, and angle iron all round. The grating was broken by pressure of water, not worn. The middle part of the seating was all broken; the side flanges were all right. There was left an inch of metal on the side of the landing; the middle part was broken. All the pumps in the condenser were renewed in dock. I put a copper pipe into the feed pump chamber. A new brass grating was put in. After these repairs the condenser worked all right. Mr. Young sent me on board to enquire if the condenser was working all right. The Chief Engineer said "Yes, no trouble." The landing was left as it was broken. A false brass grating put over the old landing.

HENRY LINDSAY.

Niel Macdougall sworn saith to Mr. Kilby.—I have been on board the *Sir John Lawrence*. I am a foreman carpenter. At that time I was in Macneill & Co.'s service. It was part of my duty to go on board the *Sir John Lawrence*. When sent I saw the ceiling of the ship; it was in very good condition; it required repairs. I was sent by the Superintendent for to repair it the last time the ship was in dock in October 1886. Some of the planks were gone and required replacing. This was in the fore hold. I saw the plates of the ship in the fore hold and the frames; they seemed in fair condition. I noticed no rust. The ship was thoroughly repaired in 1884. The ceiling was repaired in 1884. Most of it was new. I cannot say whether the part I had to renew was old or new ceiling. I put on the covering boards of the spar deck in 1884. I put the ceiling on in 1884. I was then in Macneill & Co.'s service. The covering board planks were all new except a piece round the quarter round the stern of the ship. I did not see any of the stanchions were loose. I did have a look at them. The gangway boards were morticed into the covering boards. I cannot say whether they were slack or not. I saw a boat on board which would not float when the ship was coming out of dock the last time. I do not know whether this was before or after the last survey.

Cross-examination to Mr. Orr.—I went into the fore peak, the last time the ship was in dock I did not examine the plates or the frames. I was working under Mr. Young when the *Sir John Lawrence* was repaired in 1884. I saw the main deck laid and the upper deck laid; the portion from the bows to the cabin 'was new, the upper deck was all new, the covering boards were of teak-wood. I did not see any of the stanchions loose. The rigging is fastened to chain plates rivetted to the outside of the ship. I cannot remember whether the rigging passes under or over the top rail on the open deck; it went outside a part of the rail. I could lean against the rails with safety. I was not afraid to lean against them. There was a rope netting painted over, that was all done after the ship came out of dock in 1884, the netting was made of new material. I did not see anything wrong with the netting when I was last on board. The covering board and the stanchion ought to last fifteen or twenty years. I cannot say how long the netting would last. That boat which would not float was taken away to the yard, another boat was sent to take its place; this was in October after the ship was in dock. A new boat, a gig, was sent to replace the old boat. I left Macneill and Company's service in January last. Up to that date I did not see the new boat come back to the yard: they were chipping the hull of the *Sir John Lawrence* when I was working on board of her in 1884; the chipping was going on all round the hull of the ship inside; the inside was painted after the chipping. I cannot say whether anything was done to test the thickness of the scantling. I saw some of the ship's plates drilled through; that was in 1884. I have seen this done in the fore-castle when I was putting in the hawse chocks; they were bored for the fastenings of the hawse chocks, the plates were about $\frac{3}{8}$ ths of an inch thick to half an inch. I did not measure the thickness.

To Captain deSmidt.—Everything was taken out of the ship amidship at the time of the repair of 1884. I cannot say whether cement in the holes had been removed. I cannot say how many plates were taken out of her and new frames put into her. There were some new plates put in about the engine-room. If water got in between the stanchion and the wood work, the latter would be apt to rot, and then the stanchion would not last so long: the stanchion was driven right through the waterway; the bottoms of the stanchion were fitted to plates which with four screws were screwed down to the waterway; there were two bolts and two screws to each stanchion.

To Mr. Kilby, re-examination.—I could see the men working at the chipping—native men; they scraped and chipped.

N. MACDOUGAL.

George Adolphus Robertson sworn saith to Mr. Kilby.—I am Superintendent of the Port Police; it is part of my duty to see that passenger ships carrying passengers to Chandbally are inspected. It is the duty of the native officers to go alongside the vessels in their police boats, to remain alongside from the early evening till the vessel leaves port the following morning, to count the passengers embarked, and the following morning after the vessel leaves port to give in their report, the time that each of the steamers left

their mooring, the number of passengers carried, and to report any accident, if any, occurring during the embarkation. The report is made to the Inspector of the division. The Inspector notes the information in his daily register of cases, and it is part of his duty also that during the night immediately to the early morning when the steamers leave their moorings, to see that the native officers of the police are alongside the vessel, and are on the alert. I have never prosecuted any of the steamer captains for having too many passengers on board. The duty of counting passengers falls upon the sergeant of Police on Rs. 35 a month; he, however, can only attend to one ship; the other two passenger ships which start at the same time have their passengers counted by a corporal on Rs. 10 or Rs. 12 a month. During the Dole Jatra and the other three or four festivals in the year, the rush of pilgrims for Juggernath is very great. On several occasions it has been reported to me that the maximum number having been reached, no further passengers were allowed to go on board. There is only one Inspector,* Mr. Driscoll, for that division. There were no extra precautions taken by the police on the occasions when the rush of passengers were great, except that the inspector visited the police boats oftener in the night. When the rush of pilgrims is great, the passengers begin to go on board about 6 P.M. before sunset. They continue going on board till the moment the vessel leaves. The police never go on board the vessel at all. The Inspector may do so; there is a light all night on the gangway; there is only one gangway. A big country-boat is placed alongside the gangway as a landing stage; the passengers coming in smaller boats are embarked on the stage of the big country-boat, the police usually only remain on the big country boat. I have seen this. I have visited the spot at various times throughout the night. I usually found my police officer on the big country boat. The passengers are counted by the dinghy load. Most of the boats carry ten passengers, two boats carry twenty, and four or six fourteen. The passengers in each boat are counted, and then the boat is tallied by a stroke. Those tallies have never been checked or their accuracy tested during the 13 years and seven months I have been Superintendent of the river. I have found that the vessels seldom could get one half the number of their passengers, except on festival days, when they would get about the full complement. I also know that the passengers would have to be checked again at Chandbally, where there is a landing stage, and more easy to count them. I did not test the accuracy of the counting on festival days, when the rush was great for that reason. I had every confidence that my men did their duty accurately. I have never been to Chandbally. On the 25th of May the following entry occurs in the register case book, No. 1356:—The S.S. *Curlew*, *Tyrone* and *Sir John Lawrence* left port at 4-55 A.M., 5 A.M., and 5-10 A.M., with 573, 886, and 735 passengers, respectively, for Chandbally. The *Sir John Lawrence* was licensed to carry on that occasion 735 passengers; she therefore had her full complement on board. The counting officer was Corporal Sahadeo Tewarry; his salary is Rs. 12 a month. All three steamers had their full complement of passengers. It was reported that passengers had been refused admission on all three steamers.

G. A. ROBERTSON.

Case adjourned till tomorrow at 12-30.

C. H. REILY.

The 29th July 1887.—George Adolphus Robertson. Examination continued to Mr. Kilby.—The police officers counting the passengers on board the *Curlew* was Sergeant Ram Golam Singh, and Corporal Mungli Khan counted the passengers on board the *Tyrone*; that is how I understand the report. Ram Golam gets Rs. 35, and Mungli Khan Rs. 16 a month. I cannot say when the large country boat used as a landing stage goes alongside. I have seen it lowered the evening after sunset alongside. The gangway ladder is down all day. There is nothing to prevent native passengers from going aboard before the country boat goes alongside. In former years I used to see a crowd of small boats all round the vessel mostly towards the evening, and when there would be a rush of passengers, men with tickets have come to me on the day following the starting of the steamer, and have shown me their tickets, and have complained to me that they had not been allowed to go on board, although they had these tickets. From this I infer that persons without tickets must have been admitted on board before the passengers with tickets went alongside. People with tickets have an idea that they can go on board up to the moment before the steamers. When they get alongside they are often unpleasantly undeceived. I have known instances when boat loads of passengers have been turned away from the side of the ship between the hours of 3 and 5 P.M. The ship people I believe prevented these boats going alongside. I have seen boat loads of passenger start for Koita Ghât and after a while return in the same boat. Some of them have complained to me that they had not been allowed to go on board, although they had tickets, but had been told to return later on in the evening. I have not known of instances where boats have been allowed to transfer their passengers on board the steamer before the time. During the Gunga Sagar mela passengers go on board the steamer from all points in the port of Calcutta. They even go, hundreds of them, by train to Diamond Harbour to catch the steamer there. These remarks do not apply to the Chandbally steamers.

To Captain de Smidt.—I do not think boats go alongside on their own account while the vessel is in motion. The country-decked boat used as a landing stage has been in use for the past two to three years.

To the President.—There is an order that passengers arriving from Chandbally should be counted before being allowed to disembark. This is done on every occasion. It is recorded

in the same way. The passengers are counted by the boat-load. It would be impossible to count by the heads. We discovered that boat-loads of passengers were landed at Garden Reach. I issued a proclamation forbidding this, and we have prosecuted boat manjees for breach of the rule. The boats whose duty it is to count the passengers await the arrival of the steamers at Koila ghat. The police at the Hastings thana have orders to arrest any boats attempting to go alongside while the vessel is still in motion. Some passengers may occasionally get ashore before the steamer brings up at her moorings. The matter of counting passengers was considered by Sir Stuart Hogg, at that time Commissioner of Police. Having knowledge, he wrote to Government suggesting the sending a police officer on board each steamer during her voyage to and from Chandbally. At present, I consider, I do the best I can with the materials at my disposal. The labour of counting the passengers can be much more efficiently done, especially if the steamers were compelled to take their passengers on board over a landing stage. When the tide is strong, it is, in my opinion, positively dangerous for passengers to be taken aboard in boats. I can only remember one or two cases where deaths have been reported to me. I have heard that the body of a passenger, if he happens to die on board after the vessel started for Chandbally, would be thrown overboard.

Cross-examination to Mr. Orr:—I don't believe that six bodies could be thrown overboard between Diamond Harbour and the Garden House without the matter being reported to the Port Officer. The crew would talk about such an occurrence if it ever took place. It would not be possible for boats to come alongside and discharge their passengers through the port holes without the police knowing of it if their boat happened to be there. Mr. Neustein came to me in September 1886: he talked to me about the prosecution I had instituted against the *Sir John Lawrence* for starting before daylight in December 1885. Mr. Neustein said to me that he was now prepared to give evidence against the steamer in any future prosecution which I might take in hand. That on the previous occasion he had given evidence on behalf of the steamer, and that he had sworn that it was daylight, and that he could see for miles: he was now prepared to assist the prosecution. I thereupon said how about the log, because in 1885 Neustein had produced the log as written by himself. To this Neustein said that he would make the log all right. His own words were, as far as I can remember—"I will suit the log to the prosecution." I said to Neustein you better clear out of this. You will be getting yourself into trouble. This interview took place about a month before I went on leave, which I did about 3rd October or the 4th October. Neustein came to me in the Police Office. It was some time in the afternoon I warned the Inspector, Mr. Driscoll, at the same time.

G. A. ROBERTSON.

Shahado Tecarry solemn affirmation, saith to Mr. Kilby. I am Corporal, Second Division River Police; my pay is Rs 12 a month. I remember the last time the *Sir John Lawrence* went out to sea. I was on duty on that day to count the passengers who boarded that vessel; for the passengers there was only one ladder, there was another ladder on the other side down for the captain's use. I went alongside in my police boat on the starboard side, close to the passenger ladder. I could not see the ladder on the port side; no boat went near the port side ladder, I can swear to this. I went alongside at 6-30 p.m. I stayed till the next morning at 5-10 a.m. I stayed there all the time. I was awake on watch counting passengers all the time. After 3 a.m., no passengers came on board. I cannot say whether there were any first class passengers or not. On the day when the passengers go on board the port ladder is drawn up, so all the passengers go on board by the starboard ladder. Before my boat came alongside there were no passengers on the ship. I went on board when I first arrived and walked around the ship to see whether there were any passengers on board. I went all over the deck. The *Sir John Lawrence* did not begin to take passengers in till half-past 8. I am quite sure no passengers went on board before half-past 8 p.m. It got dark after 7. I did not see any passengers on board before half-past 8. A big country-boat was used as a landing stage; one dinghy comes up at a time; there were a number of dinghies around. I counted the passengers myself throughout the time. I stood in the log boat all the time and counted the passengers. The *Sir John Lawrence* was allowed to carry 735 passengers. By 3 a.m. the complement was reached. Eight or ten dinghy loads of passengers went back to shore; they had been refused admission by me. They went away saying they had got tickets. They were making a noise, but I prevented them going on board the steamer. I told the seacunny when the complement was full, and the Captain ordered the ladder to be lifted up. No boatmen turned away before 3 a.m. It is not true that a boat load of 20 passengers were refused permission to disembark on board the *Sir John Lawrence* by some *sahib* at 9 p.m. It is not true that the *sahib* said at 9 p.m. It is so full that I won't let you come aboard. I did not go on board again before the steamer started. Occasionally a boat brings more passengers from the shore than she is entitled to carry, but this does not happen often. The boatmen would be arrested. When a boat licensed to carry 10 passengers comes alongside, I make a single down stroke; if any boat comes alongside containing more than 10 passengers, I make the down stroke to represent the 10, and then the number in excess to the side of the down stroke; if six passengers come in a boat I write down the six in numbers. There is no accurate account kept of the passengers coming from Chandbally. We approximate the number of passengers who arrive from the boats used. We ask the boatmen how many passengers they have on board. All the passengers come down the ladder; they also come

down any other way. They are in a great hurry to get ashore. Boats are not allowed to go near the steamer till she is fast to her moorings. I am off duty the whole of the next day. When the passenger dies out of port limits the body is thrown overboard, if within port limits it is landed and made over to the police by the Captain. Now and again a small boat brings off passengers from other ghâts, but the bulk of the passengers come on board from Koilah Ghât.

Cross-examination by Mr. Orr.—Before half-past 6 on the last occasion I saw passengers in large numbers collected at Koilah Ghât. I know the *panicalla* of the *Sir John Lawrence*. I did not see him on that day at the ghât. I have seen the *panicalla* of the *Sir John Lawrence* keeping the passengers together on the ghât. We invariably ask the officers on the ship how many passengers they brought two or three hours after the ship comes in. We do this with the double object of comparing the information with our own attempt to count, and to find out how many passengers really came in the steamer.

बहरी लाल पौल,

BEHARY LALL PAUL,

Interpreter.

Bhoobun Kishen Ghose solemn affirmation saith to Mr. Kilby.—I took thirty-three tickets for passengers in the *Sir John Lawrence* for her last voyage. Ten first class and 23 servant tickets. I went to the *Sir John Lawrence* with four women first class passengers, and one native woman servant. I went on board; it was light enough for the Captain to read my tickets. We went from Koilah Ghât, and the Captain lowered the ladder for us on the port side of the steamer and we eventually, 45 of us went up by that ladder. That was my party. They were distributed in various boats; thirty-four went on the steamer, and eleven returned to shore. I did not notice any police boat on the starboard side of the steamer. The port ladder was lowered for us by special arrangement I had made with the Captain on the Tuesday previous. We went to the port side to avoid the rush. We went on the spar deck and then to our reserved cabin in the saloon; we left the women there; I remained on board till gun fire, nine o'clock. I left at gun fire. During the time I was on board I saw many passengers. I was standing on the poop deck. I went forward also into the third class passengers compartment. I saw passengers on the top deck and the lower (main) deck; the passengers were seated so close together there was no room for another person to get between, their bodies were touching, their shoulders rubbing, the passengers were huddled together in no order. I could not get past them, though I tried to do so. I have been describing the state of the passengers in the upper deck. I looked down on to the main, it was as far as I could, quite as densely packed with passenger as was the upper deck. I did not, however, go to see. The Captain was trying to make more room on the upper deck by compelling some of the passengers to go on the main deck. The passengers were unwilling to go, he seized some by the hand and pushed them; the majority of the passengers were, women—three women to two men. I saw no children. The Sobha Bazar Rajas are my relations. When I came away there was a crowd of dinghies still round the starboard ladder. I left by the same ladder I came up. Eleven of us returned in the same boat.

BHOOBUN KISHEN GHOSE.

Lawless Mathieson sworn, saith to Mr. Kilby.—I am Assistant Harbour Master. I took the *Sir John Lawrence* out of dock in October 1886. I recollect her windlass, the whelp of the starboard side of gipsy of the windlass was jammed and would not work. I wanted to use windlass on the starboard side when moving the vessel; I found I could not do so. It is not usual to have length of the chain cable arranged on deck when the ship has a windlass of the kind possessed by the *Sir John Lawrence*. I cannot tell for certain whether there was room to so arrange the cable before the windlass.

To Captain de Smidt.—I moored the vessel with two hawser chains and two stern chains. I had 25 fathoms on my port chain, and 7 to 10 on the starboard chain. After 30 fathoms and 15 fathoms. I noticed no defect in the cable, none of the links with studs. The cable seemed in good working order not worn out the starboard side of the windlass was workable sufficiently to heave the starboard chain tight. I was doubtful about the starboard side of the windlass, because Mr. Neustein told me not to let go the starboard anchor, because the windlass was jammed on that side. I did not see anything the matter with the bowsprit, the chain was taken out of the port side locker only. I took no chain out of the starboard locker, because I could not heave it up out of the locker by the gipsy. I did not consider that windlass in a fit state for a vessel going to sea.

Cross-examination to Mr. Orr.—I do not know whether the vessel had been surveyed. I do not recollect saying to anyone that for a ship which had been surveyed she was in a rascally condition. I do not recollect making that remark to Mr. Neustein.

LAWLESS MATHIESON.

The 1st August 1887. Bunko Behary Bose on solemn affirmation saith to Mr. Kilby.—I went on board the *Sir John Lawrence* before she started on her last voyage with my brother's eldest daughter, the eldest Ranees of the late Rajah Opurbo Krishna Bahadour of Sobha Bazar and some other neighbours, one man servant and three maid servants. My three nephews accompanied me also, but they and one servant returned to shore with me. We went on board about candle light; the steamer was lighted with lamps when I went into the saloon. About 7 p.m. went up the ladder on the port side. The passengers, except the servants and some of the neighbours had first class tickets. At first I tried to get on board by the starboard ladder, I found this impossible through the great crowd of boats and people. I then ordered my boatmen, we had two boats, to go to the port side of the vessel. There was boats placed as a landing stage on the port side. I did not see whether there was a boat placed as a landing stage by the starboard side ladder. I noticed no police boat with policemen in uniform among this crowd of boats. No one tried to prevent us getting on board by the port ladder; I saw no one else except our party go up the port ladder; we came down by the same ladder. I kept on the saloon. I went up above the saloon where the servants were. I could see that the spar dock was full of people. They were packed close to each other, there was no room to move about among them. As I came back to shore the gun fired and it was nine o'clock. We started from Koilia Ghât and returned to the same ghât. I did not see a police boat near the steamer at any time.

Cross-examination to Mr. Henderson—On the previous day, I arrived with a letter from Mr. Orr, went on board the steamer and I saw the Captain, and it was then arranged that I should bring my party to the steamer on the Tuesday, and that they should go on board by the port ladder. I saw more than 20 boats on the starboard side. I can swear I saw no policemen in uniform.

BUNKO BEHARY BOSE.

Ashutosh Chatterjee on solemn affirmation saith to Mr. Kilby.—I went on board the *Sir John Lawrence* the night before she went on her last voyage; it was a Tuesday, I think, the 24th of June. We started a party of five boats to get on board at half-past 5 p.m. We went alongside the starboard side. We were not allowed to go on board. We were told to go back to the shore and come again when we were called. We went back, our boat remained alongside; my father was in that boat. It was night when the steamer whistled. Most probably 8 p.m., hearing the whistle, the four boats went again towards the steamer. The fifth boat passengers had not gone on board. We all went on board by the starboard side ladder. One party consisted of between 40 and 50 persons, men and women, of these about 30 were intending passengers, four men and the rest women. We tried to get first class tickets, but failing to do had to take deck passages. Our party were on the upper deck grouped round the foremast. I left after gun fire. There were some people on board, not very many, when we went on board. When I left at gun fire the deck was awfully crowded, it was so crowded that each person was struggling for his own place. Those who came on board first were sitting, the later ones were standing. I saw no one lying down. There was no room, so far as I could see, for persons to lie down, the persons sitting were side by side, their bodies touching. This was the state of things from the ladder to the fore mast on the upper deck. I heard frequent cries of distress, all the females were crying. I peeped down into the lower deck and saw that it was full of passengers also; they were less crowded than the people on the upper deck. I can form no idea of the number of passengers on board. The passengers were very cruelly treated by the Captain and lascars. They caught the women by the hand and pushed them along the deck. Some of the women fell during the pushing (this last answer in reply to a question by the Court) I saw no policemen in uniform in or near the ship, either going or coming. I cannot recollect whether the passengers were counted. The Captain was standing in the boat with a whip, it may have been a stick; if anybody tried to come down from the steamer he beat them with the stick. The Captain was standing on a large country-boat; my uncle told me it was the Captain, he was a stout officer.

To the President.—We took up while we were there the space wanted for 40 or 50 passengers, besides the men who accompanied me back to the shore. I did not see any person come away. None of us were stopped from going on board, because we were not going to travel on the steamer; there were only two or three boats left round the vessel when I came away.

Cross-examination to Mr. Henderson.—Only eleven of our party came ashore. More than 29 or 30 of our party went on the steamer. They had tickets. My uncle had the tickets, Jogendro Nath Chatterjee. I do not know how many tickets he had. My uncle in reply to the Captain said I have tickets, he mentioned no number. My uncle held them up in his hand; I was nearly two hours on board. There were lots of dinghies about when I went on board; when I left I only saw three or four dinghies. I did not go to the other side of the ship. I did not see anybody standing alongside the stout Captain, he was stout. I was not hurried when I went on board; as cool as I am now. The cries of distress I heard were *Bapre bachon o go; Morria geylam go; Dada cothai yello*. I heard these cries on board the steamer. I did not hear these cries before the passengers got on the steamer. I saw no women fall; I heard that they fell. I did not say that the Captain was counting the passengers.

ASHUTOSH CHATTERJEE.

*Robert Bushby, sworn saith to Mr. Kilby:—*I call myself Engineer-Surveyor to the Port Commissioners. I passed my examination as a Surveyor of steam-ships, to the Board of Trade. I was appointed in 1874 Shipwright and Engineer-Surveyor to the Board of Trade, and I practiced as a Surveyor under the Board of Trade till April 1882 in London, Hull, and the last six years in Liverpool. The Board nominated me as Engineer-Surveyor to the Port Commissioners, I am paid by salary. I get Rs. 1,000 less income-tax. My duties are to inspect steam-ships under Act, VI and VII of 1884, that is, all sea-going and inland steam-vessels which come to the Port of Calcutta. All coolie emigrant ships, under Act XXI of 1883, all ships and steamers applying for register under the Merchant Shipping Act, any ship reported to be unseaworthy within the Merchant Shipping Act of 1880, and any other duty the Commissioners may order me to do. The fees for the performance of these various duties are paid to the Port Commissioners; they amount about Rs. 20,000. I have an assistant, Mr. John McKellar, he is my subordinate, and has to obey my official orders. No one supervises my work. I am responsible to the Government through the Port Commissioners, my immediate superiors. My duties in surveying a ship are to survey hull, the machinery and equipment of both iron and wooden ships. When in England I passed an examination which included such subjects as rigging and gear. If an owner intends building or repairing a ship which he intends to use hereafter as a passenger ship he generally calls upon me to survey the ship before it is launched. Sometimes I am asked to visit the vessel before the building is complete; this is done to save expense in alteration later which I might call for were I not satisfied with the way the ship was built. My interference is limited to seeing that the ship is built strong. I have nothing to do with her shape. It is left entirely to my discretion to decide whether a ship is strong enough to be a passenger ship. The owner can appeal if my requirements are in his opinion too stringent. If it happens that my requirements should not be stringent enough there is no one to call my action into question at all. I have known the *Sir John Lawrence*, I think, since 1884. I came out here in 1882. I first came out under the impression that I should be a surveyor of steamships, the same sort of duties I had been doing in Liverpool, which was confined entirely to passenger steamers, including hull and engines. In the beginning of 1883 I got the survey of emigrant ships added to my duties. I knew the *Sir John Lawrence* before she was repaired when she was lying up in the river here. I was consulted whether she should be repaired or not. I was asked to report on the condition of the vessel by the Port Commissioners. I made a report, and the report went through the Port Commissioners. I think Mr. John Mackinnon consulted me what amount it would take to repair the *Sir John Lawrence*. I did not know whom the ship belonged to at that time, I was not told. I had no conversation with Mr. Mackinnon before the official application as to what was required to be done in regard to the repairs to obtain a certificate. I sent in a written report, it must be filed in the Port Commissioners' office. I cannot tell from memory when the *Sir John Lawrence* was built, she was then about 18 or 19 years old; she was built in 1865. The *Sir Lawrence* was an extra strong ship as originally built; her scantling are above the requirements of Lloyd's A. 100 class, her keel and garboard strake were exceptionally strong and her plating was quite $\frac{1}{8}$ th heavier and the sheer strake was $\frac{1}{8}$ th heavier than ships of her dimensions and tonnage would be built in the present time. Her iron was of ten per cent. better quality than they make iron now for ship plates. The requirements of a ship classed 90 A.1. Lloyds for the garboard strake would be F16 the thickness of the garboard strake of the *Sir John Lawrence* was $\frac{1}{8}$ th. The sheer strake in a ship classed 90 A.1. at Lloyd's should be $\frac{1}{8}$ th; on the *Sir John Lawrence* the sheer strake was originally $\frac{1}{4}$ or $\frac{1}{8}$ th. The bilge strake on a ship classed 90 A.1. at Lloyd's should be $\frac{1}{8}$ th. The bilge strake of the *Sir John Lawrence* was $\frac{1}{4}$ th. The side plating in a ship classed 90 A.1. Lloyd's would be $\frac{1}{8}$ th, and the same thickness at the flat at the bottom. For the *Sir John Lawrence* they were $\frac{1}{4}$ th respectively. I say this from having bored her in those parts.

ROBERT BUSHBY.

Case adjourned till to-morrow, half-past 12.

C. H. REILY.

*The 2nd August 1887. Examination of Robert Bushby continued to Mr. Kilby.—*Those are the plates on the hull proper below the main deck. When I surveyed the *Sir John Lawrence* in 1884, she was then in dry dock and the hull stripped entirely, the boilers taken out, the decks taken up, also the ceiling in the hold. The cement was all taken out of the boiler compartment, all the frames and floors in that compartment were taken out; the engines were not taken out, they were stripped and overhauled generally. The frames and plates were completely exposed. I examined each frame and chalked those which had to be taken out. In doing this I was guided by Lloyd's rules for A.100 class of vessel. Those of the plates which were below the thickness required by Lloyd's rules were doubled in each case, quarter inch plates were rivetted on to the old plates and on to the frames. In the boiler compartment the plates which are mostly liable to deterioration, the frames were taken out altogether, wherever a plate gave indication of having been worn it was bored at the thinnest spot. When the frames were removed, I could tell what the original thickness of the plate must have been. I bored the various plates. I should think I made quite a hundred holes in various places. I cannot say what was the thickness of the plates I bored into. I kept no note of the thickness of each plate, but as I went along I indicated with a chalk what had to be done in respect of each plate. If the chalk mark happened to be rubbed out I would have discovered it in a day or two I would then have been more strict

in seeing whether any of my suggestions had not been obeyed. If I discovered anything of that sort it would have resulted in a very severe survey. I visited the *Sir John Lawrence*, I should say about a dozen times at intervals of a week between each visit. If my suggestions had not been carried out, I should have heard of it. The Port Commissioners do not receive a fresh fee for each of my visits. Only one fee for the whole survey. An ordinary survey of a ship necessitates three visits, the fee is the same in both cases. Each visit, except the last, takes up about three hours; the last visit when the ship is afloat and under steam takes about half an hour. When the survey of a ship is held while the vessel is afloat I make at least 12 visits during the survey. The scantling of the *Sir John Lawrence* would have passed A.1. at Lloyd's, as she was originally built. When I saw her in dry dock in 1884, her wear and tear were not more than what a ship usually might be like. She was not more rusty nor corroded than I expected. The frames under the boiler were done for, worn out and required renewal, they were renewed. A ship of the kind as the *Sir John Lawrence* having once been thoroughly repaired ought not, if she had been well kept up in the interval to have wanted thorough repairs for 12 to 15 years. She ought regularly to be cleaned and painted once in four years, chipped and painted every four years. This would depend on the nature of the cargo and the trade the ship was in. When I first saw the *Sir John Lawrence* she was laid up, had no paint, and was very rusty. I cannot tell how long the steamer had been in the state I saw her in. The fore and mainmasts were good. I think the mizzen was renewed, but I am not sure. She had entire new rigging, the mast were taken out altogether, looked at and put back, that is, the main and foremasts were returned to their places. The main deck and the upper deck were renewed with new wood. Some of the main defective where defective were renewed, I think the forward bulkhead was bad at the bottom and good above. There were four bulkheads, a collision bulkhead forward, a collision bulkhead aft, a bulkhead at the after part of the engines, and the forward bulkhead. The collision bulkhead forward are, as far as I remember, all right, the collision bulkheads were not changed. The bulkhead in the aft part of the engine-room was all right; both the collision bulkheads were carried up to the main deck, so were the others, no bulkheads were removed. There was a bunker bulkhead, not water-tight, at the fore part of the boiler, between the boiler and the bunker, that was bad and was renewed. There was also a partition bulkhead originally between the engine and the boiler space, half of it had been taken down, the bottom half to let in air. The removal of either of the bunker bulkheads or the partition bulkhead would not weaken the ship, they were made of very thin plating. I examined the plates in the forepeak, some of the plates were thin, those that were doubled. The rest were sufficiently strong, sufficiently thick. Thick enough to comply with the rules I follow in making my survey. Sufficiently thick to allow the ship to be classed as 90 A.1. it would not have been sufficient for class at Lloyd's A.100. I found the engines shewing the ordinary wear and tear of ten years use. Engines of that sort with care should last 40 or 50 years. The engines were left as they were after the usual overhauling. One new main boiler and a donkey boiler was supplied. The *Sir John Lawrence* had a pump to each hold, a hand pump; she had engine bilge pump, that pump was attached to the main engine and also to the donkey engine. Those pumps were after survey in perfect order. There was a steam pump from the donkey also a Downton pump for putting out fires, both these pumps would be efficient as pumps as fire engines on the spar deck after it was added. Downton pump was a portable pump, if carried up it could be worked on the spar deck if the suction hose and delivery hose were in perfect order. Originally the *Sir John Lawrence* had a fore-castle deck and a poop, the fore-castle deck extended aft for another 25 feet of the poop as a shelter or hurricane deck. There was a main deck from stern to stern forward of the engine room only; there was a between deck, the alteration made was that the upper deck was continued till it joined the poop forming one long deck. The necessary beams to support that deck were added, the beams, were of iron. The extra weight of the deck and beams would be from five to six tons, there were bulwarks on each side in the space between the poop and the bridge deck, the bulwarks originally were 4 feet; there was the topgallant rail which practically made the bulwarks five feet high. The poop was not shortened or lengthened when the spar deck was continued; the topgallant railing was taken off and the bulwarks kept at the same height they were before; the upper deck when added to became a flush deck from stern to stern there were no bulwarks round the upper deck, there were only rails; the upper deck is about three feet narrower than the main deck, the sides being rounded. The rails stood as a covering board, the rails protected the passengers from falling over board; they took the place of the bulwarks on the main deck. Only spray could ever come on to the spar deck. No sea could be shipped so high up nor solid water. On the main deck after the repairs the protection from weather was as to the poop, the sides of the house, and forward the sides of the shelter deck closed in at the sides. There were also the bulwarks amidships about 25 feet between the poop and the shelter deck house. There were no shutters or curtains on the main deck. There was a double awning on the spar deck and side screen fore and aft as far as the space measured for passengers, further forward than the foremast. The space measured off for passengers on the *Sir John Lawrence* was—

- (1) The whole of the main deck from the forepart of the poop to the fore-castle.
- (2) The between decks, and
- (3) The upper deck.

She was licensed to carry in the between decks the number of passengers represented by the superficial space of the deck divided by nine in foul weather, and the same space divided by six in fair weather. The superficial area was 1,620 feet, that is, from the bulkhead before the engine-room to the collision bulkhead. The number of passengers in fair weather was 270, and in foul weather 180. The upper deck and main deck together in fair weather if the 270 were carried in the between deck is 708, in the foul season 511. The superficial area devoted to passengers on both decks may be obtained by a calculation which will take some time. If the 270 are not carried in the between deck then the two decks can carry 888 fair season, 591 foul season. The ventilation on the between decks was two cowl ventilators about 16 inches diameter and two hatches; these hatches can be kept open in any ordinary weather and even in very bad weather. There may have been some bad ventilation, but I do not know. If the poop were given to third class passengers, it was licensed to carry 60 passengers in fair weather and 44 in foul weather. In foul weather the maximum number which the *Sir John Lawrence* could carry was 735, including space in all three decks, in fair weather 1,038. The *Sir John Lawrence* carried a master, one officer, 24 deck crew, three engineers, and 12 engine room crew. The crew lived in the fore-castle. The master and chief engineer each lived in a small cabin on the upper deck. The Chief officer and other engineers lived in cabins in front of the poop. If first class passengers were carried, the maximum would be $735 - 44 = 691$ in foul weather; in fairweather 978. There is no space reserved for second class passengers, except in very bad weather, a hurricane, great seas would not wash over the bulwarks. In a heavy storm it would be safe for passengers to remain on the upper deck; also on the space where the bulwarks are. The between deck was the same deck called by that name before the spar deck was added, it still, in my opinion, remained the between deck after that addition. As regards the master and mate and the engineers, my discretion is trusted by the law with respect to the number of the crew. I consult my own discretion. As regards boats, the *Sir John Lawrence* had four under the rules framed under Act VIII of 1876. The *Sir John Lawrence* was compelled to carry four boats, a dinghy, a cutter, a long boat, and a gig, she being a steamer between 360 to 500 tons. As Surveyor, however, I insisted on their carrying, a life-boat, a long boat, a cutter and a gig. I insisted on the life-boat being put in, from my knowledge of what would be required under similar circumstances under the Board of Trade Rules. As a matter of fact, the *Sir John Lawrence* carried two life-boats, a cutter, and a gig. The tonnage of the *Sir John Lawrence* was a fraction 466 tons. I think the number of boats fixed by the rules made by Act VIII of 1876 are insufficient. The boats I insisted upon could carry $97\frac{1}{2}$ passengers: the life-boats required five lascars, and a coxswain, cutter five lascars, and the gig three lascars. The engine room crew are generally capable of rowing a boat. I believe the repairs to the *Sir John Lawrence* cost a lakh and 20 thousand rupees. The repairs and alterations effected on the *Sir John Lawrence* would, in my opinion, make her roll less, nor did it affect her stability in the least. The Act requires that each passenger shall have 6 feet by 1; in fair weather if you packed the passengers rubbing shoulders and in a sitting position you could get 1,000 passengers on the upper deck and 700 or 800 on the main deck, that is packing them closely. In a cyclone the great seas would probably come over the bulwarks and wash the passengers and some of them might be drowned, the Captain would then close all the hatches. Four or five hundred would be able to store themselves in the between decks. If the hatches were battened down there would not be enough ventilation to keep them alive for two days; they could live 24 hours without loss of life. A couple of hundred could take refuge in the saloon. The passengers forward of the engine-room on the main deck would be pretty comfortable. There would be enough room on the poop and main deck and the fore-castle to carry the 735 passengers, the maximum number which could be carried in foul weather. There would not be a crowd of passengers in the upper deck during a violent storm, except a few behind the houses. The person working the ship would be the men at the wheel, the master, the engineer and the crew down below. I was about 10 years at sea. I do not think the captain of a steamer carrying as many passengers as the *Sir John Lawrence* would be justified in going out to sea if he knew a storm was coming on. In September 1885 I surveyed the *Sir John Lawrence* myself; this was a dock survey. I did not on that occasion see steam up, Mr. McKellar did that for me. I inspected the hull on that occasion inside and out. I found nothing wanting, every thing in order. She was properly painted and properly found, everything requisite under the Act was supplied. I am certain I put the life-boats into the water. I cannot say about the other boats. I examined all the boats. I could tell whether the boat was sound when she was hanging into the davits. I tested them with this hook, I dug a little bit out here and there, paint would hide a rotten boat, the more paint the more suspicion. I had the life-boats lowered to see whether the disengaging gear worked properly, not to see whether they could float. The next survey was in April 1886, that was made by Mr. McKellar, that was not a dock survey. I did not go near the vessel at all during the survey; he is about 35 I should say, he gets Rs. 440. The next survey was in October 1886. I surveyed the bottom on the 21st October in dock and Mr. McKellar did the rest.

ROBERT BUSHBY.

Case adjourned till to-morrow.

C. H. REILLY.

The 3rd August 1887. Examination of Robert Bushby continued to Mr. Kilby.—The certificate of that survey bears date the 25th October 1886; that is Mr. McKellar's signature; my signature does not appear on this document (G), though as a matter of fact I surveyed the bottom and outside of the steamer. The fact that the certificate bears date the 25th October, shows that the survey of her hull, machinery, and equipments were complete, except that after the granting of the certificate the surveyor sees the ship under steam, this is done to save the useless getting up of steam, simply for the purpose of testing the valves when steam would have to be got up later on, in order to test the steamer get out of port. Mr. McKellar surveyed the hull and equipments on the two occasions I have spoken of. He is quite competent to discharge this duty. After the 25th October 1886 there was no further survey of the dock and equipments held forming part of that survey. Mr. McKellar received a letter from Mr. Neustein and handed it over to me as soon as he got it; this was in the early part of November, it may have been in December. I was out of town for a few days some time after the letter was given to me. As soon as an opportunity offered itself, I went on board. I took with me a memorandum of the points raised in that letter. I made the memorandum myself. I made a careful inspection of all the points raised by Mr. Neustein including the patch in the fore-castle, the upper fore-castle above the main deck. I went into the forepeak and into the hold. I examined the forepeak; I had a careful look round with a light. I had none of the plates bored. I did not think this necessary. I saw no reason to have this done I saw no material change from my previous survey. I had not been down the forepeak the last time the steamer was in dock. I had not seen the plates in the forepeak since October 1885. It is quite dark in the forepeak. I do not remember whether there was any water in the forepeak, there might have been. I do not remember having it pumped out. In October 1885 when I surveyed the forepeak I did it with an ordinary hand light or a "stick butt", or native torch. Between October 1885 and November 1886, I must have surveyed over a 100 hulls. If there has been previously anything wrong with the forepeak I should have remembered it. I saw the patch in the fore-castle from the inside in 1885. The thickness of the plate on to which the patch was rivetted was about a quarter of an inch thick, the plate was painted in the inside I think. I did not measure the patch. I merely looked at it. I ordered the patch to be bolted on first and then ordered the patches to be rivetted on. Afterwards I did not measure the thickness of the plate. I went through the various points of Mr. Neustein's letter and found none of them correct, except as regards two store houses which had been built on the passengers space; even in this case the encroachment of space was less than that stated by Mr. Neustein. I reported the result of my examination to the Port Commissioners, in writing. There is the signature of Mr. Duff Bruce on this letter put in and marked (H) dated 8th December 1886. This letter, put in and marked (J), bears also Mr. Duff Bruce's signature.

Mr. Kilby at this stage asks to interpose the evidence of John Moore, the Master of the *Curlew*, on the ground that his steamer is about to leave Port.

Mr. Henderson, for the owners of the *Sir John Lawrence*, consents.

Application granted.

ROBERT BUSHBY.

John Moore, sworn, saith to Mr. Kilby.—I am master of the steamer *Curlew*, and was such master on the 25th of May last. I left Calcutta about 5 in the morning. I first saw the storm signals at Mud Point. I was about 5 miles to 4½ miles off, when I saw the signals. I had to turn the vessel round to see them. The weather at the time was very dirty. I saw the signals in the distance at half-past 10, but did not distinguish them. I turned my vessel round about 11 a.m., then I waited till the rain passed over, then I saw the signal—an inverted cone over a ball. I believe it was No. 8. The weather looked as if the wind was going to increase, heavy rain, Mud Point bore from my steamer S.E. or S.S.E. I was in the Bellary Channel at that time leading into the Western Channel. The Bellary Channel was, where we were, about 500 yards wide. This is the channel Chundbally ships usually go by. The *Sir John Lawrence* was about an hour to an hour and a half behind us. I went on to Kedgerree, and anchored there just abreast of the Kedgerree tidal gates. I anchored about 12 o'clock noon. There was more wind than there had been at 11 o'clock, but up to that time it hung to one quarter. At eleven the wind was N.E., at twelve N.E.; it was blowing strong, not a gale. It had appearance of increasing; but with the wind from the N.E., we had great shelter here. A strong N.E. is indicative of a cyclone in May—a cyclone passing somewhere. My barometer at 11-30 was 29.59°. I anchored at 11-45. The *Tyrone* was anchored about three cables to the eastward of me. The Captain of the *Tyrone* talked first by signals, afterwards by black board. All the way to Mud Point we were discussing the weather. Captain Spence said "I think I am going back to Diamond Harbour." I replied "say when; I am ready." We eventually decided to go on to Kedgerree. I would never go to sea when there is a wind from the N.E. and a low barometer. After I anchored, the *Sir John Lawrence* came up an hour after, or an hour and a half. If anything, there was a little more wind: that was the only difference. When the sun began to set, the glass began to fall. At 6 p.m. the glass was 29.45: it was blowing pretty hard. The barometer fell very gradually. All through the afternoon the weather was very thick. If it had been clear, I should have gone back. After 12 noon the weather became thicker. It was thick all day. At 5 p.m. I would have gone back to Diamond

Harbour if I could have found my way. At 5 P.M. there was every indication of a cyclone. The *Sir John Lawrence* passed us about a mile and a half off. I could not make out her passengers. The steamer was under sail, fore and aft canvas. At 10 P.M. wind blowing very hard, veering towards the East; barometer 29.38; it was falling faster. At midnight wind E. by N., blowing very hard with heavy rain in gusts; barometer 29.30. About 2.45 A.M. the barometer reached its lowest point, 29.23. We had a lull for half an hour with very heavy confused sea. We were pretty well in the heart of the cyclone at that time. At 2.30 A.M. the wind veered round to the S.E. and blew in terrific gusts S.E. and S.S.E., and continued to do so for two and a half hours. My idea is the *Sir John Lawrence* encountered the worst of the storm between the Ridge ship and False Point. I saw no wreckage I could recognise as belonging to the *Sir John Lawrence*. Towards daylight on Thursday morning the 26th the storm began to abate. At noon on Thursday the barometer had risen 29.35, less wind and sea. At 6 P.M. barometer 29.40. Wind still backing to the southward. Friday morning at daylight I went on to Chandbally. It was not very comfortable for my passengers. At one time we had them all below deck. The hatches were not on. We carried 550 on that occasion—our full complement. I went down; then it was pretty warm. There was, however, plenty of ventilation. I know the *Sir John Lawrence*. I imagine most of the passengers must have tried to go below. The awnings must have blown away. I do not think the *Sir John Lawrence* would have shipped heavy seas. She was very light in the water and very buoyant. Any vessel would ship heavy water in a cyclone. All I mean to say is that the *Sir John Lawrence* would not have shipped more water than the best ship in port. In front of the open bulwarks of the main deck, the main deck was protected by sides. There was an ash port on each side fore and aft. It was clear with alley under the deck. The passengers if they crowded there would, in my opinion, be perfectly safe. The hatches of the 'tween deck correspond with the hatches on the main deck, so that there was a continuous open space from the 'tween decks to the upper decks. I do not think it would have been necessary to batten down the hatches. As a sea-beat, the old *Sir John Lawrence* was as good as any boat which came to Calcutta. She was from 450 to 500 tons. I think her 90 horse-power would be enough to enable her to keep her own if everything was in good order. I know nothing of her equipment.

To Captain deSmidt.—I did not hail or signalize to the *Sir John Lawrence*. I do not imagine the old man saw the signals. I had to turn round to see them myself. Independently of the signals I would not have gone out. Captain Irvine saw us right enough. That ought to have caused him to stay, if there was nothing else to press him on. At the time the *Sir John Lawrence* was passing us the state of the weather and my barometer told me my place was at anchor where I was. If he had stayed and some other vessel had made the passage, he would not have been Master of that ship very long. I do not mean to say that I have any special reason for saying this, but there are owners who insist on their orders being obeyed. Thank God I do not serve such. I say that eight out of ten masters of ships would have hesitated before attempting to go out to sea in such weather. There is not a ship in port which would have gone out if they had known, what I know, that they had no port to go to. I think it was a very risky thing to do as Captain Irvine did. I have been in a cyclone in 1879 and a hurricane off the Cape in 1864. I have never heard if the *Sir John Lawrence* shipped heavy water. There are as bad seas in the Eastern Channel as any I know of. I have been 33 years at sea. I have known seas breaking over the bridge of big loaded vessels which were driven through in the Eastern Channel.

To the President.—I have never seen Captain Irvine that he was not able to walk and talk with any man on the point of duty. I think he was a humane man, kind to his passengers if it had not been so, he would not have had so many passengers go with him. She was a popular vessel with the natives. I think the passengers on board the *Sir John Lawrence* must have suffered from being kept in a confined space. As to being knocked about, they pack themselves too close for that. No man with any sense would have of his own free will gone to sea. Neustein did the talk, Irvine did the work. Neustein is no sailor in comparison to Irvine. Smith, the Chief Officer, was a tear-away old fellow. He certainly would, in my opinion, have urged the Captain to go on. Smith has been a master on the same line. Smith used to do things which no one else would do. Irvine has never complained to me that his owners were hard task-masters. The only advantage that the *Sir John Lawrence* would have obtained would have been the increased number of passengers he would have secured according to her tonnage. So far as I know, I never knew Captain Irvine carry passengers in excess of the number on his own account. The panniwalla may have smuggled, but I have no reason to say so. Captain Irvine was too honest a man to have smuggled passengers himself. They are very particular in counting passengers at Chandbally. It is done over a landing-stage, one man at a time. There is no rush. I never was handed up for having excess passengers. I don't see how it would be possible for a Captain to land a portion of the passengers before he got to Chandbally without being found out. After the passengers are out the police come on board and search the hold over to see whether there are any passengers left on board. Before we take in passengers at Chandbally the police search the steamers, and then count the passengers as they come on board. In Calcutta the police come on board every ship and count the passengers. Over and over again I have had to turn out excess passengers found on board by the police, just before starting at daybreak.

Chundra Coomar Bhattacharjee, solemnly affirmed, saith to Mr. Kilby.—I went alongside the *Sir John Lawrence* in a dinghy about 8 or 8-30 of the evening previous to her starting on her last voyage. I reached the ghât about 8 or 8-30. It took me some time to engage a boat. When I got alongside it was 9 or 9-30. I heard the gun fire when I was in the dinghy on my way to the vessel. I intended to go with my family and some of my neighbours to Chandbally in that steamer. There were altogether two boats which carried my party of twenty people. I saw a European and two or three khalassies standing on the side of the vessel; passengers from a boat were getting on to the steamer. The European said to me you cannot now come on board. I spoke to the European in Hindustani. I said I will be very much disappointed if I am not allowed to go on board the vessel. I begged of him to be good enough to take me on board. He said there is already a large number. I cannot take you on board. I kept on begging the European. I coaxed him to take me. He at last said if you do not listen to me I will give you a good caning. I then said what is to become of these tickets of mine. I hold both kinds of tickets: those for Rs. 3-0-6 and Rs. 5-0-6. He said you will get back your money; then the khalassies pushed my boat from the side of the vessel. I felt sadly disappointed and came back to the ghât. We slept that night in a sort of a godown near the Koila ghât, the ladies refusing to return to their homes as they had started on a pilgrimage. About 6 o'clock the other two steamers for Chandbally left. The *Sir John Lawrence* left the last of the three steamers. I got the money back on those tickets. My friends have got the money for me. I caught a Midnapore steamer that same day and went to Juggernath *via* Midnapore. I did not notice any police boat when I went alongside the *Sir John Lawrence*; there were none near me. I saw no police in uniform. The two sorts of tickets were for the same class of accommodation—deck accommodation. On Monday the price of tickets was Rs. 3-0-6, on Tuesday I had to pay Rs. 5-0-6. After that the tickets sold for Rs. 6. Many people who bought tickets for Rs. 6 could not go by that steamer. I met these at Juggernath.

Cross-examination to Mr. Henderson.—I bought the tickets at Messrs. Macneill and Company's office. I saw about eight empty boats; only one boat with passengers on board. That is the boat out of which passengers were getting into the steamer. I saw none of these boats return with passengers. I know the uniform of the police on the river: they wear ash-coloured or black uniform. I have seen them. The European looked like a Mr. Brown employed in Thacker, Spink and Company. The police boat is manned with nine oars and has more brass about it. I did not see any brass-mounted boats.

Interpreted by me,

BIHARI LAL PAL,

Interpreter.

Court adjourned till to-morrow, half-past 12.

C. H. REILLY.

The 4th August 1887. Examination of John Moore continued to the President.—We landed our passengers by dinghy on arrival in Calcutta. We try to keep off the dinghies as much as we can before we get to our moorings, but they occasionally get alongside in spite of us, and some of the passengers scramble on to the dinghies before we are moored. The bulk of them remains on board till the steamer is properly moored. I have never seen the police count the passengers who arrive from Chandbally.

Cross-examination to Mr. Henderson.—If there were a good few on board some of the passengers only a few get off into the dinghies before we are moored. Except in poojah season, we seldom get our full complement. I have known Captain Irvine for the past seven years. I knew him intimately during that time. I have a full belief in his integrity and honesty. I believe that Captain Irvine would never have taken extra passengers on board for the purpose of filling his own pockets. The panniwalla in connection with the crew might carry an extra man or two as passenger, but not to any great extent. It would be impossible to smuggle passengers on shore before coming to the counting stage at Chandbally without the Captain knowing of it. I cannot believe that Captain Irvine could ever have connived at any such system. I never saw boats putting off with passengers from the *Sir John Lawrence* when she arrived at Chandbally. I do not believe it possible for passengers to have been kept back until after the visit of the police at Chandbally. The police always searched my vessel for passengers, and, so far as I know, they did the same at Chandbally with the *Sir John Lawrence*. I have often seen the police count my passengers in Calcutta. I go on board about 9 p.m. The police boat always was alongside. I have no reason to suppose that the system of counting passengers in Calcutta by the police was any different on board the *Sir John Lawrence* than it was on my steamer. The night previous to the cyclone the police were alongside my steamer. Some of the police were on the landing stage. They reported no excess to me in Calcutta. The numbers counted out at Chandbally

were not in excess of the number I was permitted to carry. I made no signal when the *Sir John Lawrence* passed me. The *Sir John Lawrence* might have anchored in perfect safety about four miles lower down, this spot would not be in the direction of, but about 16 miles from, the South Channel buoy. I heard that the chest of Captain was picked up at Saugor. I do not think it possible that she pulled up at the place—I mean she went right out to sea. She must have been right out to sea between 5 and 6 p.m. It is quite likely that he did not see the signals. The *Sir John Lawrence* unfortunately was not going to sea; it would probably have been all right with her if she had. I never saw the *Sir John Lawrence* carry her canvas when she ought to have stowed it. I have never heard it rumoured that she was a hot ship. It is very probable that the passengers would have gone between deck during the cyclone, if the vessel had anchored at Kedgerree. They would have plenty of room if the passengers had not overcrushed themselves. So far as I know there would be sufficient ventilation. I was never there myself. If the hatches were open on the main deck, there would be enough ventilation. My full complement is about 550 passengers. That complement is calculated on the same basis as the complement of passengers permitted in other vessels on the same line. Having my full complement of passengers would not obstruct in any way whatever the working of the vessel in fair weather or foul. I have had my full complement of passengers often. They have never interfered with the working of my vessel. After we have started and the passengers and their bundles got arranged a bit, I never found any difficulty in moving about my ship, neither I nor my officers. I have seen the *Sir John Lawrence* in very heavy seas in the Eastern Channel. She was a very good sea-boat. I never saw anything that was wrong with the equipment of the *Sir John Lawrence*. I never examined any of her gear. I have never had anything to do with the owners of the *Sir John Lawrence* in business. I had no reason to suppose that Captain Irvine had orders to go to sea irrespective of the weather. Native passengers huddle together, because it is their nature to do so. The space allowed by Government rule is in my opinion sufficient. The proof of this is shown in this particular instance. All my full complement of passengers on the day of the cyclone went into the between decks, which contain only a little over one-third of the space allowed by the rules to the whole number. They were there the whole of one afternoon, the whole night, and part of the next day, and I never heard any complaint. I have frequently seen the passengers squeeze into a much smaller space than allowed them by the rules, and they have done so of their own accord. I have known Smith for some years. My ship is surveyed periodically every six months—sometimes by Mr. Bushby, sometimes by Mr. John Mackellar, his assistant, sometimes by both. I have always found them pretty strict. They always wanted something new, something fresh. Mr. Bushby always surveyed the deck. When Mackellar did the survey alone, Mr. Bushby was either at home or away from Calcutta. I always went round with Mr. Bushby during the surveys. So far as it was possible afloat Mr. Bushby visited all parts of the ship. He examined the plates and frames. Twice we have had the ceiling up. We had 417 new plates put out my ship last year. This was in consequence of Mr. Bushby and Mr. Mackellar's survey. Every old plate was removed from the bottom of the vessel. All new frames were required. A good many of the plates were not very bad. Two years prior we had the ship bored. Mr. Bushby was the surveyor on that occasion. Both surveyors are very particular with our vessel. If the *Sir John Lawrence* were surveyed in the same way as our steamer, she must have been a sound ship. I think a survey certificate signed either by Mr. Bushby or Mr. MacKellar is a perfectly good guarantee. The survey is equally strict throughout the ship and more survey than it is at home. The dock survey takes place every twelve months. Every dock survey the vessel is scraped and cleaned outside ready for inspection. I do not think Mr. Bushby passed a plate so rusty that you could peel off the rust with your fingers. He would have it scraped and sounded. I have noticed the patch on the *Sir John Lawrence*; if it was properly secured, it would not lessen the strength of the ship. Captain Irvine is as good a seaman as they make now-a-days. We anchor at the Kanaka buoy some time during the night, reaching Chandbally the next morning. After he gets out to sea after leaving Chandbally, if he had a trustworthy officer on board, he could get three hours' sleep. If he got away early enough, say by 8 a.m., he would anchor at Saugor at 10 p.m., and so get a comfortable sleep. Passengers and their friends get on to the ship together. I never heard an objection being made by persons coming on board to see their friends off. I have not observed any considerable number of persons come on board to see friends off.

Re-examination to Mr. Kilby.—Tickets are looked at as the passengers come on board. When there is a rush of passengers, my seacunny has no orders to object to friends of passengers coming on board. The police do not examine the tickets of the passengers. Whenever there is a large number on board, the police in Calcutta always count the passengers after they are seated on the deck. This is done between 3 and 4 o'clock just prior to our leaving. Unless the 1,038 passengers on board the *Sir John Lawrence* all crowded on to the upper deck, they would not interfere with the working of the ship.

To the President.—I and my Chief Officer are the only seaman officers on board. My Chief Officer does not hold a pilot's certificate. Mr. Smith held a pilot's certificate.

J. MOORE.

Robert Bushby. Examination continued to Mr. Kilby.—Except the enquiry I made, and that made by Mr. MacKellar, there was no other enquiry into the charges made by Mr. Neustein

The space on the main deck reserved for passengers is 2,863 superficial feet, that is, after all deductions having been made, the space between the two open bulwarks for passengers was about 640 feet. Passengers could stay in the alleys during the cyclone, in any weather, except in an overwhelming sea, which should sink the ship. I remember the two 400 gallon tanks; filled, each tank might weigh a ton and 3 quarters. The main deck was a safe place for tanks of that sort. These tanks were lashed to ringholds, from memory I cannot say. I looked at the tanks after receiving Neustein's letter. If they had not been properly secured I should have noticed it. I noticed nothing wrong. I saw the *Sir John Lawrence* on the same morning of the collision with the *Indore*. A collision of that kind would not strain a steamer of the build of the *Sir John Lawrence*. I never ask the officers of the ship if there is anything wrong on board, unless there be some special reason for it. In cases where, like the charges made by Mr. Neustein, I should think it necessary to speak to the Mate and the Captain. I do not remember ever having done so before. I have known an officer volunteer information without being asked. Engineers often and officers often volunteer remarks if they want any special thing done. I have never known any of Macneill's officers speak to me about anything on board. I cannot remember any instance. It is possible they may have done so. The number of passengers to be carried between deck would not be altered by the spar deck being added to the steamer. In this case, adding the spar deck did not interfere with the ventilation of the vessel. This is the certificate of the last survey held on the *Sir John Lawrence*, dated 25th April 1887, put in and marked (K). An iron ship like the *Sir John Lawrence* should last 30 or 40 years with ordinary care. I think the *Sir John Lawrence* was kept up liberally. I produce a copy of letter from Macneill & Co asking for survey of *Sir John Lawrence*, dated 8th September 1882. I also produce copy of letter, dated 29th September 1882, from Secretary, Port Commissioners, to Messrs. Macneill & Co., embodying my reports put in and marked (L) and (M) respectively. There is no official rule binding me as to the scantling of passenger ships either here or in the United Kingdom. I kept no note of the alteration and addition I thought desirable on board the *Sir John Lawrence*. After the repairs are finished, I go round before the paint is put on. I should then see whether the repairs and alterations I had suggested had been carried out. I remember ordering a very large number of plates to be taken out of the *curlew*. I had to mark each of these plates with a piece of chalk to show they are to come out. The way it was done was to mark a whole line of plates if they had to come out with a line of chalk. I should be able to see at the final survey, before the paint was put on, whether any of the plates I had condemned had been taken out or not. The *Sir John Lawrence* was painted, but not clipped after the big repair in 1884. I say ships are not clipped more than once in four years. Without going the length of removing the frame, it is quite possible to tell whether the plate was sound where it joins the frame. I did test the delivery and suction hoses. I do that in every survey. I invariably ask the engineers in the engine-room, whether the Superintending Engineer be present or not generally whether there is anything wrong. I have never known an instance where the engineer has hesitated to point me out anything he thought defective. If there was anything wrong with the condenser, the engineer in charge ought to have told me. If the Superintending Engineer knew of any defect in the condenser, he ought to have called my attention to it. As a matter of fact, I did examine the condenser in my final survey in April 1887, and found that the repairs to the condenser were sufficient, and I did not find it necessary to order any further alteration. These documents produced are surveyor's certificates in which the A and B certificates under Act VIII of 1876 were issued to the *Sir John Lawrence*; put in and marked (N) to (N5) I never mustered the crew. I took the Master's word for the number. In the big repair of 1884, I ordered my shipwright assistant, Mr. Cowperthwaite, to take the number of equipment out of Lloyd's rules, and to go over and calliper every length of chain on board the *Sir John Lawrence* and test it up to the highest class at Lloyds. He did this. I did not survey the chain the last dry-dock survey. Mr. McKellar did the survey.

To Captain deSmidt.—I was never on board of the *Sir John Lawrence* before. I was called upon to survey her. I do not know whether she was in the market for sale at that time. I never heard of a Mr. Cranstoun, or that he had declared the *Sir John Lawrence* not to be worth repairing. The *Sir John Lawrence* had to go into dock before I could give my survey report on her. She was not in dock when I gave the report embodied in (M). I had some of the cement in the fore and aft hold taken out in places where I thought it necessary. I bored some of the bottom plates when the ship was in dock. There were more holes bored in the forepeak than anywhere else. The engine and its foundations were perfectly good. All the scuppers on the ship were renewed in the repair of 1884. On the outside they were flanged over on to the plate and screwed in. Iron lips over them were not necessary. They were all in good order. I paid special attention to them. In the big repair the pintles and gudgeons of the rudder were repaired. There was no condenser on board for making fresh water.

ROBERT BUSHBY.

Court adjourned till to-morrow.

C. H. REILY.

ON THE 5TH AUGUST 1887 THE COURT RE-ASSEMBLES.

Robert Bushby. Examination continued to Mr. Trelawny.—I have sometimes done as many as five surveys in a day, that is, a portion of such survey. That is very tedious and hard work in this climate. Sometimes there is pressure put on me to go through with the surveys. I do not, however, for this reason slur the work. It frequently occurs that owners wish the ship to be surveyed in a hurry. I take my own time, and, if necessary, detain the ship.

To the President.—The officer appointed to receive the declaration sent in under section 12 of Act VII of 1884 is the Vice-Chairman to the Port Commissioners. Under section 7 of the Native Passenger Ships Act of 1876, "the officer authorised in this behalf by the Local Government" is by appointment the Port Officer, Captain Stiffe. Captain Stiffe is the officer who, under the Act, has to grant certificates (A) and (B). As a matter of fact, the Port Officer does not himself cause a ship to be surveyed; he sends the notice on to me and I make the survey. These remarks only apply to certificate (A). The notice given under section 7 is always by letter; that letter is sent on to me and I make the survey. Captain Stiffe might send the notice to any surveyor; sending it to me does not involve payment, except in one or two exceptional cases. I make the survey or Mr. McKellar; we sometimes do it both together. The Port Officer has absolute discretion, except in cases which come under section 13, and which are otherwise provided for, to grant and withhold the issue of certificates (A) and (B). There is of course an appeal to the Local Government, provided for in section 16. The Port Officer is the official responsible for the issue of certificates (A) and (B). As regards certificate (A), the Port Officer invariably accepts my report as final. I only know one instance, which happened some years ago, that of the steamer *Commilla*, where I reduced the number of passengers to be carried, and Captain Stiffe called upon me for my reason for doing so. The point raised was one of principle, and I eventually followed the former practice. I had to give way. With this exception, Captain Stiffe has accepted my surveys without demur so far as certificate (A) is concerned. I know nothing of certificate (B). I do not know where the Port Officer gets the materials on which he issues certificate (B). So far as I know, there is no other survey held on behalf of the Port Officer except the one held by me. I never got any directions from Captain Stiffe, after the receipt of Mr. Neustein's report, to hold a survey of the *Sir John Lawrence*. He, however, sent the Port Commissioners the letter. I did have an interview with Captain Stiffe on the subject. Emigrant ships at home have to be surveyed by four surveyors, that is because they make long voyages and have to carry a large number of passengers.

Cross-examination by Mr. Henderson. All I have to do with the Act of 1876 is to furnish materials on which certificate is granted. I supply these materials under a survey which I have to make under another Act, excepting as regards the measurements, which have to be made under the Act of 1876. So far as I am aware, the Port Officer, during my period of service, has never, under section 14 of Act VIII of 1876, caused a ship to be surveyed at the expense of the master or owner while my certificate of survey was in force, and the issue of that (A) certificate in that survey. Mr. McKellar has power to make a survey, and is competent to do so in my absence; he has power to make a survey and grant a declaration on which a certificate is issued even when I am present in Calcutta. The Port Commissioners grant the certificate. The additional duties placed upon me did, before I got Mr. McKellar's assistance, very seriously interfere with my survey work. Since Mr. McKellar's appointment we have been quite competent and capable to carry on the work. I was not present when the plates were bored at the big repairs in 1884. I saw the plates after they were bored. I forget whether I gave the order for the borings; it is very probable I did. I made a thorough investigation of the whole of the hull. I have not the slightest reason to believe that the chalk marks I made were rubbed out; if they had been, I should have found it out, for I thoroughly inspected the vessel before she was painted. I ordered sundry plates to be doubled. I own that my orders were carried out. The surveys made in the thinnest parts of apparently defective plates was done under my directions. I cannot say whether I took out any plates. I found that about 200 plates were supplied to the ship, but whether they were used for the purpose of doubling plates, or in the place of old plates taken out, I cannot say. All plates which were left in her were sufficiently strong to meet the requirements of the law. I saw that every order I gave with regard to the plates was carried out. On my weekly visits I saw whether my orders were carried out; that was the object of my visits. The frames were eighteen inches apart in the *Sir John Lawrence*; that distance is closer than usual in a ship like the *Sir John Lawrence*. The frames would be 20 to 21 inches apart if built in the present day; the closer the frames the stronger the ship. I saw the hole before the patch was put on. I happened to be coming up the river shortly after collision took place. I looked at the hole from my steam-launch. I am certain the plate was strong enough for the place where it was placed. When next I saw the plate it had been rivetted on. The plate was not too thin to bear a patch; it was on the starboard side; it was 11 feet above water. I say this because I identified the part of the *Indore* which caused the damage, and that water measurement was 11 feet out of the water. It could never by any chance be less than eight feet from the water. It is absolutely impossible that the hole should be only four feet above the water when it was mended. It is not true that the hole was below the main deck; it was not in the forepeak; the edges had not been cut. When I first saw the hole, it was not more than 15 to 18 inches by 12. I do not think the hole was two feet square after the edges had been cut. It is impossible that at the time the patch was put on the frames were nearly eaten through with rust. It is

absolutely impossible that the plate could have been $\frac{1}{2}$ of an inch thick. It is impossible, when the ship is deep, that half the patch should be under water. It is not true that, as she pitched, the patch was almost entirely under water, whatever the draught was. It was not 3 feet below the main deck. The plate was painted. It is not true that the inside of the vessel was one mass of iron rust, and that the scales could be taken off by the fingers. From 1884 till she foundered it could not be said that the ship, as to her hull and scantling, was neglected. It was not possible for a ship which had been scaled and painted like the *Sir John Lawrence* to have got into the state of rust described. Ships I have surveyed have repeatedly been scraped and painted. The scraping and scaling and painting of the plates of the *Sir John Lawrence* were carried out in much the same way as in other ships. I have nothing to do with the painting. I have to see that the painting inside is done. I never noticed, during my surveys of the ship, that the vessel had been specially furnished up to pass such survey; the ship was thoroughly scaled; paint was not laid over rust. It is not true that the *Sir John Lawrence* received a coat of paint over the bad places in and out. During the 13 months previous to Neustein's discharge, it was not true that, if scaling had been attempted in the hold and forepeak, the chipping hammer would infallibly have gone through, nor would the hammer have gone through between the frames just before the bunkers. It is not true that the *Sir John Lawrence* was never scaled at all inside, but only scraped outside. I saw the windlass at the big repairs in 1884. I examined it at that time, it was in proper working order, both starboard and port side. On each of my surveys it came under my notice. I never observed any defects in the windlass, nor was any defect brought to my notice. I know, however, it was under repair in 1886. I examined the windlass after the repair of 1886, and it was then in perfect working order: the Captain and Mate were perfectly satisfied. They said it had got out of order through the carelessness of the previous Mate, Neustein. I examined the state of the windlass on my last survey in April 1887, and also on receipt of Neustein's letter. The repairs of the windlass were being proceeded with at the time he was dismissed. At the last survey I found that the windlass had not deteriorated: it was in thorough working order. In my opinion the windlass would have continued in such thorough order up to the time the ship was lost. I could never have passed the windlass at a survey if it had been useless, or even partially useless. I did not observe that the centre casting was broken. If the casting had been broken, it must have occurred in the interval of October 1886 and my previous survey. I can't remember the state of the starboard gipseys, but if they had worn into the wooden bitt which supported them, they would never have escaped my notice. If the whole body of the windlass had been forced over to starboard, I should have noticed that. Surveying the chain of the ship is part of my duty. I never observed that any of the studs had gone. If the messenger chain had not been there at all, it would not have interfered with the working of the ship. I have no special recollection of the condition of the donkey engine. The hose and the engine which were tried at every one of the surveys held by me, were not defective. It would take two or four men to work the Downton pump. I did notice the hose of the Downton pump. It was not leaky: it would not take eight lascars to work it. There is only handle room for four. I know, as a matter of fact, that the forward pumps are connected with the bottom of the ship. The pumps were tried at every survey I made. Every time I tried the pumps, I found them in satisfactory order. On each survey I made I examined the scupper pipes. The scupper pipes were renewed in the repairs of 1884, and properly so done. The length of the piping was about 15 inches; the thickness of the lead three-eighths of an inch. No sea that ever rose could have affected that pipe. The mouth of the pipe is flanged over the outer plating. After Neustein's letter, I examined all the scuppers carefully. I am quite satisfied with their condition. None of them would have been packed with cement. It was not necessary to have lip-guards to the scupper pipes, the question raised in Neustein's letter. I left it optional with the owners to put them on or not as they liked. I believe the lip-guards were made. It is not possible for a boat-hook to pierce the scupper pipes. I have never seen an iron-shod boat-hook with a sharp point in any of the boats on the river.

ROBERT BUSHBY,

Court adjourned to 8th August, Monday next, half-past 12.

C. H. REILLY,

*The 8th August 1887.—Robert Bushby.—Cross-examination continued to Mr. Henderson.—*It is usual sometimes to have iron scupper pipes. There is nothing unusual in this class of vessel in having had scupper pipes. Neither lead nor iron scupper pipes are expensive to make or fit in. At the present time lead scupper pipes would be the more expensive of the two. The rudder of the *Sir John Lawrence* was in a good state of efficiency. The steering chains were properly fitted. There was relieving tackle to each side on board. The relieving tackle was surveyed by me on each occasion and found to be in good order. There was a fixed span tiller. I saw that the condenser had been repaired on the occasion of one of my survey visits. I examined these repairs and considered they were sufficient. The scaling for the valves had been repaired. There is no ground whatsoever for

characterising my surveys of the *Sir John Lawrence* as a mere walk round, taking about ten minutes. It is not true that I never went below hatches. I did go below hatches on each occasion I made a survey of the *Sir John Lawrence*. It is not true that I merely looked down the hatches in the main deck. The additional weight of 5 or 6 tons on the main deck by the newly added deck was more than compensated for by the removal of a long set of deck cabins on the upper deck. The iron socket into which the stanchions fitted were secured to the deck by coach screws into the covering board: the awning stanchions would be screwed down, and would reach right through the covering board and the plate underneath, and were secured by a nut underneath that again. The covering board was new and not rotten in the least: it was sufficient to hold the screws of the stanchions. The ordinary wear of the ship since 1884 could not have rendered the covering board rotten. The bowsprit was very short: a stump bowsprit. The end of the bowsprit was not carried away in the collision with the *Indore*. I do not think the bowsprit, the band, bobstay, and bowsprit shrouds were carried away: the bowsprit shrouds on the starboard side may have been carried away. If they had been carried away, I should have had them replaced: there was no such thing as a bobstay on board. She did not require one. The stump bowsprit had nothing to carry: it is only used when sails are carried over. The bobstay was not the key and support to all the masts. The forestay, which is the support, was not secured to the bowsprit in the *Sir John Lawrence*, and never is in any other ship. In iron ships the forestay is secured to cleats bolted to the covering board. The ceiling of a ship in a new ship is no support to such ship. The rails were iron on the upper deck with rope netting. The two 1200 gallon tanks in the lowerhold were connected by a pipe at the bottom, so that the contents of one tank should run into the other. On the 21st October 1886 I was on board the *Sir John Lawrence*. Mr. Young asked Neustein to go down below and help to get up the shaft. He was sitting in a long chair. His reply was I am too d—d old. This was after Mr. Young had asked him two or three times. Mr. Young said nothing to Neustein further in my presence. Neustein never moved. No one ever wrote to me direct about the defects in the *Sir John Lawrence*. The hatches of the *Sir John Lawrence* were not cased into the upper deck. The large one before the engine was 8'-6" by 6 feet. This hatch leads to the between deck. The other hatch, which led to the forepart of the between decks, was 5 feet square. The combings of the after hatch are about a foot high. The combings were not raised that I know of. The cubical content of the between decks was 13,622 feet (cubic feet). The statement that remnants of the old lip-guards were left adhering to the sides of the vessel were absolutely untrue. The new scuppers could not have been worked into the plate if they had been there. Bilge pipes are not required on board of a modern steamship. They are only used in sailing ships with flat floors to draw the bilge when the ship is hove down by sail. The bilge pipe has nothing to do with the safety of the ship. It is only useful to prevent damage of cargo. It is not true that at the survey of 1st October 1885, at which I was present, the water poured down the forward pump ran through as fast as you poured it in. The sea connection to the after pump was cut off at the repairs of 1884. Doing so made the ship a safer vessel. It is not true that the pipe leading to the hold had not been connected with the forward pump. I am not certain whether the rudder pondants were there. I do not think they were necessary. The inner keelson was not knocked off. The top angle irons, which formed the base of the deck stanchions at the fore hatch, were damaged by ballast being thrown down. They were not damaged in any other part, nor at the stanchions. If these angle irons had not been there at all, there was sufficient section of iron in the keelson plate, and the angle irons worked on below these angle irons to give the required section for a vessel of the class of the *Sir John Lawrence*. I paid special attention to this, as it is the only point which, to a casual observer, might have affected the stability of the ship.

Re-examination to Mr. Kilby.—The patch was rivotted on to the frame and plate. The point of the *Indore* coolie deck, which knocked the hole into the *Sir John Lawrence*, the plate at the point three-eighths of an inch thick. There were two angle irons inside and the end of the deck. The point that struck the *Sir John Lawrence* are perpendicular to the stern. The point was strong enough to pierce a half-inch plate. I had not seen the windlass for eight months immediately preceding the time when Neustein left the *Sir John Lawrence*. I always notice windlasses; particularly as I could have noticed whether the gipsey had worn into the bitts. On looking at a windlass I generally ask the Mate, or whoever is with me, if it is all right. If he says yes and I myself see nothing the matter with the windlass, as I look at I pass it, I should probably have observed if any of the studs had gone from the chain. I look generally along every length of chain. There may be one length on top of another, but it is easy to see each link. You can generally see if a chain is worn. I mean by examining the scupper pipes as part of the hull that I examined each one of the scupper pipes. The scupper pipes could not possibly have worked loose. The bowsprit had no sheave. It was not broken off at the sheave hole. The bowsprit may have been used to put up a light jib to help to bring her round. She never used a jib for sailing purposes.

To the Court.—It is usual. It is not at all unusual to put a permanent patch instead of taking out the plate bodily. The only case in which the new plate is put in is when the ship is under A class and the owner may wish to sell her as a ship of that class. There is absolutely no foundation for the statement that I refrained from having a new plate put

in the place of the old one because I believed that the removal of the damaged plate would necessitate the further removal of 40 or 50 other plates. Neither Mr. Taylor nor Mr. Young spoke to me on the subject of allowing the patch to be permanent. My decision in the matter was not influenced in any way by their wishes or views. I did not know Mr. Young before I came out to this country. I am not more intimate with him than I am with any other Superintendent.

ROBERT BUSHBY.

John Taylor sworn saith to Mr. Kilby.—I was acting Marine Superintendent to Messrs. Macneill and Company for some time from May 1885 to November or December 1885. There was a collision between the *Sir John Lawrence* and the *Indore* about May, the end of May that year. The *Indore* was a river steam-ship belonging also to Macneill. I saw the hole which had been knocked into the starboard bow of the *Sir John Lawrence*. I saw the *Indore* after the accident. I should say it was the bow of the upper deck of the *Indore* which struck the *Sir John Lawrence*. The bow of the *Indore* was injured, the stanchion was smashed, the flagstaff also, and some of the hand rails. The deck and angle irons were not affected. The *Sir John Lawrence* was struck with wood first, afterwards with iron. The covering board over the point was scoured away, and exposed the iron. This point on the *Indore* was eleven to twelve feet from the water. I do not remember whether the *Sir John Lawrence* was deep that day or light. The hole was above the main deck in the fore-castle. I am quite certain of this. I noticed the plate where the hole was. I had the barbs or rags cut away, and the hole made as near square as possible, and an outside patch put over it, an iron plate about a quarter of an inch thick. The size of the square hole was about 18 inches. The patch in the first instance was bolted on to the plate only. Subsequently it was rivetted on to both plate and frame. I went round with the surveyor during the surveys of the *Sir John Lawrence*. The first was in June 1885 and the second in October 1885. Neustein was on board at the latter survey. The October survey was a dock survey. Mr. Bushby did the hull survey, Mr. MacKellar the engines. I have been over a good many surveys. I can tell you what was done by Mr. Bushby on that occasion. We went all over the ship both inside and out. I don't remember looking at the scupper pipes. I don't remember the surveyor looking at them. The scupper pipes had no cement on them in my time. Mr. Bushby looked at all our boats; they were lowered down to the level of the deck. None of them were put into the water in my time; this applies to both surveys, Mr. Bushby looked at them inside. He did not test the planking in any way. Mr. Bushby looked at the windlass; it was not tried, simply looked at. No complaint was made to me about the state of the windlass: Neustein never mentioned the state of the windlass to me. The pumps were examined; the leathers drawn and looked at nothing else. The hose was looked at in the October survey. The hose was not tested, that I remember. It was tested in the June survey. Mr. Bushby went down below right to the bottom of the ship into the after hold as well as the fore hold. It was not very dark. We had a light to look at the stringers and the plates. I saw no rust, all the iron-work was painted in the hold. We painted every two or three years or as often as the iron would require it. A Downton pump was connected with the bilge, and the pipes of both fore and aft pumps were continued to the bottom of the ship. I know nothing of a boat being sent from the *Medina* on board the *Sir John Lawrence*. I gave no order about it. The boat could not have been transferred without my order. I never heard of a boat on board the *Sir John Lawrence* that would not float. I went over into the Sunderbunds after giving over charge to Mr. Young. I remember the bowsprit of the *Sir John Lawrence*. I don't remember whether it had a sheave tied to it, it was short bowsprit. It was not broken at the collision. I can't remember whether she had a bobstay. I can't say whether the *Sir John Lawrence* had a broken bowsprit: it looked as if it had been broken. I never heard any complaints that the *Sir John Lawrence* rolled very much after the alteration. I never heard the officers of the ship tell the surveyor of any repairs or alterations they might deem necessary. I have never heard this done on any of our steamers that I can remember. I think the etiquette is that the officer should tell the Superintending Engineer, but if they chose to speak to the surveyor direct, they could do so. No notice would be taken of their having done so. The survey of the hull and equipments took Mr. Bushby about an hour. Mr. MacKellar did the survey of the engine-room. At that time Mr. Leech was the Chief Engineer. The condenser was repaired in my time. The landings were eaten away partly. The seatings were all right, the landings were repaired, we made brass landings in the place of the iron landings eaten away. We had not to lay the ship for that repair. I had no look at the chamber of the condenser nor were they opened out or looked at in the survey. My attention was not called to them. I did not remember the ram pump being opened out—the valves were opened I felt the thickness of the damaged plate on the starboard bow with my fingers. The plate was a quarter of an inch thick.

To Captain deSmitt.—The frame to which the patch was attached was good. I cannot tell you the thickness of the frame. The thickness of the plate I should say originally was not much more than a quarter, perhaps $\frac{1}{16}$ of an inch. I am not a practical ship-builder, I am an engineer. I never said to anybody that if Mr. Bushby ordered the plate out there would be no stopping. In my time I never bored any of the plates to test their thickness. I do not know whether the donkey had any connection with the fore and after hold for the purpose of pumping the fore and after hold out. We were dependent on the two main pumps. I did not notice the plate to be rusty. It had no rust. I felt the plate from the inside. I had heard that the *Sir John Lawrence* made use of her sails.

Cross examination to Mr. Henderson.—The *Sir John Lawrence* had a flat bottom for a sea-going steamer. I cannot say that the donkey engines had no connection with the fore and after hold. I could not have made the statement that taking out the damaged plate would result in no stopping. It would not have been true. I never heard it ever suggested that if that particular plate be removed, it would be necessary to take out other plates in the bow. Mr. Neustein was not present when I examined the damaged plate. I had no doubt then, and I have no doubt now, that the plate and its patch was as strong after the patch was put on as the plate was when it was new. The engineers and officers had to report to me if there was anything wrong in their respective departments. The only complaint made by Leech was about the condenser, and his complaint was seen to, everything was done to repair it that was necessary. None of the officers were discouraged in any way to make suggestions as to any repairs about the ship. I never discouraged any suggestions being made to me. Every time I went on board, I asked both engineers and officers what they required being done on board ship. The suggestions which in my opinion were reasonable were carried out. It never happened in my time that I had to refuse any request for repairs made by officers and engineers. I never gave either the engineers or officers to understand that it would be better for them to keep out of the way of the Surveyor. I never suggested to Neustein that he should go elsewhere during a survey and keep out of the way. It is absolutely untrue that the condition of the ship was such that to draw Mr. Taylor's attention to repairs was to court instant dismissal. Messrs. Macneill and Company never discouraged the bringing to notice the fact that particular repairs were necessary. They never gave me either directly or indirectly to understand that the less that was asked for the better. I never knew Messrs. Macneill and Company do anything which would induce the belief that the less which was asked for the better. In my estimation the brass landings were sufficient for the purpose they were intended. No complaint was made about them. Leech never in my hearing complained that the repairs were insufficient.

JOHN TAYLOR.

Court adjourned till tomorrow half-past 12.

C. H. REILY.

The 9th August 1887.—*Cross examination of John Taylor continued to Mr. Henderson*—In my opinion Mr. Bushby as a Surveyor was very strict, he never hesitated to direct anything he found wrong to be repaired or altered. I never did anything in order to influence any of the surveyors as to what repair or alteration they might direct. A boat was smashed in the collision between the *Sir John Lawrence* and the *Indore*, and a boat was substituted by my order; it came from the yard, whether it was a new boat or not I cannot say. I think the broken boat was given to the *Burmah* after repair. One of the life-boats was smashed and a new life-boat replaced it shortly after the accident. The Captain reported that a boat had been sunk during the voyage, another boat was sent on board the *Sir John Lawrence* to replace the boat which was sunk; it was not a life-boat. The boat which was substituted for the boat which was sunk was never removed from the *Sir John Lawrence* during the time I was a Superintendent. The boat which was substituted was in good condition and repair. In the survey of October 1885, the scraping usually done to a steamer when in dock was done on this occasion to the *Sir John Lawrence*; the ship was also painted. I never noticed any old lip guard bolts adhering to the sides of the ship. I can swear these were not there, I should certainly have seen them. I never had any conversation with Mr. Bushby whether the patch should be left permanent or not, the question was never discussed between us. The plates and frames generally were in good condition, and that I say after having gone through the vessel. I cannot say that I examined the ceiling particularly.

To the Court.—I did not think it necessary to call the attention of the Surveyor to the repairs done to the condenser. The Surveyor could not have seen the landings unless his attention was specially called to them. No boat was ever put on board the *Sir John Lawrence* in my time simply with the object of passing the survey.

JOHN TAYLOR.

Alexander Pedler sworn saith to Mr. Kilby.—I am Officiating Meteorological Reporter to the Government of Bengal, and I was so on the 25th May. I issued orders by urgent telegram at 8-25 A.M. on the 25th May to hoist storm signal No. 8 at the river stations, that is, Diamond Harbour, Mud Point, and Saugor Island. I issued these orders to the Telegraph Masters in charge of the stations. This is a copy of the Government notification prescribing the nature of the signals to be put up. Copy put in and marked (O). I based my opinion as to the nature of the storm signal to be put up from meteorological information I had received from the previous five or six days, previous to putting up No. 8 signal. I had been in receipt of such information every two hours from the ports on the West coast of the Bay. Reports from the East coast were coming in every six hours. I knew the storm was moving in a westerly direction, so it was not necessary to get as frequent reports from the East coast; the West coast information was more important. Just at the time of hoisting the signal I had ordered telegrams for Akyab and Diamond Island. The Diamond Island telegram ceased to come after the morning of the 23rd May. I have received no official intimation why Diamond Island telegram ceased after that date. I have been informed that the wire was out of order. In several previous storms Diamond Island telegrams have ceased to come at most critical times. I think that the construction of the line between Diamond Island and the main land must be defective. I have no reason to believe that the fault is due to the men

in charge of the telegraph station. In respect of the origin of cyclones in the Bay, Diamond Island is the most important of all stations which furnish me with information. It is the nearest station in that part of the Bay in which cyclones generally form, though it is about 350 miles away from where I believe the storm of the 25th May actually formed. The usual birth place of cyclones which come to the head of the Bay of Bengal is to the West of the Andaman Islands. We have meteorological stations both at Port Blair, Andamans, and Nancowry in the Nicobar Islands. Reports from Port Blair have come in since by post. I cannot be certain whether there has been any report come in from Nancowry. I received reports from Diamond Island by telegraph some days after the storm of the days the observation of which were previously missing. If I had received the reports from Diamond Island and Port Blair in time, I should have been in a position to state more accurately the nature of the storm. It would not have been possible to state with absolute precision the precise intensity. As a matter of fact, the storm was a very small one, but very intense. It is always possible to mistake a large storm with less intensity for a small storm with great intensity. It must be remembered that the observations on which the conclusion is based are obtained from stations which are generally some hundreds of miles from the storm itself. It is of the utmost importance that there should be telegraphic communication between Port Blair and the main land. This has been reported on several occasions to Government. On the 20th I came to the conclusion a cyclone was forming to the South-West of Diamond Island. Subsequent information confirmed that impression, and showed that the cyclone was increasing in force and moving in a north-westerly direction. This was notified day by day in the meteorological report published every afternoon. As in other cases, the Diamond Island telegram while the storm was in progress ceased to come in at the most critical moment. The West coast stations appeared to be affected by the approach of the cyclone on the morning of the 24th. From the indication on the morning of the 24th received from the West coast, it appeared probable that the storm would cross the coast some where near Vizagapatam, as barometric pressure was falling most rapidly along that part of the Bay, and wind directions appeared to show that the centre of the storm was to the South of Vizagapatam. The observation I received in the evening of the 24th showed me that the storm was proceeding in a more northerly direction than was shown by the position fixed by me in the morning, and at 1 A.M. on the 25th, the wind suddenly went round at Vizagapatam to North-West it was calm at Gopalpore, and at False Point wind was N.-N.-E. and very light. It being calm and winds light along the West coast, it appeared to show that the storm was not a very large and intense one. At 3-40 A.M. wind at False Point was North and blowing at 14 miles an hour, which is a very light wind indeed. Pressure had risen at False Point within the previous twelve hours. This telegram reached me at 8-15 A.M., and taking this in conjunction with other telegrams I received, I hoisted the storm signal No. 8. Up till receiving this telegram from False Point, it was quite uncertain at what part of the coast the storm would strike. There was no other signal in the Code which applies to the storm. Whatever my information had been I should have hoisted No. 8. The only other signal which might have been used was No. 3. This has reference to very large cyclones, whereas the storm in question was a very small one. It might be desirable to have one or two more general signals. In other respects, I should have the signals, as far as meteorology is concerned, as they are now. I have already suggested a modification of one of the signals in most cases of storms of unknown intensity. At 1 P.M. on the 25th the centre of the storm was, in my opinion, about 100 to 110 miles South of Saugor Island. The diameter of the storm was about 100 miles. At the time the *Sir John Lawrence* passed Mud Point and Saugor, both telegraph masters at these stations saw the *Sir John Lawrence*.

To Captain de Smidt. The storm was small in diameter, but great in intensity.

Cross-examination to Mr. Henderson.—It would not be particularly rough at Saugor at 1 P.M. on the 25th in the proximity of the light-house. The indications at Saugor Island at 1 P.M. on the 25th were very different from indications given in ordinary monsoon weather. A strong N-E wind is always an indication of a storm at that time of year.

ALEXANDER PROLER.

Edward Henry Palmer sworn saith to Mr. Kilby. I am Port officer at Chandbally. I have to do with passenger ships on the voyage from Chandbally to Calcutta. I have to give them their (B) form certificates and check any excess of passengers they may happen to have on board. I am subordinate to the Calcutta Port Officer. The Inspector and police staff at Chandbally thana are subordinate to me in that they have to carry out any orders I give them in respect of counting passengers arriving and departing in the passenger ship. I exercise this power under the Native Passenger Act 1876. I am an Honorary Magistrate at Chandbally, and by virtue of that office and in accordance with the orders of the District Magistrate I exercise authority over the police. The police make no written reports to me, they make oral reports if there happen to be any excess passengers. When the ships come in I do not myself count passengers, but when there is a great pressure of passengers during poojah trips, I generally go on board one and all three of the steamers. I have seen the passengers counted by the police, it is done by the inspector, sub-inspector and head constable, followed by two or three other constables attached to each of these officers. Nine or ten constables altogether. There are ten constables in the thana, the ships come one at a time, the difference varies from intervals of half an hour to three hours. The system of counting

passengers disembarking is the first vessel that arrives; at her stage, which is made of jetty about 12 to 15 feet, the steamer's gangway. The rule, and they are counted the police have. I have seen the counting of passengers in three-fourths of an hour to through but the police and the It is possible for the police to quite within the power of the been handed up for carrying excess passengers and been fined. The Divisional Officer at Bhadruck tries such cases. I have no power to try such cases. The Captain of the *Sir John Lawrence* has not been fined within the last five years. I think the Master of the *Curlew* was fined four or five years ago. I have been Port Officer at Chandbally for nine years. The system of counting as I have described has been so carried on ever since I have been Port Officer. When passengers go on board bound for Calcutta they are counted in just the same way, they go on board over the same stage. The passenger ships stay at their respective jetties the whole of Thursday and portion of Friday. The thana is distant from the jetties four or five hundred yards. The ships can be seen for an hour and a quarter before they come to the jetty. I have seen a police go on board the ships to see if there are any passengers left on board. I have seen them do this. The police remain on the jetty and prevent excess passengers going on board till the steamer starts. The steamer suits themselves to the state of the tide. There is no particular time fixed for the passengers to go on board. Passengers do not go on board on Thursday. They are not allowed to do so. The police search the vessel before allowing her to embark passengers. I know Mr. Augier in business; he was Sub-Deputy Collector and Customs Officer, and he has nothing to do with the counting of the passengers. I remember he did make a report to the Collector about something connected with the passengers. He used to go on board the steamers till warned off.

Cross-examination to Mr. Henderson.—Mr. Augier is not in Government employ now. He was dismissed for withholding Government money. I was not called upon for any explanation. I am responsible for the counting of the passengers. I live in Chandbally itself. I go down to the jetties almost every time the steamers come in. There is no ground for saying that the counting at Chandbally is a mere farce. It is not true that it was impossible to count the living stream of passengers as they rushed past. I never found after the counting that people were concealed in the cabin and about the deck. There is no river police at Chandbally. The passengers were not allowed to scramble down the planks as they liked. There is a village before you get to Chandbally seven or eight miles off where passengers might be landed, but I have never heard of passengers being landed there. I have never heard of passengers being landed on boats before the ship comes alongside the jetty. I have never known of passengers being taken aboard from boats to evade the counting. There has never been any permission given to the Captains to carry passengers in excess of the fixed number. I knew Captain Irvine, he in my opinion was a humane man. He treated the passengers kindly; he was popular amongst the natives. He was a sober man. I have known him nine years. I have known cases when tickets were not sold because the full number of that voyage had been reached. I have no doubt that my orders as to counting passengers were carried out and I had full opportunity of judging that they were so. We have had cases of one or more pilgrims on their way from Juggernath dying on the bank of the river before they disembarked. These cases were very few and far between.

EDWARD H. PALMER.

John MacKellar sworn saith to Mr. Kilby. I am Assistant Engineer Surveyor to the Port Commissioners. I was appointed January 1885 by the Port Commissioners. I was examined before my appointment was confirmed. I had questions to answer set me by Mr. Bushby. It was not a competitive examination. I saw the post advertised. I applied for it and sent in my testimonials. I was not acquainted with Mr. Bushby at that time. Mr. Bushby handed me the papers, I filled them up, and afterwards I saw that my appointment was confirmed. I asked no questions about it. I had not been a surveyor before this. I had been an engineer in the Mercantile Marine. I first went to sea in 1873 as fourth Engineer. I gradually rose to First Engineer, and was First Engineer for seven years. I was in the British India service at the time. I began my service in the British India. I was in that service for five years. Then I went over to the British and African service about a year and a-half. Then I rejoined the British India, and I passed the rest of my service in the British India till I took up my present appointment. I served an apprenticeship as an engineer for five years at home. I received no other authority from Government or official body to practice the duties of surveyor except my letter of appointment. I either myself, or assisting Mr. Bushby, have surveyed the *Sir John Lawrence* ten times. On the 19th and 21st April 1886 I visited the *Sir John Lawrence* when she was in the river. On the 19th I surveyed the boilers and machinery. On the 21st I finished the steam survey. In April I did not examine the hull and deck equipments, Mr. Bushby did so I believe. On

October 23rd, I examined engine and boiler. On the 25th I saw the equipments on deck and also completed the steam survey. On the 23rd and 25th I was alone I saw the ship under steam on the 26th. I was on board and saw her work through the bridge. I was alone in my survey on the 25th and the 26th. I cannot remember whether Mr. Bushby was with me on the 23rd. On the 31st January and 1st February 1887 I went on board the *Sir John Lawrence* because of a report sent to me about the condition of the vessel. I examined the hull of the *Sir John Lawrence* inside while she was in the river on 6th June 1885. Except on these two occasions, viz., the 6th June 1885 and 25th October 1887, I made no other survey of hull and equipments on board the *Sir John Lawrence*. When I made a survey in the year 12 ships were surveyed out of Calcutta. I have not been further than Naraingunge surveying vessels. When we go outside Calcutta to survey vessels either I or Mr. Bushby go. We do not go together. I survey vessels in Calcutta myself without Mr. Bushby going on board. I survey a fair proportion of the vessels alone. I believe I surveyed a little less than half of the 377 vessels I mentioned. I did these surveys entirely alone. Invariably when Mr. Bushby and I go together I do the engine department and he does the deck and equipments. We survey about a hundred vessels together. That is a rough estimate. Mr. Bushby does the emigration vessels entirely alone. He does most of the British India vessels by himself. We divide the work between us to get through it as expeditiously as possible, so as to cause as little detention of the ship as possible. I cannot tell with certainty. I make a report to Mr. Bushby in writing if I find anything defective. If I don't find anything defective I let Mr. Bushby understand orally that a certificate may be issued. I have my own private diary, in which I noted what I did on the 6th June 1885. I keep my diary regularly. I don't note down everything, but I note down everything of importance.

JOHN MACKELLAR.

Court adjourned till to-morrow half past 12.

C. H. REILLY.

The 10th August 1887.—Examination of John MacKellar continued.—I have looked for my diary containing the rough notes of my surveys of June 1885, I can't find it. They are only my private diary not office records. 377 vessels were surveyed by Mr. Bushby and myself, or by one of us from the 30th March 1886 to 1st April 1887. Most of the surveys are held in Calcutta. I do not remember with any particular minuteness what I did on each survey. As I do so many vessels, I cannot remember what had been done by me two and a half years ago on any particular vessel I surveyed. I examined the hull of the *Sir John Lawrence* in June 1885. I say everything was correct. If it had not been I should not have granted or rather got the certificate granted. The boats must have been in good condition or I should have condemned them. I feel sure I should have detected a rotten boat or a leaky boat if it had been on board. I should have noticed if the frames and plates had been rusty. I should have examined the frames to ascertain the condition of the iron, and if found defective, I should have ordered them to be strengthened or renewed. I always go down into the forepeak of every ship when I make an internal survey. I go into every compartment of the ship. Chandbally ships are not pretty rusty generally. The holds of the *Sir John Lawrence* were in thoroughly good condition and without scales. The plate on which the patch was put was also in good condition and painted. I never heard it stated that the hole in the forecabin was done by the *Sir John Lawrence's* anchor.

JOHN MACKELLAR.

Arthur William Stiffe, sworn, sworn to Mr. Kilby.—I am the Port Officer of Calcutta. I received from Government some letters sent to the Government by Mr. Neustein. I received the letters from Government on the 23rd November last. I also received a letter from Mr. Neustein direct. I was requested to report on those letters. This is the Government letter put in and marked (P). I also received a subsequent letter in June 1887 from Government, forwarding me the same set of letters from Neustein. I was asked to report a second time on those letters, put in and marked (Q). On receipt of the letter (P), I sent the enclosure to the Port Commissioners to deal with, and reported to Government that I had done so. I made no enquiry myself, and I made no report to Government. I then left the Port Commissioners to correspond direct with the Government. I am the officer referred to in section 7, Act VIII of 1876. I am at liberty to enter and inspect a ship under section 7. I may authorise any one else to do so. I am the person who grants certificates (A) and (B) under the Act. I am required to cause the ship to be surveyed before granting certificate (A) under the express direction of section 14 of the Act. Up to Mr. Bushby's arrival in 1882, I think, I appointed a surveyor myself and was responsible for the survey. Since Mr. Bushby's arrival I am not responsible for the character of the survey. My responsibility is limited now to the fact that a survey is held. I received official instructions from Government to apply to the Port Commissioners to order Mr. Bushby to make the survey necessary under the Act of 1876, and receive his report whether the requirements of the Act are complied with. From the nature of the Government instructions, I consider myself authorized to accept the report of Mr. Bushby; but if the owners or agents raised any objection to the report, I then should refer the matter back to Mr. Bushby or to Government. If the case was urgent, and the information given me was *prima facie* credible I might satisfy myself by a personal inspection of the ship, or through a survey of independent surveyors, as to whether the ship was seaworthy and properly equipped, fitted and ventilated.

By "urgent," I mean if the ship were on the point of going to sea ; if the case were not urgent I should simply write to the Port Commissioners, sending the information I had received on to them. I should take no further action ; they would not report to me. In Neustein's case, although he brought grave and serious charges against the way in which the surveys on board the *Sir John Lawrence* were conducted, I thought it lay solely within the province of the Port Commissioners to investigate into the action of their subordinate. Since the receipt of Government letter, dated 16th January 1884, I consider I have no responsibility in respect of surveys. Letter put in and marked (R). My view of my duty in respect of the (A) certificate is to make out and hand it over to the owner or agents on receipt of Mr. Bushby's certificate of the survey of the ship. Practically, therefore, the officer authorised under section 13 of the Act of 1876 is Mr. Bushby, and not myself. Under section 8, I consider I have the authority myself to enter and inspect the ship. As regards certificate (B), I should conceive it part of my duty to take action under section (8) when circumstances demand it. Section (8) I consider does not apply to me, in that the Government have directed Mr. Bushby to be the person authorised under the section. I follow the Government direction and consider myself absolved from all responsibility. Act VIII of 1876 directs that the surveys on which (A) and (B) certificates are granted should be by surveyors. Mr. Bushby has been appointed both Engineer and shipwright Surveyor. On the authority of the Government letter, I consider I am sufficiently complying with the requirements of the Act in accepting the certificate of one surveyor, Mr. Bushby. I do not recognize Mr. McKellar. As to (B) certificate, when asked for in respect of ships about to make a long voyage, I go on board myself ; as to ships going short voyages there is less trouble. The requirements are mentioned in section 11, Act VIII of 1876. Occasionally I go on board ; generally I accept the agent's statement in writing—a detailed statement that the requirements of section 11 have been complied with. I have been on board the *Sir John Lawrence* several times. She had an awning deck from stem to stern. She carried passengers on this deck. If there had not been substantial bulwarks or netting or other sufficient protection against the weather, I should have noticed it, and should have seen that the law was complied with. I consider that railings with rope netting combined with curtains are a sufficient protection against the weather within the meaning of the Act. The Local Government has appointed the Engineer and Shipwright Surveyor for the Port of Calcutta under section 9 of Act VII of 1884. The Vice-Chairman of the Port Commissioners is appointed the officer to whom the declaration of surveyors should be sent under section 12. At present there are no rules in existence made under section 24 of the Act of 1884 ; they have been under consideration for the past 2 or 3 years. The surveys are made under the rules made under the previous Act (Act V of 1862).

To the President.—The Board of Trade refused to recognise a Calcutta survey certificate, unless the survey was made by one of their own surveyors, or one nominated by them. This is what I have heard. The Board of Trade accept Mr. Bushby's certificates. Before Mr. Bushby's arrival the survey was held by two surveyors, a shipwright and engineer surveyor. At that time also I employed an additional and independent surveyor under the Act of 1876 ; a fourth surveyor was employed by the Protector of Emigrants. I am quite satisfied with the way Mr. Bushby performs his work. I consider him an absolutely trustworthy officer, if anything overscrupulous. Even if Mr. Bushby had never been near the ship, and yet signed the survey, I should be satisfied with that survey and accept its contents as absolutely correct. Mr. McKellar is not a legally qualified ship's surveyor. I was not aware that Mr. McKellar conducted surveys alone in the absence of Mr. Bushby, except on occasions when Mr. Bushby was away on leave. An engineer-surveyor has not to pass any examination that I know of ; anybody nominated by Government could be an engineer-surveyor. I wish to correct the statement I made as to Mr. McKellar not being legally qualified ; he may have been specially exempted from examination under section 69, Act VII of 1880.

Cross-examination to Mr. Henderson.—I accepted the certificates signed by John McKellar regularly in 1885. I accepted his certificates because he was gazetted as Assistant Engineer-Surveyor. I considered Neustein's charges, on the face of them, false and frivolous. If I had thought there was any foundation in any of the charges, I should have caused an independent enquiry to be made. I am authorised under section 14 to order a survey to be made upon an application for a (B) certificate while an (A) certificate is still running. I have no recollection of having ordered a survey for the purposes of a (B) certificate while an (A) certificate is running.

ARTHUR W. STIFFE.

George Pointon, sworn, to Mr. Henderson.—I am Commander of the *Bassein*. Formerly I was employed as Chief Officer on the *Sir John Lawrence*. I knew Captain Irvine intimately. I sailed with him about four years and a half ; previous to that time I did not know him. I have, since I left the *Sir John Lawrence*, been to visit Captain Irvine very frequently. When I sailed with Captain Irvine he was employed in the Chandbally trade. In my opinion Captain Irvine was not a foolhardy man ; he certainly would not have risked the lives of his passengers unnecessarily. He treated his native passengers with exceeding kindness. I do not think there was any commander who sailed out of Calcutta who was kinder or more humane to his passengers. He was decidedly an honest man. He was decidedly not the kind of person who would smuggle excess

passengers with the object of putting money into his own pocket; nor was he likely to connive at any one else on board doing the same thing. I have been in the service of Macneill and Company. No Captain of any of the boats belonging to Macneill and Company have to my knowledge ever been driven to make a voyage irrespective of the risk of loss of life. I left the *Sir John Lawrence* before 1882. Up to that time I believe the *Sir John Lawrence* to be a staunch vessel and a good sea-boat. I should not have remained in her if she had not been seaworthy and staunch. I did not leave her because she was not staunch and seaworthy. Captain Irvine was a very sober man. We got everything we indented for.

G. POINTON.

Case adjourned till 1 p.m. on Friday next.

C. H. REILLY.

The 12th August 1887. John MacKellar examination continued.—Some of the passenger declarations which are sent to the Port Office are signed by me alone. I was gazetted to act as engineer-surveyor for Bushby during his absence in England. During that interval, I alone surveyed the ships and signed the certificate. I was assisted by D. MacKellar of Lloyd's, who did the hulls and equipments of sea-going vessels. Mr. Bushby was absent during the months of July, August, and September 1885. During Mr. Bushby's absence out of Calcutta, when he is engaged in business elsewhere, I alone sign the certificates, otherwise he always signs whether he surveys the vessel or not. During Mr. Bushby's absence from Calcutta I do the whole of the survey myself. I was passed as a Shipwright Surveyor by Mr. Bushby. Mr. D. MacKellar was Gazetted a Shipwright Surveyor simply to assist me, because the work was so heavy for one man, not because I was not a qualified Shipwright Surveyor myself. To my knowledge I have only been gazetted once, and that as an Assistant Engineer Surveyor only. I have not been gazetted as a Shipwright Surveyor. Before I passed Mr. Bushby's examination I had no previous experience as a Shipwright Surveyor. The details of the surveys held by me upon the *Sir John Lawrence* in June 1885, April 1886 and October of the same year did not impress themselves on my mind beyond an impression that everything on board was all right. Before getting Neustein's letter, I remember noticing how the scuppers were fitted. I saw them from the main deck and from the between deck, not from the outside. I think there were about three scuppers on each side of the ship. I only observed some of them previous to Neustein's letter. I cannot say which of the scuppers I observed. I may have seen them all, but I did not look at them particularly. I never noticed any cement in connection with these scupper pipes. In the between decks there was enough light to see the scupper pipes. There were two hatches on the between decks—one on the fore and the other on the after hold. The between deck is one compartment. I do not remember seeing the after scupper pipes. I remember examining the soil pipes. I am not sure whether the scupper pipes were in the engine-room or in the after hold. It is quite easy to walk along the stringer plate in the after hold. In ships as large as the *Sir John Lawrence* there would always be stringer plates. You cannot make a minute inspection of the inside of the hull from the bottom of the vessel. So when I can, I walk along the stringer plate. When I survey a ship I get into every corner of the ship it is possible to get into. Mr. Bushby is very particular in his surveys, and gets into every compartment of the ship he can. In October 1886, when the ship was coming out of dock, the windlass I noticed was under repair. I did not see the *Sir John Lawrence* in dock; I went on board on the 23rd as she was coming out. I examined the engine and boilers on the 23rd. Mr. Young pointed out to me the part of the windlass which was defective, I think Mr. Bushby saw the windlass on the 23rd. The 24th was a Sunday. On the 25th I again saw the windlass: they were finishing repairs. On the 26th I saw it again. The repairs were finished. I saw the windlass working. I believe, both port and starboard were in working order. It would be quite right to grant a certificate even when the windlass is not in proper working order. It is never, however, done in this port. I remember seeing Neustein on board the *Sir John Lawrence*. I remember his being dismissed. On the last two occasions to 25th and 26th October. I do not remember seeing Neustein on board, on the 23rd I saw Neustein on board. These dates are all written down in our order book. I examined the chain while the steamer was lying at the Salt Golahs on the 25th October 1886. I never examined the chains before that date. It is usual to examine chains in dock; I suppose I could not get the chains out of the locker through the windlass being defective. I presume that was the reason I did not examine the chain when the ship was in dock. It is not more inconvenient examining the chain when the ship is afloat than when she is in dock. It is not more inconvenient for the Surveyors but may be more inconvenient for the crew and officers. It all depends on the facilities which exist for getting the chain out of the locker. I saw as much of it as there was on deck. The rest I could not see, through some misunderstanding between some of the ship's crew. Mr. Neustein was the responsible man. I passed the chain nevertheless. I saw 60 to 80 fathoms of each chain of the working part. The ship was moored fore and aft I suppose by her own chains. I could not examine that part of the chain which was under water, so do not know whether it was defective or not. After the vessel was unmoored I went in her through the bridge at that time, I saw the part of the chain which had been under water. I do not think 120 fathoms of chain were out taking both ends when the vessel was moored. I thought half of that would be enough. I watched the

windlass working taking in the chain as it went down into the chain locker. The chain was at once paid into the locker. It was not laid out for my inspection. I was looking at the windlass most of the time it was working. They were not ready with the steam for me to begin my survey. A ship could be painted over the rust, but the process would not last long; the scales would drop. It is quite as easy for a surveyor to detect rust underneath paint as rust without a dash of paint put over it. When ships are surveyed for the first time, there is a form in the office which has to be filled up with particulars. Where ships are surveyed over and over again, we do not fill up any form of the subsequent surveys. There is no diary in the office as to what was done by me in surveys held by me on the *Sir John Lawrence*. No diaries either of surveys held by Mr. Bushby. I do not know anything of any diaries of survey in our office. If everything is all right, we make no report to the owners. The diary book referred to in this blank form. Forms of this kind are applications put in by owners or agents of vessels, they are filed in the office, but never signed either by Mr. Bushby or myself; put in and marked (S). The document is only filed in the office, therefore it is unnecessary to sign it. We sign the declaration and we consider that sufficient. I remember that the patch on the starboard was above the main deck. I did not see any broken bunks or chest. I did not see any in that part of the fore-castle. The hole was four or five feet above the main deck. The awning deck extended to the fore-castle. The height of the fore-castle was six feet six. I never observed the deck was rotten near the chain locker pipes. I did not notice a chock of wood put there. We test the pumps on the occasion of every survey. We put water down the bilge pump to see whether the buckets and valves are in good order. When you pour water down, if the pump be in good order, you can see the water it would remain above the pump. If it ran away it would show that the pump was leaky or the valve out of order. I remember the *Sir John Lawrence* had a stump bowsprit. I did not notice that it was broken. There must have been a band at the end of the bowsprit, that is to say there ought to have been. I did not observe whether there was one or not. The *Sir John Lawrence* had no bobstay that I know of. She had shrouds: they were all right. When a vessel is in good order it takes from one to two hours to survey thoroughly, hull and equipments. I am alluding to the *Sir John Lawrence* class of ships. Mr. Young or Mr. Taylor were invariably present at surveys. The application for survey specifies a particular day, if it is possible for us to go on board on that day, we do so, without any further notice to the Superintendent. If we cannot go, we write and tell him so. There is no time fixed for our survey. The Superintendent awaits our arrival on board till we come. The Marine Superintendent has the responsibility of keeping the vessels in order. The captain and engineers can do everything necessary to assist us in our survey, but it is better that the Superintendent should be on board. I ask questions of the captain and chief engineer. I am in the habit of doing this. I ask them whether there is anything they would like my attention drawn to if there is anything defective in any way. I have asked questions of the captain and engineer direct. These officers have drawn my attention to defects when the Marine Superintendent was present. I cannot remember whether this has been done on board any of Messrs. Macneill's ships. We accept the original measurement of passenger space. Unless there has been any alteration we do not measure. No encroachment on passenger space can be made except under penalties. We trust to this proving a sufficient deterrent. We could generally tell if there had been an encroachment without measuring the space again. After receiving Neustein's letter I measured the vessel and found there had been an encroachment on passenger space. On receiving Neustein's letter I laid it before Mr. Bushby. There was a delay of a month or two before we went on board the *Sir John Lawrence*. When we did go on board we found everything all right. We went on board on the 30th or 31st January 1887. I got Neustein's letter about the 25th of October. I showed Mr. Bushby that letter within a week after I got it from Neustein. Our first visit on board the *Sir John Lawrence* in respect of the charges brought by Neustein was on the 31st January 1887. That was on receipt of the Government letter. If Government had never sent that letter, we should never have gone on board the *Sir John Lawrence* on 31st January. We were both quite satisfied with the condition of the vessel even before that visit.

To Captain deSmidt.—During my apprenticeship I was taught nothing but engineering. I was eleven years at sea before I was appointed assistant to Mr. Bushby. I used to look after the machinery of the vessels. I had to make ports tight, superintend the iron work on board the vessel. I was for three months superintending the construction of one of the Cape Mail Steamers. I superintended the building of a vessel 80 feet long of my own design—a screw vessel. I superintended the fitting of one of the British India vessels—the finishing. I know nothing about the general equipment of sailing ships. The survey of pilgrim ships are done under the authority of the Port Commissioners. I have measured the Chandbally passenger ships myself. I know all that is necessary for ships' boats. I was present when the patch was being fitted. I saw it finished. I looked at the thickness of the old plate, but did not measure the thickness. I should say the plates in the forepeak were at least $\frac{1}{4}$ thick. I did not see them bored. If I had any doubt about the thickness of the plates in the forepeak I should have bored them. I had no doubt. I went by the thickness of the landing and the condition of the plate generally. I allude to plates in her hull, and on her poop and topgallant fore-castle. You find the thickness of the plate by boring it. There are also a small patch on the port bow; I did not put it on. None of the plates in the ship were tested after the complaint of Mr. Neustein. The end of the scupper outside is flanged over and bent down on to the plate. There was no occasion from the way they were constructed to put an iron flange over the lead flange and bolted through with screw bolts. The leaden scupper would last as long as the ship. I think now

that there must have been 120 fathoms of chain out when the *Sir John Lawrence* was moored at the Salt Golahs. There may have been four or five or six boilers in one ship.

Cross Examination to Mr. Henderson.—It is ridiculous to think that a boatman's bamboo could push in the scupper pipe. I know the *Arco* was in the river. Her scuppers are exactly the same as those on board the *Sir John Lawrence*. They do not show scars made by boats hooks. The *Arco* has these scuppers since she was built and she passed her survey at Home under the Board of Trade ten years ago. The flanges of the *Sir John Lawrence*, scupper pipes were not rivetted. I know what lip-guards are, they do not add anything to the strength of the outer part of the scupper. There is no topgallant fore-castle on the *Sir John Lawrence*. I at the time was quite satisfied that the plate on which the patch was placed was thick enough. I was supposed to be competent when I was at sea to put a new plate on a vessel. I could have gone on board at any time the vessel was on the river after receiving Neustein's letter, and yet I considered it was unnecessary to do so; that was the reason I never went aboard till I got Government instructions. The encroachment I spoke of was on the forepart of the main deck by the erection of two cabins. The number of passengers allowed to be carried was reduced by fifteen as far as I remember. All passenger vessels require to be measured for space—all Indian passenger vessels. The more frequently I go on board, the less likely it is that there should be an encroachment. I did not notice. It is quite possible that the stump bowsprit owed its origin to the fact that on some former occasion it had been broken. I do not think it a fact that there was no band to the bowsprit would have escaped my notice. There is a separate receipt granted for payment of fees than appears in (S). I saw no paint put over rust in the *Sir John Lawrence*. I could see the chain passing over the windlass and going into the locker. I could see every link of the chain as it came up. I was watching the chain for the purpose of survey, because we had not seen it in dock. I should have noticed any broken links or missing studs or bent links. I examined the scuppers particularly after getting the Government letter. I looked out every part mentioned in Neustein's letter. Apart from the encroachment of space already mentioned, I found nothing wrong with the ship. The charge as to the encroachment have been greatly exaggerated. I examined the scuppers thoroughly, and I am now in a position to say, that none of them were cemented. There is no ground, whatsoever in my opinion for the suggestion that new scupper pipes had been put in, in the interval between the writing of Neustein's letter and our visit to the ship on the 31st January 1887. I got no certificate from Mr. Bushby when I passed my examination, a report was made to the Port Commissioners; the result was that I was confirmed in my appointment. There are no other Engineer-Surveyors besides Mr. Bushby and myself. I have seen the condenser of the *Sir John Lawrence* opened out nearly every time I surveyed the ship, the condenser was in good order, it was not a new condenser, but it was in perfectly good order.

Re-examination to Mr. Kilby. I do not think the mouth of the scupper has been repaired previous to our survey of January 1887.

JOHN. MACKELLAR.

Court adjourned till 15th instant.

C. H. REILA.

The 15th August 1887.—*Robert Lindsay Young, sworn, saith to Mr. Kilby.*—I am Superintending Engineer to the Rivers Steam Navigation Company, combined with marine duties. I am also Superintendent of the *Sir John Lawrence* employed by the owners. I do not know who the owners were. I had to look after the hull and the equipment of the vessel. I am an engineer by profession. I served my apprenticeship in the engine shop of A. and J. Ingles on the *Clyde*. I have had to do with boring the stern posts of screw steamers which was done in the yard, and the fitting of machinery and sea cocks of ships, and one thing or another. Before the time I became Marine Superintendent, I had no further experience in ship building and in the gear and equipment of ships. I have, however, been to sea for many years, either as junior or chief engineer, about nine years. I knew the *Sir John Lawrence* first in 1879. She was then running to Chandbally. Macneill and Company were the agents. I do not know who the owners were at that time. I have a general idea who the owners were. I cannot tell you whether the ship at that time was running in the interests of Macneill and Company. It was laid up in October 1881 as far as I remember; repairs were begun upon her about the end of July 1883. There were various reasons: the boiler was defective; the deck, the main deck, was bad, and part of the upper portion of the bulwarks were bad; the frames below the boiler were bad, and several other frames round the ship wanted repairs; the plates were in a fair condition. I did not advise Macneill and Company that she was not in a fit condition to run. We could not get a certificate for the vessel from the surveyors—Mr. Walker and Mr. Mitchell—Mr. Walker refused it. I cannot tell you whether they were surveyors under the Native Passenger Ships Act, 1876. The *Medina* was substituted for the *Sir John Lawrence* when she was taken off. There were, I think, fifty-one all told on board excluding the commander; but I am not positive about this. I am positive the number was fifty one. The *Sir John Lawrence* at the time she was lying off was advertised for sale. There was one offer made to buy her. I think Rs. 20,000 to Rs. 25,000 were offered for her by an Eurasian. Mr. Bushby surveyed her afloat in October or November 1882. I was present; no one else was present. This was under instructions from the Port Commissioners. After that survey she was docked in February 1883. Under my orders holes were bored in her bottom. She had been docked in one of the British India docks: the examination was satisfactory. Mr. Bushby saw the steamer while she was in dock after the boring: he paid one visit. I reported myself to

Messrs. Macneill and Company after the boring. I found the plates satisfactory. The vessel was some time after that taken down to the yard, 23, Garden Reach. The repairs were begun on the 1st August 1883. The vessel did not run again till June 1884. The repairs occupied till that time. We began by scaling the hull inside throughout. This I did on my own responsibility. There were a few places taken out below the sheer strake. No other plates were taken out below the main deck. No plates were taken out under the boiler. About 200 plates were supplied. A great portion of them was used on the upper framework of the vessel for renewing bad plates in place of plates which were taken out; the rest were used for doubling thin plates. About ten per cent. of the plates were used for the doubling. Mr. Bushby came on board about once a week. He saw the vessel after it was scaled inside. All the repairs to the iron work of the hull were done under his orders. All the bad frames which were above the water line, and which were defective, were repaired by putting on wherever required new reverse angles. We arranged for the putting up of the 25 feet of additional deck. We stripped the main deck, leaving only sufficient fore and aft to work the ship, so that she could be docked. We did the same thing to the awning deck, removing all the steam winches, deck hawsers and covering boards. We lifted the boiler out—both boilers; took the engines all to pieces, leaving on board only the condenser, cylinder and bed plate. That is about the extent of the repairs done at Garden Reach during this period. Mr. Bushby was on board six to eight times. We happened to be building new vessels there, and Mr. Bushby had to be there very often. We arranged for docking her at the Caledonian dock. This was done for the purpose of renewing the frames below the boilers and repairing the propeller shaft and sea cocks, as well as sealing the bottom outside and painting her. Not more than four or five plates were put on her when she was in the Caledonian dock, and about 8 to 10 frames. There was also the half of a plate doubled in her bottom. The ceiling in the boiler room was all renewed, the working men still working on the different parts of the vessel. She was in the Caledonian dock about two months. Mr. Bushby visited her at least once a week during that time. On leaving the Caledonian dock she was taken back to No. 23, Garden Reach. The work was still carried on, the new boiler put on board, and the engines put together. Repairs were finished at No. 23, Garden Reach. The price of the 200 plates would be about Rs. 3,300. There were about 4,000 feet of running feet of angle iron used; the cost of the angle iron would be about Rs. 2,100, rivets Rs. 840, labour Rs. 4,898-10-3. Besides there is the cost of coals, tools, and supervision. This is the expense we were put to in respect of the iron work alone. The cost of stores and materials supplied daily to the *Sir John Lawrence* from the stores of the Rivers steam workshops, 23, Garden Reach, from the month of September 1883 till June 1884 comes to Rs. 12,203 7-10. The items making up this sum are contained in the book I now produce. Part of the iron work and rivets, already mentioned, forms items in this book also. Besides these materials supplied from the work, there were materials also supplied by the Agents from other sources. The value of these materials so supplied comes to Rs. 11,262-13 9. The cost for the iron work, including labour and the materials supplied, both from the workshop and other sources by the Agents, amounted to about Rs. 28,364-15-10. This sum does not include deck woodwork, main boiler, donkey boiler and new crank shaft. There was spent in respect of laying decks, repairing engines, and fitting new boiler on board, and also fitting new crank shaft and caulking the dock—crew's wages, a sum of Rs. 20,191-6-2—making altogether a sum of Rs. 48,555-0-7. I put the repairs as a whole including everything, at a lakh of rupees. Rupees 50,000 of this sum was spent on the new boilers and engine-room repairs and rigging. Mr. Bushby made about 15 official visits to the vessel when she was under repairs, and perhaps the same number of unofficial visits. The vessel was lying alongside other vessels which he had to visit in his official capacity. The fee paid for these official visits was, I think, three times thirty = Rs. 90 to the Port Commissioners. There must have been a fee paid to Mr. Bushby for his first official visit in October 1882. I cannot find the receipt for that. In February 1883 the vessel was docked, and Mr. Bushby was paid a fee for that survey. I have got the receipt. When the *Sir John Lawrence* was docked in January 1884, Mr. Bushby was paid a third fee. I have that receipt. There was a final survey in May, and a fee was paid for Mr. Bushby's attendance. I have that receipt. We paid the Commissioners four times 30 rupees. Rupees 30 is the survey fee for a vessel of the tonnage of the *Sir John Lawrence*. Over and above this nothing was paid, that I know of, to Mr. Bushby for the additional visits he paid the ship. I have not a plan of the *Sir John Lawrence*. Since the repairs of 1884 no plates have been taken out or put into the *Sir John Lawrence*. She was not docked in Rankissen's dock to my knowledge. She may have been. The height between the main deck and between deck is 7 feet, but I never measured the distance. No report, whether official, or non-official was made to, or by, Mr. Bushby after the final survey, after the conclusion of the great repairs of 1884. There was absolutely no report of any kind made to us. I was present at the survey held in April 1886 and October 1886. I was not present at the survey held in September 1885. Mr. McKellar surveyed the hull and equipment in April 1886. He surveyed the vessel in the usual way. He looked at the boats, I cannot say whether he looked at the scuppers. He generally looked at the windlass, so I conclude he did on that occasion. He went down below into the holds. I went with him to each of the holds. I saw no rusty frames, stringers, or plates. I suppose he did look at the boats because he generally did so. I never remember a survey when he did not look at the boats. In October 1886 Mr. McKellar did the deck and equipments. He looked at the boats. I say this because he always does so. He passed all the boats. He looked at the windlass. He passed the windlass after the final survey. The windlass I believe was passed on the 26th. The only explanation I can give of the fact that the certificate for that survey bears date the 25th, and that the survey was not concluded till

the 26th, is that the certificate may have been prepared on that date, but not issued. The pumps were examined and passed on that October survey. Some of the pumps were repaired before the 26th October. The tonnage of the *Indore* was about 650 tons. I can't be positive. The *Indore* is a substantially constructed ship. I remember seeing a patch on the starboard bow. I looked at it from the inside in looking round the fore-castle: it was in the fore-castle. We were putting a patch on the port side, and I then noticed the patch on the starboard side. No one called my attention to it. I did not measure the thickness of the plate on which the patch was placed: the plate on the starboard side was quarter of an inch thick. I measured that plate. I therefore presume the plate on the starboard side was about the same thickness. The plates above the main deck were all the same thickness. I remember Captain Irvine very well. Whenever he applied for stores, I invariably supplied all he asked for. I never refused him anything he asked for. He never asked for anything he ought not to have asked for. He was a man upon whose indents I could rely. With the exception of the item relating to lip-guards and the gipsy, everything was provided as asked for before she sailed on the 27th October. The gipsy was being cast, and was, as a matter of fact, supplied on the following voyage. I did not have the pumps connected to the side bilges either. I myself did not think this necessary. A new boat was supplied. A port after boat was taken away, and a serviceable one supplied in its place. This was done in the morning of the 25th: it must have been. It was there—the new boat—before the survey took place. I dismissed Neustein the morning the *Sir John Lawrence* came out of dock. That was the morning of the 23rd. He left when Captain Smith joined two days after; about the 25th or 26th. I swear that the new boat was sent on board before the survey. The defective boat only wanted caulking: it had hung on the davits close to the funnel. I remember Mr. Leech being dismissed in September 1886. I gave him a certificate of competency (it was the first certificate I gave him after he was dismissed) to enable him to get a Government appointment. I had given him no certificate, except that one, since the time he was dismissed from the *Sir John Lawrence*. Some time after his dismissal he asked me to give him a certificate—about a month after. I did not give it him. I said I could not very well give him a certificate considering the reasons for which he had been dismissed, but I said I would not stand in his way if an opening offered. I gave him the certificate in March. He came to me and said he could get an appointment if I gave him a certificate, so I gave it him. He was dismissed about a mistake about coal—shortness of coal. There was no dishonesty about the transaction. He got Rs. 300 a month when in the *Sir John Lawrence*. His successor got Rs. 200 only: he was a second class engineer. We did not send a first class engineer with the ship on her last voyage. We sent him in connection with business in Cuttack. His being sent has nothing to do with the working of the *Sir John Lawrence*. It was a very serious matter, sending in a short account of coal. It might have resulted in sending the ship to sea short of coal. There is no etiquette that I know of which prevents either the Chief Engineer, Captain, or Chief Officer speaking direct to the Surveyor about defects or requirements on board, even in cases where the information given by the Chief Engineer might have the consequence of taking the ship off the trade in a busy time for a fortnight. I certainly would not resent his giving the information. I have known many occasions when the Chief Engineer and Captain have mentioned defects direct to the Surveyor, without having been mentioned to me at first—even in cases where I and the officer might differ. As to the necessity for making the alteration or repair, I should certainly not resent such officer appealing against my judgment to the surveyor. Neustein was very insolent. I dismissed him. Mr. McKellar told me of the letter he had received from Neustein. This was before the despatch of the letter by Messrs. Macneill and Company to the Port Officer recalling the certificate granted to Neustein.

To Captain deSmidt.—The *Sir John Lawrence* had compound horizontal engines. The new boiler was of the same size as the old boiler. The thinnest boring I got was, I think, $\frac{3}{32}$. These were the plates we doubled. Her rig was not much altered in the great repairs of 1884. We took down one yard. I don't think she had a topsail yard. The topmast and foremast were all one spar. The foretopmaststay we set up to the end of the bowsprit. The bowsprit itself had been shortened considerably. There was six feet of bowsprit outside the ship.

To Mr. Trelawny.—There is no truth in the report that I withheld the certificate ultimately granted to Mr. Leech because he was supposed to be about to bring a suit against Macneill and Company, or that he was in league with Neustein.

To the President.—Mr. Walker withheld the certificate mainly on the ground that the boiler was defective. His objection had nothing to do with the plates of the ship. If I was commissioned to build a ship of the size and tonnage of the *Sir John Lawrence*, I should put plates into her which would be required under Lloyd's rules.

Cross-examination to Mr. Henderson.—I have planned and built a number of vessels in the port. I have supervised the building of about 30 vessels—inland vessels, iron vessels. Very few of them were actually built out here; they were built at home and erected out here. I have planned and built two vessels out here. I have planned many vessels which have been built at home. This has been part of my duty since I was appointed Superintendent. During the big repairs there was a contract made with one Behari Lall Seal. This is the contract; the work mentioned in this contract was done to my satisfaction. I supervised the work. I saw that the ship was thoroughly scaled, scraped, and cleaned [contract put in and marked (7),] and the various pieces of work stipulated for on the contract carried out; the ship was at Garden Reach and in the Oaledonian docks, while the work mentioned in this contract (7) was going on. The contract bears no date but I can say that the work was begun on the 1st August 1883. This is a bill for the work done under that contract,

put in and marked (8). Mr. Hutcheson was Chief Engineer on the *Sir John Lawrence* when the repairs mentioned in (7) were being carried out; he held a first class certificate; he was a competent man; he gave a certificate as to the carrying out of the work. This is in the handwriting of Mr. Hutcheson—I mean his signature. The red ink writing is in the handwriting of my Baboo, put in and marked (9). There was a dispute about the amount demanded Rs. 1,200 odd in (8).

R. L. YOUNG.

Court adjourned till to-morrow half past twelve.

C. H. REILY.

The 16th August 1887—Robert Lindsay Young Cross examination to Mr. Henderson continued.—Mr. Hutcheson left the service of the Rivers Steam Company. This certificate (9) must have been given before he left. Looking at (8), I say that the chipping and scaling on the *Sir John Lawrence* was begun on the 1st August 1883 and finished on the 1st May 1884. The word scaling is the proper word to use in describing the action necessary to knock off the rust from the plates of a ship. Some people talk of chipping; it means the same thing. In the October survey, 1880, the *Sir John Lawrence* had gone into dock, on that occasion she was not scaled inside. Mr. Neustein did not in that occasion propose to have the outside of the vessel scaled. It is not true that when Neustein proposed to have the outside scaled, he was only permitted to have the paint lightly tapped off with scrapers. It is not true that Captain Irvine was peremptorily forbidden in 1884 to have the inside of the hold scaled. It is not true that in 1885 the *Sir John Lawrence* only received coats of paint over the rust in bad places inside and out. It is not true that the *Sir John Lawrence* was scaled only in places where it was safe to do so. It is not true that in any time after 1883, if the hammer had been used in the forepeak for scaling, it would infallibly have gone through the plate even before 1883. After the big repairs of 1884 we supplied paint to the officers on board, and they painted down the vessel, so I cannot say how many times she was repainted. I had nothing particularly to do with the supervision of the painting after she was painted in 1884. I went on board at the various surveys held after 1884. I observed that the ship was painted both in and out. If the ship had not been properly painted, I would have objected to it. One ton of paint was supplied to the *Sir John Lawrence* in one year 1885 to 1886, October to October, also 152 gallons of paint oil. I got this statement out of the items which may be examined in this indent book which I produce in Court. The amount supplied would be more than sufficient to paint down the *Sir John Lawrence* in and out with two coats of paint; this painting does not include the bottom of the vessel, which is painted in dock. The bottom was painted in the different docks she was in, or the British India dock. The oil and paint for painting the bottom were supplied by the dock people. Whenever a ship is docked her bottom is painted. The *Sir John Lawrence* was scaled both inside and outside in 1884. It is not true that the windlass at any time was utterly useless. I never observed that the gipsey on the starboard side had worn into the board. The first complaint, either verbal or in writing, made in respect of that windlass was contained in that document No. (1). The windlass, however, had been repaired before more than once. I was alluding to the repair made in October 1886; before that date for a whole year no complaint had been made about it. After No. (1) was handed to me, I took steps at once to have the windlass seen to and put right. After the repairs I saw the windlass; it was in thoroughly good working order. A small cast-iron bracket that takes the upright spindle was cracked; the starboard gipsey was set fast on to the spindle; this had gone wrong from the want of attention and the want of oil. The last time I paid particular attention to the windlass was in the survey of April 1887. I have had occasion to examine the chain. It was the Chief Officer and carpenter's duty to look after the windlass. The *Sir John Lawrence* in 1884 was supplied with chains in proper working order. The chains in 1884 were overhauled; if there had been defective links discovered, they would have been put right. Neustein never indented for new chains without getting them. In the October survey of 1886 I saw part of the chain. Between 1880 and 1886 chains were twice or thrice supplied to the *Sir John Lawrence*. If holes had been knocked in the scupper pipes outside the ship by boat hooks or any other instrument, I think I should certainly have noticed it. Previous to the date of document (1) no complaint was even made by Neustein or any one else about the state of the scupper pipes. During the time the vessel was under repairs for the purposes of the survey in October 1886, Neustein did not, except what is stated in No. 1, make any further complaint about the state of the scupper pipes. When (1) was sent in I examined the scupper pipes to see if anything was necessary. There had been lip guards at one time, but the holes have been filled up; there were no old bolts sticking on the outside. We had lip guards cast, but they were found not to be necessary. I never observed that the scupper pipes had been cemented in any way. I do not believe they were. The after scupper leading from the main deck through the hold on the starboard side was not leaking that I know of. Leech did not complain to me about the state of the scupper. I know Gill of King and Company. No bill was ever sent in by King and Company for repairs done to the scuppers. The sending in of the indent (1) had nothing to do with the discharge of Neustein, and in no way influenced me personally. I never told Neustein not to go near the surveyor, because he knew too much about the ship. I never told him that I would get him sacked if he went near a surveyor. I never in any way gave Neustein to understand that if he spoke to the surveyors about the repairs of the ship, it would be the worse for him. A day or two after the 17th October 1886 Neustein did not draw my attention to the dangerous condition of the scupper pipes. He never mentioned the *Vingorta* to me in connection

with these scupper pipes. That is an entire fabrication. It is not true that Neustein whenever he got a chance drove these complaints into my ears; nor in consequence of his having done so did he get into ill-blood with me. Neustein was not dismissed the first day. I had words with him on the 19th. About the 19th October they were taking the propeller shaft out of the hold. I asked him to rig up the necessary locker and to lend a hand to get it over the side. He refused. He said he was a d—d sight too old for this sort of thing. I did not discharge him on that day. I, however, spoke to Captain Irvine who ordered Neustein and then he went to work with a very bad grace. On the 23rd Neustein came to me and wanted the cooking stove repaired. Instead of repairing it I ordered a new one; but during the time the vessel was in dock, he had without orders sent the old one down to the shop, and the new one had not been supplied. On that morning he came to me using very abusive language about it he said: A d—d fine ship this, I have got to build a brick fire to cook my breakfast with. I discharged him. Previous to this nothing had occurred between Neustein and myself to cause ill-blood between us. It is not true that I never paid any attention to Neustein's suggestion about repairs. I paid every attention to them. It is not true that my idea is that nothing nautical has anything to do with the safety of a vessel. I have had to do with the removing of plates from other ships. Plates are tested by boring. That is the method I adopted in the repairs of other ships. Boring is a proper test. I went round with Mr. Bushby when he went round to see what repairs were necessary to the plates of the ship, both at the time when the ship was afloat and in dry dock. The borings came under Mr. Bushby's observation. I was present when he directed what was to be done. His directions were carried out to the letter. It was my duty to see that those directions were carried out. All the orders he gave in respect of repairs connected with other portions of the ship were carried out under my supervision. I have had experience of Mr. Bushby's method of survey since he came here. He and Mr. MacKellar and sometimes he and sometimes Mr. MacKellar survey all our inland steam ships. In my opinion the surveys done by Mr. Bushby and Mr. MacKellar are thorough and satisfactory surveys, the same as I have seen surveys carried on at home. Previous to Mr. Bushby's arrival in Calcutta, I have had no ships surveyed by other surveyors. I do not think there is much difference between the nature of the survey performed by Messrs. Bushby and MacKellar and that done by other surveyors of whom I have had experience. They are not stricter than other surveyors are. It would not be correct to characterise the surveys made by Messrs. Bushby and MacKellar as a "mere walk round." There is not the slightest ground for suggesting that such surveys are mere walks round. If a ship had passed the survey of Messrs. Bushby or MacKellar, I should be perfectly sure that such ship was seaworthy and well fitted and found. To my knowledge nothing has been passed by either of these gentlemen which ought not to have been passed. At no one of the surveys held on the *Sir John Lawrence* was any part of the ship unvisited which could be got at; at a dry dock survey every part of the ship can be got at and examined. On each survey as a matter of fact the plates were examined on all parts of the ship except where the cabins were. The plates were looked at during the surveys. Mr. Bushby always took a light down. After receiving Neustein's letter I looked at, but never measured the thickness of the plate on which the patch was placed. From long experience as an engineer I can make a very accurate guess as to the thickness of a plate by looking at the edge. Had the plate been of insufficient thickness the fact would have forced itself on my notice when I looked at. In my opinion a quarter of an inch would be a sufficient thickness of plate for that portion of the ship, $\frac{1}{4}$ th inches must be sufficient on that portion of the ship; the patch was eleven feet above the water I dare say. It was not possible that the plate on which the patch was put was only $\frac{1}{4}$ th of an inch thick. When I went round with Bushby and MacKellar. I also turned my attention to the plates. It is not true that you could pick flakes of rust off any part of the sides and bottom of the ship. Never during the time I have been holding my appointment of Marine Superintendent was there over a sound boat supplied in the place of an unsound boat with the object of enabling the *Sir John Lawrence* to pass his survey. During my time no boat was borrowed from the *Medina* to put on board the *Sir John Lawrence*. I was present at two surveys in 1886. Previous to the survey of April 1886, I did not see an utterly useless boat on board the *Sir John Lawrence*. An utterly useless boat did not pass the two surveys of April and October 1886. After the survey of 1886 no rotten boat was returned to the yard. During my time there never was a rotten boat on board the *Sir John Lawrence*. The jolly boat was never patched up with pitch just to bring it alongside. In October 1886 a sound boat was taken on board the *Sir John Lawrence*. I can't say whether that was the only boat which was changed on board the *Sir John Lawrence*. During the surveys boats were put into the water. I have seen this done myself I have no doubt of this. Sometimes all the boats, at others not all the boats, were put into the water. The jolly boat was not often put into the water at surveys. When a boat was not put into the water, it was nevertheless examined by the surveyor to see if it be in good order. He always looked at the boat and its fittings. The canvas hose I know was changed from time to time on board the *Sir John Lawrence*. I have seen the port after boat; it was the port after boat which was changed in the survey of 1886 (October). I saw the rails examined on the awning deck. The awning stanchion was secured by bolts and coach screws. The screws were not torn out by the weight of the awning. It was not possible in ordinary wear and tear for the screws to be torn out. It is not true that the covering boards were rotten; they were new in 1884; they were made of teak; teak could not rot in three years. The rails in the wake of the main hatch were not unsafe. Nor the rails on each side of the gangway opposite the main hatch, the gangway stanchion properly secured. It is not true that in consequence of the screw of the stanchion having been torn out, the

water got into the holes. No complaint was ever made by Neustein about the state of the stanchion and the rails of the awning deck. It is not true that the rails in the spar deck were all loose. It was not in my opinion necessary to have the pumps connected with the side bilges. I would have heard if any complaints were made of damaged cargo; there were none that I heard of. In 1884, 25 feet deck was added. The 25 feet of deck was compensated for by taking down the deck house. The repairs and alterations left the ship in my opinion very much where she was as to stability. Captain Irvine never complained of her being top heavy or crank; he had been in command of her before the repairs of 1884; he never complained of an increase of rolling, so far as I know he was perfectly satisfied with the ship. It is not true, beyond the ordinary cleaning up, that eye wash was used previous to the surveyor coming on board. None of the paint was used to brush away defects in the ship. Covering up rust or anything of that kind, you cannot hide a rusty plate by putting paint on it—paint on the contrary only makes the rusty plate more liable to detection. I remember the condenser. All tubes were drawn in the repairs of 1883-84. The condenser cleaned out, the tubes were tested with water pressure and the defective ones renewed. If the condenser were defective, the consumption of coal would be greater. It is not to the interest of owners to have defective condensers. When the *Sir John Lawrence* went to sea last the condenser was in thorough working order. It is not true that Bushby never went down the hatches or that he merely looked down the hatches in making a survey. Both these statements are false. I was present at the survey made by the direction of the Port Commissioners in consequence of Neustein's letter to Government. That survey was made with special reference to the strictures made in Neustein's letters on the condition of the *Sir John Lawrence*. Each matter referred to in Neustein's letter was separately examined. Except the encroachment on the passenger space, none of Neustein's charges were correct. As to the encroachment his statements were exaggerated. The frames on the *Sir John Lawrence* were closer than ordinary. They were about 18 inches apart. The usual distance might be 21 inches. I never induced or endeavoured to induce either Mr. Bushby or Mr. MacKellar to pass over anything that ought not to have been passed over while making surveys of the *Sir John Lawrence*. I never endeavoured to induce them to withdraw recommendations for repairs which they may have been inclined to make. I remember the pumps being tried by Mr. Bushby by water being poured down. I do not remember any occasion when the pumps would not work when so tested. The pumps were in proper working order in the April survey. I have every reason to believe they were in perfect working order on her last voyage. When the cement was taken out below the boiler, the bloom was still on the iron we bored the plates all the same. There are store bills of materials supplied to the *Sir John Lawrence* from 12th July 1886 to 9th December of same year, put in the bundle marked (10). These indents date from 5th May 1885 to 31st December 1885. Every item mentioned in these indents was supplied except those scrubbed out with blue pencil, put in and marked (11). There are similar indents some for 1886 and some for 1887, to which the same remark applies, put in and marked (12). Looking at this bill I can say that 45 fathoms of $1\frac{1}{4}$ inch chain cable was sent on board the *Sir John Lawrence* on the 16th November 1886. This was sent to supply the place of another length of chain. There are bills for materials supplied by Burn and Company to the *Sir John Lawrence*, October, November and December 1886, put in and marked (13). These are Howrah docking bills for October and November 1886, marked (14). These are bills for docking and other charges and for materials supplied from England for the *Sir John Lawrence* from February 1883 to February 1884, marked (15). This is a bill from John King & Co., for work done on board the *Sir John Lawrence* after the collision in 1885, put in and marked (16).

R. L. YOUNG.

Court adjourned till Thursday next, the 18th instant.

C. H. REILY.

The 18th August 1887—Robert Lindsay Young. Cross examination continued to Mr. Henderson. I dismissed Leech. At the time I dismissed him there was intention in my mind to put Mr. Ogg in his place or a man on a reduced salary. No consideration of that kind had anything to do with dismissing Leech. There was no suggestion here made to me by Macneill and Company or any one to get rid of Leech, or order to get a cheaper man. I had known Captain Irvine from 1879. He treated his passengers well.

Re examination to Mr. Kilby.—The ton of paint and 52 gallons of oil were supplied on twelve different occasions throughout the year October 1885 to October 1886. The bulk of that supply was not supplied in October 1886. The indent put in will show the approximate time when this paint and oil was supplied. Such part of the chain I saw was all right. The part I did not see I never heard to be defective. The 45 fathoms of chain supplied on 16th November 1886 was to the best of my belief to take the place of an anchor and part of a chain lost at Chandbally. The anchor and chain must have been lost after Neustein left. I did not think the lip-guards necessary, except for throwing the water off. Both the surveyor and I always examined the sea connections of the engines. I do not remember how long the after port boat had been on board the *Sir John Lawrence* before I had it taken away in October 1886. It must have been on board when I came back in 1885. The boat which replaced the after port boat was an inland steamer boat. I have never built a sea-going steamer. I would not like to risk the steamers I build in a voyage to Chandbally during the monsoon. I do not know how Mr. Bushby got his information about the thickness of the plates on the *Sir John Lawrence*. He went on board with me after the plates had been

bored. I cannot say how he remembered the details. I kept no memorandum of the thickness of the plates. The hull of the *Indore* projects from 6 to 9 inches beyond the stringer plates of the upper deck. The *Indore*, at her stern, when loaded would be about 4 feet out of the water.

To Mr. Hendersop.—It is quite possible, judging from the build of the *Sir John Lawrence*, for the upper deck of the *Indore* to have struck the *Sir John Lawrence*, while the hull never touched her at all. The forepeak of the awning deck on the *Indore* ended in a sharp point—a triangular plate to which the two angle-irons on the sides are rivetted.

R. L. YOUNG.

Duncan McKellar—Sworn saith to Mr. Kilby. I am Lloyd's surveyor to this port. If I were surveying a ship either for the purpose of classing or to see whether she were worth repairing or not, I would first have her placed in dry dock. I would have stages made outside and inside all round the ship, and have all ballast and cargo removed and the holds cleared. I would have a portion of the coiling removed. I would have the plates and angles scaled of all rust and oxidation, outside and inside. I would then examine the plates and angles, try them with a hammer, and when I thought the plates were thin, I would have holes drilled through to ascertain the thickness. I would examine the cement in the bottom to see whether it were sound or broken and whether it was adhering to the iron. I would examine the decks, if wooden decks and appeared to be worn. I would have holes bored through to ascertain thickness. I would examine her windlass, and her rudder and steering gear. I would have her engines, if a steamer, examined by an Engineer-Surveyor, myself doing the equipments. I would keep a note of the condition of the plates and angles, deck and equipment. If I was surveying the vessel for classification, I would report all those particulars to Lloyds. If I was surveying for another party to see whether the ship was worth repairing or not, I would report to them what I thought was the condition of the ship in writing. Unless I was asked to do so, I would not set out particulars of any survey. If the owners decided to repair the ship, then I should recommend what repairs should be done in detail. I should say so many plates or angles—specifying them—are to be changed. In that way I would specify everything that was to be done to the vessel. You must have stages to examine the outside of a ship. I should say the class at Lloyds A 90 would be quite sufficient for a vessel engaged on the Chandbally passenger trade. The plates for a ship of 460 tons net should, according to Lloyd's rules, be $\frac{1}{16}$ of an inch thick amidship and $\frac{1}{8}$ forward and aft. This is when the ship is new. The scantling 20 years ago was a good deal heavier. Unless one-fourth of the thickness was worn away, it would not be necessary to change the plate. If the vessel was taken care of and the plates protected, the plates here and there would want renewing. It is a proper procedure to double instead of renewing a plate. I often do so myself. The plates used for poop and fore-castle might be one-fourth thinner. The gar-board strake ought to be $\frac{1}{16}$ when the ship is new to satisfy Lloyd's requirements for class 90A; the sheer strake $\frac{1}{8}$, the bilge strake $\frac{1}{16}$. From the gar-board strake to the sheer strake $\frac{1}{16}$. I never surveyed the *Sir John Lawrence*. I measured her holds in May last in order to ascertain her carrying capacity. The holds seemed to me in good condition, properly painted. I did not notice any rust. I was on ten or twelve occasions on board the *Sir John Lawrence* in May last. I do not remember being on board in any other time. When I saw the ship in May she seemed a sound good ship. I took my last measurements on the day before she started on her last trip. I was down between decks and in the lower hold. As far as I can remember, she was closed in from the engine-room right forward, so as to be protected from the weather in case of a cyclone. I think a thousand people in a cyclone could take refuge in the main and between decks. I did not look at her equipments, but she did not seem to be in bad order anywhere. She did not strike me as being skimpy in any way. The Mate was with me most of the time I was making my measurements.

To Captain de Smidt.—The poop and topgallant fore-castle plates might be one-fourth of an inch quite safely. A plate between the guard-room and sheer strake, I should say, should be $\frac{1}{16}$ when the vessel is new.

To the President.—I knew Captain Irvine, but not intimately. My impression was that he was a steady, careful man, who did not drink and was a good commander. I had known him ten or fifteen years.

Cross-examination to Mr. Henderson.—I was down in the hold of the *Sir John Lawrence* on each occasion I visited her. If the plates had been rusty, I must have noticed it. If the angleiron frames had been worn, I would have noticed it. I did not notice either that the plates were rusty or the angleiron worn. In surveying for measurement as to capacity you do not take into consideration the strength of the ship. When I survey for class at Lloyds it is for four years. The *Sir John Lawrence* at one time was classed at Lloyds. Originally she was classed *A.A. the star means that the vessel was built with heavier plating than that required by the rules at the time she was built in 1865. The plating required in 1865 was heavier than now required by Lloyd's rules for the same class of vessel. The *Sir John Lawrence* continued till 1879 in the class *A.A. She was taken off her class in 1879 at the request of her owners—Messrs. Macneill and Company. This letter is a copy of one preserved in my office. I have compared this letter (Put in, marked 17). In 1877 Mr. Stewart was Lloyd's Surveyor. I produce the survey of 19th October 1877 held by Mr. Stewart. I produce the copy kept in our office. This is Mr. Stewart's signature. (Put in certificate marked (18) and report marked (18)). Taking into consideration

the general condition of the *Sir John Lawrence* as specified in report (18¹) of 1877 and the thickness of the plates at that time, I do not think it likely that the same plates in 1887 in the fore part of the vessel could be under one-fourth of an inch below the main deck. The borings specified in (18¹) were made below the main deck. Sometimes we bore the fore-castle head plates I knew Mr. Stewart. He was a careful surveyor, and a man thoroughly competent for the post. In 1865, when the *Sir John Lawrence* was built, in order to comply with the rules applicable to the class in which she was fixed, she should have $\frac{1}{8}$ garboard strake, from garboard strake to upper part of the bilge, and the sheer strake $\frac{1}{4}$ from the upper part of the bilge to the steer strake $\frac{1}{8}$. The star shows that the *Sir John Lawrence* must have been built with heavier plating than the figures I have given. While I was on board the *Sir John Lawrence* neither the Ma'e nor any one else made any complaint to me about anything being wrong. I have been associated with Mr. Bushby in making surveys more than once. In my opinion Mr. Bushby carried out the surveys in a proper and efficient manner. I had no reason to believe that he conducted the surveys in which he was associated with me in a perfunctory manner—quite the contrary. I have no reason to believe that Mr. Bushby does conduct surveys in this port in a perfunctory manner. I don't think making notes have anything to do with the efficiency of a survey: they only serve for future reference. I have had to do with surveying ships under the Native Passenger Act. I have granted declarations under the Act. These declarations can only be granted after a proper survey, and should be a record that proper survey had been made. If I were called upon to survey a passenger steamer under the Native Passenger Act, 1876, for the purpose of seeing whether a certificate should be granted, all I should do, if I found her in proper order and seaworthy, would be to sign the declaration required by Act. I should deem it necessary to send a report of a survey held by me on the direction of the Port Officer under the Native Passenger Act to the owners of the vessel. If directed by the Port Officer to make a survey, I should report that survey to the Port Officer alone and not to the owner.

D. McKELLAR.

Robert Bushby.—Recalled by Mr. Kilby.—I have no memoranda of the details of the thickness of the various plates. I am trusting to my memory alone in giving those details. You must remember I made a very careful survey of the *Sir John Lawrence*—the last survey of all, shortly before she went down. I did not bore any of her plates on that occasion.

To Mr. Henderson.—When I bore plates, I do so to ascertain whether they are thick enough. When I pass the plates as thick enough, I do so with reference to some standard, and I would not pass the plates unless they came up to that standard. In regulating the standard, I take into consideration the service for which the ship is intended. By this means I am in a position to say that plates on a certain ship I have passed are not in certain places below a certain thickness. That is how I am in a position to state that the plates in the *Sir John Lawrence* were of the particular thickness in the different parts of that ship as stated by me.

ROBERT BUSHBY.

Court adjourned till to-morrow.

C. H. REILY.

The 19th August 1887. John Simpson sworn, saith to Mr. Henderson.—I am Foreman to Messrs. John King and Company, Shipbuilders and Iron Founders. I remember the *Sir John Lawrence*. I have been many times on board the *Lawrence*. I think it was in June 1885, I went on board her after a collision. We fastened a patch on the starboard side just above the main deck in the forepart of the ship in the fore-castle. The "rags" had been cut when I saw it; it was about 16 inches square; the patch had been previously bolted on. We rivetted the patch. I thought the plate was quite thick enough to put a patch on. I have had experience in putting plates on. I have thirty years experience as shipwright and apprentice. I have no doubt the plate was thick enough for that patch. The plate was not less than $\frac{1}{8}$, it may have been a quarter of an inch. The plate was in a good state of preservation. Rivets were put through the frames as well as the plate. In my opinion after that patch was rivetted the plate was perfectly safe, and the ship, so far as that patch was concerned, seaworthy. I think the space between the frames were between 20 inches to two feet, I cannot say. I never measured them.

Cross-examination to Mr. Kilbey.—The patch was over two feet. The plate was rivetted to one frame not to two frames, the plate was two feet to two feet six, square. It was such a long time ago, I do not remember exactly. I am not sure whether the plate was rivetted to both frames. What I think was that it was rivetted to one frame, and to the plate on the other side with a strap at the back to take the rivet. I remember using a strap. The ship was painted red below and black above, the patch was on the black. I am sure of that. The scaffolding hung from the ship's side. I used to go in my own boat and get on to the stage from the top of my boat's cabin. The stage was a permanent stage, I had a considerable distance to step up from the top of my boat to the

stage. The ship was not very deep. I cannot say the depth of water she was drawing. She was in the usual trim. She was sufficiently trimmed to go to sea. She was a little heavier than ballast trim. The scaffold was about my middle, as I stood on the cabin. The top of the cabin was about four to six from the water. The hole was eighteen inches or so above the scaffolding. I am quite sure the patch was in the forecassle. I am positive I did not go below the forecassle into the forepeak. I remember there was the ordinary coating of paint on that plate. The *Laurence* was kept just like an ordinary vessel in the trade.

Re-examination.—She was as well kept as any other vessel.

JOHN SIMPSON.

19th August 1887.

Minden Augier, sworn saith to Mr. Kilby—I was appointed to a post in Chandbally, Sub-Deputy Collector. Customs Officer, with powers of a Deputy Collector under Act of 1878. In addition to this, my predecessor, Mr. Chapman, was Inspector of Chandbally Police. I was nominated to the duties of Inspector by the Magistrate, Mr. Trevor Grant. I took over my Chandbally appointment at Chandbally on the 18th March 1886. I took over temporarily the charge of the Inspectorship of Police from Mr. Chapman on the same day. Mr. Chapman held all the other appointments also. At the end of May 1886, Mr. Grant asked me to submit the usual application to him to be appointed Inspector. I never ceased doing the work of the Inspector. I was obliged to do this, as there was no other officer to do it. From the 18th March the same Inspector under my direct supervision counted the Chandbally passengers as they came and went. I left Chandbally on the 30th July on sick leave. During the interval between the 18th March 1886 and 3rd July of the same year Mr. Palmer had nothing to do with the counting of the passengers to the best of my knowledge. I was in no way subordinate to Mr. Palmer; they were two distinct departments. Mr. Palmer was Honorary Magistrate. As such Magistrate he did have a certain control over the police in respect to cases which happened on land; he had no control over them in regard to passenger counting. I received verbal instructions pending the ratification of my appointment by the Inspector-General of Police, both from the Magistrate of the district and the Commissioner to carry out the duties of Inspector of Police with regard to the counting of passengers only. I endeavoured to carry out these duties to the best of my ability always. Soon after I returned from Balasore, after seeing Mr. Trevor Grant, my suspicions being aroused, I determined to do the counting myself. On the 21st June the first vessel which came in was the *Curlaw*. I boarded her and found she had excess passengers. I found she had 610 passengers on board; she was allowed to carry 560. She had therefore 50 excess passengers; but the Captain challenged this counting. I had no means to test the accuracy of the Captain's statement, as the passengers had disembarked, and as he admitted to having 23 excess passengers on board I reported him to Mr. Trevor Grant, my immediate superior. Mr. Trevor did nothing to my knowledge on that report. The next vessel was the *Sir John Lawrence*; she came on the 24th June. On the morning of the 24th, as I looked down the river, the *Sir John Lawrence* not having come in, I noticed about two and a half miles from her mooring place the masts of the vessel evidently at anchor. The whole day passed (I had noticed this about 7 A.M.) till 3 o'clock P.M., when I saw Captain Bulloch's launch, called the *Jack*, leave her moorings and silently floating down the stream. She did not blow her whistle. She ought to have done so, and had always done so previously. In the course of about two hours the *Jack* returned with a crowd of passengers. I immediately sent two constables to count her passengers, while I went with two others on board the *Laurence*, which had followed the *Jack* up the river. I met the *Laurence* and went on board at the jetty. The two constables I had sent I saw board the *Jack* at her usual mooring place. I went on board and sent for Captain Irvine and also the Agent, Juggobundhu Baboo. I then asked Captain Irvine to keep tally with me. Captain Irvine and the Agent as well said it was useless giving this trouble, for there were no excess passengers on board. I insisted upon the Captain keeping tally with me. We counted the passengers, and our tally agreed; there were 561 passengers on board the *Laurence*, whereupon both the Agent and the Captain declared that I had given them unnecessary trouble. By this time the counting of the passengers on the launch *Jack* was reported to me.

Question.—Was any report made to you on that day or at that time by the police you had deputed to count the passengers on board the *Jack*?

Answer.—Yes.

Question.—Did they report to you at the time the number of passengers they had found on the *Jack*?

Mr. Henderson objects.

I think under the circumstances of Mr. Henderson's objection I must disallow this question.

Examination continued.—After getting that report I spoke to Captain Irvine on the subject.

Question.—What did he say?

Mr. Henderson objects.

Objection overruled.

Answer.—He merely said to me that he was obliged to get the assistance of the launch in consequence of her having run on the sand bank to lighten her weight by removing a certain amount of her passengers, and he admitted the counting on the launch. He said the counting on the launch was about right. I had told him the number on the launch reported to me.

Examination continued.—I reported the matter to my official superior, Mr. Trevor Grant. I have a copy of the letter I sent to Mr. Trevor Grant with me. I produce it. I made that copy at Chandbally from the original on the same day that I despatched the original. I compared this copy with the original after I made it. It is a correct copy.

Mr. Kilby tenders the copy.

Mr. Henderson objects.

Objection upheld.

Examination continued.—Shortly after this report had gone in, I received a copy of a letter. I have the letter by me. On the occasion of last year's cyclone, the 17th or 18th of June, I was standing on the wharf at Chandbally with the Commissioner Mr. Metcalfe. At that moment the *Laurence* was coming into Chandbally. Mr. Metcalfe's son was a passenger by that vessel. The *Laurence* appeared to me overcrowded. I got instructions from the Commissioner. I superintended the counting of the passengers, which was done by Sub-Inspector and head constable. I asked for the usual report and got it in writing. I doubted the statement I received. I went over to the Agent's office; then Juggobundhu Babu showed me a letter.

Question by the President.—From your experience gained as an Inspector of Police at Chandbally, and officially responsible for the counting of passengers arriving and departing in the steamers at that port, give me the conclusions you have arrived at as to the nature of the manner in which that counting is done.

Answer.—I have no hesitation in saying that there is no reliance to be placed upon the report of the subordinate police staff, and from the nature of the system it can never be satisfactory.

Examination continued.—When the ship arrives very often at midnight, passengers may escape from all sides of the vessel without being detected. The Sub-Inspector, head constable or policemen keeping tally are very likely to make a mistake. When passengers disembark they do so over a stage erected between the vessel and the wharf. The stage is six feet wide and there is a general rush—sometimes one, sometimes six abreast, all pushing to get ashore. The counting is done by a single man, and at the conclusion of the counting he reports what he likes. There is no means of either checking his counting or establishing a prosecution against the Captain. In the case of departure from Chandbally it is a common practice for passengers to go aboard when the vessel has left the wharf and is in mid-stream; the police having returned after the final counting. I have also noticed passengers go aboard when the vessel has proceeded about 500 yards down from its mooring place, and I have drawn the attention of my superior to the fact. I have documents now in my possession here, on which I base the allegation I have made as to the manner in which the counting is performed at Chandbally. I have been backwards and forwards to Chandbally about ten times. I returned the last time in the *Laurence*. There was not as many pilgrims as usual. When I went aboard it was in the slack time in November. In the *Sea Gull*, on one occasion, it took one half an hour to get a distance of sixty feet on the lower deck, it was so crowded. The passengers were closely packed, jammed so close together, there was no lying down room. Not a single passenger on that deck could have laid down. The *Sea Gull* generally does the passage in 14 or 16 hours. In the foul weather season she could not do the passage in that time. On dark nights the steamers have to anchor in the river; then she would take 28 hours. I have noticed very many cases of passengers, after disembarking from all the ships, die from exhaustion caused by sea-sickness, or whatever else, half an hour after they landed. Last year, between June and July, in one day I counted as many as 18 dead bodies; these included dead bodies of persons who had been brought from Puri to the *Laurence*. During the pilgrim season, which begins about the middle of May and lasts till about the end of September at least, that was the last year, I saw at least 100 dead pilgrims a month; this was the case from the beginning of June to the end of July. These pilgrims include those which came from Puri and those which came off the ships. A good number of pilgrims die who come off the ships. There is no inquest held on these dead bodies; the police I believe make the usual report. I was not dismissed from the Government service for withholding Government money. I have not been dismissed. I was removed from the service at Chandbally. On the 30th July I left Chandbally on sick leave. At the time I had in my possession a sum of Rs. 300 entrusted to me; about this sum. Not having received any orders what to do with this money, and being too ill to transmit it from a treasury 45 miles off, I sent for a native assistant and told him that I would take this money with me to hospital. I did so. I brought the money to Calcutta. I got 10 days' casual leave. Eventually I paid Mr. Trevor Grant the money. I had previously informed Mr. Grant I had the money by me. I put in two certificates I have received from the Government. (I) and (V).

Cross-examination by Mr. Henderson.—I was removed; my services were dispensed with. If an officer is dismissed the Government service he has no hope ever to regain admission. I was only "removed." The letter telling me that I was to cease serving Government as Sub-Deputy Collector of Chandbally is at Serampore. I could produce it by Monday. I am suffering from pleurisy. I obtained casual leave from the Commissioner through Mr. Grant. I went to Balasore on the 27th August. I had been 10 days in

Calcutta when I got a doctor's certificate from Mr. Crombie for a month. I got no further certificate. I was not in hospital. I was an out-door patient. I visited the hospital daily. I was not arrested when I got to Balasore. I have never been arrested by the police. My account books were at Chandbally; pending their arrival I had to find bail in the sum of Rs. 500. When the books arrived, and when done with, I was told I might go back to Calcutta. Mr. Trevor Grant made the order directing bail in Court. I went direct to Court from the ship. I signed no bond. Mr. LePatourel of the steamer *pilot*, stood bail. He is still my friend. The sum was Rs. 318. I handed that sum to Mr. Trevor Grant. According to Mr. Grant's reckoning my accounts were about Rs. 282 short, but there was a difference of opinion between us. Captain LePatourel lent me the Rs. 282. I handed it in under protest. This Rs. 282 was not a part of the Rs. 300 I paid to Mr. Trevor Grant. I have repaid Mr. LePatourel the sum of Rs. 282 which he lent me to pay Mr. Trevor Grant. I appealed to Government, and the Government refunded me Rs. 282. Before appealing to Government I never applied to Mr. Trevor Grant for the return of that money. I gave LePatourel a piano for the Rs. 282 he lent me. When I said that I had repaid Mr. LePatourel in money, I meant that I had repaid him the full equivalent of the Rs. 282 by the piano which he wanted. I paid two sums to Mr. Grant—Rs. 318 on one day and Rs. 282 on another day. Captain LePatourel was in Calcutta the day before yesterday. The piano transaction was an out and out sale. I swear it was not handed over to Captain LePatourel as security, a *bond-fide* sale. He has never either written or spoken to me on the subject. I served the Government originally as Assistant Sub-Deputy Opium Agent. I was on the supernumerary list. My services were not dispensed with in that department. I never served Hoare, Miller and Company, nor the Calcutta Steam Navigation Company. I cannot say whether I did apply to Hoare, Miller and Company for work. I was never in the service of the East Indian Railway Company. The native I told about my taking the money with me is named Baboo Jan. Mr. Grant admitted that he had seen that letter. I know Captain Palmer. I never saw Captain Palmer interfere in any way with the counting of the passengers. It is not true that the police have to report any excess to him, and have done so right through. I made two reports to Mr. Trevor Grant about the counting of passengers. I insisted on the removal of the Sub-Inspector because I reported him. He was removed in consequence of my report; no other policeman was removed on that report. I only reported against the Sub-Inspector. I emphatically deny that I had nothing to do with the counting the passengers at Chandbally. I certainly did not clear out of Chandbally because the place was made too hot for me. I got Sunday and holiday fees. I never drew the extra salary of Rs. 50 a month, though the appointment comes to that sum. It was never notified to me that I should get that sum. I did apply for that sum. Juggobundhu Babu did not tell me that neither he nor Captain Irvine were allowed to pass excess passengers. I swear that he never told me that there were orders of the Agents against carrying excess passengers. The Babu never mentioned the Agents to me at all. I have not the faintest recollection of having either verbally or in writing stated that the Agents prohibited the carrying of excess passengers. I did not wear uniform as a policeman. If I had stated it in any report that would be true. The Sub-Inspectors were never charged with bribery in any court that I know of. I was supposed to keep a diary, but I do not do so, because I had not a copy of it. I kept the written reports; filed them in my office. The documents I have with me I did not take to hospital; it was in my office in Chandbally. My office is my bungalow. I removed those papers from my office. I removed nothing that had been filed as part of the records of the office. The papers I have with me are mine. I have seen a ship arrive at midnight I should say about fifty times from the 18th of March to the 18th November. When I was strong I went down to meet these midnight arrivals. When I was ill, I depended upon the Sub-Inspector. I first took ill about the beginning of May. I applied for leave immediately but did not get sanction. The suggestion was from Mr. Grant that I should perform the duties of Inspector. On the 18th June as reported by the Sub-Inspector the *Sir John Lawrence* carried 613 passengers, on the following week 24th June 678 passengers, on the week following the 24th June I cannot give you the number. I kept special note of the 18th and 24th June, because I had doubts at the time of the reports made me by the Sub-Inspector. I saw two dead bodies thrown out of the *Cocnada* on one occasion. I saw a body also on board the *Sea Gull*. I made no report of the dead-bodies I saw.

MINDEN J. W. AUGIER.

Case adjourned till Monday next.

C. H. REILY.

The 22nd August 1887 Minden Augier—Cross-examination continued to Mr. Henderson. I produce the letter of Government directing my removal dated 18th October 1886, put in and marked (19). There was a Deputy Collector and Magistrate named Davidson at Bhudruok, 45 miles away. Deputy Collector Davidson was not my immediate superior. When I took sick leave I received no instructions from Mr. Davidson to await his arrival; I can swear that no instruction reached me which I saw telling me to await the arrival of Mr. Davidson. I understand that Mr. Davidson arrived the day after I left Chandbally. The piano was not under hire from Harold and Company or from any other Company. I bought the piano from Greenwood and Company about May 1886. The price was Rs. 450. I agreed to pay

Rs. 50 a month. I paid two instalments when my trouble came upon me. I still owed Greenwood Rs. 350. I did borrow money from a man named Mohamed Bhoj Badamjee, he holds; a hand note of mine. I did not borrow money from Golam Mohammed; I did receive Rs. 100 as a deposit from the sirdar of the Chandbally hat, and I credited it to Government; that Rs. 100 was part of the Rs. 318, I delivered to Grant. I did not ask Juggobundhu Baboo to get up a memorial on my behalf I asked no body to do this. When I came back from sick leave the Sub-Inspector I had reported against was gone. This letter was sent me for my information by the Sub-Inspector of Police at Chandbally, put in and marked (20) After the receipt of this letter I ceased to act as Police Inspector as far as counting passengers was concerned, the letter got to me some time between the 10th and 12th July. I never heard of any decrees for execution sent to Chandbally against me or even to Balasore.

MINDEN J. W. AUGIER.

Donald Fraser Mackenzie sworn saith to Mr. Kilby. I am a partner in the firm of Messrs. Maoneill and Company. My firm were proprietors of $\frac{3}{4}$ of the *Sir John Lawrence* at the time she foundered. Mr. William Mackinnon was proprietor of $\frac{1}{4}$ and Duncan Macneill and Company were proprietors of $\frac{1}{4}$, that proprietary was for September 1884 to date. From November 1875 to July 1881, Macneill and Company of Calcutta were proprietors of $\frac{3}{4}$. British India Steam Company $\frac{3}{4}$, Duncan Macneill and Company $\frac{1}{4}$. From August 1881 to August 1884. Macneill and Company, Calcutta, were proprietors of $\frac{1}{4}$, British India Company $\frac{3}{4}$, Duncan Macneill and Company $\frac{1}{4}$. We bought the *Sir John Lawrence* from Mr. Shepherd of Bombay. I cannot tell you what William Mackinnon and we paid the British India for their share. The transfer was done at home. The price of the $\frac{1}{4}$ we bought was also arranged at home. I cannot tell you what we paid. According to my calculation from documents in the possession of my firm, we spent Rs. 95,000 on the repairs of the *Sir John Lawrence* in 1883-84. The *Sir John Lawrence* was insured at the time of her loss for £5,000 at home. I am not aware of any survey being held on the *Sir John Lawrence* for the purpose of this insurance, nor am I aware of their being any necessity for such survey. I produce the pay sheet and postage bill from it. I can say that in the month of March 1887, that the *Sir John Lawrence* carried 31 deck crew and 22 engine-room crew, the April pay bill went down in the ship; I believe there was no material variation in the number of the crew mentioned in the March and April pay bill. The deck crew consisted of the master, mate, clerk, Chinaman carpenter, butler, two cuddy servants, one cook and cooksmate, one 'saloon topaz, one deck serang, one tindal, ten lascars, two deck topazes, three seacunnies, one leadsman, one bhundari, or sailor's cook, and one pannewalla. I was not in Calcutta when the great repairs of 1883-84 were undertaken. I do not know therefore what the negotiation were which preceded the decision that she should be repaired. A sum of money was paid to Mr. Bushby by our firm for his professional advice as to the requirements of the Board of Trade in regard to the alteration on the hull of the vessel. Mr. Young was Superintending Engineer, who carried out the repairs not being cognizant what those requirements were. The honorarium paid to Mr. Bushby was Rs. 1,000. All fees were paid to the Port Commissioners. The tickets sold on the last voyage made by the *Sir John Lawrence* were as follows:—

For accommodation in after saloon (zenanah)	10
Second class passenger or saloon	1
Third class Nos. 5836 to 5837	2
5840 to 6557	718
5765 $\frac{1}{2}$ ticket	$\frac{1}{2}$
			731 $\frac{1}{2}$
Less No. 6316	$\frac{1}{2}$
			731
Deduct refunded ticket—			
6125 to 6135	11
6356	1
6431 to 6433	3
6357 to 6361	5
One ticket torn up	1
			21
			21
			710

Of the 710, some 30 or 40 passengers were allowed to proceed by the *Mahratta*. No note was kept of the number of these tickets. The license number was 735. She was therefore short of 25 passengers apart from those which went by the *Mahratta*. The Captain would report to Mr. Currie the money collected on board from passengers without tickets. Commanders have instructions not to leave port with an excess number of passengers on board, and as a natural consequence of those instructions, the Commander would not lift anchor so long as he had an excess number on board. I should not myself necessarily be aware what the sums would be the Captain might pay in as received from passengers who had gone on board without tickets. We continue selling tickets till the evening of Tuesday. Before closing the office we advise the Captain as to the number sold, and if there be a margin, the Captain is authorized to receive passengers on board without tickets till the number representing the margin is exhausted. The money paid into the office by the Captain through Mr. Currie would be entered, or received, "from Captain Irvine deck freight account *Sir John Lawrence*," there are such entries I believe. I have not looked specially for them.

The court rose for lunch.

Donald Fraser Mackenzie Examination continued.—By reference to our cash sheets during the interval when the court rose, I have ascertained that the entries are made as above. These cash sheets do not refer solely to the *Sir John Lawrence*, but to the above cash transaction of our firm. My head book-keeper showed me these entries. I saw two entries, one in the subsidiary book and one in the cash sheet. I did not observe the amounts particularly, it was a small amount. I would not necessarily be likely to know the fact if the Captain at any time did receive moneys from passengers who did not buy tickets. We keep a registrar of tickets issued for each voyage. I produce the register. The register dates from 5th January 1885 to 6th July 1887. During this time, in my belief, no instances occur when tickets were issued by my firm in excess of the maximum license number at each season of the year of passengers on board the *Sir John Lawrence*. It has never come to my knowledge that passengers in excess of the authorized licensed number were carried by the *Sir John Lawrence*. On the 18th of May 715½ tickets were sold to passengers for the *Sir John Lawrence*. The Captain collected about Rs. 100, but I won't swear to the actual amount. I only looked at the entry casually. I could not tell you how many or if any passengers paid money to the Captain, it is quite possible that the sum mentioned was obtained on freight alone. The Captain would have nothing to do with cargo charges excepting deck freight. The Captain would pay his collections to us in Calcutta. Not so far as I know have we as owners nor Captain Irvine been fined for carrying excess passengers. Except the Captains tally we kept no check on the number of the passengers actually landed at Chaudbally or in Calcutta. Absolutely no commission was paid to the Captain in respect of passengers who went on board without tickets or for anything else. These documents are signed by Mr. Currie on behalf of the firm, put in and marked (V). These two documents are also signed by Mr. Currie on behalf of my firm, put in and marked (W).

To Captain deSmidt.—The *Sir John Lawrence* was insured at home, but how the knowledge of the risk was obtained, I am unable to say. As far as I know no report was sent from Calcutta of the condition of the vessel with the object of effecting that insurance. I do not know what suggestion Mr. Bushby made as to the proposed alteration in the hull. Our boats are surveyed under the Indian Passengers Act, I believe.

To Mr. Prelawny.—Captain Irvine stood very well with our firm. I have made several voyages with him and never saw him drink anything stronger than gingerade. I most certainly never saw him under the influence of liquor at any time, and I believe him to be thoroughly kind and considerate to his passengers, he was a regular typical old sailor.

To the President.—The price of tickets sometimes rose, according to the demand. On the last voyage the prices rose from Rs. 3 to Rs. 6. We refunded money on 21 tickets, 11 of them at Rs. 3 and the remainder at Rs. 5. Speaking from the sale of tickets in our office and deducting those allowed to proceed per *Mahratta*, she had 670 passengers. Our maximum number is 735 passengers in foul weather. If the police evidence be correct that she left with 735 passengers on board, there must have been 65 without tickets. I can give no explanation, because I was not there how it came about that some of the persons who bought tickets for that voyage were not received on board. The captain would be aware of the variation in the price of tickets. I can give you no reason why the number of passengers is not filled in our application for (B) certificate marked (W). On getting information of Mr. Neustein's charges, I referred the particulars of those charges to Mr. Young for report, and on hearing what he had to say, I consulted my Solicitors as to the advisability of prosecuting Mr. Neustein for defamation. The fair season is from the 16th November to the 31st March and 16th August to 30th September. The foul season is from 1st April to 15th August and 1st October to 15th November.

Cross-examination to Mr. Henderson.—The notice has to be given at least 24 hours before the vessel sails; the application is sent in at least 24 hours before the vessel sails, passengers are granted tickets right up to the end of the day before the ship sails. It would be impossible to state on that application the number of passengers she was to carry in any particular voyage. The application was drawn under Mr. Currie's directions. I do not know why the prices were increased on the 24th May. At that time the Chaudbally steamers were running under an arrangement with a common price, the increased price of the tickets would go with the common price. No instructions were given

to Captain Irvine or anybody on board to turn away people with tickets, or order to take passengers on board without tickets and charge them the highest price for which tickets were sold. I trusted entirely to Captain Irvine. I have had no reason to doubt Captain Irvine in reference to his dealings with passengers and passenger money. There was a clerk on board. He had been on board for six or seven months. His duties were to collect the tickets and the deck freight, and make out the manifest. It was his duty to count the passengers and to report if there was any excess. He never reported any excess passengers on board the *Sir John Lawrence*. At the time the *Sir John Lawrence* was lost there was no competition between the *Sir John Lawrence* and the other steamers in the same trade. No inducement was held out to Captain Irvine by our firm to make quick passages, or to get to Ghandbally before the other boats. About the time the *Sir John Lawrence* was lost, there was every probability of the steamer coming back comparatively empty on the return voyage.

D. F. MACKENZIE.

Court adjourned till to-morrow, half-past 12.

C. H. REILY.

The 23rd August 1887.—Donald Fraser Mackenzie cross-examination continued to Mr. Henderson.—Neustein applied for a certificate. I did not write out the certificate myself. I said to Neustein, when he came to the office, well Mr. Neustein I have nothing to say to you. According to your own story, you are too old for your work, and I have no intention of keeping officers of that description about me. Neustein replied: That was not the reason of my dismissal. I was dismissed for pressing upon Mr. Young repairs which were necessary to be done to the vessel. I replied that I was quite satisfied that Mr. Young was competent to decide what repairs were necessary or otherwise, and that that story would not do. Neustein said—Well I do not ask to be kept on, but as I wish to apply for permission to attend the examination for the river, I want a certificate of the time I have been in the employ. I rang my bell and told the peon to call Mr. Currie. On Mr. Currie coming in, I asked him, saying, give this man a certificate of the time he has been in our employ. The certificate came in initialled by Mr. Currie along with several other letters similarly initialled in a basket, and I signed it without reading it. It is not true that several days elapsed between the date of the certificate and the date it was handed to Neustein. It was given him on the same day of his application. I swear he never asked for a certificate which should embrace either character or ability; otherwise I should have refused it flatly at the time. There is no ghât sorang in our employ in respect of the *Sir John Lawrence*. We never paid a claim for damaged cargo yet on board the *Sir John Lawrence*, and so far as I know none were made. Leech was also dismissed from our service. So far as I know there was no connection between the dismissal of Leech and the engagement of Ogg. The surveyors were never at any time influenced or attempted to be influenced in any way by Macneill and Company as to the nature of the report which they should make. The Rs. 1,000 paid to Mr. Bushby was paid, I believe, some time in 1886. As far as I know there was no arrangement made with him that he should be paid the Rs. 1,000 at the time of the repairs. So far as I know I have no reason to believe that Bushby expected to get anything.

Re examination to Mr. Kilby.—I believe the payment of Rs. 1,000 was by a cheque; I am almost certain, but I cannot swear the payment was by cheque. I cannot say whether the money was handed to Bushby direct or sent him through some one else. I have no doubt it was debited in the *Sir John Lawrence* accounts. I have no reason to suppose that Mr. Young knew of the payment of the Rs. 1,000. There is no reason why he should. I was not in the country when the arrangements were made about the big repairs done to the *Sir John Lawrence*. I made the payment; if it was a cheque, I signed the cheque. The chances are it was sent with a note asking him to accept it. I have certainly no recollection of Mr. Bushby asking for payment, or for any sum of money. I have absolutely no recollection of Mr. Young suggesting to me that I should give Mr. Bushby any sum of money. The joint purse arrangement had been in force some time before the *Sir John Lawrence* left here on her last voyage. How long exactly, I cannot say.

D. F. MACKENZIE.

Barry LePatourel, sworn saith to Mr. Henderson—I am in command of the steamer *Pilot* at Balasore. My steamer runs between Balasore and Calcutta. I carry native passengers. I am supposed to carry a particular number. A check on the number is kept by the police at Balasore. I know Mr. Augier; he was never a friend of mine, an acquaintance.

Mr. Kilby objects to any further questions being put to this witness.
Objection allowed.

BARRY LEPATOUREL.

Joseph DeSilva, sworn, saith to Mr. Kilby.—This (B) certificate, dated 10th May 1887, is signed by me for the Port Officer. I usually sign these (B) certificates for the Port Officer. (B) certificates are generally issued a day before the vessel starts; they are issued in the afternoon, put in and marked (VI). This certificate (B), dated 21st September 1886, is signed by me for Port Officer. The two documents appended to the certificate is signed by the Agents (Mr. Henderson admits the signature to be that of Macneill and Company). put in and marked X. This (B) certificate, dated the 4th January 1887, is signed by me for Port Officer, put in and marked (Y).

J. DESILVA.

Phillip Arden, sworn, saith to Mr. Henderson.—I am Commander of the Steam-tug *Hunsdon*. I remember something about the cyclone of the 23rd of May last. On the morning of the 25th, 7 A.M. I was below Saugor, anchored near the Long Sand light. Between 9 and 10 A.M. I moved up between 6 or 7 miles. I anchored then until the following morning till 10 A.M., when the chain parted. At noon I came to Diamond Harbour. I had a very good opportunity of judging the strength of the cyclone. I know the channel taken by the Chandbally steamers. It was possible, but not probable, that a ship of the *Sir John Lawrence's* size could have lived through that cyclone. Even a brand new ship of the *Sir John Lawrence* would not, in my opinion, have returned to port.

Cross-examination to Mr Kilby.—This cyclone was not only intense, but irregular. The sea was the worst I have seen at Saugor. A perfectly new ship of the highest class at Lloyd's would have very little chance in that cyclone.

P. ARDEN.

Juggobandhu Chatterjee, solemnly affirmed, saith to Mr. Henderson.—I am Agent to Messrs. Macneill and Company at Chandbally. I have been there 4 years and 3 months. I have kept the account of passengers booked from Chandbally to Calcutta; the number of tickets sold. The police keep a tally and also the Captain kept a tally of passengers who went on board at Chandbally. Similar tallies are kept in respect of passengers landed from the ship at Chandbally. I know Mr. Palmer; he is Port Officer there; he sometimes comes and watches the landing of the passengers there. I cannot say whether he has anything officially to do with the landing and embarking of passengers. I know Mr. Chapman; he was Inspector of Police at Chandbally up to May 1886. He was succeeded by Mr. Augier. I remember on one occasion Mr. Augier counted passengers. I sometimes, when it is necessary, used to go and meet the steamers on arrival. I was in the habit of going. I did not go every time when there was a rush of passengers. I almost always went on board; that was during the pilgrim season. Last year I did not go on board every time passengers were landed during the rush. I cannot recollect whether he went and counted passengers on any other occasion. While Augier was at Chandbally during the busy season, I went to meet the steamer more than once. During these occasions I did not see Augier have anything to do with counting passengers. I saw Mr. Augier count the passengers only once as I have said, and I think that was in June. I cannot remember the day in June. I remember the occasion when the *Sir John Lawrence* stranded some little distance from Chandbally, the *Jack* went to the assistance of the *Sir John Lawrence*. On that occasion Augier took part in the counting of the passengers. I was not present at the counting. I could see Augier counting from my office; just at the landing stage. Augier told me there were a few passengers in excess. I took steps to see whether that was so or not; there was no excess. I have verbal orders from Macneill and Company not to sell tickets in excess of the licensed number. On that occasion passengers were landed on the *Jack*. The police keep proper tally at Chandbally. I had opportunities of seeing how the police did their duty, sometimes there has been a discrepancy discovered between the number of tickets sold and the number counted. The discrepancy was between 5 to 10, sometimes more, sometimes less than the number of tickets sold.

So far as I can judge the police did their duty in connection with counting the passengers properly. During the four years I was at Chandbally it never came to my knowledge that more than the licensed number of passengers were ever carried by the *Sir John Lawrence*. I was never present at any conversation between Captain Irvine and Augier. Augier gave us to understand that he had some power to count passengers. Afterwards a Sub-Inspector told us Mr. Augier had no power to count passengers, that was while Augier was in Chandbally. Augier left Chandbally for Calcutta on a plea of sickness in July 1886, that was before Mr. Davidson arrived. If excess passengers had been carried and I discovered it I should have reported the matter to Macneill and Company. I have never known passengers landed before the steamer got to Chandbally in order to evade the counting by the police. I believe the *Jack* whistled when she left her moorings to go to the help of the *Sir John Lawrence*. I was sent for by Augier on that day. I have never known the passengers on board the *Sir John Lawrence* so closely packed that they could not lie down.

Cross examination to Mr. Kilby.—On the occasion when Mr. Augier told me there were excess passengers I enquired of the Captain what tally he kept. He said he kept tally of 170 passengers landed in the *Jack*, and 561 on the *Sir John Lawrence*, he had a total of 731. Mr. Augier came to my office, I showed him the letter of advice received from Macneill and Company, it showed a less number than 735, how much less I do not know. The police do not report to me the numbers show by their tally. We enquire from them, they are not bound to report. We invariably enquire both in respect of passengers arriving and those departing; we ask for the number given by the tally of disembarking passengers in order to see if the number shown in our advice note agrees with that tallied by the police. The advice note only shows the passengers who are ticket-holders: when the tally does not agree with the advice note, we enquire of the discrepancy from the Captain. The Captain is not subordinate, nor does he have to report to me about any of the passengers he brings from Calcutta. I do not see his accounts, nor do I supervise them. I go on board when I am wanted, otherwise I do not go on. I may pay the steamer ten visits in the 24 hours.

Re-examination to Mr. Henderson.—I have never known the number given by the police exceed the number the ship was licensed to carry. I have never known the advice note give a number above the number the ship was licensed to carry. So far as I know there was never any occasion when Captain Irvine smuggled passengers on board.

JUGGUBUNDHU CHATTERJEE.

Daniel Currie sworn saith to Mr. Henderson:—I am an assistant to the firm of Messrs. Macneill and Company, off and on for about five years. I was agent to that firm at Chandbally. I came up here in July 1881. At that time an account of the passengers landing and embarking was kept by the police. It was properly kept. During these four years I never saw dead bodies taken off the steamers. I remember Neustein coming to the office for a certificate. He came to me first. I refused him a certificate and told him he might go to Mr. Mackenzie. Mr. Mackenzie called me in and told me to make out a certificate for Neustein. At the time I wrote out the certificate I put in it what I considered was the instructions Mr. Mackenzie gave me. I was afterwards told I had exceeded those instructions. I heard afterwards that Captain Irvine gave a certificate to Neustein. As far as I can remember now Mr. Mackenzie told me to give Neustein a certificate for service. On those instructions I wrote what I did. Captain Irvine told me that he gave Neustein a certificate. When I asked Irvine about that certificate, he said he did not want to take the bread out of Neustein's mouth. Neustein wrote to the Lieutenant-Governor and others and backed it up by stating that he held a certificate from Macneill and Company and the Captain. Neustein left the service in October. I spoke to Captain Irvine after the 20th October. Captain Irvine said he was a lazy good-for-nothing fellow. That was that all was said. I have had to do with the Chandbally line. I am positive that excess passengers are not carried. I have no reason to doubt Captain Irvine's honesty.

Cross-examination to Mr. Kilby.—As Agent for five years at Chandbally, I made trips about once a month between Chandbally and Calcutta, and have every opportunity of judging. As a rule, I had sold the tickets previously; so on getting on board then I know how many people ought to be on board. I invariably asked the police what was the number of passengers they counted: this applies both to passengers arriving and departing. I did this to know how we compared with other companies running steamers there. I am sure the other companies did not carry excess passengers, because if the fare is Rs. 2 and the fine Rs. 20, it does not pay. I have, when there was occasion to do so, assisted the police to count passengers. I was acting in Macneill and Company's interests and assisting the Captain. I am now speaking of passengers embarking merely. I assisted the police in every way possible by giving men to keep back the rush in order that they might keep a proper tally. I assisted the Captain in counting. I have counted every passenger at times, in order to see that the whole of the ticket-holders went on board. I am speaking of what I used to do six years ago. Baboo Juggobundhu Chatterjee performs that duty now at Chandbally. I have not been down to Chandbally since October last year. We had a fair number on the voyage down. Juggobundhu did not tally the passengers out on that occasion. We had only 300 on board—about. The Captain, every Saturday on his return from Chandbally, paid me all sums he had received as deck collections. He had no orders to pay it to me, but I being in charge of the department, he did pay it in to me. He has paid the money in to me since 1881. The payments were generally small sums, varying from Rs. 5 to 20. Now and again I may have received as much as Rs. 100. In competition times the deck collections were infinitesimal, because passengers could get tickets for 4 annas, and they could not go on board without them, when they would have to pay Rs. 2. The nominal fare was Rs. 2, if they did not take out tickets. Competition lasted up to about March this year. The pilgrim rush began in June and sometimes in July. The morning of the 25th May was the first big rush of the season. There had been a pretty good number of tickets sold in the previous week.

Re-examination to Mr. Henderson—On the 24th May the other steamers had got their full complement. I once personally telegraphed to Captain Irvine to return—that was indirectly though a cyclone in the Bay, a tidal wave at False Point, and also because the *Medina* had not been sighted at Saugor, and therefore would not have been in time to start again on Wednesday.

D. M. CURRIE.

John Henderson sworn saith to Mr. Henderson.—I am Chief Engineer to the Rivers Steam Navigation Company. I have been Chief Engineer for twenty years in that service. I remember the collision between the *Indore* and the *Sir John Lawrence*. I put the patch on the starboard plate on board the *Lawrence*. The plate was in the fore-castle: it was not in the fore-peak. The patch was bolted on: it was not rivetted. Red lead packing was used. I saw the plate both before and after the jagged edges were cut. I was present when they were cut. I was present when part of the cutting of the jagged edges was done. The plate was a quarter inch thick. I went inside the fore-castle. The plate was in a very fair state. There was paint on it, both inside and outside. No suggestion was made to me that the plate was too thin to put a patch on. I saw Leech on board. He made no suggestion about the plate being thin. Neither he nor any one else. When I went into the fore-castle, I observed the frames. I went on purpose to observe frames: they were in a good state. It is not true to say they were nearly eaten through: they were about $\frac{3}{4}$ th inch thick. I have had a good deal of experience in putting plates on to Inland vessels. I have no doubt in my mind that the plate on which patch was put was thick enough. The repairs I made was temporary, as far as the bolts were concerned. At the time it was fully understood that later the bolts would have to be taken out and rivets put in. The patch was a perfectly safe patch, as I made it. After being rivetted on the plate it would, in my opinion, be perfectly safe as a permanent repair.

Cross-examination to Mr. Kilby.—I did not see the collision occur. I know the damage which was done to the *Lawrence*. The starboard boat smashed and the two davits on which it hung bent. There was a slight indentation near the knight head. There was the hole which was patched also. Besides this there was no other damage. I understood that the *Lawrence* ran into the *Indore* from Mr. Leech. The plate was put on in May 1885. I have had to do with the repairs of a good many ships, but we have to put on patches as engineers. I have put on a good many patches on Inland vessels. It is hardly a thing to forget that the patch was put on. The circumstances that impressed the position of the plate in my mind was that it was the plate just above the sheer strake. I remember admiring the thickness of the sheer strake, it was of such unusual thickness. The hole was in one plate. The breadth of the plate was about 2-6, it may have been more. It was an irregular hole after it was cut; I should say after it was cut it was between 15 inches and 16 inches square. The hole was in the centre of the plate; it must have been in the centre of the plate. I don't remember distinctly, but my strong impression was, it was in the centre of the plate. I am quite positive the plate immediately below was the sheer strake plate. I could stand upright in the fore-castle. The hole was about 18 inches above the main deck. The deck was not injured in any kind of way. The hole was about 8, 9 or 10 feet above the water as she was when I saw her.

Re-examination to Mr. Henderson.—I did not observe how close the frames were. I had not repaired a sea—going ship before.

J. HENDERSON.

Case adjourned to Thursday the 25th instant.

C. H. REILY.

The 25th August 1887 Hutteman Singh sworn saith to Mr. Henderson.—I am an assistant to Messrs. Macneill & Co.

Cross-examination to Mr. Kilby—I look after and issue and sell tickets for the passage on the *Sir John Lawrence*. I have sold tickets since last November, before that a Babu sold tickets. The maximum licensed number is 1,038 in fair-weather and 735 in foul weather, I believe. I know what is the fair weather season and what is the foul weather season. I have never known a single instance where more than the authorised number of tickets were sold. I have nothing to do with the deck collections or with money received from passengers who go on board without tickets.

Re-examination to Mr. Henderson.—I worked under Mr. Curries' supervision.

HUTTEMAN SINGH.

MATRICULATION REGULATIONS OF THE UNIVERSITY OF LONDON.

NOTIFICATION.

The 6th October 1887.—The Regulations for Matriculation in the University of London are published for general information.

P. NOLAN,
Secretary to the Govt. of Bengal.

REGULATIONS FOR MATRICULATION IN THE UNIVERSITY OF LONDON.

EXAMINATIONS IN 1887-88.

THE following are the dates at which the several Examinations in the University of London for the year 1887-88 will COMMENCE :—

MATRICULATION.—Monday, June 13, 1887 and Monday, January 9, 1888.

BACHELOR OF ARTS.—Intermediate, Monday, July 18; B.A., Monday, October 24.

MASTER OF ARTS.—Branch I, Monday, June 6; Branch II, Monday, June 13; Branch III, Monday, June 13; Branch IV, Monday, June 27.

DOCTOR OF LITERATURE.—Tuesday, December 6.

SCRIPTURAL EXAMINATIONS.—Tuesday, November 29.

BACHELOR OF SCIENCE.—Intermediate, Monday, July 18; B.Sc., Monday, October 17.

DOCTOR OF SCIENCE.—Within the first twenty-one days of June.

BACHELOR OF LAWS.—Intermediate and LL.B., Monday, January 2, 1888.

DOCTOR OF LAWS.—Tuesday, January 17, 1888.

BACHELOR OF MEDICINE.—Preliminary Scientific, Monday, July 18, 1887 and Monday, January 16, 1888; Intermediate, Monday, July 11, 1887 and Monday, January 16, 1888; M.B., Monday, October 31.

BACHELOR OF SURGERY.—Tuesday, December 6.

MASTER IN SURGERY.—Monday, December 5.

DOCTOR OF MEDICINE.—Monday, December 5.

SUBJECTS RELATING TO PUBLIC HEALTH.—Monday, December 12.

BACHELOR OF MUSIC.—Intermediate, Monday, December 12; B. Mus., Monday, December 19.

DOCTOR OF MUSIC.—Intermediate, Monday, December 12; D. Mus., Monday, December 19.

ART, &c., OF TEACHING.—Tuesday, March 1.

REGULATIONS.

MATRICULATION.

[Candidates for any Degree in this University must have passed the MATRICULATION EXAMINATION. No exemption from this rule is allowed on account of Degrees obtained or Examinations passed at any other University.]

[This Examination is accepted (a) by the College of Surgeons, (b) by the Incorporated Law Society, in lieu of their Preliminary Examinations. It also exempts candidates for admission to the Royal Military College from the Preliminary Test, except in Geometrical drawing. And it is among those Examinations of which some one must be passed (1) by every Medical Student on commencing his professional studies; and (2) by every person entering upon articles of clerkship to a solicitor,—any such person who may have Matriculated in the Honours or in the First Division being entitled to exemption from one year's service.]

[This and all other Examinations of the University, together with the Prizes, Exhibitions, Scholarships, and Medals depending upon them, are open to women upon exactly the same conditions as to men.]

THERE shall be two Examinations for MATRICULATION in each year; one commencing on the second Monday in January, and the other on the third Monday in June.¹

No candidate shall be admitted to the MATRICULATION EXAMINATION unless he have produced a certificate showing that he has completed his sixteenth year.² This certificate shall be transmitted to the Registrar at least *one calendar month* before the commencement of the Examination.

A fee of two pounds shall be paid at Matriculation. No candidates shall be admitted to the Examination unless he have previously paid this fee to the Registrar.³ If, after payment of his fee, a candidate withdraws his name, or fails to present himself at the Examination, or fails to pass it, the fee shall not be returned to him, but he shall be allowed to enter for any subsequent MATRICULATION EXAMINATION upon payment, at every such entry, of an additional fee of one pound, provided that he give notice to the Registrar at least *one calendar month* before the commencement of the Examination.

The Examination shall be conducted by means of printed papers; but the Examiners shall not be precluded from putting, for the purpose of ascertaining the competence of the candidates to pass, *viva voce* questions to any candidate in the subjects in which they are appointed to examine.

¹ These Examinations may be held not only at the University of London, but also, under special arrangement (see Appendix I.), in other parts of the United Kingdom, or in the colonies.

² A certificate from the Registrar General in London or from the Superintendent Registrar of the district, or a certified copy of the Baptismal Register, is required in every case in which it can possibly be obtained. In other cases a declaration of the candidate's age, and that he is unable to procure his certificate of birth or baptism, made before a Magistrate by his parent or guardian, or by himself if of full age, will be accepted.—Every such document will be returned to the candidate on or before registration (see Note 1 on page 51).

³ Fees must be paid when candidates inscribe their names on the Register of the University, and should not be sent in advance. Information respecting the time and place of Registration will be sent to candidates with the acknowledgment of their certificates of age or their notices.

Candidates shall not be approved by the Examiners unless they have shown a competent knowledge in each of the following subjects, according to the details specified under the several heads—

1. Latin;
2. One¹ of the following Languages—Greek, French, German, Sanskrit, Arabic²;
3. The English Language; and English History, with the Geography relating thereto;
4. Mathematics;
5. Mechanics;
6. One³ of the following Branches of Experimental Science :—Chemistry; Heat and Light; Magnetism and Electricity.

The following are the particulars of the foregoing subjects of Examination—
LANGUAGES.

LATIN.

One Latin subject to be selected by the Senate one year and a half previously from the works of the undermentioned authors :⁵

Virgil.—Two Books of the *Æneid*.

Horace.—Two Books of the *Odes*.

Sallust.—The Conspiracy of Catiline, or the War with Jugurtha.

Cæsar.—One of the longer or Two of the shorter Books of the Gallic War.

Livy.—One Book.

Cicero.—De Senectute or De Amicitia, with One of the following Orations :—Pro Lege Manilia. One of the four Catilinarian Orations, Pro Archia, Pro Balbo, Pro M. Marcello.

Ovid.—One Book of the Metamorphoses (or Selections from Two Books) and One Book of the Epistles or of the Tristia; or Six of the Heroides; or Two Books of the Tristia.

The Paper in Latin shall contain passages to be translated into English, with questions arising out of the book or books selected. Short and easy passages shall also be set for translation from other books not so selected. A separate Paper shall be set containing questions in Latin Grammar, with simple and easy sentences of English to be translated into Latin.⁴

GREEK.

One Greek subject, to be settled by the Senate one year and a half previously from the works of the undermentioned authors :⁵

Homer.—One Book.

Xenophon.—One Book.

Æschylus.—The *Perseæ*.

Euripides.—*Hecuba*; *Andromache*; *Hercules Furens*; *Medea*; *Alcestis*; *Electra*; *Heracidae*. (One Play.)

The Paper in Greek shall contain passages to be translated into English, with questions arising out of the book selected, and with general questions in Grammar.⁶ Short and easy passages shall also be set for translation from other books not so selected.

FRENCH.

The Paper in French shall contain passages for translation into English, and questions in Grammar, limited to the Accidence.

GERMAN.

The Paper in German shall contain passages for translation into English, and questions in Grammar, limited to the Accidence.

SANSKRIT.⁷

Sanskrit Subjects, to be selected by the Senate one year and a half previously from the undermentioned works.⁸

Hitopadeśa, Books II to IV.

Pañchatantra, Books II to V.

Sāhityaparichaya, Parts I and II., pp. 1-93.

Rāmāyana, Book I.

Mahābhārata (Story of Nala, Story of Sāvitrī, Bakavadhaparvan, Śakuntalopākhyāna).

Manu, Books II to VII.

[N.B.—Special stress is laid on correct spelling and grammar in the answers to the questions.]

¹ No credit will be given for more than one of these subjects.

² Candidates desiring to be examined in either Sanskrit or Arabic must give at least *Two Calendar Months'* notice to the Registrar.

³ The **LATIN** Subjects for 1888 and 1889 will be—

For June 1888 :—*Cæsar*, Gallic War, Book VII.

For January 1889 :—*Sallust*, Conspiracy of Catiline.

For June 1889 :—*Virgil*, *Æneid*, Books I and V.

⁴ Special stress is laid on accuracy in the answers to the Grammar questions, and on the correct rendering of English into Latin.

⁵ The **GREEK** Subjects for 1888 and 1889 will be—

For June 1888 :—*Xenophon*, *Cyropædia*, Book I.

For January 1889 :—*Homer*, *Iliad*, Book VI.

For June 1889 :—*Xenophon*, *Cyropædia*, Book V.

⁶ Special stress is laid on accuracy in the answers to the questions in Greek Grammar.

⁷ See the third Note on page 54.

⁸ The **SANSKRIT** Subjects for 1888 and 1889 will be—

For June 1888 :—*Pañchatantra*, Book III.; *Mahābhārata*, Story of Sāvitrī; *Manu* IV., 128-267.

For January 1889 :—*Hitopadeśa*, Book III.; *Manābhārata*, *Śakuntalopākhyāna*; *Manu*, VI 1 to VII 53.

For June 1889 :—*Pañchatantra*, Book IV.; *Mahābhārata*, *Bakavadhaparvan*; *Manu*, VII 54-225

The Paper in Sanskrit shall contain passages from the books selected, to be translated into English, with questions in Grammar. A passage or short passages shall also be set for translation from other books not so selected.

ARABIC.

The Paper in Arabic shall contain passages for translation into English, and questions in Grammar.

ENGLISH.

The General History and Grammatical Structure of the Language.

History of England to the end of the Seventeenth Century, with Geography relating thereto.

MATHEMATICS.

ARITHMETIC.

The ordinary Rules and Processes of Arithmetic, including—

Proportion.

Vulgar and Decimal Fractions.

Extraction of the Square Root.

ALGEBRA.

Addition, Subtraction, Multiplication, and Division of Algebraical Quantities.

Reduction and manipulation of Algebraical Fractions.

Arithmetical and Geometrical Progression.

Simple Equations and easy Quadratic Equations, with questions involving their use.

GEOMETRY.

The subjects of the First Four Books of Euclid, and simple deductions.

MECHANICS.

Elementary notions as to Velocity, Acceleration Force, Mass, Momentum, Work, and Energy.

Composition and Resolution of Velocities, Accelerations and Forces, in one plane.

Moments and Couples, in one plane.

Centre of Gravity, or Mass-centre.

Transmission of Pressure in Liquids; Variation with depth of the pressure due to weight of liquids.

Specific Gravity, and modes of determining it. Pressure of gases and laws relating thereto.

Atmospheric pressure.

Common instruments and apparatus whose action depends upon the pressure of liquids, or of the atmosphere, or of both.

EXPERIMENTAL SCIENCE.

One of the three following subjects, at the option of the candidate:—

I. CHEMISTRY.

The following elements, and their compounds as enumerated below; their chief physical and chemical characters; their preparation; and their characteristic tests:—

Oxygen, Hydrogen, Carbon, Nitrogen. Chlorine, Bromine, Iodine, Fluorine. Sulphur Phosphorus, Silicon.

Combining Proportions by weight and by volume. General nature of Acids, Bases, and Salts. Symbols and Nomenclature.

The Atmosphere—its constitution; effects of Animal and Vegetable life upon its composition.

Combustion. Structure and properties of Flame. Nature and composition of ordinary Fuel.

Water. Chemical peculiarities of Natural Waters, such as rain-water, river-water, spring-water, sea-water.

Carbon Monoxide. Carbon dioxide. Oxides and Acids of Nitrogen. Ammonia.

Olefiant Gas, Marsh Gas, Sulphur Dioxide, Sulphuric Acid, Sulphuretted Hydrogen.

Hydrochloric Acid. Phosphoric Anhydride and common Phosphoric Acid.

II. HEAT AND LIGHT.

Heat.

Expansion of Solids, Liquids, and Gases accompanying rise of Temperature: Laws relating thereto. Thermometry. Calorimetry. Specific heat. Liquefaction and Solidification. Vaporization and condensation; ebullition; properties of vapours, saturated or unsaturated. Latent heat.

Transmission of heat by conduction and convection.

Light.

Propagation of light in straight lines in uniform media. Velocity of light and modes of determining it. Intensity of light, its variation with distance. Shadows. Photography. Reflection and Refraction at plane or spherical surfaces. Formation of Images by plane and spherical mirrors, and by simple lenses (excluding aberration). Decomposition of white light by a prism. The prismatic Spectrum.

III. MAGNETISM AND ELECTRICITY.

Magnetism.

Simple experimental properties of Magnets. Effect of a magnet on a neighbouring piece of soft iron or of hard steel. Terrestrial magnetism: behaviour of a declination needle and of a dipping needle at different parts of the earth's surface.

Electricity.

The two Electrical States and their mutual relations. Attraction and Repulsion. Conduction and Insulation. Electrostatic Induction. The common plate and cylinder electrical machines. Electrical condensers. Distribution of electricity upon conductors.

Current electricity. Common forms of battery. Ohm's law and its simple applications. Heating chemical, and magnetic effects of electric currents.

Simple experimental methods of generating currents by relative motion of conductors and magnets. The simple laws of magneto-electric induction.

The Examinations shall be conducted in the following order:—

MONDAY.

Afternoon, 2 to 4. Latin.

4 to 6. Latin. Grammar and Composition.

TUESDAY.

Morning, 10 to 1. Greek, French, German, Sanskrit, or Arabic.

Afternoon, 2 to 5. Arithmetic and Algebra.

WEDNESDAY.

Morning, 10 to 1. Geometry.

Afternoon, 2 to 5. Chemistry; or Heat and Light; or Magnetism and Electricity.

THURSDAY.

Morning, 10 to 1. English Language.

Afternoon, 2 to 5. English History, with the Geography relating thereto.

FRIDAY.

Morning, 10 to 1. Mechanics.

At 2 o'clock on Monday in the week next but two after the Examination, the Examiners shall publish a List of the Candidates who have passed. And at 2 o'clock on the Monday next following the Examiners shall publish a List of the Candidates who have passed, arranged in Three Divisions—in the Honours Division in the order of proficiency¹; in the First and Second Divisions in alphabetical order.

A Pass Certificate signed by the Registrar shall be delivered to each candidate after the Report of the Examiners shall have been approved by the Senate.²

If, in the opinion of the Examiners, any Candidates in the Honours Division of not more than 20 years of age at the commencement of the Examination shall possess sufficient merit, the First among such Candidates shall receive an Exhibition of Thirty Pounds per annum for the next two years; the Second among such Candidates shall receive an Exhibition of Twenty Pounds per annum for the next Two Years; and the Third shall receive an Exhibition of Fifteen Pounds per annum for the next Two Years; such Exhibitions to be payable in quarterly instalments, provided that on receiving each instalment the Exhibitioner shall declare his intention of presenting himself either at the two Examinations for B.A., or at the two Examinations for B.Sc., or at the INTERMEDIATE EXAMINATION IN LAWS, or at the PRELIMINARY SCIENTIFIC and INTERMEDIATE EXAMINATIONS IN MEDICINE, within three Academical Years³ from the time of his passing the MATRICULATION EXAMINATION.

Under the same circumstances, the Fourth among such Candidates shall receive a Prize to the value of Ten Pounds in Books, Philosophical Instruments, or Money; and the Fifth and Sixth shall each receive a Prize to the value of Five Pounds in Books, Philosophical Instruments, or Money.

Any Candidate who may obtain a place in the Honours Division at the MATRICULATION EXAMINATION in January shall be admissible to the INTERMEDIATE EXAMINATION either in ARTS or in SCIENCE in the following July.

¹ The places of candidates in the Honours Division are determined by their respective degrees of proficiency in the subject of the Examination taken collectively.

² Certificates are generally ready for issue about a month after the publication of the classified list of each examination; and, in the absence of any request to the contrary, they will be posted to the addresses given by the Candidates on their Schedules of Entry.

³ By the term "Academical Year" is ordinarily meant the period intervening between any Examination and an Examination of a higher grade in the following year; which period may be either *more* or *less* than a Calendar year. Thus the interval between the *Intermediate* Examination in Arts, Science, and Medicine, and the *Degree* Examinations of the next year in those Faculties respectively is about sixteen months; whilst the interval between the B. A. Examination and the M. A. Examination of the next year, or between the B.Sc. Examination and the D.Sc. Examination of the next year, is less than eight months. Nevertheless, each of these intervals is counted as an "Academical Year."

APPENDIX.

I.

PROVINCIAL EXAMINATIONS.

THESE Examinations are appointed by the Senate from time to time, upon the application of any City, Institution, or College desiring to be named as a local centre for one or more examinations; and are carried on simultaneously with the examinations in London, under the supervision of Sub-Examiners also appointed by the Senate.

Candidates wishing to be examined at any Provincial centre must give notice of entry (naming the centre they select, and inclosing their certificate) to the Registrar of the University of London, who will make all necessary arrangements.

A fee usually varying from 1*l.* to 2*l.* is charged by the local authorities, in addition to the University fee.

Both fees are payable on Registration, which takes place at the Provincial centres at a time of which due notice will be sent to candidates.

The answers of the Candidates at the Provincial Examinations are reviewed by the Examiners at the same time with the answers of the Candidates examined in London; and a List of the Candidates who have passed at each Provincial Examination is published, at the time fixed by the Regulations, at the place where such examination has been held.

The MATRICULATION EXAMINATION of JUNE 1887 was held at—

Aberystwith :—University College;
Bangor :—University College;
Birmingham :—Queen's College;
Bristol :—University College;
Cardiff :—University College;
Cheltenham (for Ladies only) :—The Ladies' College;
Downside :—St. Gregory's College;
Eastbourne :—New College;
Edinburgh :—The Literary Institute;
Epsom :—The Royal Medical College;
Leeds :—The Yorkshire College;
Liverpool :—University College;
Manchester :—The Owen's College;
Newcastle-on-Tyne :—The School of Science and Art;
Nottingham :—University College;
Oswestry :—The High School;
Sheffield :—Firth College;
Stonyhurst :—Stonyhurst College;
Ushaw :—St. Cuthbert's College;
Ware :—St. Edmund's College.

The MATRICULATION EXAMINATION of JANUARY 1888 will be held at—

Birmingham :—Queen's College;
Cardiff :—University College;
Glasgow :—The Training College, New City Road;
Leeds :—The Yorkshire College.

The MATRICULATION EXAMINATION of JUNE 1888 will be held at—

Birmingham :—Queen's College;
Bristol :—University College;
Edinburgh :—The Herriot-Watt College;
Leeds :—The Yorkshire College;
Liverpool :—University College;
Nottingham :—University College;
Oswestry :—The High School;
Sheffield :—Firth College.

The INTERMEDIATE EXAMINATION IN ARTS, 1887, was held at—

Aberystwith :—University College;
Birmingham :—The Mason Science College;
Cardiff :—University College;
Cheltenham (for Ladies only) :—The Ladies' College;
Liverpool :—University College;
Manchester :—The Owen's College;
Newcastle-on-Tyne :—The School of Science and Art;
Ushaw :—St. Cuthbert's College;
Ware :—St. Edmund's College.

The INTERMEDIATE EXAMINATION IN SCIENCE¹ and the PRELIMINARY SCIENTIFIC (M.B.) EXAMINATION,¹ 1887, were held at—

Birmingham :—The Mason Science College;
Cardiff :—University College;
Cheltenham (for Ladies only) :—The Ladies' College;

¹ With the exception of the Practical Examination in Biology, which must be carried on at the University.

SCHOLARSHIPS, &c.

[*Note.*—The undermentioned Gilchrist and other Scholarships and Prizes are announced at the request and on the authority of the respective Educational Bodies by whom they are offered for competition. They are awarded upon the result of the University Examination: but the University cannot guarantee or be responsible for the award, over which it has otherwise no control.]

GILCHRIST SCHOLARSHIPS, EXHIBITIONS, AND PRIZES.

1. BRITISH SCHOLARSHIPS, &c.

(a) For Male Candidates.

1. A Scholarship of the value of Fifty Pounds per annum, tenable for three years, is biennially offered to Candidates intending to pursue, at OWEN'S COLLEGE, MANCHESTER, their studies for Graduation in one of the Faculties of the University of London; a single Scholarship of Fifty Pounds per annum for three years being awarded to the highest of those Candidates at the June Matriculation Examination who shall have been previously approved by the Principal of Owen's College, provided that he pass in the Honours Division, or, in case no Candidate should so pass, two Scholarships each of Twenty-five Pounds per annum, being awarded to the two Candidates as aforesaid who shall stand highest in the First Division. Particulars may be obtained on application to the Principal of Owen's College, Manchester.

2. A Scholarship of Fifty Pounds per annum, tenable for three years, is annually awarded to that Candidate in the Honours Division at the June Matriculation Examination who shall stand highest of the Candidates previously approved by the Principal of UNIVERSITY COLLEGE, BRISTOL; and who intends to study at that College with a view to Graduation in one of the Faculties of the University of London. [*N.B.*—This Scholarship is open to Women.] Further particulars may be obtained on application to the Principal of University College, Bristol.

(b) For Female Candidates.

1. Two Exhibitions, one of Thirty Pounds, the other of Twenty Pounds per annum, tenable for two years, are annually awarded at the June Matriculation Examination to the two Female Candidates of not more than Twenty years of age at the commencement of the Examination, who pass highest in the Honours Division, to assist them in pursuing their studies at some Collegiate Institution approved by the Gilchrist Trustees.

2. Two Exhibitions, one of Forty Pounds, the other of Thirty Pounds per annum, tenable for two years, are annually awarded to the two Female Candidates who pass highest at the Intermediate Examination in Arts (provided that they obtain in the one case at least two-thirds, and in the other at least three-fifths, of the total number of marks), to assist them in pursuing their studies at some Collegiate Institution approved by the Gilchrist Trustees.

3. A Book Prize of the value of Ten Pounds is annually awarded to the Female Candidate who passes highest at the B.A. Examination, provided she obtain not less than two-thirds of the total number of marks.

[See also the BRISTOL Scholarship above.]

Further particulars may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S.W.

II. INDIAN SCHOLARSHIPS.

A Scholarship of the value of One Hundred and Fifty Pounds per annum, and tenable for four years, will be awarded to the Native Candidate who passes highest in the January Matriculation Examination, 1888, carried on at CALCUTTA, BOMBAY, MADRAS and COLOMBO; provided that such Candidate passes either in the Honours or in the First Division, is not more than 22 years of age, and is desirous of prosecuting his studies, either at the University of Edinburgh or at University College, London, with a view to Graduation in one of the Faculties of the University of London.

Further particulars of this *Indian Scholarship* may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S.W.

III. COLONIAL SCHOLARSHIPS.

1. A Scholarship of the value of One Hundred Pounds per annum, and tenable for three years, is annually awarded to the highest among those Candidates at the January Matriculation Examination carried on at MELBOURNE, SYDNEY, ADELAIDE, and HOBARTON, who passes either in the Honours or in the First Division, is not more than 22 years of age, and is desirous of prosecuting his studies either at the University of Edinburgh, or at University College, London, with a view to Graduation in one of the Faculties of the University of London.

2. A similar Scholarship, under the same conditions, is biennially awarded to the Candidate who passes highest at the January Matriculation Examination carried on in New Zealand.

3. A similar Scholarship under the same conditions is triennially awarded to the Candidate who passes highest at the June Matriculation Examination carried on at FREDERICTON (New Brunswick), HALIFAX (Nova Scotia), and CHARLOTTETOWN (Prince Edward's Island).

(Note.—Every Candidate for a Colonial Scholarship must either be a Native of the Colony in which he presents himself, or have resided therein for the five years immediately preceding).

Further particulars of the *Colonial Scholarships* may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S.W.

WEST SCHOLARSHIP.

This Scholarship, of the value of Thirty Pounds, and tenable for one year, is awarded by the Council of University College, London, to that Candidate at the June Matriculation Examination who distinguishes himself the most in English. Further particulars may be obtained of the Secretary of University College, Gower Street, London, W.C.

TUFFNELL SCHOLARSHIPS.

Two Scholarships, of the value of about 100*l.* each, and tenable for two years, are awarded by the Council of University College for distinction in Analytical and Practical Chemistry, and in General Chemistry, alternately, to that Student of the College, *being an Undergraduate of the University of London of not more than three years' standing*, who shall have passed the most distinguished Examination in the subjects for which the Scholarship is to be conferred, and shall have evinced sufficient merit to entitle him to the Scholarship. Further particulars may be obtained of the Secretary of University College, Gower Street, London, W.C.

REID STUDENTSHIPS FOR WOMEN.

A Free Studentship at Bedford College, value 30 guineas per annum, tenable for two years, will be awarded to the Woman taking the highest place in the Honours Division of the January Matriculation Examination, and to the Woman taking a similar place at the June Matriculation Examination.

A Free Studentship at Bedford College, value forty pounds per annum, tenable for two years, will be awarded to the Woman taking the highest place in the Intermediate Examination in Arts.

For further particulars application should be made to "The Reid Trustees," Bedford College, Yrk Place, Portman Square, London, W.

III.

INSTRUCTIONS TO CANDIDATES FOR MATRICULATION.

All applications for admission to the Examination must be made *by letter only*. No special form of application is necessary. Care must be taken to give a correct postal address, and the Candidate's name *must be written in full*.

Every application, if made for the first time, must be supported by the requisite document giving proof of age. No Candidate, whatever his age, is admitted to the Examination on his first application without the production of such a document.

Candidates who have previously presented themselves at the Examination must state that fact upon again applying for admission, but need not produce their Certificates of Age a second time.

Applications should not be made earlier than eight weeks, and must not be made later than a month, before the commencement of the Examination.

The age of a Candidate with regard to entry is reckoned up to and inclusive of the first day of the several Examinations, that day being computed to fall as late as the Regulations will possibly allow. The two dates, in the case of the Matriculation Examinations, are January 14th and June 21st. Only those Candidates therefore who shall have *completed their sixteenth year* on or before either of those dates will be admissible to the January or the June Examination, as the case may be; and not those who shall complete such age after those dates.

Fees must be paid on Registration, and not before.

The full marks obtainable at the Matriculation Examination are 2,500. Of these 1,900 qualify for a Prize, 1,700 for Honours, and 1,300 for the First Division. There is no regulation fixing the minimum number of marks required for the Second Division. No further details as to the marking at this or other Examinations can be furnished.

The Alphabetical Pass-List is sent, when ready, to every College or School from which any Candidate (whether successful or not) has immediately proceeded to the Matriculation Examination.

The Classified List is sent, when ready, to every College or School from which a *successful* Candidate has immediately proceeded. It is also widely circulated among the leading Newspapers of the United Kingdom.

Lists cannot be supplied to individual Candidates or their friends.

The Examination papers of past Examinations are not published separately; but the papers of the previous academical year are printed in the University Calendar of the current year; which is issued annually at the beginning of April, and is to be obtained (price 4*s.*) of the publishers, Messrs. Eyre and Spottiswoode, East Harding Street, E.C.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 8th October 1887.

No.	District and date of return.	Rainfall at Sadler Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
<i>Western Districts.</i>			
BURDWAN DIV.	1 Burdwan, Oct. 8, '87	Nil	Weather—hot and dry. Rain urgently wanted for winter rice, which is beginning to wither in parts. Prices rising. Cholera died out. Fever prevalent.
	2 Bankoora „ 8, '87	Nil	Weather—hot and dry. <i>Aus</i> and <i>kelas</i> paddy are being gathered. <i>Amun</i> plants are suffering for want of rain in the Bishenpur sub-division, and have begun to wither in almost all the thanas in the Sadler. If it does not rain soon a very poor crop will be reaped, and scarcity may ensue. Prices have risen. Fever in a mild form is reported to be prevalent in the sub-division.
	3 Beerbhoom „ 8, '87	Nil	Weather—unseasonably warm. No rain since 27th ultimo, and <i>amun</i> paddy suffering most severely. In the absence of a timely downpour within the next ten days, a partial failure is apprehended. <i>Aus</i> paddy is being harvested. It is an insignificant crop in this district. Sugarcane looks well. Public health very indifferent. Fever prevalent to a very unusual degree.
	4 Midnapur „ 8, '87	0.30	Weather—oppressive except in early morning. State and prospects of crops good.
	5 Hooghly „ 8, „	0.02	Weather—very hot. Prospects of winter rice affected by absence of rain, especially to the west. <i>Aus</i> harvest nearly over with good outturn. Public health good for time of year.
PRESIDENCY DIV.	Howrah „ 8, '87	0.65	Weather—sultry with prospect of showers. Prospects of winter rice in the north of the district improved by late rain; no change in the south. Harvesting of <i>aus dhan</i> completed with fair results. Jute harvest almost finished. Public health good.
	Oolchoeriah up to 6th October 1887.	Nil	
	<i>Central Districts.</i>		
	6 24-Pergas. „ „	Report not received.
	7 Nuddoa „ 8, „	0.34	Weather—sultry. More rain wanted for <i>amun</i> rice in places. Prospects of crops on the ground fair. Fever prevalent.
RAJSHAHY DIV.	8 Khoolna „ 8, '87	0.11	Weather—very hot, with slight rain. Prospects of <i>amun</i> crop favourable. Ploughing for winter crops has commenced. Some fever prevails, but general health fair.
	9 Jessore „ 8, „	Nil	Weather—very hot, but mornings getting cool. Early <i>amun</i> in ear. Prospects good. Lands are being prepared for winter crops. Public health fair.
	10 Moorsheadabad „ 8, '87	2.12	Weather—seasonable. Prospects of <i>amun</i> good. Sowing of <i>til</i> and <i>kalai</i> going on. Sugarcane promising. Fever as usual in this season prevails.
	11 Dinagepur „ 8, '87	Nil	Weather—seasonable. State and prospects of <i>haimanti</i> paddy and sugarcane good. Rice selling at from 20 to 28 annas per rupee.
	12 Rajshahye „ 8, '87	0.08	Weather—seasonable. <i>Aus</i> harvest completed with an outturn of ten annas. Prospects of <i>amun</i> paddy and other standing crops continue good. Public health fair.
RAJSHAHY DIV.	13 Rungpur „ 8, „	Nil	Particulars not furnished.
	14 Bogra „ 8, '87	Nil	Weather—very warm for this time of the year. State and prospects of crops continue satisfactory on the whole. Public health fair.
	15 Pubna „ 8, '87	0.04	Weather—hot. Public health and prospects of crops good.
	Serajungge „ „	0.09	
	16 Darjeeling „ 8, '87	0.03	Weather—fine. State and prospects of crops fair.
DACCA DIVISION.	17 Julpigoree „ 8, „	Nil	Weather—seasonable. Prospects of crops fair. Lands are being prepared for winter crops. Cattle-disease prevalent in places. Public health good.
	<i>Eastern Districts.</i>		
	18 Dacca, Oct. 8, '87	0.16	Weather—fine and hot. <i>Ashuni</i> paddy is being harvested. <i>Roachia</i> and <i>amun</i> paddy thriving, but some damage anticipated for want of rain.
	Manickgunge „ „	Nil	Ploughing for winter crops going on. On the whole prospects of crops good.
	Munshigunge „ „	0.9	Public health good.
DACCA DIVISION.	Narsaingunge „ „	Nil	
	19 Farreedpur „ 8, '87	0.85	Weather—hot. State of <i>amun</i> good. Jute harvest nearly completed with good outturn. Public health good.
	20 Backergunge „ 7, '87	Nil	Weather—seasonable. Prospects of crops good. General health fair, except at Perozepur and Matberia, where fever is prevalent.
	21 Mymensingh „ 7, '87	0.08	Weather—very hot and sultry. State and prospects of crops good.
	Jamalpur „ „	0.82	
DACCA DIVISION.	Kishoregunge „ „	0.11	
	Attea „ „	Nil	
	Netrokona „ „	4.25	

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL—contd.			
<i>Eastern Districts—contd.</i>			
CHITTAGONG DIV.	22 Chittagong, Oct. 11, '87	2.14	Weather—hot. Prospects of standing crops fair. Transplantation of <i>aman</i> nearly over. Prices stationary. Public health good.
	23 Noakholly " 7, "	0.07	Weather—sultry and close. Prospects of <i>aman</i> crop fair. A few heavy showers needed. New <i>aus</i> 27 to 28 seers per rupee. Public health fair.
	24 Tipperah " 6, "	0.20	Weather—abnormally dry and very hot. In a large portion of the district the crops are perishing for want of moisture. There is no water in the fields. Where the Megna inundates the lands, as in the south and extreme west of the district, the crops are flourishing, but they are very bad elsewhere. [Daily Weather Report shows rainfall at Comilla 2.50 on the 9th].
	Brahmanbariah " " "	Nil	
	Chandpur " " "	0.13	
	Chittagong Hill Tracts, " 4, "	0.07	Weather—hot with foggy mornings. Gathering of <i>jum</i> paddy still continues. Cotton doing well and beginning to pod. Lands are being ploughed for mustard. Paddy in low lands progressing. Rain wanted.
	25 Hill Tipperah " 5, "	Nil	Weather—days hot, mornings cool. <i>Amun</i> paddy doing well. Prospects of <i>jum</i> crops fair. Public health good.
BEHAR.			
PATNA DIV.	26 Patna Oct. 8, '87	Nil	Weather—hot. Sowing of <i>rubbi</i> crops is being pushed on. Rain badly wanted for paddy crop. <i>Rahar</i> , cotton and sugarcane continue to look well. Public health good.
	27 Gaya " 7, "	Nil	Weather—dry and hot. Paddy suffering much for want of rain. Prospects of <i>rubbi</i> crop will become gloomy if it does not rain within the next three or four days. A few cases of fever reported.
	28 Shahabad " 8, "	Nil	Weather—hot for the season. State of paddy crop continues satisfactory, but more rain urgently wanted both for this crop and for sowing of <i>rubbi</i> , which has commenced. Some fever and cholera reported from Buxar and Sasserain otherwise public health good. Prices stationary.
	29 Durbhunga " 8, "	Nil	Weather—mornings cool and days hot. Prospects of rice continue favourable, though rain is urgently needed to secure a good crop. Lands are being prepared for <i>rubbi</i> sowings. Price of rice averages 19 seers per rupee. Public health generally good.
	Mozufferpur " 8, "	Nil	Weather—very close, hot and rainless. <i>Rubbi</i> lands are being ploughed. Rice crop is still in good condition, but rain is much wanted. Public health good.
	31 Saran " 8, "	Nil	Weather—westerly wind; sultry, rather hot and oppressive for this season of the year. Rain very badly wanted for <i>aghani</i> . Much anxiety is felt as <i>hathia</i> is slipping off. Prices rising. Public health good.
	32 Champaran " 8, "	Nil	Weather—hot. Early morning cloudy. <i>Bhadai</i> crops are being harvested; yield is good. Rain very much needed for rice crop throughout the district. Prospects good as yet. Sowing of <i>rubbi</i> commenced in the Bettiah sub-division. Public health fair.
BHAGTIPUR DIV.	33 Monghyr " 8, "	Nil	Weather—hot during the day, cool in the morning. Rain very much wanted for rice crop. <i>Rubbi</i> sowings busily going on. Public health generally good. Prices stationary.
	34 Bhagulpur " 8, "	Nil	Weather—sultry and oppressive. Rain urgently wanted for late rice which has already suffered on high lands. <i>Kurthi</i> doing well. Preparation for <i>rubbi</i> sowings forward. Public health much better.
	35 Patna " 8, "	Nil	Weather—clear and hot for the time of year. <i>Aghani</i> rice doing well. <i>Kurthi</i> sown. Lands are being prepared for mustard and tobacco. Millets maturing.
	36 Maidah " 8, "	Nil	Weather—very hot and fine. No rain except in the extreme north-west on two days. All crops suffering for want of rain, but will still be good if moderate showers soon fall. There are now signs of rain, and a little has fallen to-day (8th) in the middle of the district. Common rice selling at an average of 21 seers per rupee. Fever prevalent.
	37 Sonthal Pergah " 8, "	Nil	Weather—growing hotter. Thunder and lightning on the 7th, but no rain. State of crops good up to date, but prospects critical. Rain urgently wanted. Some loss has already taken place on higher lands in west and north.
ORISSA.			
ONISSA DIV.	38 Cuttack Oct. 7, '87	Nil	Weather—hot, mornings cool. Clouds appearing. Very slight rain fell on 6th in some places in the interior. <i>Laghu sarad</i> coming into ear. High land <i>sarad</i> suffering for want of rain, and will be greatly injured if the drought continues. Prices of food-grains rising. Common rice sells at 16 seers per rupee in town. Public health generally good.
	39 Poores " 6, "	Nil	Weather—very hot with light west winds and almost cloudless skies. The continued absence of rain seriously endangers the <i>sarad</i> crop, especially in parts where irrigation is impossible. Common rice 21 seers 14 chittacks per rupee in the Sudder sub-division and 20 seers 4 chittacks in the Khoorda sub-division. Cholera has re-appeared in the town and in the interior of the district.
	40 Balasore " 7, "	Nil	Weather—hot. Prospects of crops generally good, but more rain is wanted. Harvesting of <i>beati</i> paddy is going on and weeding of <i>sarad</i> is approaching completion. Public health good, except a few cases of fever.
CHOTA NAGPORE.			
<i>South-West Frontier Agency.</i>			
	41 Huzaribagh, Oct. 7, '87	Nil	Weather—bright, clear and rainless, and unusually warm. Paddy on uplands has suffered seriously for want of rain, and damage to low land rice also apprehended. <i>Bhadai</i> has generally yielded fairly. <i>Rubbi</i> promising so far. General health good.
	42 Lohardugga " 8, "	Nil	Weather—hot and cloudy. No rain during the week. It is urgently wanted for standing crops throughout the district. Prices fluctuating. Cholera abating, but fever prevalent in Palamow.
	43 Singbhum " 7, "	Nil	Weather—signs of early cold weather. Hot during the day. Want of rain is being seriously felt in all parts of district and complaints are general. A timely fall would do immense good. Outturn will not be more than 8 annas if drought continues. <i>Gora dhan</i> being harvested. General health good. Price of rice has risen.
	44 Manbhum " 8, "	2.24	Weather—hot. Heavy rain on 7th did much good to paddy. More rain still required in all parts of district. High land paddy prospects no good. Public health fair.

STATISTICAL DEPARTMENT.

The 10th October 1887.

P. NOLAN,
Secretary to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of September 1887.

	Inches.	Date.	Hour.
The mean pressure of the month	29.674		
The average pressure of September from 24 years' registers	29.682		
The highest pressure in the month	29.861	30th	10h.
The lowest pressure in the month	29.431	11th	16h.
The range of pressure	0.430		
	Hours.		
The total number of hours of bright sunshine during the month	120.1		
The maximum possible number of hours of sunshine	367.0		
	°		
The mean temperature of the month	82.4		
The average temperature of September from 24 years' registers	83.3		
The highest temperature in the month	91.3	9th	
The lowest temperature in the month	76.6	24th	
The range of temperature during the month	14.7		
The mean daily range of temperature	9.0		
The greatest range of temperature in one day	11.8	29th	
	Per cent.		
The mean humidity of the month	86		
The average humidity of September from 24 years' registers	85		
	inches		
The mean vapour tension of the month	0.956		
The average vapour tension of September from 9 years' registers	0.987		
The mean cloud proportion of the month	7.27		
The average cloud proportion of September from 10 years' registers	7.30		
	Inches.		
The total rainfall of the month	9.54		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	9.22		
The average fall of September from 48 years' registers	10.18		
The greatest fall in 24 hours	1.55	23rd	
	Days.		
The number of rainy days in the month	21		
The average number of rainy days in September from 24 years' registers	21		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	143.4		
The mean difference of sun and air temperatures	56.1		
The greatest sun temperature	153.6	6th	
The greatest excess of sun over air temperature	66.5	16th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	75.4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2.8		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	5.6	30th	
	Miles.		
The mean movement of the wind per day	95.2		
The greatest movement of the wind in one day	171.0	16th	
The greatest movement of the wind in one hour	14.0	14th 10 to 11 A.M.	

The number of hours with winds from each of the 8 points—

N. 69, NE. 22, E. 33, SE. 162, S. 151, SW. 120, W. 89, NW. 37, Calm 37.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently equal, and, daily, the thermometer which furnished the record of temperature at the Surveyor-General's office during the years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 10th October 1887.

A. PEDLER,
for Offg. Meteorological Reporter to the Govt. of India.

Meteorological Report of the Province of B

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 7TH OF OCTOBER 1887.

At the close of the previous week the meteorological conditions over the province were distinctly those which mark the close of the rainy season in Bengal, and the commencement of the transition conditions which obtain up to the time of the setting in of the north-east monsoon or the cold-weather conditions. Dry north-westerly winds were blowing over the greater part of the province, and in fact the only districts in which southerly and south-easterly winds still continued to blow were at the extreme easterly stations of East and North Bengal and in Assam. Humidity had become very low at the western stations, and cloud proportion had also become small generally over the whole province. Northerly and north-westerly winds were also blowing over a considerable part of the northern half of the Bay, though in the south a fairly strong south-west monsoon current still prevailed. These conditions continued practically unaltered during the first four or five days of the present week, though at the eastern and northern stations wind directions changed somewhat, and became in many cases north-easterly. On the 5th and 6th winds became lighter and more variable in direction than they had hitherto been, and on the 7th a certain number of stations showed southerly winds, and there was evidence of a considerable amount of interaction taking place over the province, which caused conditions to become more favourable for rainfall. For the greater part of the week the whole province has been practically rainless, except for a few local showers of little or no importance; but on the 7th rainfall was fairly general in the 24-Pergunnahs and Khoolna districts in South-West Bengal, while showers were more numerous over a considerable part of the remainder of the province. These disturbed conditions in South Bengal were probably induced by the formation of a small cyclonic storm in the south of the Bay, slight indications of which were shown on the 7th by a fairly complete cyclonic circulation over the centre and south of the Bay and by the strengthening of the winds at Galle and Diamond Island. This storm afterwards developed slightly and crossed the coast close to Madras on Sunday morning, the 9th instant, giving heavy rain to the west coast stations.

Pressure.—The changes of pressure during the week have been of comparatively little importance and have been of the normal oscillatory character. On October 1st pressure rose in all districts, on the 2nd and 3rd there was a slight fall, on the 4th the changes were small and variable, on the 5th there was a further fall, on the 6th again the changes were small and variable, and on the 7th there was rather a rapid rise. For the whole week the mean pressure has not varied very largely from the normal, and taking those stations only into consideration from which observations have been received for several years, and which therefore yield reliable averages, the mean pressure of the province for the week has been only 0·008 inch in excess of the normal. The extreme variations are from a mean excess pressure of 0·038 inch at Hazaribagh to a defect of 0·014 inch at Chittagong. In Assam Dhubri has shown a slight excess pressure (0·022 inch) and Silerhar an almost corresponding defect, while at Sibsaur pressure has been very nearly normal. For the whole of Assam pressure has been in defect of the normal by 0·003 inch.

Temperature.—Owing to the meteorological conditions above described, and to the fact that rainfall has been almost absent for the week, temperature has been rather largely in excess of the normal over the whole province. The excess temperature is in no district smaller than one degree, and the largest excess is 1·6° in North Bengal. For the whole of Bengal the temperature has been in excess of the normal by 1·2°. In Assam also temperature has been in excess by 1·4°.

Rainfall.—It has already been noticed that until quite the close of the week rainfall was practically almost absent. In some districts indeed rainfall has been entirely absent throughout the week, and thus the whole of Behar, North Bengal and Orissa have received so little rain, that the average falls for each district do not amount to more than a few hundredths of an inch. In South-West Bengal the fall throughout the week has only averaged 0·30 inch, which is about a quarter of the normal amount for the period, but the rainfall has been practically confined to the following districts:—Midnapore, 24-Pergunnahs, Howrah, Hooghly, Nuddea, Khoolna, Jessore and Moorshedabad. In East Bengal the fall has also averaged 0·30 inch, which is about a sixth of the normal quantity, and the falls have been received principally in the following districts:—Dacca, Backergunge, Furreedpur and Chittagong. The Tipperah district has again been practically rainless throughout the week except at Chandpur, but a report received by telegram on the 10th says that on this day 2·50 inches of rain were received at Comilla. Chutia Nagpur has received during the week an average amount of 0·25 inch, which is about one-fifth of the normal fall, but this rainfall has been mainly confined to the Maubhoom district.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 7th of October 1887:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.										RAINFALL.							
	Highest observed during week.	Lowest observed during week.	Averages for week.				Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1887.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, t thunder, p passing temporary showers, < lightning, Δ dew, = fog.

MEMORANDUM.

THE birth and death returns of the principal Municipalities in Bengal afford the following results for the week ending 10th September 1887 :—

1. That births and deaths were registered in these Municipalities in the proportions per 1,000 of population of 19 and 26.1, respectively, as opposed to 17.1 and 25.1 per 1,000 in the preceding week ending 3rd September, indicating a sensible improvement in the registration of both the events.

2. That the highest proportions of births and deaths were returned from the following Municipalities :—

Births.				Deaths.			
			Ratio per mille.				Ratio per mille.
Arrah	39.5	Gya	62.8
Durbhanga	37.0	Arrah	52.6
Bhagulpore	36.4	Scrampore	39.2
Darjiling	32.6	Purneah	38.1
				Bhagulpore	34.5
				Beauleah	34.2
				Monghyr	33.4
				Suburbs of Calcutta	31.2
				Puri	29.4

3. That, as compared with the outcome of the preceding week, fever alone exhibited noticeable enhancement of mortality, the fatal results from the other diseases exhibiting only fractional differences, and small-pox presenting no death, *vide* figures given below :—

Ratio per mille during the weeks ending—						
10th September 1887. 3rd September 1887.						
Cholera	3.1	2.6
Small-pox1
Fever	11.0	9.7
Bowel-complaints	4.5	4.8
Injury6	.3
Other causes	6.9	7.6

4. That the following Municipalities suffered pre-eminently from the diseases specified in the above table, excepting small-pox, from which, as before stated, no death was reported to have occurred, and injury, the casualties from which were nowhere above normal :—

Cholera.		Fever.		Bowel-Complaints.		Other Causes.	
	Ratio per mille.		Ratio per mille.		Ratio per mille.		Ratio per mille.
Arrah	27.5	Purneah	31.1	Puri	16.8	Gya	21.2
Gya	10.2	Beauleah	26.3	Gya	11.6	Bhagulpore	11.8
Burdwan	7.6						
Chupra	3.9						
Patna	2.9						
Suburbs of Calcutta	2.7						

5. That the death-rates in relation to Sex, Class and Age, stood as follows :—

According to Sex.			According to Class.			According to Age.		
		Ratio per mille.			Ratio per mille.			Ratio per mille.
Males	...	25.6	Christians	...	17.4	Under 1 year	...	197.2
Females	...	26.7	Hindus	...	28.6	1 and under 5 years	...	37.9
Ratio of male deaths to every 100 female deaths	108		Mahomedans	...	20.6	5 " " 10 "	...	17.1
			Budhists	...	24.2	10 " " 15 "	...	13.1
						15 " " 20 "	...	15.7
						20 " " 30 "	...	14.4
						30 " " 40 "	...	13.4
						40 " " 50 "	...	18.5
						50 " " 60 "	...	35.0
						60 years and upwards	...	72.4

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 4555A.

GENERAL.—*The 11th October 1887.*—Moulvie Fuzul Karim, Deputy Magistrate and Deputy Collector, Netrokona, Mymensingh, is transferred to Darjeeling, and is posted to Siligorec.

Baboo Chunder Narain Gupta, Deputy Magistrate and Deputy Collector, Sonthal Pergunnahs, is transferred to Mymensingh, and is appointed to have charge of the Netrokona sub-division of that district.

Baboo Kasi Kinker Sen, Deputy Magistrate and Deputy Collector, Moorshedabad, on leave, is posted to the Sudder station of the Sonthal Pergunnahs district.

Mr. F. F. Handley, c.s., has been granted by Her Majesty's Secretary of State for India an extension of furlough for four months and thirty days on sick certificate.

Moulvie Mobaruck Ali, Temporary Deputy Magistrate and Deputy Collector, Singbhoom, is transferred to the Sudder station of the Sonthal Pergunnahs district.

Baboo Srish Chandra Ghose, Temporary Deputy Magistrate and Deputy Collector, Manbhoom, is transferred to Singbhoom.

Moulvie Ikram Russool, Deputy Magistrate and Deputy Collector, Backergunge, is allowed leave for two months and twenty-two days, under section 72 of the Civil Leave Code, with effect from the 31st instant, or such subsequent date as he may be relieved.

Baboo Kristo Kumar Sen, Deputy Magistrate and Deputy Collector, on leave, is posted to the Sudder station of the Backergunge district.

The 12th October 1887.—Mr. J. P. Grant, c.s., reported his departure from India on furlough on the 15th September 1887.

The 14th October 1887.—Baboo Mohesh Chunder Sen, Deputy Magistrate and Deputy Collector, Bogra, is allowed leave for one month, under section 72 of the Civil Leave Code, from the afternoon of the 4th October 1887.

The 17th October 1887.—Mr. G. W. Place, Assistant Magistrate and Collector, Lohardugga, is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, with effect from the 25th August last.

The services of Baboo Kustori Lal, Temporary Deputy Magistrate and Deputy Collector, Saran, are placed temporarily at the disposal of the Revenue Department of this Government for employment on survey work in the Srinagar Ward's estate.

The 18th October 1887.—Mr. R. C. Sterndale, Officiating Cantonment Magistrate, Dum-Dum, and Judge of the Small Cause Court in that Cantonment, is allowed leave for twenty-one days, under section 138-2 of the Civil Leave Code, with effect from the date on which he may avail himself of it.

POLICE.—*The 18th October 1887.*—Mr. J. Cowie, Officiating Assistant Superintendent of Police, Sasseram, Shahabad, is allowed leave for two months, under section 138-2, chapter X of the Civil Leave Code, with effect from the 5th July last.

Mr. F. H. Tucker, Officiating District Superintendent of Police, Hooghly, is allowed leave for two months, under section 72 of the Civil Leave Code, with effect from the 1st instart, or such subsequent date as he availed himself of it.

ECCLESIASTICAL.—*The 11th October 1887.*—Pastor Doman and Pastor Kuar Manjhi, of the Bethel Mission, in the Sonthal Pergunnahs district, are hereby authorized, under section 9, Act XV of 1872, to grant certificates of marriage between Native Christians in that district.

REGISTRATION.—*The 11th October 1887.*—Moulvie Fuzlul Karim, Deputy Magistrate and Deputy Collector, Siligore, Darjeeling, is vested with the powers of a Sub-Registrar in the Phansidewah thana.

The 13th October 1887.—Moulvie Syed Abdur Raub, Special Sub-Registrar of Burrisal, is allowed leave for two months, under sections 128 and 141, chapter X of the Civil Leave Code, in extension of the leave granted to him under the order of the 20th May last.

The 14th October 1887.—Moulvi Abdus Samad, Rural Sub-Registrar of Gulsakhali, in the district of Backergunge, is appointed to be Rural Sub-Registrar of Jaffergunge, in the district of Dacca.

OPIMUM.—*The 11th October 1887.*—In modification of the order of the 14th June last, Mr. G. O. R. Nicholson, Head Assistant to the Principal Assistant Opium Agent, Behar, is appointed to act as Principal Assistant, Opium Agent, Behar, with effect from the 7th July last, until the date on which he was relieved by Surgeon-Major G. Price.

MEDICAL.—*The 14th October 1887.*—The orders of the 13th August last granting Dr. R. Macleod, Civil Medical Officer, Gya, on deputation as Officiating Civil Medical Officer, Patna, and Superintendent of the Temple Medical School, Bankipore, privilege leave for two months, and appointing Assistant Surgeon Binod Krishna Bose, attached to the Gya Pilgrim Hospital, to have charge of the civil station of Gya, in addition to his own duties, are cancelled.

The following are republished from the *Assam Gazette* :—

No. 316.—*The 5th October 1887.*—The undermentioned officers have been granted by Her Majesty's Secretary of State for India permission to return to duty, as advised in list dated the 2nd September 1887 :—

Permitted to return.

Name.	Service.	Appointment.	Date on which permitted to return.

Ordered that copy of the above notification be forwarded to the several Local Governments and Administrations, with the request that the notification may be republished in the local Gazettes.

CHARLES WEIR,
Offg. Under-Secy. to the Govt. of India.

GENERAL ORDERS.

Published in the "Gazette of India," dated 17th September 1887..

DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

ACCOUNTS AND FINANCE.

PUBLIC DEBT.

Simla, the 16th September 1887.

No. 4983.—In accordance with the provisions of Section 15, sub-sections (1) and (2), of the Indian Securities Act, XIII of 1886, the Governor-General in Council is pleased to publish, for the information of the public, the following draft of rules which he proposes to make under Section 14 of the Act, and to specify the 15th day of October 1887 as the date after which the draft will be taken into consideration :

Proposed Rules under Section 14, Indian Securities Act, 1886.

1. Interest cages, shewing the several half years at which interest will accrue, shall be imprinted on the reverse of each new note issued, and payment shall be recorded by the stamp of the Disbursing office, or by a manuscript entry, over the space apportioned to the half-year concerned. If payment be made at a Presidency town, the recording entry shall shew the Presidency and the date and number of the issuing warrant, which shall be in the form of a negotiable instrument payable to the holder's order. But if payment be made at a District Treasury, the recording entry shall shew the name of the treasury, the number borne by the payment voucher, and the date of payment; this entry shall be authenticated

by the initials of the Treasury Officer, and the holder's receipt shall be taken on the face of the payment voucher. If, however, the note be of the old form, and bear no interest cage, the holder's endorsement for interest will be required on the note itself, and payments will be authenticated by the Disbursing Officer under the endorsement as heretofore.

2. Under the preceding rule, interest cages shall be imprinted, and (in the case of notes in the old form) holder's endorsements for interest shall be written only on the back of the note itself.

3. If the note be of the old form and bear no interest cage, the holder's endorsement for interest should agree letter for letter with the name in the body of the note, or in the transferring endorsement, as the case may be; the usual signature may be added below.

4. An endorsement or receipt by a native female must be attested by the signatures of at least two respectable witnesses, who must attend before the officer in charge of the treasury where interest is payable, and certify to the genuineness of the endorsement or receipt.

5. Notice of any private trust in an endorsement or receipt for interest is inadmissible.

6. A note blank endorsed by the holder is not receivable at any Government Treasury or at the Public Debt Offices in the Presidency towns. The holder of any such security will therefore be required to specially endorse the same before submitting it for payment of interest.

7. The holder of a note may be required to receipt the same for renewal in all or any of the following cases, that is to say:

- (1) If the note has been enfaced for payment of interest at a Mofussil Treasury, and the holder thereof is desirous of altering the place of payment.
- (2) If only sufficient room remains on the back of the note for one further endorsement, or when any word or words is or are written upon the note across any existing endorsement or endorsements, all cross endorsements being strictly prohibited.
- (3) If the note is torn or in any way damaged or crowded with writing or unfit, in the opinion of the officer before whom it is produced for payment of interest, for receiving endorsement.
- (4) If, in the opinion of such last-mentioned officer, the title of the person presenting the note for payment of interest is irregular or not fully proved.
- (5) If the note in question, being a counterpart note issued under the provisions of Rule 8, has ceased to be the property of a minor, or to belong to an estate in which administration is limited to interest.

In all or any of the preceding cases payment of any further interest on such note may be refused until the note is receipted for renewal and actually renewed.

8. In the case of any note which is the property of a minor or belongs to an estate in which administration is limited to interest, the Public Debt Office at Calcutta may, upon such note being deposited with them, issue to the holder of such note a counterpart thereof having the words "counterpart not negotiable" stamped across the face thereof, and further payments of interest may be recorded upon such counterpart. Whenever such note shall cease to be the property of a minor, or shall cease to belong to an estate in which administration is limited to interest, the further payment of interest in respect of the note may be refused, until the first or any subsequent counterpart (as the case may be) issued in respect of it has been receipted and renewed in the manner provided in the last preceding rule. Upon such counterpart being receipted and renewed as aforesaid, the same, together with the original note and any preceding counterpart issued in respect thereof, will be cancelled.

9. No payment of interest and no record or acknowledgment of the payment of interest and no issue of a counterpart note under the preceding rules is to be deemed or taken to be an acknowledgment of the title of the holder of any note.

10. The following fees are payable in respect of applications under sections 11 and 12 of the Act.

For each renewed or duplicate security, 4 annas per cent. if the new note does not exceed Rs. 400, and Re. 1 if the new note exceeds that sum.

11. A note tendered for renewal must be receipted on the reverse as follows:

"Received in lieu hereof a renewed note in the name of
with interest payable at

Signature of Holder."

12. If a person tendering a note for renewal applies for more than one note in lieu of the note tendered, the latter must be receipted on the reverse as follows, or as near thereto as circumstances will admit:

"Received in lieu of the within two (or more) notes for Rs. _____ respectively
in the name of _____, with interest payable at

Signature of Holder."

13. If a person tendering more than one note for renewal applies for one consolidated note in lieu of the notes tendered, the latter must be receipted as follows, or as near thereto as circumstances will admit:

Received in lieu of the within a new note in the name of
for Rs. by consolidation with Promissory Note or Notes Nos.
(mentioning the numbers and amounts of the other notes desired to be
consolidated with it), with interest payable at

Signature of Holder."

14. The form of receipt mentioned in the foregoing rules must be very clearly and correctly written, and there must be no ambiguity as to the name of the payee of the new note. The holder's signature should agree letter for letter with the name in the body of the note, or in the transferring endorsement, as the case may be; the usual signature may be added below.

15. The holder of any note requiring renewal may procure a renewed note in lieu of his original security in any of the following ways; that is to say, he may present it duly receipted either in person or through a representative at—(1), Public Debt Office, Bank of Bengal, Calcutta; or (2), at a Government Treasury for transmission to that office; or (3), at the Banks of Madras and Bombay, who, as Agents of the said Bank of Bengal, may either renew such notes on their own responsibility, or may forward them to the said Public Debt Office, Bank of Bengal, for renewal. In the case of notes presented direct to the said Public Debt Office, Bank of Bengal, or transmitted to it for renewal, either through a Government Treasury or the Bank of Madras or of Bombay, the prescribed officer referred to in section 11 of the said Act shall be the Secretary, Bank of Bengal, for the time being; and in the case of notes presented for renewal at the Bank of Madras or of Bombay, and renewed by those Banks on their own responsibility, such officer shall be the Secretary of the Bank of Madras or of the Bank of Bombay for the time being, as the case may be.

16. The officer referred to in Section 12, sub-section (1), of the Act shall be the Comptroller-General for the time being.

17. The loss or destruction of a Promissory Note shall be notified, in the first instance, by letter addressed to the Bank of Bengal, Public Debt Office, Calcutta: such letter shall contain the following particulars:

(1) Particulars of the note according to the following form:

Promissory Note for Rs. , No. , of the per cent. loan of

(2) Last half-year for which interest has been paid.

(3) To whom paid.

(4) Name of the person in whose name the note was issued (if known).

(5) Particulars of coupons attached (if any).

(6) Where enfaced at present.

(7) The circumstances attending the loss.

(8) Whether the loss was reported to the Police.

The above letter shall be accompanied by—

(a) The Post Office registry receipt for the letter containing the note, if the same was lost in transmission by post.

(b) The Police report, if any, can be obtained.

(c) A letter signed by the Officer of the Treasury or Presidency Bank where interest was last paid, certifying the last payment of interest made on the note, and to whom, if interest was paid out of Calcutta.

(d) If the applicant is not the last registered holder, all documentary evidence necessary to trace back the title to the last registered holder.

(e) Any portions or fragment which may remain of the lost or destroyed note.

A duplicate of the letter to the Public Debt Office, Calcutta, must also be sent to the Treasury where interest is payable.

18. The loss or destruction of a Promissory Note shall be further notified by an advertisement, which the applicant for a duplicate note shall cause to be inserted in three successive issues of the *Gazette of India*, and of the Local Government Gazette of the place where the loss or destruction occurred. Such notification shall be in the form following, or as near thereto as the circumstances will admit:

Lost or destroyed (as the case may be).

The Government Promissory Note No. , of the per
cent. loan of , for Rs. ,
originally standing in the name of ,
and last endorsed to ,
the proprietor, by whom it was never endorsed to any other person,
having been lost or destroyed, notice is hereby given that payment
of the above note and the interest thereupon have been stopped at the
Public Debt Office, Bank of Bengal, Calcutta, and that application is about
to be made for the issue of a duplicate in favour of the proprietor. The
public are cautioned against purchasing or otherwise dealing with the above-
mentioned Security.

Name of the advertiser—

Residence—

19. At the expiration of six months from the date of the insertion of the last advertisement, the Comptroller-General shall, if satisfied of the loss or destruction of a portion of a note, and of the justice of the claim of the applicant, and if a sufficient portion for the identification of the note so lost or destroyed shall have been produced, direct the Public Debt Office, upon the execution of such bond of indemnity as is hereinafter mentioned, to issue to the applicant a duplicate note in lieu of that so lost or destroyed as aforesaid. If, however, no portion or no sufficient portion of the note so lost or destroyed shall have been produced as aforesaid, then, at the expiration of two years from the date of the insertion of such last advertisement, the Comptroller-General shall, if satisfied as aforesaid, pass an order directing the Public Debt Office, upon the execution of such bond of indemnity as is hereinafter mentioned, to pay the applicant interest in respect of the note so lost or destroyed pending the issue of a duplicate note, and also directing the said Public Debt Office, at the expiration of six years from the date of the publication of the list in which the lost or destroyed security is first mentioned, if no reason to the contrary appear, to issue to the applicant (on his executing and procuring the execution by two sureties of such indemnity bond as is hereinafter mentioned, should the same be deemed necessary by the Comptroller-General), a duplicate note in lieu of that so lost or destroyed as aforesaid.

20. The Comptroller-General may, within six years of the date of an order passed by him under Rule 19, if he finds sufficient reason, alter or cancel such order, and may also require that the interval before the issue of a duplicate note be extended to twelve years or such shorter period not being less than six years as he may think fit.

21. Indemnity bonds when taken on the issue of a duplicate note or notes shall be for twice the amount of such note or notes, and when taken on the issue of orders for payment of interest shall be for twice the amount of the interest involved, that is to say, twice the aggregate amount of all back interest accrued due on the note, *plus* twice the amount of all interest to accrue due thereon, during the six years which will have to elapse before the issue of a duplicate note can be made. In simple cases such bonds may be issued by the Comptroller-General at Calcutta in a printed form prescribed by Government. No fee will be chargeable if a bond does not exceed in amount Rs. 500; but Rs. 5 per 1,000 will be chargeable on bonds of Rs. 1,000 and upwards, provided that no fee for any one bond so issued shall exceed in amount Rs. 30. If, however, the Comptroller-General consider that the circumstances of the case demand that a bond shall be specially prepared by the Government Solicitor, a fee of two gold mohurs shall be payable to that officer.

22. The list of securities lost or destroyed, referred to in section 12 (3) of the said Act, in respect of which an order is made for payment of interest pending the issue of a duplicate security or for the issue of such duplicate security, shall be advertised half-yearly in the *Gazette of India* in the months of January and July, or as soon afterwards as may be convenient. All securities in respect of which an order has been passed as aforesaid shall be included in the first list published next after the passing of such order, and shall continue to be advertised every half-year until the expiration of six years from the date of first publication, or from the date of the last payment of interest on the original securities, whichever is the later date. Such list shall contain the following particulars, viz.:—The name of the loan and number of the lost note, its value, in whose name it was issued, from what date it bears interest, the name of the claimant for a duplicate, the number and date of the order passed by the Comptroller-General for payment of interest or issue of a duplicate, and the date of publication of the list in which such security was first mentioned.

NOTIFICATION.

The 12th October 1887.—Baboo Srinath Gupta, Deputy Collector, is appointed to be Deputy Collector of Income-tax in the district of Rajshahye, and under section 40 of Act II of 1886 is vested with the powers of a Collector under that Act.

NOTIFICATION.

The 15th October 1887.—The following letter, regarding the withdrawal of quarantine at Aden and Perim against arrivals from Bombay, received from the Government of Bombay, dated the 8th instant, is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

No. 3131, dated Bombay Castle, the 8th October 1887.

From—J. DE C. ATKINS, Esq., c.s., Under-Secretary to the Govt. of Bombay,
General Department,

To—The Secretary to the Government of Bengal.

In continuation of my telegram, dated 5th instant, I am directed to state that, under instructions from the Government of India, the notification of the Government of Bombay, No. 2497, dated 24th August 1887, which imposed quarantine at Aden and Perim against arrivals from Bombay, has been withdrawn.

NOTIFICATION.

The 18th October 1887.—In supersession of the notification, dated the 1st February 1887, published at page 76, Part I of the *Calcutta Gazette* of the 2nd February 1887, it is hereby notified for general information that, under the provisions of Act XII of 1875 (the Indian Ports Act, 1875), the Lieutenant-Governor is pleased to sanction the addition of the following rule to the revised rules for the Port of Calcutta, published at page 774, Part I of the *Calcutta Gazette* of the 30th June 1886:—

When cargo is being loaded into or unloaded from any ship through any hatchway, every hatch, fore and after, and cross-piece, shall be either removed from it or slung separately by a lanyard of sufficient strength to prevent its falling into the hold.

Any person neglecting to comply with this rule shall be liable to a fine, which may extend to one hundred rupees. One-half of the fine shall be paid to the informer.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

RED SEA—WESTERN SHORE.

SAWAKIN APPROACH.

Shoal southward of Tellah Tellah Kebir.

THE following information has been received by the Admiralty from Commander E. Rooke, H. M. S. *Falcon* of the existence of a shoal lying about $3\frac{1}{2}$ miles southward of Tellah Tellah Kebir, southern approach to Sawakin.

On 2nd August 1887 the *Falcon*, about an hour after leaving an anchorage Eastward of Tellah Tellah Kebir, passed over this shoal; soundings of $6\frac{1}{2}$ to 7 fathoms were obtained for the distance of half a mile; bearings of the land could not be taken on account of thick weather.

Approximate position as given, latitude $18^{\circ} 44\frac{1}{2}'$ N.; longitude $38^{\circ} 11'$ E.

By direction of the Government of Bengal,
ARTHUR W. STIFFE, Captain, I.M.,
Port Officer of Calcutta.

NOTICE TO MARINERS—(No. 59).

BAY OF BENGAL.

Madras Harbour.

It is notified by the Port Officer of Madras that the use of flags as bad weather signals has been discontinued at the ports of the Madras Presidency, and that the following storm signals have been adopted in lieu at Madras and the outports. When there is reason to apprehend the advent of dangerous weather, the officer in charge of the port will—

(1) if during daylight, direct the hoisting of a ball ;

(2) if at night, three lamps suspended on the same line, one above the other (in a vertical series) ;

(3) if a cyclone is likely to approach the port, a drum by day  ; and

(4) two lamps similarly suspended by night.

If it is decided that the shipping shall be ordered to sea, the following signals will be hoisted at the flag-staff of the port signifying “cut or slip” :—

(1) a cone by day, apex upwards  ;

(2) three good lights suspended triangularly, one at the mast head and one at each yard arm, by night.

NOTICE.

It is hereby notified that at the next Half-yearly Departmental Examination of Junior Civilians, Deputy Magistrates, &c., which is to commence on Monday, the 14th November 1887, four Local Committees will be convened in this Division, viz., (1) at No. 14, Hare Street, Calcutta, for officers stationed at the Presidency or employed in the 24-Pergunnahs, (1) at Kishnaghur for officers employed in the Nuddea district, (1) at Jessore Sudder station for officers employed in that district and in Khoolna, and (1) at Berhampore for officers employed in the Moorshedabad district.

A. N. BHATTACHARJEE, *Personal Assistant, for Commissioner.*

COMMR.'S OFFICE, PRESIDENCY DIVISION, the 14th October 1887.

BEHAR CIRCLE.

ENTRANCE EXAMINATION, 1888.

THE attention of those who wish to appear at the Entrance Examination of 1888, as teachers or as private students, is called to the following:—

I. By "teacher" is meant one who has been employed as such since 1st January 1887, and is a *bonâ fide* teacher, in receipt of a salary at the time of the examination. Satisfactory evidence of this will be required of those who wish to appear as teachers for the Entrance, F. A., or B. A. examinations.

II. Private students will have to produce evidence that they have not read in any school since May 1887, and send, together with their application, a certificate from the head-master of the last school they read in showing that they have observed the Inter-school Rules.

III. Teachers and private students will have to appear at the test examination of the nearest zillah school and pay a fee of two rupees.

IV. The application forms, when sent for the signature of the undersigned, must be accompanied by a statement signed by the head-master showing that there is a reasonable probability of the applicant's passing.

V. No applications to be allowed to appear at the test examination will be received later than 31st December 1887 from either teachers or private students.

VI. Head-masters of the zillah schools are informed that the standard of marking for the test examination is to be just that of the University. If candidates, whether pupils of the school, teachers or private students, fail to pass in more than two subjects, or fail very badly in two, their marks must be submitted to the undersigned, to decide whether they shall be sent up or not. Care must be taken to submit the marks in time.

JOHN VAN SOMESEN POPE,

Inspector of Schools, Behar Circle.

BANKIPORE, the 6th October 1887.

WEDNESDAY, OCTOBER 19, 1887.

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

The 12th October 1887.—It is hereby notified that, under section 22, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to re-appoint Moulvi Nur Mahomed Khan Chaudhury and Baboo Jogendra Nath Bhattacharjee to be Commissioners of the Nattore Municipality, in the district of Rajshahye.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 13th October 1887.—It is hereby notified that, under section 19, clause (3) of the Bengal Local Self-Government Act III (B.C.) of 1885, the Lieutenant-Governor is pleased to appoint Baboo Kanti Chandra Chatterjee to be a member of the District Board of Jessore in the place of Mr. T. Brae, junior, resigned.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 14th October 1887.—It is hereby notified for general information that in accordance with the recommendation of the Commissioners of the Ranchi Municipality made at a meeting, and in the exercise of the power conferred upon him by section 9 of Act III (B.C.) of 1884, the Lieutenant-Governor intends to vary the limits of the municipality unless good reasons are shown to the contrary within six weeks from the date of the publication of this notification within the Municipality.

The boundaries of the municipality after revision will be as follows:—

North—From the north-east corner of the compound of the late Colonel Hedayat Ali's house to the northern corner of the compound of the Maharajah's house now occupied by Mr. Slack, c.s.; thence a line running south-east passing south of Karam Tola and north of the bungalow known as Mr. Pickard's bungalow (excluding Hatma Tola) to where the Hazaribagh road crosses the Jamoonia Dharba, and then that Dharba to a point whence a line drawn to the Chutia temple would be parallel with the Hazaribagh road.

East—A line drawn from the above point parallel with the Hazaribagh road to the Chutia temple.

South—The road from the Chutia temple to the Hazaribagh road; then the Hazaribagh road to the Doranda river.

West—A line from the north-west corner of the compound of Colonel Hedayat Ali's bungalow to the Musalman burying-ground on the Lohardugga road; thence a line due south passing west of the Ranchi Hill and then to the Doranda river where it is crossed by the Argora road (including Kumhar Tola); thence the Doranda river.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 14th October 1887.—It is hereby notified that, under section 22, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to re-appoint Dr. W. Beatson to be a Commissioner of the Bhagulpore Municipality.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 14th October 1887.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Baboos Brojeswar Nath Chowdhary, Purna Chander Ganguli, and Karoo Saha to be Commissioners of the Colgong Municipality, in the district of Bhagulpore, *vice* Baboos Joggeswar Chandra Ghose, Dijaraj Banerjee, and Beni Nath Ghose, who have ceased to be Commissioners under section 20 of Act III (B.C.) of 1884.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 14th October 1887.—It is hereby notified that, under section 19, clause (3) of the Bengal Local Self-Government Act III (B.C.) of 1885, the Lieutenant-Governor is pleased to appoint Moulvie Zakir Hossein to be a member of the District Board of Maldah in the place of Baboo Shib Chandra Nag, transferred.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

Calcutta Gazette of the 23rd idem, it is hereby notified that the Lieutenant-Governor is pleased, in the exercise of the power conferred on him by section 35 of the Bengal Ferries Act I (B.C.) of 1885, to direct that the ferries named in the margin, which are situated in

the district of Midnapore, shall be managed by the District Board of Midnapore, and that all the proceeds of such ferries, and all the dues levied, and compensation received under the said Act in respect thereof, shall be paid into the District Fund, with effect from the 1st October 1886.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

ERRATUM.

The 18th October 1887.—In the notification, dated the 6th September 1887, published at page 217, Part IB of the *Calcutta Gazette* of the 7th idem, regarding the appointment of Baboo Debendro Nath Ganguli as a Commissioner for the Dainhat Municipality, for "resigned" read "who has ceased to be a Commissioner under section 20 of the Act."

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 18th October 1887.—It is hereby notified for general information that, in the exercise of the power conferred on him by section 351 of Act III (B.C.) of 1884, and on the recommendation of the Commissioners of the Chyebassa Municipality, made at a meeting, the Lieutenant-Governor is pleased to confirm the bye-laws reproduced below, which have been framed by the said Commissioners under section 350 of the Act—

PROPOSED BYE-LAWS FOR THE CHYEBASSA MUNICIPALITY.

For regulating the conduct of business at meetings.

1. The day of the meeting shall ordinarily be the second Tuesday in every month, unless the Chairman, for any special reason, fixes any other day. A notice signed by the Chairman or Vice-Chairman shall be circulated at least three days before the day of the meeting.

2. A list of business to be transacted at the meeting shall accompany the notice, and no matter which is not contained in such list shall be brought forward for discussion at any meeting unless with the consent of the majority of the Commissioners present at the meeting.

8. Any member wishing to bring any proposition before the Commissioners at a meeting shall give written notice to the Chairman or Vice-Chairman of his intention to do so, and such proposition shall be included in the next list of business which may be prepared after the receipt of the notice.

For regulating the time and mode of collecting the taxes.

4. Every collecting officer shall be provided with a certificate of his authority to collect, and every such certificate shall bear the seal of the Municipality and the signature of the Chairman. Every collecting officer, at the time of demanding payment, shall be bound to show his certificate, if required.

5. Every collecting officer receiving any money in payment of any demand shall give a receipt for it.

6. Every person required in writing to furnish any schedule or return, which the Commissioners may lawfully require him to furnish, shall send such schedule or return to the Office of the Commissioners within one week from the date upon which the requisition has been served upon him in the manner described in section 356 of the Act.

An person failing to do so shall be liable to a penalty not exceeding Rs. 5 for the omission, and to a penalty not exceeding Rs. 2 for every day the omission shall after warning continue.

Any person submitting a false or incorrect schedule or return shall be liable to a penalty of Rs. 20, provided that nothing in this bye-law shall be held to prevent the institution of a criminal prosecution under the Penal Code should the facts appear to warrant such a proceeding.

7. Payment of purchase-money for property sold and the delivery of the property shall be made immediately after the sale; and if the purchaser fail to pay the full amount of his bid, it shall be lawful for the distraining officer at his discretion to sell the property again on the same day or on any other day of which due notice shall be given, and the former purchaser shall in such case be responsible to the Commissioners for any loss, which shall be recoverable as a debt due to them.

For regulating the conduct of persons employed by the Commissioners.

8. All persons employed by the Commissioners whose services may be no longer required shall be liable to discharge after receipt of previous notice, or pay in advance for the period of one month, and no such person shall withdraw from the duties of his office without having given previous notice for the period of one month on pain of forfeiture of one month's salary.

9. All persons now holding or who may hereafter be appointed to any office under the Commissioners shall, when required so to do, furnish good security to such amount as the Commissioners may from time to time fix, and any person failing to furnish such security within such time as the Commissioners may appoint, shall be held to have thereby forfeited his appointment and may be removed from office.

10. The Commissioners shall have power to inflict for neglect of duty a fine not exceeding one month's pay upon any person employed by them.

For regulating the disposal of offensive matter, rubbish and dead bodies of animals.

11. Every person within whose premises any animal may die, shall within two hours after its death, or if death occurs at night, within two hours after daylight, either remove at his own expense the carcass to such place as may be set apart by the Commissioners for the reception of such carcasses, or report the death to the conservancy overseer of the division within which such premises may be situated; and in such latter case shall pay to the said overseer the expense of removing the carcass at the rate of Re. 1 for a large and annas eight for a small animal, and in cases where the said person is not the owner of the animal, and the owner is known, the owner shall alone be responsible for the payment of such expense, and such expenses shall be recoverable as a debt due to the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 10.

12. No person shall deposit or cause to be deposited any carcass, or any part of a carcass, in any place other than such places as may from time to time be appointed by the Commissioners for the reception of such carcasses.

The penalty for infringement shall be a fine not exceeding Rs. 10.

13. All dust, dirt and rubbish of every kind, the removal of which is undertaken by the Municipal Commissioners, shall be deposited between the hours of 4 A.M. and 8 A.M. from April to September, and 4 to 9 A.M. from October to March, on the side of the road near the entrance of the premises from which it has come.

The penalty for infringement shall be a fine not exceeding Rs. 10.

For the regulation and management of privies.

14. Every owner or occupier of any house, land or premises from which offensive matter is not removed by the said owner or occupier, shall give free access to the servants of the Municipality to his house, land or premises for the removal of any night-soil or filth within such hours as may have been fixed by the Municipal Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 5.

15. Every person shall construct his privy above ground, and shall provide it with a suitable moveable receptacle of metal or earthenware.

The penalty for infringement after notice shall be a fine not exceeding Rs. 20.

16. On receipt of a notice from the Municipal Commissioners, every owner or occupier of any house, land or premises in or on which any well-privy or other noxious or improperly constructed privy may be situated, shall fill up, close or otherwise alter the construction of the said privy as may be directed in the notice; and if the orders contained in the notice be not carried out within fifteen days, the Commissioners may fill up, close or otherwise alter the said privy, and any expenses incurred in so doing shall be recoverable as a debt due to the Commissioners.

17. No owner or occupier of any house, land or premises in or on which any privy may be situated, shall allow night-soil or filth of any kind to flow or to be discharged from such privy into any drain, watercourse, river, tank, hollow or excavation, or any place containing waste and stagnant water, or into any other receptacle but one of the nature described in bye-law No. 15.

The penalty for infringement shall be a fine not exceeding Rs. 20.

18. No person shall throw, deposit, or discharge any night-soil, sewage or the contents of any drain, privy or cesspool into any river, tank, khāl, watercourse or receptacle for water; or dispose of the abovementioned kinds of offensive matter in any other way than as the Municipal Commissioners may from time to time direct.

The penalty for infringement shall be a fine not exceeding Rs. 20.

19. No person shall carry night-soil through the streets except between the hours of 3 A.M. and 7 A.M., or otherwise than in a closely covered receptacle of such description and pattern as shall be from time to time required by the Municipal Commissioners, or use any places other than those approved by the Commissioners, for the purpose of depositing such night-soil.

The penalty for infringement shall be a fine not exceeding Rs. 20.

20. No person shall perform any office of nature in any place outside private premises other than such as may have been appointed by the Commissioners, provided that such places have been set apart by the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 10.

For regulating or prohibiting the use of fire-balloons, fireworks, firearms, or missiles in the vicinity of public roads.

21. No one shall let off any fire-balloons, fireworks, firearms, or any missiles in or near a public street without the written consent of the Municipal Commissioners previously obtained.

The penalty for infringement shall be a fine not exceeding Rs. 10.

For regulating cremation and burials.

22. No person shall bury or cause to be buried any corpse or part of a corpse in a burial ground, in a grave constructed of masonry, in such manner that the top of the coffin, or the body where no coffin is used, shall be at a less depth than four feet from the surface ground.

The penalty for infringement shall be a fine not exceeding Rs. 10.

23. No person shall bury or cause to be buried in any burial ground, any corpse or part of a corpse in a grave not constructed of masonry, which shall be less than five feet deep.

The penalty for infringement shall be a fine not exceeding Rs. 10.

24. No person shall build or dig or cause to be built or dug any grave in any burial ground at a less distance than four feet from any other existing grave.

The penalty for infringement shall be a fine not exceeding Rs. 20.

25. No person shall build or dig or cause to be built or dug a grave in any burial place in any other line than that marked out by the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 20.

26. No grave once used shall be opened for the burial of another body without the permission of the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 20.

27. Every person who shall bring or convey, or cause to be brought or conveyed, any corpse or part thereof to any burning-ground, shall burn, or cause the same to be burnt, within six hours after its arrival at the said burning-ground.

The penalty for infringement shall be a fine not exceeding Rs. 20.

28. The person bringing a corpse for cremation or burial at any registered burning-ghât or burial-ground shall be bound to pay a fee from two to ten annas according to circumstances.

The penalty for infringement shall be a fine not exceeding Rs. 5.

29. No person, when burning, or causing to be burnt, any corpse or part of a corpse in any burning-ground, shall permit the same, or any part thereof, to remain without being completely reduced to ashes; or shall permit the clothes or other articles connected with the burning of such corpse to remain at or near such burning-ground, unless the same be completely reduced to ashes.

The penalty for infringement shall be a fine not exceeding Rs. 20.

30. No one shall carry a corpse or part of a corpse through any highway, unless it be decently covered and completely concealed from public view.

The penalty for infringement shall be a fine not exceeding Rs. 10.

31. No person, while carrying any corpse or part of a corpse within municipal limits, shall, except for the purpose of ordinary relief, deposit it on or near any public highway.

The penalty for infringement shall be a fine not exceeding Rs. 10.

For control of Municipal Wells.

32. After an iron bucket suspended from an iron chain has been supplied to a well, no person shall draw water from such well otherwise than by means of such iron bucket.

The penalty for infringement shall be a fine not exceeding Rs. 5.

33. No person shall mount on to the uppermost platform of the well, and no person shall bathe or wash clothes, cooking utensils, &c., &c., within a distance of ten feet from the lowest platform of the well.

The penalty for infringement shall be a fine not exceeding Rs. 5 for the first offence, and a fine not exceeding Rs. 50 for the second or subsequent offence.

34. No person shall throw any matter whatever into a well.

The penalty for infringement shall be a fine not exceeding Rs. 25.

Miscellaneous bye-laws.

35. No person shall put, or cause to be put, on any house or other building any spout or other thing intended for the conveyance and discharge of water, which shall be so placed that water discharged therefrom shall be thrown or fall upon any public road or thoroughfare.

The penalty for infringement shall be a fine not exceeding Rs. 5; the penalty for continued infringement after notice shall be a fine not exceeding Re. 1 daily.

36. No person shall construct or place over or by the side of any public drain any bridge, platform, building or structure of any kind, except by and with the written permission of the Commissioners, and in such manner as they shall direct.

The penalty for infringement shall be a fine not exceeding Rs. 10, and the penalty for continued infringement after notice shall be a fine not exceeding Rs. 3 daily.

37. If any house, wall, or other erection, or any part thereof, fall upon any highway, or into any public drain, the owner of such house, wall, or erection shall remove it after notice within the time prescribed by the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 10; the penalty for continued infringement after notice shall be a fine not exceeding Rs. 5 daily.

38. No person shall prepare any channel or convey water by any channel across any public thoroughfare, except in such manner as shall have been first approved by the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 10; the penalty for continued infringement after notice shall be a fine not exceeding Rs. 2 daily.

39. No person shall steep in any tank, ditch, water-course or river within municipal limits any jute, hemp or other vegetable matter likely to render the water of such tank, ditch, water-course or river offensive or noxious to the neighbourhood.

The penalty for infringement shall be a fine not exceeding Rs. 5; the penalty for continued infringement after notice shall be a fine not exceeding Rs. 2 daily.

40. No person shall, without the written permission of the Commissioners, set up any obstruction in any public nullah or water-course, and the Commissioners may order the removal of any such obstruction on ground of public health.

The penalty for infringement shall be a fine not exceeding Rs. 10; the penalty for continued infringement after notice shall be a fine not exceeding Rs. 4 daily.

41. No person shall allow any pigs to be at large, or keep them otherwise than in closed styes.

The penalty for infringement shall be a fine not exceeding Rs. 5; the penalty for continued infringement after notice shall be a fine not exceeding Rs. 2 daily.

42. No person shall in any way obstruct, or allow to be obstructed, any of the lanes, walks, bye-ways or other thoroughfares in any bazar, or by exposing goods for sale, or accumulating anything on any such lane, walk, bye-way or thoroughfare.

The penalty for infringement shall be a fine not exceeding Rs. 10.

43. No person shall let loose, or cause or allow to be let loose, or allow to get loose, any diseased or worn-out animal into any highway.

The penalty for infringement shall be a fine not exceeding Rs. 20.

44. Any person required by the Act, or by any bye-law under it, to take out a license shall produce and show his license when required to do so by any Commissioner, or any person duly empowered by the Commissioners in writing to make such requisition.

The penalty for infringement shall be a fine not exceeding Rs. 20.

45. No person shall tether cattle, goats, or other animals, or cause them to be tethered, on or within reach of any public highway.

The penalty for infringement shall be a fine not exceeding Rs. 5.

46. No person shall picket animals or collect carts or form any encampment upon any public ground without the permission of the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 10.

47. Any one violating an order by the Commissioners, under section 236, shall be liable to a fine not exceeding Rs. 10 for such infringement, and to a further fine not exceeding Rs. 3 daily for infringement after notice.

48. No cart laden with bamboos, or long planks, or any such materials over 12 feet in length, shall traverse the public streets, except with a person in attendance in front, in addition to the driver.

The penalty for infringement shall be a fine not exceeding Rs. 10.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

The Calcutta Gazette.

WEDNESDAY, OCTOBER 19, 1887.

PART II.

Advertisements.

(N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.)

LAND SALE NOTICES.

NOTICE is hereby given, under sections 6 and 13, Act XI of 1853, that the undermentioned estates or shares of estates in the district of Monghyr will be put up for sale at the Collector's office of that district on 24th October 1887, for arrears of revenue and other demands which, by the Regulations and Acts in force, are directed to be realised in the same manner as arrears of revenue.

When in columns 6, 7 and 9 of the appended statement it is stated that only a share is to be sold, a separate account is kept for such share, and the other share or shares in the estate are excluded from the sale:—

S. J. DOUGLAS, *Offg. Collector.*

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Dacca will be put up to sale at the Dacca Collectorate on the 12th January 1888, corresponding with 29th Poush 1294 B.S.

The purchasers will be subject to the following conditions of sale:—

1st.—The estates to be sold to the highest bidder above the upset price. The purchasers of these estates will be considered as the proprietors of these estates, and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

Number in the statement of Government estates.	Number on the district roll.	Name of the estate and pergunnah.	Government revenue.	Area in acres.	Upset price.	REMARKS.

T. L. JENKINS, *Covtd. Deputy Collector in charge.*

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Dacca will be put up to sale at the Dacca Collectorate on the 12th January 1888, corresponding with 29th Poush 1294 B.S.

The purchaser will be subject to the following conditions of sale:—

1st.—The estate to be sold to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him free of revenue.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchaser to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

(708—1)

G. H. SIMMONS, Traffic Manager.

Oudh Forest Department.

BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of s&l beams and scantlings supplied from this depôt will be as follows:—

BEAMS.—21 feet length, at Rs. 2-10 per cubic foot.

22	"	"	2-12	"
23	"	"	2-14	"
24	"	"	3	"

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

SCANTLINGS.—From 12 to 20 feet, at Rs. 2-8 per c. ft.
Under 12 and over 7, at " 2-4 "
Under 7 feet at " 3 "

The above prices are for ordinary building purposes. For Planking, Sleepers, &c., special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

Second and Third Class Timber will be sold and price fixed by agreement.

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge. By order of the Conservator of Forests, N. W. P. and Oudh, Oudh Circle.

KANKYA LAL,

Sub-Assistant Conservator of Forests,
Bahramghat Division.

Bahramghat, the 1st April 1886.

Crystalline Cinchona Febrifuge.

A NEW and improved preparation made at the Government Factory from Red Cinchona Bark. This is a more perfect substitute for Quinine than the ordinary uncrystallized Febrifuge. It can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds and upwards* at a time, from the Superintendent, Royal Botanic Garden, Seebpore, near Calcutta, for *cash only*, at the following rates:—Per four ounce tin *Rs. 6 ans. 8*, per eight ounce tin *Rs. 12 ans. 8*, per pound tin *Rs. 24*. The general public can be supplied by the Superintendent, Royal Botanic Garden, for *cash only*, at the undernoted rates:—Per four ounce tin *Rs. 8 ans. 8*, per eight ounce tin *Rs. 16 ans. 8*, per pound tin *Rs. 32*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage four annas per 4 oz. tin, eight annas per 8 oz. tin, and twelve annas per pound tin, in addition to the foregoing rates.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine and can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds* at a time, from the Superintendent, Botanical Garden, Calcutta, for *cash only*, at the following rates:—per four ounce tin, *Rs. 4 ans. 8*; per eight ounce tin, *Rs. 8 ans. 8*; per pound tin, *Rs. 16 ans. 8*. The general public can be supplied by the Superintendent, Botanical Garden, for *cash only*, at the undernoted rates:—per four ounce tin, *Rs. 5 ans. 8*; per eight ounce tin, *Rs. 10 ans. 8*; per pound tin, *Rs. 20*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage eight annas per 4 and 8 oz. tins, and twelve annas per pound tin, in addition to the foregoing rates.

Notes on Forestry,

By C. F. AMERY.

Deputy Conservator, Forests, N. W. Provinces.

THIS little work, published with the approval of the Government of India, treats of the general principles of forest management in all its branches, and is recommended not only to forest officers, but to all who are interested in the progress of forest management in this country.

JOHN ELIOT, M.A., Meteorological Reporter

to the Govt. of Bengal.

CALCUTTA, the 26th August 1875.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by person in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, i.e., from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. PEDLER,

Offg. Meteorological Reporter to the Govt. of Bengal.
Meteorological Office, Bengal, the 17th March 1886.

INDIAN LAW REPORTS.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5-1, Council House Street, at the following rates, payable in advance—

" six "	" 100	" 68	" 45
" nine "	" 145	" 96	" 64
" twelve "	" 180	" 120	" 80

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the Calcutta Gazette of the 9th July 1884:—

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 22-8.

	Without postage.	With postage.
For the Calcutta Series ...	Rs. 10 0	Rs. 12 8
„ each of the Madras, Bombay, and Allahabad Series ...	„ 6 0	„ 7 0
part of the Calcutta Series purchased separately (inclusive of postage in India)	„ 2 0
part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India)	„ 1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.

„ Thacker & Co., Bombay.

„ Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

Curator of Government Books, North-Western Provinces and Oudh.

Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA. LEGISLATIVE DEPARTMENT.

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 6th October, 1887:

NO. 11 OF 1887.

A Bill to amend the Law relating to the Regulation of Police.

WHEREAS it is expedient to relax those provisions of Acts for the regulation of police which restrict the employment of Police-officers to the presidency, province or place of the police-establishment of which they are members; It is hereby enacted as follows:

Title, extent and commencement. **1.** (1) This Act may be called the Police Act, 1887.

(2) It extends to the whole of British India; and

(3) It shall come into force at once.

2. (1) Notwithstanding anything in Act XXIV of 1859 (an Act for the better regulation of the Police within the territories subject to the Presidency of Fort St. George), Act V of 1861 (an Act for the regulation of Police) or the Bombay District Police Act, 1867, the Governor-General in Council may, by notification in the Gazette of India, create a general police district embracing parts of two or more presidencies, provinces or places, and direct the enrolment under Act V of 1861 for service therein of a police-force of which the members shall exercise such powers, perform such duties, enjoy such privileges and be subject to such liabilities of Police-officers appointed under that Act as the Governor-General in Council may direct.

(2) With respect to a police-force established under the last foregoing sub-section, the functions assigned by Act V of 1861 to the Local Government shall be discharged by the Governor-General in Council, or by such Local Government or other authority as the Governor-General in Council may appoint in this behalf, and the functions so assigned to the Inspector-General of Police, Deputy Inspectors-General, Assistant Inspectors-General, District Superintendents of Police and Assistant District Superintendents shall be discharged by such officer or officers as may be appointed in this behalf by the Governor-General in Council or, subject to his control, by the Local Government or other authority, if any, appointed by him under this sub-section to discharge the functions of the Local Government.

(3) Subject to any orders which the Governor-General in Council may make in this behalf, a part of a presidency, province or place included in a general police district under sub-section (1) shall not by reason of being included therein cease to be part of the presidency or general police district of which it forms part under any of the Acts mentioned in that sub-section.

(4) For the purposes of this section, and subject to the provisions thereof, Act V of 1861 shall be deemed to take effect throughout British India.

3. Notwithstanding anything in the Acts mentioned in sub-section (1) of the last foregoing section, but subject to the provisions of any other enactment for the time being in force and to any orders which the Governor-General in Council may make in this behalf, a member of the police-establishment of any presidency or general police district may be employed in any other presidency or general police district, and, while so employed, shall be deemed to be a member of the police-establishment of that other presidency or district.

STATEMENT OF OBJECTS AND REASONS.

UNDER the provisions of the various Police Acts in force in British India, namely, Acts XXIV of 1859 and V of 1861 and Bombay Act VII of 1867, the employment of police officers is restricted to the presidency, province or place of the police-establishment of which they are members. These provisions cause much inconvenience. In the case of a railway system passing through territories under the administration of different Local Governments, they necessitate the employment of a different police force under the control of a different authority for each portion of the line which is within the limits of the territories of a different Local Government. On the North-Western Railway, for example, there are at present no less than seven different forces of police under the control of various authorities. Again these provisions prevent even the temporary employment, on an emergency, of police officers of one province in any part of another province. With the object of removing these inconveniences this Bill has been prepared. In order to provide for the employment, under the control of one police authority, of one police force within limits which are not conterminous with the limits of a Local Administration, the Bill empowers the Governor-General in Council to create general police districts embracing parts of two or more provinces and to enrol for service therein a special police force under special police authorities, and it further authorizes the temporary employment of police officers in places beyond the presidency or general police district to which they belong.

The 6th October, 1887.

J. B. PEILE.

J. M. MACPHERSON,

Offg. Secretary to the Government of India.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 15th October 1887.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
<i>Western Districts.</i>			
BURDWAN DIV.	1 Burdwan, Oct. 15, '87	1.19	Weather—cloudy and rainy for the most part of the week. Rain has considerably improved prospects, but rice in northern portion of Cutwa sub-division still suffering. More rain wanted generally. Prices pretty stationary except in Cutwa, where there has been another rise. Fever prevalent.
	Culna ...	0.55	
	Cutwa ...	0.59	
	Raneogunge ...	0.78	Weather—dry, but cloudy. There have been light showers here and there which may have slightly benefited the <i>aman</i> rice. The plants on high lands have died out; those on low lands have been to some extent saved for the time being by waters drawn from neighbouring tanks. <i>Aus</i> has given an average crop. <i>Kelas</i> is being cut. Other crops are doing well. Prices are gradually rising. Public health fair.
	2 Bankoora „ 15, '87	0.33	
	Bishenpore ...	0.82	
	3 Beerbhoom „ 15, '87	2.81	Weather—cool and cloudy with frequent showers. The rainfall came “in the nick of time” for the fast ripening <i>aman</i> paddy. Had the drought lasted a week longer, the crop would have suffered irretrievably. As things are, it is safe for the present; but steady rain is needed at frequent intervals for the next fortnight. Prices rising. Public health very indifferent.
	Rampore Haut ...	0.82	
	4 Midnapur „ 15, '87	2.89	Weather—moderately hot and muggy. Crops are reported to be good except in Ghatal, where rain was wanted. There has been 1.52 of rain there during the past week.
	5 Hooghly „ 15, „	2.16	Weather—cloudy during the week with occasional rainfall. Prospects of winter rice have improved by rain. Rain still wanted. Public health good except in the Sudder and Jehanabad sub-divisions, where fever is reported.
	Serampore ...	0.96	
PRESIDENCY DIV.	Jehanabad ...	0.76	Weather—cloudless with dry north-westerly wind. Recent rain has improved the prospect of <i>aman</i> . Lands are being prepared for <i>rubber</i> sowings. Prospect of sugarcane in the south very satisfactory, but more rain wanted for rice there.
	Howrah „ 15, '87	1.56	
	Oolooberiah „	0.68	<i>Central Districts.</i>
	6 24-Perghs. „ 15, '87	1.16	
	7 Nuddea „ 15, „	4.38	
	Kushitea ...	2.48	Weather—fair cooler, sky cloudy. Rain has done much good to <i>aman</i> crop. Sowing of winter crops progressing. River levels have fallen rapidly. Fever prevalent.
	Meherpur ...	0.68	
	Chudanga ...	3.19	Weather—rainy and cool. Prospect of <i>aman</i> crop favourable. Rain of the week has done great good to the standing crop and to ploughing for winter crop. Some fever prevails. General health good.
	Ranighat ...	1.99	
	8 Khoolna „ 15, '87	3.18	Weather—tolerably cool. Prospects of <i>aman</i> bettered by the rain of the week. Lands are being tilled for cold-weather crops. Fever reported from Jhenidah and Magura.
	9 Jessore „ 15, „	2.05	
RAJSHAHY DIV.	Jhenidah ...	4.5	Weather—cloudy and rainy. Prospects of <i>aman</i> , <i>rahar</i> and <i>til</i> good. <i>Kalai</i> and <i>moong</i> are being sown. Late rain has improved the prospect in Kandi, where common rice now sells at 25 seers per rupee.
	Magurah ...	2.73	
	Narsail ...	0.9	Weather—cloudy. State and prospects of <i>haimanti</i> paddy and sugarcane good. Rice 24 seers per rupee.
	Bongo: g ...	5.12	
	10 Moorsheadabad „ 15, '87	3.87	Weather—cloudy with occasional showers throughout the week. Rain has done great good to <i>aman</i> paddy and other standing crops. Public health fair.
	Kandi ...	1.35	
	11 Dinagepur „ 15, '87	1.48	Weather—rainy. State and prospects of crops favourable.
	Thakurgaon ...	0.17	
	12 Rajshahye „ 15, '87	4.46	Weather—rainy throughout the week. The rain that has fallen this week will do much good to the winter rice. Lands are being ploughed for tobacco and mustard. Common rice sells at 20 seers per rupee at the Sudder station. Public health generally good.
	Natore ...	1.32	
DACCA DIVISION.	Nowgong ...	1.76	Weather—hot and cloudy in the latter part of the week. <i>Ashvini</i> paddy being harvested. Sowing of pulses commenced. Rain has done much good to the crops. Prospects of crops and public health good.
	13 Rungpur	
	14 Bogra „ 15, '87	2.79	Weather—cloudy and showery. State of <i>aman</i> good. Cultivation for winter crops commenced. Public health fair.
	Sheipur ...	1.41	
	Nowkhilla ...	3.86	Weather—days hot, nights comparatively cool. Prospects of crops good. General health fair.
	15 Pubna „ 15, '87	2.66	
	Serajgunge ...	1.09	Weather—rainy and cloudy. State and prospects of crops good.
	16 Darjeeling „ 15, '87	3.14	
	17 Julpigoree „ 15, „	2.67	Weather—rainy and cloudy. State and prospects of crops good.
	
DACCA DIVISION.	<i>Eastern Districts.</i>		
	18 Dacca, Oct. 15, '87	5.73	Weather—rainy and cloudy. State and prospects of crops good.
	Manickgunge ...	0.56	
	Munshigunge ...	0.50	Weather—rainy and cloudy. State and prospects of crops good.
	Noraingunge ...	1.25	
	19 Furreddpur „ 15, '87	2.85	Weather—rainy and cloudy. State and prospects of crops good.
	Goalundo ...	4.31	
	Madaripore ...	1.91	Weather—rainy and cloudy. State and prospects of crops good.
	20 Backergunge „ 14, '87	3.60	
	21 Mymensingh „ 14, '87	1.86	Weather—rainy and cloudy. State and prospects of crops good.
	Jamalpur ...	0.84	
	Kishoregunge ...	Nil	
	Attea ...	0.26	
	Netrokona ...	0.23	

No.	District and date of return	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL—contd.			
<i>Eastern Districts—contd.</i>			
CHITTAGONG DIVN.	22 Chittagong, Oct. 18, '87	1.95	Weather—seasonable. Early <i>amun</i> crop in ear. Prospects fair. Price steady. Public health generally good.
	23 Noakholly „ 14, „	1.57	Weather—seasonable. Recent rain has much improved the prospects of the <i>amun</i> crop. Public health fair.
	24 Fenny „ „	1.80	
	24 Tipperah „ 13, „	0.60	Weather—very hot and rain in sufficient quantity is still keeping off. The crop on the low lands is safe as yet; that on the high lands is perishing; some rain has fallen, but a great deal more is still required.
	Brahmanbariah „ „	Nil	
	Chandpur „ „	1.52	Weather—hot during day. Morning foggy throughout the week. Gathering of <i>jum</i> paddy still continues. Cotton doing well. Early paddy on low lands flowering in some places. Rain wanted. Lands are being prepared for mustard.
	Chittagong Hill Tracts „ 11, „	1.40	Weather—hot during day. Morning foggy throughout the week. Gathering of <i>jum</i> paddy still continues. Cotton doing well. Early paddy on low lands flowering in some places. Rain wanted. Lands are being prepared for mustard.
	25 Hill Tipperah „ 12, „	Nil	Weather—nights and mornings cool and days hot. <i>Amun</i> paddy not doing well for want of rain. Prospects of sugarcane fair. <i>Jum</i> crops gathered; outturn moderate. Public health good.
BEHAR.			
PATNA DIVN.	26 Patna Oct. 15, '87	2.68	Weather—cool during the latter part of the week with continuous rain and high wind for two days. Rain has much benefited the paddy crop which was suffering, and will improve the prospects of <i>rubbi</i> which has already commenced to be sown in some places. <i>Bahar</i> , cotton and sugarcane look well. Public health good.
	27 Gaya „ 15, „	0.70	Weather—seasonable. Cloudy. Paddy still suffering for want of rain. The small quantity of rain has enabled the agriculturist to sow <i>rubbi</i> , but has not been sufficient for paddy. Fever reported from all parts of the district and cholera from the Sudder thana.
	28 Shahabad „ 15, „	4.00	Weather—fair in the early part of the week, but rainy and cloudy in the latter part. Recent rainfall will do much good to paddy and will facilitate <i>rubbi</i> sowings which have commenced. Prospects continue hopeful, except in Bhabua sub-division. Public health generally good. Some fever and cholera reported from sub-divisions.
	Buxar „ „	2.61	
	Sasaram „ „	2.58	
	Bhabua „ „	Nil	
	29 Durbhunga „ 15, „	1.61	Weather—rainy during the latter part of the week. Rain has greatly benefited the rice crop. It is expected that a good crop will be secured. <i>Rubbi</i> sowing has commenced in places. Prices remain stationary. Public health generally good.
	30 Mozufferpur „ 15, „	2.57	Weather—at first hot and cloudy, latterly strong easterly winds and heavy rain. Rain has benefited immensely the rice crop and the <i>rubbi</i> cultivation. Fever is rather prevalent.
	Hajipur „ „	1.26	
	Sitamarhi „ „	4.10	
	31 Saran „ 15, „	3.33	Weather—cool since 11th. Heavy rain during the week has greatly benefited paddy which would have otherwise been a failure. It will also do much good to <i>rubbi</i> . Public health generally good.
	Sewan „ „	0.38	
BHAGLPORE DIVN.	32 Chumpan „ 15, „	3.32	Weather—rainy and windy. The rainfall of the week has been very beneficial to the rice crop, rendering its prospects excellent. It has also facilitated the sowing of <i>rubbi</i> which has already commenced in the district. Public health good. Prices stationary.
	Jettiah „ „	3.75	
	33 Monghyr „ 15, „	6.19	Weather—hot and sultry in the first part of the week, cloudy and stormy in the latter part. Prospects of winter rice very much improved by rain on the night of 14th. Sowing of <i>rubbi</i> crops is being pushed on. Public health generally good, except a few cases of cholera in Monghyr.
	Beguserai „ „	0.64	
	34 Bhagalpur „ 15, „	0.10	Weather—unsettled since 12th. Scops reports no rain up to 12th, but the rain since then is believed to have been general, and if it has been so an average rice crop is secured. <i>Rubbi</i> sowings going on and prospects generally improved.
	Bunka „ „	1.33	
	35 Purneah „ 15, „	2.65	Weather—hot in the earlier and rainy in the latter part of the week. <i>Aghani</i> will benefit greatly by the rain that has fallen and should now be a very good crop. Minor crops doing well. Public health exceptionally bad even for this district and season.
	Kissengunge „ „	1.25	
	Arrareah „ „	1.88	
	36 Maldah „ 15, „	1.50	Weather—seasonable. The showers which have fallen on and off throughout the week have done much good to all crops, of which the prospects are now favourable. Common rice selling at an average of 22 seers per rupee. Fever prevalent.
	Chanchal „ „	1.13	
	Shibgunge „ „	1.48	
ORISSA DIVN.	37 Sonthal Bergha „ 15, „	0.91	Weather—cloudy with partial showers in the west and heavier rain in the east. East side of the district secure as regards <i>aghani</i> rice. West and north have had a little rain, but not enough. Some good rain at head-quarters to-day (15th). Public health fair, but fever in Rajmehal.
	Gazol „ „	1.30	
	De guur „ „	0.90	
	Gouda „ „	0.89	
	Pakour „ „	0.65	
	Rajmehal „ „	4.07	
	38 Cuttack „ „	2.92	Report not received.
	Poorce „ 13, „	5.52	Weather—cloudy and rainy. <i>Sarad</i> crops have in many parts been benefited by the recent rain; but it has come too late to do much good in the Chilka tracts, or on the high lands elsewhere. <i>Jaghu sarad</i> is in ear. <i>Rubbi</i> is being sown. Common rice 21 seers 10 chittacks per rupee in the Sudder sub-division and 20 seers 10 chittacks in the Khoorda sub-division. Public health good.
	39 Khoorda „ „	3.05	
	40 Balasore „ 14, „	3.66	Weather—cloudy; mornings cool. More or less rain throughout the district. Prospects of crops good. Weeding of <i>sarad</i> crop completed. Public health generally good, except a few cases of fever here and there.
CHOTA NAGPORE.			
<i>South-West Frontier Agency.</i>			
	41 Masrurwah, Oct. 14, '87	1.18	Weather—cloudy since 12th. Moderate rain. Rain has done much good and agricultural prospects have greatly improved. General health fair.
	42 Bohardugga „ 15, „	1.26	Weather—cloudy and cool. Showery at head-quarters. Rain urgently wanted in the interior. Prospects of crops not favourable. Prices as before. Cholera disappearing, but fever prevails in Palamow.
	43 Singhnoom „ 14, „	0.19	Weather—cloudy and windy; cool. A little rain reported all over district; more required both for winter rice and <i>rubbi</i> sowings. General health good.
	44 Manbhoom „ 15, „	0.15	Weather—cloudy and cool. The rain in Govindpore has done much good. In the Sudder sub-division it has been very insufficient and partial. The high land paddy is fast withering and not more than an 8-anna crop can be expected. Public health good.

in Bengal for the month of September 1887—concluded.

[illegible]

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA- TIONS TAKEN IN ASSAM, DURING THE MONTH OF SEPTEMBER 1887.

The weather conditions in Bengal during September are generally similar to those of the previous monsoon months. The south-west monsoon continues to bring up large amounts of aqueous vapour, and during the earlier weeks of the month the rainfall, more especially in the western districts, is partly due to the Bombay branch of the monsoon current, though the greater part of the rainfall is undoubtedly brought up by the current blowing from the Bay of Bengal. The Bombay branch, however, gives way earlier than that from the Bay of Bengal, and from the second or the third week it ceases to influence Bengal. The Bay of Bengal branch also weakens during September, particularly during the latter half of the month, and at its close it almost withdraws from the province, and thus the rainfall in September in Bengal is decidedly smaller than in July and August, and the decrease is also greater in the western districts than elsewhere, from the cessation of the Bombay monsoon current comparatively early in the month.

The intermittent character of the monsoon rainfall has been frequently pointed out in previous summaries. Each heavy burst of rainfall appears to exhaust for the time being the supplies of aqueous vapour available for condensation. Hence, after each such burst, the monsoon current falls off, and appears to die away in and near its northern limits. Local variable winds set in over the Gangetic plain and extend eastwards. This goes on until the moisture current in the rear accumulates fresh supplies of aqueous vapour and renewed energy, when it again advances and gives general rain. The majority of these advances accompany a certain amount of atmospheric disturbance, which frequently takes the form of small moving depressions or cyclonic circulations or storms. These usually occur near the front of the increasing monsoon current, or near its limits of retreat. Hence these depressions may originate either over the land or the sea, according to the strength and other conditions of the monsoon current at the time. The chief meteorological features of the month are usually the depressions which introduce and accompany the bursts of rain. Their place of formation, the rapidity with which they follow one another, and the total amount of rain they give, depend mainly upon the strength of the monsoon current itself, whilst the directions which the depressions pursue, and the local distribution of rainfall, are determined by the local meteorological conditions prevalent during their formation and existence.

Normal distribution of rainfall.—The average distribution of rainfall for the month of September depends mainly upon the geographical relations of the province to the Bay of Bengal monsoon current, which are similar to those of the preceding month. The withdrawal of the Bombay branch westward deprives a portion of the province (chiefly the western districts) of one of its sources of rainfall, and also somewhat alters the conditions and relations of the province to the other branch. Hence the average distribution of the month of September differs, more especially in the western districts, considerably from that of the two preceding months of July and August.

The average rainfall of the month exceeds 20 inches in the districts at the foot of the hills in North Bengal. Between this area and a line running west and east through Bagdogra, and also in a small area in East Bengal including Fenny and Noakholly, the mean rainfall varies between 15 and 20 inches. Between these areas and a curved line defined by the stations of Bettiah, Durbhunga, Bhagulpore, Godda, Berhampore, Goalundo, Manick-gange, Bagirhat, Diamond Harbour, Kendrapara and Porce, and thus including the greater part of North-East and South-West Bengal and the northern districts of North Behar, the average rain is from 10 to 15 inches. In the area to the south and west of this line, including the whole of Behar, except the most northern portions, the northern and central districts of South-West Bengal, the Northal Pergunnahs, Chutia Nagpur, and the western districts of Orissa, the average rainfall is less than 10 inches, and ranges between 6 and 10 inches. The greater part of South-West Bengal and Chutia Nagpur, within this area, has an average varying from 8 to 10 inches. The average rainfall of the month is least in the Patna, Gya and Shahabad districts of South Behar, and in a small area in South-West Bengal, including the stations of Magoorah, Bongong, Ranaghat, Krishnagur and Culna. In these districts the average rainfall very slightly exceeds 6 inches, and ranges between 6 and 7 inches.

Meteorology of the month.—At the close of August, Bengal had been influenced by one or two very feeble barometric depressions, which had formed over the land; one had formed over South-East Bengal and had given rather heavy rain to the southern parts of the province, while a second very feeble depression, accompanied by slight cyclonic circulation of winds, was formed over North Bengal, and gave rise to excessive rainfall at some of the stations affected by it, some stations receiving falls in excess of ten inches within 24 hours. On the 1st of September this feeble depression had almost disappeared, but conditions over the greater part of the province were favourable for rainfall, and the great majority of stations on this day received moderate rain. Conditions at the commencement of September were thus fairly normal for the season, and rainfall was general for the first three or four days, but on the 4th a distinct cyclonic circulation of winds again set up over part of Behar and North Bengal, the centre of which appeared to be near Maldah, and in connection with this feeble whirl some heavy falls of rain occurred, and thus Matari in the Purneah district and Falacotta in the Julpigoree district each received more than fifteen inches in a single day; while Mickligunge, Julpigoree

and Debigunge received amounts of between ten and fifteen inches. On the 5th the feeble wind circulation was transferred to Behar, and rather heavy rainfall continued in the north of the province, but a rapid rise of pressure took place on the 5th, which brought about on the 6th a rapid and almost complete change in the meteorological conditions. The minimum pressure recorded in the Bay retreated southwards to Coconada; pressure again rose rapidly in Bengal, the rise in some instances exceeding a tenth of an inch. Winds became light and variable, and at neighbouring stations were frequently of opposite directions in the interior of the province, and instead of the very strong monsoon current which had previously been blowing at the head of the Bay, a light and rather irregular current was reported, though at the same time an extremely strong monsoon current was blowing in the south of the Bay. Rainfall also to a great extent ceased in Bengal, though in Behar some heavy falls were reported. On the 7th these conditions developed further, winds became northerly at the greater number of stations in the province, pressure remained very high in Bengal, and an almost complete break in the rains was established. Conditions over the centre and south of the Bay were probably decidedly disturbed at this time, and wind directions all round the Bay showed distinct indraught towards the sea area, while in the south of the Bay at Galle a particularly strong monsoon current was blowing. These conditions continued unaltered until the 9th, when an extremely rapid fall of pressure set in over the northern half of the Bay, the pressure giving way most rapidly at the eastern stations, and on this day conditions were decidedly favourable to the production of a barometric depression in the eastern part of the Bay. From the 6th to the 9th, therefore, there was an alm st complete break in the rains over the greater part of the province.

The conditions last noticed continued to develop, and on the 10th a distinct depression was formed at the head of the Bay, south or south-west of Burrisal, which afterwards drifted in a westerly direction across the head of the Bay through Orissa and South-West Bengal into the Central Provinces, when it ceased to affect Bengal on about the 13th. In its advance it as usual brought heavy rain to the area affected by it. The storm having disappeared inland, it then became possible for the monsoon winds again to flow over the interior of the province. Moderate rain commenced to fall in many districts, but it was neither very general nor heavy. A rather strong south-easterly current set in over the whole of Bengal from about the 13th, though, at the same time, a strong westerly current was blowing across the south of the Bay from the Arabian Sea. This seems to have deflected the area of heavy rainfall from the Bengal current towards the east coast of the Bay, and on the 14th Diamond Island reported the excessive rainfall of 9.58 inches. On the 15th and 16th another very feeble depression formed in the north-west angle of the Bay, which passed inland through South-West Bengal, and with its disappearance a fairly steady monsoon current from the Bay of Bengal again flowed over the province, and easterly and south-easterly winds were reported from almost all stations. Conditions were almost unchanged on the 17th, and on this day very light and local rain was reported from the greater part of the province. On the 18th the changes of pressure over the province were a little irregular, and at the western stations winds became rather westerly, showing that the westerly current blowing from the Arabian Sea was still influencing Bengal. On the 18th rainfall was again irregularly distributed, and the greater part of the centre of the province received little or no rain. On the 19th pressure commenced to fall, the fall being rather large in North Bengal and Assam, and the area of lowest pressure at the Bay stations was transferred to the north-west angle of the Bay and the Orissa Coast; the westerly winds strengthened, and winds became westerly and south-westerly over the greater part of the province. On this day also general and rather heavy rain was received in Behar and North Bengal, but the remainder of the province received little rain. On the 20th a brisk fall of pressure took place over parts of South-West Bengal, and pressure became distinctly low, a band of low pressure apparently stretching from South-West Bengal through West Bengal into Behar. Winds also commenced to show a very faint tendency to circulation over Bengal, and rain again fell over a considerable part of Behar and North Bengal. On the 21st pressure continued to fall, and a low pressure area was formed over the whole of the centre of the province, while on the 22nd a distinct barometric depression was formed at the head of the Bay, which subsequently advanced in a northerly or north-north-easterly direction through the centre of the province into North Bengal, giving moderate to heavy rain in its advance. On the 26th the depression had practically filled up, the cyclonic circulation of winds accompanying it had disappeared, and winds became rather irregular in direction, though rain-showers are still reported. With the disappearance of the depression conditions became at once less favourable for rainfall, and for the remainder of the month generally local showers only were reported, principally from the east and north of the province. From the 27th to the end of the month, pressure almost steadily rose, westerly and south-westerly winds also set in at the western stations, and gradually forced back the southerly winds previously blowing until, at the close of the month, north-westerly winds were blowing over the whole province except at the eastern stations, where still south-easterly and southerly winds were reported. With the setting in of the dry north-westerly winds humidity rapidly decreased, until at several of the western stations the saturation was less than fifty per cent. of the possible amount. Cloud proportion also decreased rapidly, while temperature generally increased, and at the close of the month the conditions over the greater part of the province were distinctly those which mark the close of the rainy season, and the commencement of the transition conditions which obtain, previous to the setting in of the north-east monsoon or the cold weather season in Bengal.

For the whole month therefore it may be said that the monsoon blowing over the province was weak, the number of depressions formed in the Bay and advancing over the land was small, the depressions themselves were very feeble, and finally the monsoon diminished in strength more rapidly and much earlier than usual, for the monsoon from the Bay of Bengal had almost ceased to flow over Bengal from the 27th of the month.

Barometric depressions for the month.—Leaving out of consideration one or two extremely feeble whirls which formed over the land, and which were of no practical interest, three feeble barometric depressions only have been formed during the month. Neither of these had been of much importance beyond giving moderate to heavy rain to the areas affected by their advance.

First feeble barometric depression of September 9th to 12th.—On September, the 9th, an extremely rapid fall of pressure set in over the northern half of the Bay, the pressure giving way most rapidly at the eastern stations, and thus forming an area of relatively low pressure over the north-eastern part of the Bay. On the 10th a further very rapid fall of pressure took place over the northern half of the Bay, and at some of the stations in South Bengal the fall equalled about 0·15 inch. A distinct barometric depression with cyclonic circulation of winds was therefore formed on the 10th, the centre of which was apparently not very far south of the Sunderbans to the south or south-west of Burrisal. The depression then travelled in a westerly direction, and on the 11th it was about midway between Saugor Island and False Point, and it was again accompanied by a distinct cyclonic circulation of winds, though the wind velocities in connection with it were light. On the morning of the 12th the depression had passed well inland, and had disappeared into the Central Provinces. During the formation and advance of the feeble storm, moderate to heavy rain was brought to the southern districts, and in some cases the falls were very heavy.

Second very feeble barometric depression, September 15th and 16th.—On September 15th a rapid fall of the barometer took place in the north-west angle of the Bay, resulting in the formation of a very feeble depression, the centre of which was near Balasore, and which was accompanied with cyclonic circulation of winds. The depression gave heavy rainfall on this day to parts of South-West Bengal and Orissa, and thus Pooree reported 3·18 inches, False Point 4·46 inches, Dharmasallah 4·02 inches, Garbetta 2·18 inches, and Auda (Bankoorah district) 2·70 inches. On the 16th the depression had entirely passed inland, and had almost disappeared. It was therefore of very slight importance.

Third feeble barometric depression of September 22nd to 26th.—On September 21st a moderate fall of pressure took place, which was most rapid in South-East Bengal. On the 22nd a distinct barometric depression, accompanied by cyclonic circulation of winds, had formed over the head of the Bay, the centre being only a short distance south of the Soonderbans and south or south-west of Burrisal. On the morning of the 23rd at 10 A.M. its centre was almost over the coast line of the Sunderbans, and between Saugor Island and Burrisal. The feeble storm was, as usual, accompanied by distinct cyclonic circulation of winds, but the wind force at the land stations was moderate only, though at the head of the Bay squally weather generally prevailed. On the 24th the depression advanced slowly in a northerly or north-north-easterly direction, and at 10 A.M. its centre was near Burrisal and between this station and Jessore, and with the advance of the feeble storm inland, strong winds set in at the coast stations at the head of the Bay and moderate to heavy rain fell over the greater part of the south of the province. The feeble storm continued its advance in a northerly direction, and at 10 A.M. of the 25th its centre was in North Bengal between Serajgunge and Rampore Beaulah. It was still well defined, but the depression was decidedly shallower than on the previous day, and it was evidently filling up. On the 26th the depression had practically filled up, the cyclonic circulation of winds accompanying the feeble storm had disappeared, and winds became rather irregular in direction, while pressure generally rose, and on the 27th the depression had quite disappeared.

Pressure.—At the commencement of September the pressure distribution was fairly normal, but on the 5th and 6th a very rapid rise took place over the greater part of the province, the rise in some instances equalling about a fifth of an inch. For the first week of the month, therefore, pressure was in excess of the normal by 0·06 inch. During the second week, owing to the formation of the depression above described, the mean pressure became very considerably below the normal, the average defect equalling more than a tenth of an inch. The defect was to a certain extent neutralized in the third week, but still pressure was in defect by 0·02 inch; while during the fourth week pressure became more nearly normal, though there was still an average defect of 0·01 inch. For the whole month, therefore, the mean pressure has been below the normal at almost all stations, and taking only those stations into consideration which have recorded observations for many years, and which, therefore, yield reliable averages, the mean pressure for September for the whole province has been 0·014 inch below the normal. The defects have generally been largest at the stations in the south of the province.

Temperature.—Owing to the fact that rainfall has generally been below the normal over the province throughout the month, temperature has been distinctly above it. The mean temperature of the whole province has thus been 0·2° in excess of the normal. The distribution of temperature, however, is a little irregular, and thus while East Bengal and Orissa have been 0·6° in excess and North Bengal 0·7° in excess, North Behar has shown a mean temperature of 0·5° in defect. In South-West Bengal, South Behar, and Chutia Nagpur the variations from normal temperatures have been very small. In Assam temperature has been rather largely in excess, and the mean excess has equalled 0·3°.

Rainfall.—Speaking generally, over the whole province there were three distinct breaks in the rains during September. The periods of these breaks differed in various districts, but may be said roughly to have been from the 6th to the 9th, from the 17th to the 19th, and from the 26th to the end of the month, though over the greater part of Behar and Chutia Nagpur rain ceased to fall from the 22nd. The actual number of rainy days during September has therefore been very considerably smaller than usual, and thus while the average number of rainy days in this month varies from about 17 days in North Behar to 16 or 17 in East Bengal, the actual number this year has been from 9 days in North Behar to 14 days in East Bengal, or an average of about two or three days less than usual. As stated previously, also the falls have been decidedly light and scanty. North Bengal has received the largest average fall of 12·01 inches, but this is 1·66 inches less than the normal amount. South-West Bengal has received the next largest fall of 8·02 inches, which is also 1·11 inches less than the normal. North Behar has received an average fall of 7·48 inches, or less than the normal amount by 2·52 inches. East Bengal has only received 7·37 inches, which is the extremely large amount of 5·21 inches less than the normal. South Behar has received 6·38 inches or 1·71 inches less than the normal, and Chutia Nagpur 6·35 inches which is no less than 2·56 inches smaller than the normal, while Orissa has received only 6·32 inches, which is again the very large amount of 4·49 inches less than the normal. Compared with the normal fall and expressed as a percentage of that amount, the actual rainfall in each large meteorological district becomes—in Orissa 59 per cent., in South-West Bengal 88 per cent., in East Bengal 58 per cent., in North Bengal 88 per cent., in North Behar 75 per cent., in South Behar 79 per cent. and in Chutia Nagpur 71 per cent. Considering each of these districts to have an equal value in the calculation, the actual rainfall of the province for September may be said to have been equal to only 74 per cent. of the normal.

The following table, which includes the above figures, gives a comparison between the actual monthly and total rainfall, and the normal rainfall of the province up to the end of September in the same form that has been employed in the previous monthly abstracts of the present year. The figures represent the ratio of the rainfall of each month of the present year to the normal rainfall expressed as a percentage. The table thus gives a condensed summary of the rainfall data of the present year for each meteorological division. The first nine columns gives the percentage amount of rainfall received in each month, and the last column the percentage rainfall of the whole period from the 1st of January to the end of September.

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Actual rainfall of first nine months expressed as a percentage of the normal fall for the period.
Orissa ...	110	Nil	137	60	193	66	91	83	59	84
South-West Bengal ...	292	2	252	56	139	82	103	76	88	95
East Bengal ...	412	14	206	34	71	79	80	71	68	77
North Bengal ...	530	2	274	114	168	139	93	97	88	110
North Behar ...	381	Nil	127	109	177	135	59	111	75	100
South Behar ...	411	Nil	203	188	423	70	83	83	79	101
Chutia Nagpur ...	500	Nil	10	111	331	73	93	90	71	95

Taking up the discussion of the rainfall more in detail, the first point of importance is the great irregularity of its distribution. It frequently happens that, when a weak monsoon is blowing, the distribution of rainfall is irregular and capricious, and the rainfall of September has been no exception to this rule. Owing to the great irregularities the actual distribution of the rain is a little difficult to describe. The heaviest falls as usual have been in and near the hills to the north of Bengal, where such stations as Falacotta, Buxa, Alipur Duars, and Mickligunge report nearly 30 inches of rain. The second area of large precipitation in the east of the province is, however, almost entirely wanting, and a large part of South-East Bengal has received a fall of less than five inches, while at Goalundo in the Furreedpur district less than two inches has fallen. Speaking generally, almost the whole of North Bengal, the Mymensingh district in East Bengal, a considerable part of the Jessore and Nuddea districts in Central Bengal, the Soonderbuns districts, and parts of the Chumparun, Rungpore, and Cuttack districts, have received falls of ten inches and upwards; the remaining parts of the western and central districts and the extreme south-east of Bengal have received falls from ten to five inches in amount, while falls of less than five inches are reported from a large part of East Bengal, from one or two districts in Behar and the south of Chutia Nagpur, and from a district represented in West Bengal by such stations as Cutwa, Bankoorah, Maliara, Gangajalghati, Sonamukhi and Bolpore.

Compared with the normal falls for the month, practically the whole of the province has received a largely defective fall except the Sunderbuns, and a narrow band running through the centre of the province through parts of Jessore, Nuddea, Burdwan, and Moorsbedabad districts, and a part of North Bengal comprising portions of Malda, Rajshahye, and the Bogra districts. Small isolated areas of excess rainfall are also found in the following districts:—Gya, Palamow, Chumparun, Monghyr, Bhagulpore and Cooch Behar. These regions of excess fall, however, are small and of not much importance, and certainly the area of excess precipitation is not one-tenth of the whole province. The defective fall over the province generally varies from about three up to five inches of rain, but over a large

part of East and South-East Bengal the defect exceeds five inches, and over the greater part of the Tipperah and parts of the Noakholly and Chittagong districts, the rainfall has been more than seven inches below the normal, and therefore the defects in this part of Bengal are very serious.

Comparing the averages district by district with the normal, and allowing due weight for the area which each reporting station represents, it is found that the average rainfall in the Comilla or Tipperah district has been rather less than 30 per cent. of the normal amount; in the following districts the falls have been only from 40 to 50 per cent. of the normal amount:—Balasore, Furreedpore and Dacca; and in the following districts the falls have been from 50 to 60 per cent. of the normal:—Bankoorah, Chittagong, Noakholly and Durbhunga; and in the following the falls are from 60 to 70 per cent.:—Pooree, Howrah, Hooghly, Mozufferpore and Shahabad; and in the Singbhoom, Maubhoom, South Bhagulpore, Sonthal Pergunnahs, Patna, Sarun, Purneah, Mymensingh, Khoolna, Beerbhoom, Midnapore and Cuttack districts the actual falls have been from 70 to 80 per cent. of the normal. Elsewhere the falls have not been so seriously in defect.

The following table gives full data for the comparison of the actual and the normal rainfall of the month of September in all districts of the province. The figures are derived in the manner explained in preceding monthly summaries. The first column gives the average district rainfall as determined from the rainfall observations of the past 15 years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in the district. The third column expresses the ratio of the actual district rainfall to the normal district rainfall expressed as a percentage. The fourth column gives the same information as the third column in a slightly different form. It states by what percentage the actual rainfall varied in excess (+) or in defect (—) from the normal rainfall:—

Percentage Table for September 1887.

DIVISION.	DISTRICT.	Normal district rainfall for September 1887.	Actual district rainfall for September 1887.	Percentage of actual to normal rainfall.	Percentage excess (+) defect (—)

Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the readings during the same period for the past ten years. The humidity of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number of cumulated means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past ten years in the district ending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 14th October 1887.

DISTRICT OBSERVATIONS.															Representative station.	DISTRICT.	METEOROLOGICAL DIVISION.
Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	OF WEEK.		RAINFALL.												
			Mean for district.	Normal mean.	Since 1st of month.			Since May 15th.			Average number of rainy days.	Normal number of rainy days.

The mean pressure of the seven days ...

The average pressure of the corresponding period for 24 years, S. G.'s Office ...

The total number of hours of bright sunshine ...

The maximum possible number of hours of sunshine ...

The mean temperature of the seven days ...

The average temperature of the corresponding period for 24 years, S. G.'s Office ...

The extreme variation of temperature ...

The maximum temperature ...

The highest velocity of the wind in one hour ...

The highest pressure of wind on one square foot ...

The mean relative humidity ...

The average relative humidity of the corresponding period for 24 years, S. G.'s Office ...

The total fall of rain from 9th to 15th October 1887 ...

The average fall of the corresponding period for 24 years, S. G.'s Office ...

The total fall from 1st January to 15th October 1887 ...

The average fall of the corresponding period for 24 years, S. G.'s Office ...

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The month of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, p passing temporary showers, t thunder, a dew.

A. PEDLER,

for Offy. Meteorological Reporter to the Govt. of India.

**Results of the Thermometrical Observations taken at the Meteorological Office,
Chowringhee, from 9th to 15th October 1887.**

The mean temperature of the seven days

The extreme variation of temperature

The maximum temperature

The mean relative humidity

The total fall of rain from 9th to 15th October 1887

The mean temperature and humidity are obtained by applying to the mean of the 10a, 10h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;

The 17th October 1887.

A. PEDLER,

for Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

During the week ending 24th September 1887, births and deaths were registered in the principal Municipalities in Bengal (excluding Howrah, from which return has not yet been received) at the rates respectively of 19 and 23·6 per 1,000 of population, against 19·9 and 25·8 per 1,000, respectively, in the preceding week ending 17th September, indicating a falling off in the registration of both the events, particularly of deaths.

2. The highest proportions of births and deaths were returned from the following Municipalities :—

Births.				Deaths.			
			Ratio per mille.				Ratio per mille.
Gya	47·8	Serampore	53·0
Monghyr	35·3	Gya	45·2
				Puri	44·1
				Beaulah	39·4
				Suburbs of Calcutta	36·2
				Monghyr	35·3

3. The following table denotes that, as compared with the results of the preceding week, there was a sensible diminution of mortality from fever, but no important differences in the casualty rates from the other diseases, *vide* figures given below :—

				Ratio per mille during the weeks ending—	
				24th September 1887.	17th September 1887.
Cholera	1·1	1·8
Small-pox	1
Fever	9·7	11·4
Bowel-complaints	4·0	3·9
Injury	·4	·5
Other causes	8·1	8·1

4. Eliminating small-pox, from which no death was reported to have occurred, fever and bowel-complaints which proved notably fatal, the former only in the Beaulah town, viz., at the rate of 26·2 per 1,000 of population, and the latter in the Serampore Municipality, viz., 25·5 per 1,000, and injury, the casualties from which were nowhere large, cholera and the maladies coming under the head of "Other causes" caused the greatest loss of life in the following Municipalities :—

Cholera.				Other Causes.			
			Ratio per mille.				Ratio per mille.
Arrah	6·0	Gya	23·9
Patna	2·6	Puri	23·1
Suburbs of Calcutta	2·3	Naraingunge	16·5
				Serampore	15·7
				Suburbs of Calcutta	13·6

5. That the death-rates under the heads of *Sex*, *Class* and *Age* stood as noted below :—

According to Sex.				According to Class.				According to Age.			
			Ratio per mille.				Ratio per mille.				Ratio per mille.
Males	23·8	Christians	36·1	Under 1 year	193·2
Females	23·3	Hindus	25·2	1 and under 5 years	41·9
Ratio of male deaths to every 100 female deaths	113	Mahomedans	19·7	5 " " 10 "	15·0
								10 " " 15 "	10·6
								15 " " 20 "	13·5
								20 " " 30 "	14·9
								30 " " 40 "	12·9
								40 " " 50 "	15·0
								50 " " 60 "	23·2
								60 years and upwards	54·9

R. LIDDERDALE, M.D., Deputy Surgeon-General,

The 12th October 1887.

Sanitary Commissioner or Bengal.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives as at before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "Age," the ratios under which have been omitted, inasmuch as the census of the Europeans is assumed to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

General remarks on the fluctuation of principal staples carried over the East Indian Railway during the month ended 27th August 1887.

INCREASES.

Jute, raw.—This increase is due to the new traffic booked *via* Naihati to Howrah and the neighbourhood.

Rice (husked and unhusked).—This increase is in continuation of that reported throughout the year.

Other grains.—This was chiefly in despatches from Meja road, Allahabad, Jagra, and Aligarh to Indore, Agra, Dholpur, Bhurutpur and Gwalior to supplement poor crops.

Oil.—Due to improved despatches in kerosine oil from Howrah.

DECREASES.

Coal and coke.—There was an increase in the downward despatches and decrease in the upward traffic, resulting in a net increase in the weight carried and a slight decrease in the earnings.

Cotton.—Due to the period being always a dull one for this traffic.

Piece-goods, European.—This decrease is reported to be due to second and third hands being unable to dispose of their stocks up-country.

Turmeric.—This was entirely in the despatches from Howrah.

Gunny.—This decrease follows that in the export traffic.

Wheat.—This was owing to partial exhaustion of stocks up-country and to the small quantities available being either damaged by the early rains when lying in the open, or to Calcutta merchants being unable to give the prices asked by sellers.

Grain and Pulses.—There was an increase in the weight carried attended with a decrease in the earnings; the increases were in the despatches from Cawnpore and Manhar to Dholpur and the neighbourhood, while the traffic of the corresponding period of 1886 was of much longer lead, resulting in the decrease in the freight earned.

Government stores.—The decrease was chiefly in despatches from Howrah.

Hides.—Due to the Calcutta market being dull and to the supplies up-country being shorter than in 1886.

Railway Materials, Foreign.—Following the busy month of July, there was a lull in the despatches of railway materials both from Howrah and Bombay.

Salt.—The decrease in this commodity was chiefly in the despatches *via* Agra, due to diversion of the staple by the Bombay Buroda and Central India Railway from Agra to Cawnpore.

Seeds.—The decrease was almost entirely in linseed and poppy-seed, and was due to the very weak state of the market; the crop in poppy-seed was a partial failure.

Sugar, refined and unrefined.—Due to scanty supplies from the Oudh and Rohilkhand Railway and our stations in the Dinapore district having continued to show the decreases of previous months.

Tobacco.—Due to poor crops.

ALLEN MEARS, *Dy. Traffic Manager.*

TRAFFIC MANAGER'S OFFICE, JAMALPUR, the 13th October 1887.

Eastern Bengal State Railway.

Abstract of principal commodities carried over the Eastern Bengal State Railway during the month of June 1887, as compared with the same month of the previous year.

INCREASES.

Coal and Coke	349 Tons.
For Railway and Flotilla purposes.	
Jute	386 "
There has been a steady increase in the jute traffic in the Central Section.	
Grain and Pulse	541 "
Good crops and a favourable market.	
• Railway materials	686 "
For repairs and renewals. Also return of old material to Calcutta for sale.	
Seeds	304 "
Improvement in Home market after an extended period of depression.	

DECREASES.

The decreases under cotton, raw, husked rice, hides, salt, and tobacco are insignificant, and attributable only to ordinary fluctuations.

CALCUTTA, the 13th August 1887.

F. P. QUINLAN, Examiner of Accounts.

INCREASE.

Tons.

Coal 256
This increase is due partly to steamer service and partly to silk factories being worked by steam-power to greater extent.
Cotton piece-goods (European) 13
The increase in this staple is due to greater demands for Doorga Poojah.
Gunny bags and cloths 10
The increase in this traffic is due to increased grain traffic.
Grains—(2).—Rice 198
The increase in this commodity is due to greater dispatch from intermediate stations owing to good crops this year.
Iron 23
This increase is due to more building materials purchased by the merchants.
Railway plant and rolling-stock 15
This increase is due to more materials carried during the month.

DECREASE.

Salt 82
The decrease is due to this being carried by river this year.
Mustard and rape 26
The decrease in this traffic is due to less import on account of bazar being dull this year.
Sugar—Undrained 15
The decrease in this traffic is due to less import on account of bazar being dull this year.

PART I.

Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 4675A.

GENERAL.—*The 19th October 1887.*—The undermentioned officers have been granted by Her Majesty's Secretary of State for India extensions of furlough for the periods noted against their names—

Mr. A. Earle, c.s.	Six months on sick certificate.
„ J. G. Charles, c.s.	Eleven months.

The 20th October 1887.—Mr. F. E. Piffard, Temporary Deputy Magistrate and Deputy Collector, Rajmehal, Sonthal Pergunnahs, is transferred to Jamtara in that district.

Mr. F. J. Monahan, Officiating Joint-Magistrate and Deputy Collector, Jamtara, Sonthal Pergunnahs, is appointed temporarily to have charge of the Rajmehal sub-division of that district, *vice* Mr. T. Inglis, on deputation.

The 21st October 1887.—Baboo Nitya Nanda Bhar, Officiating Deputy Magistrate and Deputy Collector, Burdwan, held charge of the Raneeunge sub-division of that district from the afternoon of the 16th to the afternoon of the 20th October 1887.

Baboo Mohendra Nath Mookerjee, Deputy Magistrate and Deputy Collector, Bhubooah, Shahabad, is transferred to Manbhoom, and is appointed to have charge of the Govindpore sub-division of that district.

Mr. J. R. Hand, Deputy Magistrate and Deputy Collector, Shahabad, on leave, is appointed to have charge of the Bhubooah sub-division of that district.

The 22nd October 1887.—The services of Mr. H. R. H. Coxe, Assistant Magistrate and Collector, on leave, are placed at the disposal of the Government of India, in the Home Department.

The services of Mr. R. H. Greaves, Joint-Magistrate and Deputy Collector, are placed at the disposal of the Government of India, in the Home Department.

Baboo Hurry Mohun Chandra, Personal Assistant to the Commissioner of the Rajshahye Division, is allowed leave for six months, under section 128, chapter X of the Civil Leave Code, with effect from the 1st proximo, or such subsequent date as he may avail himself of it.

Baboo Lolit Ohandra Neogy is appointed to act as a Deputy Magistrate and Deputy Collector, and as Personal Assistant to the Commissioner of the Rajshahye Division, in the absence, on leave, of Baboo Hurry Mohun Ohandra, or until further orders.

The 24th October 1887.—Babob Pran Kissen Roy, Deputy Magistrate and Deputy Collector, Balasore, was in temporary charge of the Bhuddruck sub-division of that district from the 10th to the 30th September 1887, both days inclusive.

Mr. F. H. B. Skrine, Officiating Magistrate and Collector, Beerbhoom, is allowed leave for twenty-four days, under section 72 of the Civil Leave Code, with effect from such date as he may be relieved.

Mr. S. S. Jones, Joint-Magistrate and Deputy Collector, on leave, is appointed to act as Magistrate and Collector of Beerbhoom, during the absence, on leave, of Mr. F. H. B. Skrine, or until further orders.

The 25th October 1887.—Baboo Basanta Krishna Bose, Temporary Deputy Magistrate and Deputy Collector, Silligoree, Darjeeling, is allowed leave for two months and sixteen days, under section 72 of the Civil Leave Code, with effect from the date on which he may be relieved by Mouvie Fuzul Karim.

Baboo Baroda Das Bose, Sub-Deputy Collector, Palamow, Lohardugga, is allowed leave for three months, under section 72 of the Civil Leave Code, with effect from the date on which he was relieved at Howrah.

POLICE.—*The 19th October 1887.*—Mr. W. D. Pratt, District Superintendent of Police, has been granted by Her Majesty's Secretary of State for India an extension of furlough for four weeks.

The 24th October 1887.—Mr. W. H. Cornish, District Superintendent of Police, Lohardugga, is allowed leave for one month, under section 72 of the Civil Leave Code, with effect from the 7th instant, or such subsequent date as he availed himself of it.

The 25th October 1887.—Mr. C. P. Crouch, District Superintendent of Police, Balasore, is allowed leave for fifteen days, under section 72 of the Civil Leave Code, in extension of the leave granted to him under the order of the 23rd August 1887.

Mr. G. B. Havelock, Assistant Superintendent of Police, on leave, is posted to Pooree, and is appointed to have charge of the district police of that district.

Mr. H. M. Parish, Assistant Superintendent of Police, in charge of the Pooree District Police, is transferred to Cuttack.

Mr. H. S. Schurr, Assistant Superintendent of Police, is appointed to act as District Superintendent of Police, Nuddea, during the absence, on leave, of Mr. G. J. Cawley, or until further orders.

EDUCATION.—*The 21st October 1887.*—Mr. J. van Someren Pope, Inspector of Schools, Behar Circle, is allowed furlough for one year, under section 50, chapter V of the Civil Leave Code, with effect from the 20th March 1888, or such subsequent date as he may avail himself of it.

OPIMUM.—*The 25th October 1887.*—Mr. S. Cooper, Sub-Deputy Opium Agent, on leave, is appointed to act as Sub-Deputy Opium Agent, Aligarh, during the absence, on leave, of Mr. C. M. Jerdon, or until further orders.

MEDICAL.—*The 19th October 1887.*—Surgeon-Major G. Bomford, Officiating Professor of Physiology, Medical College, Calcutta, is allowed leave for three months, under section 72 of the Civil Leave Code, with effect from the 17th instant, or from such subsequent date as he may avail himself of it.

J. WARE EDGAR,

Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 24th October 1887.—Whereas it is provided by section 74 of Act XII of 1875 (the Indian Ports Act) that any Magistrate, upon an application being made to him by the Consul of any Foreign Power to which the Foreign Deserters' Act, 1852, has, by an order of Her Majesty in Council, been, or shall hereafter be, declared to be applicable, or by the representative of such Consul, and upon complaint on oath of the desertion of any seaman, not being a slave, from any ship of such Foreign Power, may, until revocation of such Order in Council has been publicly notified, issue his warrant for the apprehension of any such deserter, and may take the further proceedings provided by the Act: and whereas Her Majesty in Council has been pleased to issue orders in Council, dated the 12th day of July 1887, making the Foreign Deserters' Act applicable to the Kingdom of the Hellenes, and the Governor-General in Council has been pleased to direct the publication of the orders, the Lieutenant-Governor directs the publication of the orders in Council in the *Calcutta Gazette*, for the information and guidance of the Magistrates within the Presidency of Bengal, as follows.

COLMAN MACAULAY,

Secretary to the Govt. of Bengal.

AT THE COURT AT WINDSOR.

The 12th day of July 1887.

PRESENT:

THE QUEEN'S MOST EXCELLENT MAJESTY IN COUNCIL.

WHEREAS by the "Foreign Deserters' Act, 1852," it is provided that, whenever it is made to appear to Her Majesty that due facilities are or will be given for recovering and apprehending seamen who desert from British merchant ships in the territories of any

foreign power, Her Majesty may by Order in Council, stating that such facilities are or will be given, declare that seamen, not being slaves, who desert from merchant ships belonging to a subject of such power, when within Her Majesty's dominions, shall be liable to be apprehended and carried on board their respective ships, and may limit the operation of such order, and may render the operation thereof subject to such conditions and qualifications, if any, as may be deemed expedient:

And whereas it has been made to appear to Her Majesty that due facilities will be given for recovering and apprehending seamen who desert from British merchant ships in the dominions and possessions of His Majesty the King of the Hellenes:

Now, THEREFORE, Her Majesty, by virtue of the power vested in Her by the said "Foreign Deserters' Act, 1852," and by and with the advice of Her Privy Council, is pleased to order and declare, and it is hereby ordered and declared, that from and after the publication hereof in the London Gazette, seamen, not being slaves, and not being British subjects, who, within Her Majesty's dominions, desert from merchant ships belonging to subjects of His Majesty the King of the Hellenes, shall be liable to be apprehended and carried on board their respective ships: Provided always that if any such deserter has committed any crime in Her Majesty's dominions, he may be detained till he has been tried by a competent court, and until his sentence, if any, has been carried into effect.

And the Secretary of State for the Home Department, the Secretary of State for the Colonies, and the Secretary of State for India in Council, are to give the necessary directions herein accordingly.

C. L. PEEL.

NOTIFICATION.

The 24th October 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,

Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 63).

ZEILA—GULF OF ADEN.

Changes in positions of Buoys.

THE following information has been received from the Resident at Aden, through Commander A. Carpenter, R. N., in charge Marine Survey of India.

Eilat Buoy (red with black cage) has been replaced 7 cables N. $\frac{1}{2}$ E. (True) of its old position on Admiralty Chart No. 919, Obokh, Berbera and Zeila. It now lies in 8 fathoms water.

Channel Reef Buoy (red with black cage) has been replaced one cable N. E. $\frac{3}{4}$ E., true, of its old position on the same chart. It now lies in 7 fathoms water.

These buoys are exactly alike. It is to be hoped that one will soon be painted another colour, or given a different cage.

Caution is necessary in using the passage between Channel Reef and Shab Filfil, not to pass near the buoy, as the Reef appears to extend more to the southward than shown on the chart. See Admiralty Chart 919.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, Captain, I.M.,

Port Officer of Calcutta.

PORT OFFICE, Calcutta, the 19th October 1887.

RED SEA—WESTERN SHORE.

SAWAKIN APPROACH.

Shoal southward of Tellah Tellah Kebir.

THE following information has been received by the Admiralty from Commander E. Rooke, H. M. S. *Falcon* of the existence of a shoal lying about $3\frac{1}{2}$ miles southward of Tellah Tellah Kebir, southern approach to Sawákin.

On 2nd August 1887 the *Falcon*, about an hour after leaving an anchorage Eastward of Tellah Tellah Kebir, passed over this shoal; soundings of $6\frac{1}{2}$ to 7 fathoms were obtained for the distance of half a mile; bearings of the land could not be taken on account of thick weather.

Approximate position as given, latitude $18^{\circ} 44\frac{1}{2}'$ N.; longitude $38^{\circ} 11'$ E.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, *Captain, I.M.,*
Port Officer of Calcutta.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 59).

BAY OF BENGAL.

Madras Harbour.

IT is notified by the Port Officer of Madras that the use of flags as bad weather signals has been discontinued at the ports of the Madras Presidency, and that the following storm signals have been adopted in lieu at Madras and the outports. When there is reason to apprehend the advent of dangerous weather, the officer in charge of the port will—

(1) if during daylight, direct the hoisting of a ball ;

(2) if at night, three lamps suspended on the same line, one above the other (in a vertical series) ;

(3) if a cyclone is likely to approach the port, a drum by day  ; and

(4) two lamps similarly suspended by night.

If it is decided that the shipping shall be ordered to sea, the following signals will be hoisted at the flag-staff of the port signifying "cut or slip"—

(1) a cone by day, apex upwards  ;

(2) three good lights suspended triangularly, one at the mast head and one at each yard arm, by night.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, *Captain, I.M.,*
Port Officer of Calcutta.

NOTICE.

In accordance with the Government of Bengal notification, dated the 16th September 1887, it is hereby notified, in supersession of the notice, dated the 1st idem, published on page 799, Part I of the *Calcutta Gazette* of the 7th September 1887, that the next Half-yearly Departmental Examination of Assistant Magistrates, Deputy Magistrates, and others, serving in the districts of the Bhagulpore Division, will be held at Bhagulpore, on Monday, the 14th November 1887, and following days.

The examination will be held in the Commissioner's office.

JOHN BEAMES, Commissioner.

COMM. 'S OFFICE, BHAGULPORE, the 14th October 1887.

NOTICE.

It is hereby notified that at the next Half-yearly Departmental Examination of Junior Civilians, Deputy Magistrates, &c., which is to commence on Monday, the 14th November 1887, four Local Committees will be convened in this Division, viz., (1) at No. 14, Hare Street, Calcutta, for officers stationed at the Presidency or employed in the 24-Pergunnahs, (1) at Kishnaghur for officers employed in the Nuddea district, (1) at Jessore Sudder station for officers employed in that district and in Khoolua, and (1) at Berhampore for officers employed in the Moorshedabad district.

A. N. BHATTACHARJEE, *Personal Assistant, for Commissioner.*

COMM'R.'s OFFICE, PRESIDENCY DIVISION, the 14th October 1887.

BEHAR CIRCLE.

ENTRANCE EXAMINATION, 1888.

THE attention of those who wish to appear at the Entrance Examination of 1888, as teachers or as private students, is called to the following:—

I. By "teacher" is meant one who has been employed as such since 1st January 1887, and is a *bonâ fide* teacher, in receipt of a salary at the time of the examination. Satisfactory evidence of this will be required of those who wish to appear as teachers for the Entrance, F. A., or B. A. examinations.

II. Private students will have to produce evidence that they have not read in any school since May 1887, and send, together with their application, a certificate from the head-master of the last school they read in showing that they have observed the Inter-school Rules.

III. Teachers and private students will have to appear at the test examination of the nearest zillah school and pay a fee of two rupees.

IV. The application forms, when sent for the signature of the undersigned, must be accompanied by a statement signed by the head-master showing that there is a reasonable probability of the applicant's passing.

V. No applications to be allowed to appear at the test examination will be received later than 31st December 1887 from either teachers or private students.

VI. Head-masters of the zillah schools are informed that the standard of marking for the test examination is to be just that of the University. If candidates, whether pupils of the school, teachers or private students, fail to pass in more than two subjects, or fail very badly in two, their marks must be submitted to the undersigned, to decide whether they shall be sent up or not. Care must be taken to submit the marks in time.

JOHN VAN SOMEREN POPE,

Inspector of Schools, Behar Circle.

BANKIPORE, the 6th October 1887.

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 1316B.

Secretary to the Govt. of Bengal.

NOTIFICATION.

The 19th October 1887.—It is hereby notified that the members of the Buxar Local Board, in the district of Shahabad, having at a meeting, under section 25 of Act III (B.C.) of 1885, requested the Lieutenant-Governor to appoint a Chairman, the Lieutenant-Governor is pleased under the said section to appoint Mr. E. F. Growse, c.s., Sub-divisional Officer, to be Chairman of that Local Board.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 21st October 1887.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the powers vested in the Local Government by section 351 of Act III (B.C.) of 1884, to confirm the following bye-laws which have been framed by the Commissioners of the City Moorshedabad Municipality, under section 350 of the said Act, unless good reasons are shown to the contrary within one month from this date.

ADDITIONAL BYE-LAWS FOR THE CITY MOORSHEDABAD MUNICIPALITY.

For regulating the conduct of business at meetings of the Commissioners.

1. ALL meetings should be convened by a notice, signed by the Chairman or Vice-Chairman, sent round to each Commissioner not less than five days before the date of meeting.
2. At all meetings the proceedings shall be commenced by reading the minutes of the last meeting, which shall show the names of the President and the Commissioners present, and the words of every resolution or amendment; and in cases where votes have been taken, the number of voters for and against, with a view to ascertain if the same have been correctly recorded, and if any Commissioner is of opinion that the minutes have not been so recorded, the Commissioners shall decide whether or not they have been so recorded, and shall make corrections, if necessary.
3. Subjects shall be discussed in the order in which they stand in the list of business.
4. A subject, once finally disposed of by a resolution duly passed at a meeting, shall not be re-opened at any subsequent meeting, unless at least two-thirds of the Commissioners, who happen to be present at a meeting, of which due notice has been given, consent that such subject shall be re-opened and re-considered, provided that resolutions adjourning the consideration of a subject may be re-considered at any meeting after the usual notice.

For regulating the conduct of persons employed by the Commissioners.

5. All persons employed by the Commissioners, whose services may no longer be required, shall be liable to discharge after receipt of previous notice, or pay in advance for the period of one month, and no such person shall withdraw from the duties of his office without having given previous notice for the period of one month, on pain of forfeiture of two months' salary.

For the regulation and management of privies.

6. No nightman, sweeper, or other person carrying night-soil through the streets shall loiter, or deposit any vessel containing night-soil, on or by the side of any public road or street except for ordinary relief.

The penalty for infringement shall be a fine not exceeding Rs. 5.

For regulating burning-ghâts and burial-grounds.

7. No person shall remove or sell any clothes or other articles appertaining to a corpse which may have been left at any burial-ground or burning-ghât.

The penalty for infringement shall be a fine not exceeding Rs. 30.

8. No person, while conveying any corpse, or part of a corpse, shall, except for the purpose of ordinary relief, deposit it on or near any public highway.

The penalty for infringement shall be a fine not exceeding Rs. 10.

General bye laws.

9. No person shall make a shop over any public drain, or in any way occupy any culvert, bridge or platform which may have been placed over any public drain.

The penalty for infringement shall be a fine not exceeding Rs. 10.

10. The Commissioners may give notice in writing to the owner or occupier of any land within three days to trim or prune any hedges, and to cut and trim any trees overhanging any public drain, or any drain which is connected with any public drain. Any person, who shall fail to comply with such requisition, shall be liable to a fine not exceeding Rs. 10, and to a fine of Rs. 2 per day until the requisition be complied with.

11. Any person who shall, in contravention of any order passed under section 236 of the Act, make, renew, or thoroughly repair with grass, leaves, mats or other inflammable materials the external roofs and walls of any hut or other building, may be liable to a fine not exceeding Rs. 20, and the Commissioners may order any such hut or building to be demolished by giving notice in writing to such effect to the owner thereof, and any person who shall fail to comply with such notice within twenty days may be liable to a fine of Rs. 2 for each day during which he shall fail to comply with such requisition.

12. No person suffering from any contagious disease shall bathe in any bathing place belonging to the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 10.

13. No person shall steep in any tank, khal, or ditch, or in the river within municipal limits any jute, hemp or other noxious vegetable matter.

The penalty for infringement shall be a fine not exceeding Rs. 20; penalty for continued infringement after notice a fine of Rs. 2 daily.

14. No one shall let off any fireballons, fireworks, firearms or any missiles in or near a public street without the written consent of the Municipal Commissioners previously obtained.

The penalty for infringement shall be a fine not exceeding Rs. 10.

For regulating the disposal of offensive matter, rubbish, and dead bodies of animals.

15. The Commissioners may, from time to time, order to be closed, and appoint places for the deposit of the carcasses of animals; and any person who shall deposit, or cause to be deposited, the carcass of any animal in any place other than that appointed by the Commissioners, or in any place which they may have ordered to be closed, shall be liable to a fine not exceeding Rs. 30.

16. No owner or occupier of land shall allow the same to be made filthy by the systematic deposit thereon of any dirt, dung, bones, night-soil or other offensive matter: provided that no prosecution under this bye-law shall be instituted against an absentee owner or occupier until notice giving 14 days to clean the land has been served on him.

The penalty for infringement shall be a fine not exceeding Rs. 10; for continued infringement a fine of Rs. 5 daily.

For regulating traffic in the streets.

17. The person in charge of an elephant or camel shall cause the same to move out of any public road or street, whenever any horse, which is being ridden or driven, is approaching, in such a way as to avoid frightening any such horse. Elephants in passing by a public road to carry bells, for omission the person in charge shall be liable.

The penalty for infringement shall be a fine not exceeding Rs. 20.

18. No person shall fly kites on any public road.

The penalty for infringement shall be a fine not exceeding Rs. 5.

19. No owner or occupier or farmer of a market or of any shop shall keep it in a filthy state.

The penalty for infringement shall be a fine not exceeding Rs. 20.

20. No cart laden with bamboos or long planks or any such materials, over 12 feet in length, shall traverse the public streets, except with a person in attendance in front in addition to the driver.

The penalty for infringement shall be a fine not exceeding Rs. 10.

Miscellaneous bye-laws.

21. No owner or occupier or farmer or vendor in any market or shop shall obstruct any person appointed by the Commissioners for that purpose from entering and inspecting any such premises at any time between sunrise and sunset.

The penalty for infringement shall be a fine not exceeding Rs. 30.

Oudh Forest Department.

BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of all beams and scantlings supplied from this depot will be as follows:—

BEAMS.—21 feet length, at Rs. 2-10 per cubic foot.			
22 " " " " "	2-13	"	"
23 " " " " "	2-14	"	"
24 " " " " "	3	"	"

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

SCANTLINGS.—From 12 to 20 feet, at Rs. 2-8 per c. ft.
Under 12 and over 7, at " 2-4 "
Under 7 feet at " 2 "

The above prices are for ordinary building purposes. For *Planking, Sleepers, &c.*, special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

Second and Third Class Timber will be sold and price fixed by agreement.

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N. W. P. and Oudh, Oudh Circle.

KANHYA LAL,

Sub-Assistant Conservator of Forests,
Bahramghat Division.

Bahramghat, the 1st April 1886.

Crystalline Cinchona Febrifuge.

A NEW and improved preparation made at the Government Factory from Red Cinchona Bark. This is a more perfect substitute for Quinine than the ordinary uncrystallized Febrifuge. It can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds and upwards* at a time, from the Superintendent, Royal Botanic Garden, Seebpore, near Calcutta, for *cash only*, at the following rates:—Per four ounce tin *Rs. 6 ans. 8*, per eight ounce tin *Rs. 12 ans. 8*, per pound tin *Rs. 24*. The general public can be supplied by the Superintendent, Royal Botanic Garden, for *cash only*, at the under-noted rates:—Per four ounce tin *Rs. 8 ans. 8*, per eight ounce tin *Rs. 16 ans. 8*, per pound tin *Rs. 32*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage four annas per 4 oz. tin, eight annas per 8 oz. tin, and twelve annas per pound tin, in addition to the foregoing rates.

JOHN ELIOT, M.A., Meteorological Reporter

to the Govt. of Bengal.

CALCUTTA, the 26th August 1875.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, i.e., from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. PEDLER,

Offg. Meteorological Reporter to the Govt. of Bengal.
Meteorological Office, Bengal, the 17th March 1886

INDIAN LAW REPORTS.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5-1, Council House Street, at the following rates, payable in advance—

	One page.	Half page.	Quarter pages
For one issue	Rs. 20	Rs. 14	Rs. 9
" three issues	55	36	24
" six "	100	68	45
" nine "	145	98	61
" twelve "	180	120	80

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884:—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance

For the complete series, including postage, Rs. 22-8.

Without postage. With postage.

For the Calcutta Series ...	Rs. 10 0	Rs. 12 8
" each of the Madras, Bombay, and Allahabad Series ...	6 0	7 0
" a part of the Calcutta Series purchased separately (inclusive of postage in India)		2 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) ...		1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.

" Thacker & Co., Bombay.

" Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

" Curator of Government Books, North-Western Provinces and Oudh.

" Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE POLICE DEPARTMENT FOR THE YEAR 1886.

RESOLUTION.

POLICE.

Darjeeling, the 24th October 1887.

READ—

The Report on the Administration of the Police Department for the year 1886.

Read also—

The Reports for the years 1884 and 1885, and the orders of Government recorded thereon.

GENERAL.

Cost and numbers of Police Force.—The actual expenditure for the financial year 1886-87 was Rs. 40,33,658 against Rs. 41,95,793 in 1885-86. The total strength of the police (including Railway police) was 23,312. The cost of the force employed on purely police work is estimated at Rs. 26,00,711, or 7-5 pies per head of population, the cost in England and Wales being 2s. 8-11d. per head. The proportion of police to area and population is shown in the following table:—

PROVINCES.	Number of police.	Area in square miles.	Population.	Proportion of police to square miles.	Proportion of police to population.
Bengal	11,991	70,956	34,821,373	1 to 5-9	1 to 2,903
Bihar	5,914	44,739	23,127,104	1 to 7-4	1 to 3,910
O issa	1,418	9,762	3,789,694	1 to 6-8	1 to 2,672
Chota Nagpore	1,384	26,966	4,225,989	1 to 19-4	1 to 3,053
Total	20,707	151,823	65,964,160	1 to 7-3	1 to 3,185

In England and Wales there was one constable for every 772 of the estimated population for 1885 (one for 750-5 in boroughs, one for 1,199-6 in counties, and one for every 396-5 in the metropolitan police district).

2. *Town Police.*—The working of the town police is not altogether satisfactory. Many municipalities are made up of widely scattered rural areas, and are ill able to afford an expensive system of police. For instance, the Commissioner of Dacca points out that the so-called town of Goalundo covers six square miles of country, while Perozepore includes hamlets and rice fields four or five miles away from the small bazar forming the nucleus of the municipality. Again, the Inspector-General remarks that Purneah and Kissengunge are striking examples of the way in which municipalities include purely rural areas. These facts raise a reasonable doubt whether the provisions of section 10 of Act III (B.C.) of 1884 have been strictly adhered to. A copy of paragraph 12 of the Report, and also of paragraph 13, dealing with the subject of street-lighting, will be sent to the Municipal Department of this Government. The Commissioners of the Presidency and Chittagong Divisions consider that the chowkidari system should be reverted to in the rural parts of municipalities; and the question of a partial or total return to a system of local or village police in such areas is one which, in Sir Steuart Bayley's opinion, deserves early consideration. He will, however, await the result of the enquiries which the Inspector-General states he is making into this subject.

3. *Rural Police.*—The Inspector-General apparently does not consider that the amending Act I (B.C.) of 1886 effected much improvement in the working of the village police; but this Act only came into force in June 1886, and, as the Commissioner of Chittagong observed, it is too early yet to write with any finality regarding its effects. It was pointed out in the order of this Government, Nos. 1032-39J, dated the 30th June 1886, that the Magistrate can now appoint any person (including police officers) he thinks fit to pay the chowkidars, but that it is not desirable that police officers should be indiscriminately and invariably employed in every instance. Mr. Veasey states that, so far as he had ascertained up to the date of writing his Report, the police had been employed in disbursement of the chowkidars' pay as a matter of course in Burdwan, Khulna, Midnapore, Mozufferpore, and the districts of the Chittagong Division, and that in these districts they are responsible for the money disbursed. In some other districts they are employed when occasion requires, but not in regular manner. The Inspector-General of Police objects to the responsibility thrown on the force in the first-named districts by requiring them to receive and hold large sums of money until they can be made over to the chowkidars concerned, and the Lieutenant-Governor is inclined to think that the employment of the police as custodians of the money collected has been carried too far in these districts. With regard to the general question of the relation between the regular police and the chowkidars, the Lieutenant-Governor fully agrees in the desirability, if possible, of making the village police, so to speak, the foundation of the regular body; but he is not prepared to undertake any radical change in the law at present, especially as the alterations made by the amending Act of 1886 have avowedly not yet received a fair trial.

4. *Miscellaneous*—The remaining paragraphs of the first portion of the Report (paragraphs 25-52) are principally devoted to matters of a departmental nature, and only call for a few remarks. The percentage of educated men in the police force is as follows:—

Inspectors	99.4
Sub-Inspectors	97.7
Head-constables	76.6
Constables	24.3

In regard to head-constables the Inspector-General observes that "experience shows that for night-work, and guard or escort duty, an illiterate head-constable is much more to be depended on than one who can read or write."

There were four cases of beating or ill-treatment by the police, but none were, strictly speaking, cases of torture. In the first both the head-constable and the constable accused were acquitted; in the second a constable was convicted, but the Sub-Inspector, who was also sent up for trial, was acquitted; in the third a constable and two other men concerned were sentenced to transportation for life; and in the fourth a Sub-Inspector, with 18 years' service, was fined Rs. 120 for ill-using two bad characters in order to compel them to give information. The Inspector-General remarks that, as regards

the rough treatment of bad characters, "we are not only in advance of public opinion, but that even the courts are not disposed to be more than lukewarm." In the case referred to, the Sub-Inspector was allowed to return to duty, and, having regard to the remarks of the Sessions Judge, before whom the case went on appeal, and to the fact that only a fine was inflicted, the Inspector-General did not think it necessary to interfere. It was urged before the Sessions Judge that, when there were repeated thefts in a locality, the public opinion of the place demanded that the bad characters of the neighbourhood should be intimidated. The Judge remarks in his decision: "There is some practical common sense in these views, and I am prepared to say that, having regard to the actual condition of this country, courts should not be disposed to look with too curious eyes on every small excess committed by an investigating officer of police." Sir Rivers Thompson remarked, in his Resolution on the Report for 1885, that he feared such ill-treatment was by no means confined to the police, but was an ingrained habit of the people. The Lieutenant-Governor recognizes the fact that charges of violence are readily brought against police officers, and that they are sometimes false or grossly exaggerated. He is further inclined to think that, in most parts of Bengal proper, at least, the people are well able to protect themselves against police oppression. At the same time, he thinks it would be most dangerous to show undue leniency in any well-established case of torture. The provisions of the Penal Code may, in point of severity, be in advance of public opinion; but morality has a tendency to follow, however slowly, in the wake of legislation, and if public opinion sympathises with the beating of thieves and rough treatment of known bad characters, it should be the endeavour of Government officers to educate and raise it to a higher level. The withdrawal during the year of the orders requiring outlying stations and outposts to be inspected quarterly, should enable District Superintendents to give more time to the scrutiny of C Forms and examination of special diaries and reports. The system of co-operation between neighbouring districts promises to produce excellent results.

CRIME.

5. *Criminal statistics.*—The proportion of crime to population and police in various provinces of India is shown in the following statement:—

PROVINCE.	Police.	Population.	Crime (cognizable.)	Proportion of police to population.		Proportion of police to crime (cognizable).		Proportion of crime (cognizable) to population.	
				Police-man.	Persons.	Police-man.	Cases.	Case.	Persons.
North-Western Provinces and Oudh ..	32,528	43,268,599	153,277	1 to	1,330	1 to	4.7	1 to	282
Punjab ..	20,196	18,812,464	68,502	1 ..	932	1 ..	3.3	1 ..	275
Central Provinces ..	8,741	9,833,791	21,555	1 ..	1,135	1 ..	2.4	1 ..	456
Bombay, including Sind ..	19,110	1,677,456	40,890	1 ..	820	1 ..	2.1	1 ..	83
Madras ..	22,200	0,865,504	129,836*	1 ..	1,390	1 ..	5.8	1 ..	237
Assam including Hill Districts† ..	4,458	5,969,918	10,031	1 ..	1,339	1 ..	2.2	1 ..	595
Bengal ..	24,026	5,964,160	107,410	1 ..	2,745	1 ..	4.4	1 ..	614

* Special and local laws were not included in the table for the last year.

† Hill Districts were not included in the table for the last year.

These figures show that Bengal employs fewer policemen, and has less serious crime in proportion to its population, than any other part of India, for which statistics are available.

6. *Crime of the Province.*—The following figures show the amount of cognizable and non-cognizable crime as compared with the previous year:—

	1885.	1886.
Cognizable	107,410	105,793
Non-cognizable	105,996	112,664
Total	213,406	218,457
Decrease in cognizable cases	1,617
Increase in non-cognizable cases	6,668
Net increase	5,051

The Burdwan, Chittagong, and Dacca Divisions account for the large increase in non-cognizable offences. The percentage of non-cognizable crime for the whole Province is 51·6, the percentage varying from 23·8 in Darjeeling to 82·7 in Noakhally. The attention of the Commissioner of Chittagong will be called to the amount of frivolous and vexatious litigation in that Division. It is probable that the system, which was found to prevail in the district of Tipperah in 1885, of referring most non-cognizable petitions to panchayets for inquiry, was due to a desire on the part of the District Magistrate to check and repress the institution of petty cases. Sir Steuart Bayley considers it to be somewhat remarkable that in a jungly and backward district, such as the Chittagong Hill Tracts, the percentage of non-cognizable cases should be as high as 58·7.

7. *False cases.*—The percentage of false cases has decreased from 6·0 to 5·5. The steady decrease from 13·4 in 1877 is possibly due to the greater attention now paid to prosecutions for false charges, but Sir Steuart Bayley is not satisfied of this. He considers it equally likely that the orders of Government regarding the disposal of C Forms may have induced a greater hesitation, or at least the exercise of extreme care and caution, in declaring a case false. The orders of this Government that complainants are to have the benefit of any doubt, and that doubtful cases are to be entered as true, may have tended to diminish the number of cases shown as false. But it should be borne in mind by magisterial officers that, if they consider a case to be false, they should not hesitate to show it as false, even though there may not be sufficient grounds for the institution of a prosecution under section 211 of the Penal Code; it is obvious that any other procedure would lead to fictitious entries and give a very false impression as to the real percentage of false cases. From the police and magisterial reports quoted by the Inspector General, there would appear to be some grounds for thinking that the police are beginning to send up more cases in C True Form, knowing that they will not be declared false without the strongest evidence. This certainly gives a very novel aspect to an extremely difficult question, and it furnishes an additional reason why Magistrates should not hesitate to declare a case false, when there are reasonable grounds for believing it to be so. No orders have ever been issued directing a prosecution in *all* cases declared false, but only when the Magistrate considers both that a case is intentionally and maliciously false, and that there is sufficient evidence to bring home to the complainant a charge under section 211, Indian Penal Code. The great variations in the percentages of cases declared false in different districts of the same Division,—for instance, 10·6 and 10·2 in Beerbhoom and Midnapore respectively against 2·7 and 2·1 in Burdwan and Howrah respectively,—indicate that the causes must be sought to some extent, at any rate, in differences of procedure; but the real difficulty appears to the Lieutenant-Governor to be involved in the fact that Magistrates are called upon in every instance to record definitely the brief opinion that a case is either false or true. As regards complaints at the basis of which are disputes of a purely civil nature, there can be no doubt but that a little more care on the part of Magistrates in making preliminary enquiries under section 202 of the Criminal Procedure Code would result in the summary dismissal and elimination of a number of cases which are now reported in an arbitrary manner, and frequently after protracted trials, as false through mistake of law or fact.

8. *Prosecutions for false charges.*—Out of a total of 5,852 cases declared false, prosecutions were instituted in 1,384, and convictions obtained in 412 cases. The percentage of false cases prosecuted was 23·6 against 21·7 in 1885, and that of convictions 29·7 against 25·1. The suggestion is put forward that false charges might, to a great extent, be suppressed by the extension to warrant cases of the power which is given in summons cases by section 250, Criminal Procedure Code, to award compensation for a frivolous or vexatious charge to the accused, and it appears that the Commissioner of Chittagong goes so far as to think that a man who has a true charge of assault to prefer is tempted to add theft to it, as by doing so he escapes all liability to the action of section 250 in case the Court should disbelieve his case. Both the proposal and the conjecture are worthy of consideration, but the Lieutenant-Governor is not prepared to advocate special legislation in this direction, though the point will be brought to the notice of the Government of India in case of any general amendment of the Act being brought forward.

9. *Refusal of inquiry.*—Out of a grand total of 105,793 cases, only 523,

"The Lieutenant-Governor agrees with the Inspector-General that attempts to commit house-breaking are often cases of some importance, but he does not think that all cases should be enquired into; the police must use their judgment in the exercise of the discretion which section 157 gives them. Private persons are not bound to give information in cases of theft or attempts to commit house-breaking, and to make enquiry in very petty case may cause much harassment and hardship to individuals, as well as occupy time which might be more advantageously used by the police in other directions. The law clearly enacts that an officer *need* not investigate on the spot, if the case is not of a serious nature and some particular person is named; and that he *shall* not investigate if, in his opinion, there is no sufficient ground for entering on an investigation. Abstention from investigation in very petty cases admits of more attention being given to more important cases, and enquiry might properly be refused in cases of petty theft of grain, or of some unidentifiable article of little value. Moreover, there are other sorts of petty cognizable crime, in which the people are quite ready enough to resort to the police, and such tendency should not be unduly encouraged."

Inspector-General should take care to the impression which is said to prevail on the subject of refusal to inquire. "The truth is," says Mr. Veasey, "that, as long as refusals are looked on as something suspicious and to be apologized for, they will continue to be as rare as at present, and their place will be taken by ambiguous entries in the station diary." The Lieutenant-Governor cannot understand why a police officer should be reluctant to record a refusal in cases where he is not bound by law to make an investigation, and he looks to the Inspector-General to make known to his subordinates the views of Government on this question.

10. *Sessions trials.*—The percentage of convictions to the number of persons tried at Sessions trials was 57·8. Having regard to the fact that every case had stood the test of a preliminary inquiry, there can be no doubt that the figures must represent a certain number of failures of justice. In Hooghly the Judge disagreed with several verdicts, but referred only two to the High Court, a conviction following in each instance. As regards the percentages of acquittals in Sessions cases, it is evident to Sir Steuart Bayley, from a comparison of the percentages in the 24-Pergunnahs and Howrah (15·4 and 19·3) with those in Burdwan and Hooghly (68·7 and 41·0) that, even in jury districts, much still depends on the presiding Judge.

11. *Analysis of crime by classes.*—The annexed statement shows the number of true cognizable cases in 1879 and during the past five years:—

	1879.	1882.	1883.	1884.	1885.	1886.
Class I.—Offences against the State and public tranquillity.	2,840	2,508	2,639	2,769	2,802	2,891
" II.—Serious offences, against the person.	3,976	4,267	4,624	4,613	4,481	4,542
" III.—Serious offences against the person and property or against property only.	20,602	18,520	19,609	24,321	24,103	22,803
" IV.—Minor offences against the person.	9,608	12,450	2,813	2,580	2,533	2,682
" V.—Minor offences against property.	42,442	36,301	37,690	42,630	42,206	40,020
" VI.—Other offences not specified above.	18,694	27,181	29,554	28,477	24,819	27,003

There is a marked decrease in offences against property, and the Inspector-General thinks that the actual decrease was even larger than appears from

the figures, as crime was better reported last year than heretofore. Class VI, is made up for the most part of petty cases of nuisance.

12. *Class I—Offences against the State and public tranquillity.*—There was an increase of 89 cases in this class, the variations calling for no particular notice. Offences relating to coin should not be allowed to make any headway, and in every case in which bad coins are passed, or attempted to be passed, an endeavour should be made to trace the coins to their source, and to bring the coiners to justice. The Lieutenant-Governor notes that a small colony of coiners has been discovered on the borders of Khulna and the 24-Pergunnahs, and this case discloses the absolute necessity for a more cordial co-operation between the police of adjoining districts. The Inspector-General remarks that the police ought to have known about this colony, and probably some of them did, but jealousy between the two districts stopped the way, and could not be beaten down until the matter had been reported to his office. Seven coining cases occurred in the Monghyr district, and in only two were convictions obtained.

There was an increase of 73 cases under the head of rioting, the district of Bogra alone showing an increase from 29 to 92, or 63 cases. The Inspector-General is unable to accept the explanation that these cases partook more of the nature of affrays than of serious riots. It is probable that, as he remarks, either the sentences inflicted are too light, or that preventive measures are not sufficiently resorted to, only 11 persons having been bound over to keep the peace. Bogra, a district without any sub-divisions, now occupies the remarkable position of having more true cases of rioting and unlawful assembly than either Backergunge or Dacca. Further inquiry will have to be made regarding this matter. The delay in deciding disputes concerning possession is said to increase very greatly the difficulties of the police. But the Lieutenant-Governor does not see why there should be any delay in their decision, as such proceedings are to be regarded as summons cases, in which the parties must ordinarily produce their own witnesses, though assistance should not be arbitrarily refused. It has been ruled by the High Court in several cases that, in proceedings under this section, a Magistrate should not hold a lengthened and protracted investigation, but should make a speedy and summary inquiry into the fact of possession, and pass orders with as little delay as possible. The same remarks apply with even greater force to proceedings under section 107 of the Code, and this is well illustrated by a case mentioned by the Inspector-General. On the 26th June the police applied to the Sub-divisional Officer of Perozepore to have certain disputants bound down to keep the peace, and the latter officer fixed the 6th August as the earliest date on which he would take it up. "A delay of six weeks of course overshot the mark, and the result was a fight, which need never have happened." The number of riots attended with loss of life is one of the worst features of the year's administration, being greater in every district than it has been in any year since 1878. Statement A appended to the Report does not show separately the number of proceedings under section 107, Criminal Procedure Code. It was remarked in the Resolution of last year that a serious riot may often be prevented by a judicious resort to the provisions of this section, and Sir Stuart Bayley has no doubt that, had Magistrates resorted to this section in all cases of clear necessity, some of these homicidal riots would not have taken place. On the other hand, there is too much reason to fear that people are bound over to keep the peace in the district of Backergunge wholesale and without discrimination. This is the opinion of the Commissioner, in which the Inspector-General concurs. It is clear that the whole subject needs inquiry, and a return will be called for from all District Magistrates showing the number of proceedings under section 107, Criminal Procedure Code, during the year 1886. The attention of the Commissioner of Bhagulpore will also be called to the serious rioting which has taken place in the districts of Monghyr, Bhagulpore and Purneah. Two cases in Bhagulpore and three in Purneah were attended with loss of life. In one of the Purneah cases, which was a fight about a fishery, one man was shot dead, and four or five others were badly wounded. In another case in the same district, a number of up-country *laltials*, described as notorious fighting men and bullies in the employ of one Chunder Narain Singh, a zemindar,

set upon and beat a European indigo-planter. Fourteen of them were ultimately sentenced to two months' imprisonment each.

13. *Class II.—Serious offences against the person.*—There were 278 murders against 288 in the previous year. Of these, five were committed by dacoits, and 17 were cases of poisoning. The Chota Nagpore Division returns as many as 41 cases, there being "a deep-rooted belief in the necessity for removing persons for practising witchcraft." The percentage of convictions for murder to persons arrested shows a further decrease from 14.4 to 12.1, and that to persons actually tried was only 17.1 against 20.7. The percentage in 1880 was 34.9 and in 1883, 24.4. This steady decrease in the percentage of convictions for murder constitutes a somewhat alarming feature in the police administration, though it is a matter for congratulation that the chances of impunity have not so far resulted in an increase in the number of reported murders. The action of the police can as a rule have little effect in diminishing the ordinary class of murders, that is, those committed in the heat and frenzy of passion; and the larger or smaller number of such murders is no safe criterion of a good or bad police administration. But there can be no doubt that the number of premeditated murders may be directly affected by a sense of impunity, or a feeling of comparative security from conviction; and the remarkable feature in the present report is the number of deliberate and cold-blooded murders as compared with those committed in the heat of passion. Some of these are marked by features of a most unusual, if not an altogether novel, character. In a case which occurred in Midnapore, the deceased was a notorious litigant. "He pleaded hard for his life, but was told that he must die, as he had given offence by his litigious propensities." In the same district "a suspected thief, whose prosecution as a budmash had been applied for, was culled out of doors at night and quietly murdered, evidently a piece of lynch law." The body was, moreover, mutilated, in recognition of the fact that the deceased was a man of licentious habits. Much the same fate was met by a "torney," or mukhtar's tout, who had made himself intolerable to his neighbours. In another case an old woman money-lender, who had been pressing her debtors, was murdered. These and other cases evince so deliberate a disregard of, and contempt for, the law, that Sir Stuart Bayley cannot but think that the large percentage of acquittals (82.9) in cases of murder must to some extent account for crimes of this character, which are by no means in harmony with the ordinarily patient and law-abiding character of the people. The Lieutenant-Governor proposes to deal with this subject separately after further consideration and inquiry, but in the meantime Commissioners and Magistrates should carefully study every murder case ending in acquittal with a view to discovering the circumstances leading to this result. At present it is to be feared there is a tendency to accept an acquittal in a murder case as something which, when once reported, need have no further attention paid to it, without regard to the fact that there is no legitimate reason why the law should not be as fully vindicated and justice done in murder cases as it is in offences against property, which are not as a rule in any degree easier of proof.

14. *Cases of murder in different Divisions.*—Mr. Veasey gives a summary of the principal murders in each division and Sir Stuart Bayley would refer to the following cases, some of which bear on the remarks made in the previous paragraph:—In Nuddea, as the result of a drunken squabble about a prostitute, a man was severely beaten, and then placed on the railway line, where a passing train cut off one of his feet. A ryot in arrears with his rent cut down and killed the zemindar's peon who had come to take him before the zemindar. A boy of 12 or 13 was charged with strangling a little girl of seven, who had threatened to report him for indecently assaulting her. As regards this case, the Inspector-General states that the boy was acquitted, although he confessed his guilt and produced the child's ornaments. The District Magistrate will be asked to report why no application was made for an appeal on behalf of Government. A creditor assisted his debtor to murder the latter's brother-in-law, as it was intended that the murdered man's wife should be given in satisfaction of the debt. In Julpaiguri a woman was accused of having poisoned her husband. The Commissioner states that she fully confessed her crime, and her statements were borne out by her neighbours; but she was acquitted by the Sessions Court.

This case also was not reported to Government. In two cases women poisoned their husbands at the instigation of their paramours. In Rungpore, a young girl poisoned her husband at the instigation of her brother-in-law. In Dinagepore, a man who had cut down a tree belonging to his zemindar, and knew the zemindar's gomasta was about to proceed against him, locked the latter inside his master's cutcherry, and then set fire to it. Two men beat a married woman to death, as they suspected her of having corrupted their wives. In Dacca a zemindar's naib was murdered by discontented ryots. A village mukhtar was murdered by some *lattials* he was engaged in prosecuting for rioting. In Furreedpore, the headman of a faction was murdered by the opposite faction for giving adverse evidence in a case between them. In Tipperah a loose character was beaten and burnt to death. There were ten murders reported in the Chittagong Division, and in only one was a conviction obtained. In Patna an old man was poisoned by his servant at the instigation of his opponent in some civil suits. In Sarun a woman was poisoned by her paramour, who had reason to suspect her fidelity. In Chumparun a woman was poisoned by her husband to clear the way for an intrigue he had with his brother's widow. In Sarun the murder of Chuni Lall, a well known Chuprah banker, by a hired Rajput ruffian named Moti Singh, attracted much attention at the time. In Durbhanga a zemindar's gomasta was murdered, and his body mutilated by the neighbours of a girl he had seduced. In Monghyr a woman, whose husband was away, had her throat cut by five men, who were offended with her for rejecting their advances. In Singbhoon a husband hired an assassin to kill a man who had an intrigue with his wife. In another case a procuress was murdered while asleep. These and other cases clearly demonstrate the necessity for taking some steps with a view to bring about better results than those attained during the year under report.

15. *Class III—Serious offences against the person and property, or against property only.*—There were 22,803 true cases against 24,103 in 1885. The annexed statement shows the number of cases under the principal heads of this class—

	1885.	1886.
Dacoity	164	103
Robbery	176	156
Serious mischief and cognate offences	703	700
Mischief by killing, &c., any animal	794	633
Lurking house-trespass or house-breaking, &c.	22,023	20,941
House-trespass, &c.	235	264

Almost the whole of the decrease of 1,300 cases is under the head of burglary. That the number is still in advance of the figures for 1883 is no doubt due to the extra pressure put on chowkidars to report. There has been a decrease of as much as 37·2 per cent. in the number of cases of dacoity, and there can be no doubt that the new system of co-operation tends to suppress this crime. The number of true cases of mischief by fire increased from 267 to 374. The difficulty of detection in these cases is manifest from the fact that only 15 persons were convicted, while 144 were discharged or acquitted. The charges at any rate enable the police to find out the names of reputed incendiaries. The Commissioner of Chittagong would proceed against such men under section 110 of the Code of Criminal Procedure. But the present law omits the words "dangerous character," which were in the corresponding section of the Code of 1872. These words would cover professional incendiaries as well as professional cattle poisoners, but it would be now necessary to show the habitual commission of criminal intimidation or extortion, or an attempt to extort.

16. *Class IV—Minor offences against the person.*—This class of offences calls for no remarks.

17. *Class V—Minor offences against property.*—There were 40,020 offences under this class against 42,206 in 1885. The following table shows the increase or decrease under the principal heads:—

Description of offence.	1885.	1886.
Lurking house-trespass or house-breaking	692	689
Theft of cattle	2,055	1,798
Ordinary theft	27,376	25,063
Criminal breach of trust	1,614	1,547
Receiving stolen property	1,874	1,672
Criminal and house-trespass	8,562	9,218

The only increase is under the heads of criminal trespass and house trespass, which, as the Inspector-General remarks, are not important crimes from a police point of view. The remarks made by Mr. Veasey in paragraph 254 of his Report, regarding the employment of Domes as municipal mehters in the town of Patna will be referred to the Commissioner for any remarks he may have to make.

18. *Class VI.—Other offences not specified above.*—There were 27,003 cases under this class against 24,819 in 18-5. The following table shows the figures for the last two years under the principal heads of this class :—

		1885.	1886.
Vagrancy and bad character	...	1,117	1,210
Offences against Excise Laws	...	2,414	2,336
" Opium Act	...	571	390
" Railway Laws	...	348	350
" Salt and Customs Laws	...	353	359
" Arms Act	...	938	1,061
Public and local nuisances	...	18,053	19,316
Other special and local nuisances cognizable by police	...	905	1,338

Out of the total increase of 2,184 cases, as many as 1,696 are accounted for by prosecutions for nuisances of various sorts. It is always difficult to know whether an increase in the number of prosecutions for petty infractions of municipal and conservancy regulations is due to the greater frequency of such delinquencies, or to an increased vigilance and austerity on the part of municipal authorities and the guardians of the peace. The matter is one that depends a good deal from district to district on individual idiosyncrasies, and an increase or a decrease from year to year may be entirely accounted for by a change in the local authorities. As regards those nuisances and offences under special laws, which are cognizable by the police, Sir Steuart Bayley looks to the Inspector-General to discourage any tendency he may observe to award praise or the reverse solely in accordance with figures and returns.

19. *Cases of bad livelihood*—Adjoining districts as usual show remarkable variations in the number of prosecutions for bad livelihood. There was again great delay in disposing of cases in some districts, but the Resolution for 1885 was issued so late in 1886 that it has naturally not had any great effect in putting a stop to delays during the latter year. Sir Steuart Bayley trusts that the report for the present year will exhibit a marked improvement in this respect. It is far better that a case should be taken up at once in Court than that men should have charges hanging over their heads for months and months, because it is not found convenient to depute an officer to the spot. As was remarked in last year's Resolution, there are many cases in which it is no kindness to the suspected person to make the enquiry in his village, and in which no advantage can accrue from such a procedure. When not more than one person in half a lakh of the population is proceeded against for bad behaviour, obviously doubts must arise as to whether a sufficient resort is had to these sections in some districts. The average number of cases during the four years from 1874 to 1877 was 3,426. In the last-mentioned year the attention of Sir Ashley Eden was directed to the abuse of these provisions of the law in some districts and the reaction that ensued on the orders then issued has brought the number down to a very low level. Statistics prove that in Bengal the police have not the same acquaintance with the criminal classes, or the same familiarity with their haunts and movements, as is possessed by the police in England, and the number of persons proceeded against on suspicion in that country, under Vagrancy Acts and the Prevention of Crime Act, is about fifty times as many as those proceeded against in Bengal under sections 109 and 110 of the Code of Criminal Procedure. Sir Steuart Bayley does not advocate a return to the policy which existed prior to 1876; but at the same time he would not have these sections altogether lost sight of, as appears to have been the case in some districts, and those not the least criminal. Some of the Behar districts swarm with criminal castes and unconvicted burglars, and if Sarun had as many as 82 cases, it is not easy to see why there should have been only 16 in Durbhunga, 12 in Mozufferpore, and 9 in Chumparun.

20. *Non-cognizable crime.*—Non-cognizable offences have increased by 6,668, as will be seen from the following table:—

			1885.	1886.
Abetment	2
Class I	7,587	8,063
„ II	60	72
„ III	1,126	1,028
„ IV	54,731	58,945
„ V	10,629	10,665
„ VI	10,017	10,877
Special laws	21,844	23,014
Total			105,996	112,664

The increase under class I is chiefly under offences against public justice (227) and false evidence (239); but this does not make up for the decrease of 701 cases in 1885.

Classes IV and V.—The increase under criminal force is 3,394, and under hurt 856. This large increase in trivial charges, and the fact that they were not settled out of Court, is not a satisfactory feature. There were 7,999 cases of mischief, an increase of only 26 on 1885, but that year showed an increase of 1,086 on the year before.

Class VI.—Offences relating to marriage increased from 3,434 to 4,050, proceedings for taking security to keep the peace from 1,562 to 2,109, while possession cases decreased from 388 to 307. Under “Special laws” there has been an increase of 350 in railway cases, of 242 in stamp cases, and of 295 for non-registration of births and deaths; while pound cases have decreased by 3,516 and salt cases by 271. Out of 4,050 complaints of offences relating to marriage, process was issued in 2,284 cases. Only 1,686 persons appeared before the Court, of whom 455 were discharged after appearance, 903 were acquitted, and 244 convicted; 4,050 institutions and 244 convictions. The number of murders, due to jealousy and illicit intrigues, has been remarked on above, and a number of serious offences against the person have been due to the same causes. There can be no doubt that a judicious enforcement of the provisions of Chapter XX of the Penal Code in *bond fide* cases must tend, in an oriental country, to the prevention of much serious and violent crime. The very small percentage of non-cognizable cases in which the police were employed to investigate (4·3 against 4·5 in 1885) indicates that in some districts the police are not sufficiently made use of.

21. *Proceedings under the Code of Criminal Procedure.*—Considering the area and population of the Province, the small number of proceedings under Chapters X and XII of the Criminal Procedure Code (597 and 307) is remarkable. Magistrates should bear in mind that, when a certain state of facts is made out to their satisfaction, action under section 145 of the Procedure Code is obligatory and not optional. Judicious action under this section and under section 107 directly tends to the prevention of unlawful assemblies and homicidal riots. Orders for security on conviction under section 106 are shown under this head, while proceedings under section 107 are lumped together with bad livelihood proceedings under class VI of cognizable crime. In future, the Lieutenant-Governor would like to know the exact number of proceedings under section 107. Serious riots are often prevented by the institution of judicious proceedings, and their speedy disposal under this section. Magistrates should avail themselves of every legal means for the repression of crimes of violence; but it is evident, from the remarks of the Inspector-General, that some Magistrates have shown remissness in this respect. Attention is again directed to this important subject, and officers in whose districts rioting occurs, and who, after this warning, are found to have failed in this respect, will be considered to have incurred a very serious responsibility.

22. *Remands*.—Altogether 37,500 A forms were sent up. They were disposed of as follows:—

				Percentage.
At first hearing	13,882	37·01
Remanded once	7,882	21·0
Ditto twice	5,149	13·7
Ditto thrice	3,318	8·8
Ditto four times	2,217	5·9
Ditto five times	1,408	3·7
Ditto six times	1,041	2·7
Ditto more than six times	1,824	4·8

This is slightly better than the results for 1885. Balasore, Backergunge, Manbhoom, and Pubna are again among the worst districts. The very worst is Bogra, where the percentage of cases decided at the first two hearings was only 15·05. This district also, as has been remarked above, shows the largest number of riots, and these facts together point to laxity on the part of the District Magistrate. Further enquiry will be made on this point. The Inspector-General says that it is his experience that these delays do not occur where Magistrates send for the case registers regularly. As the duty of looking at the registers of their subordinates and scrutinizing their work is imposed on District Magistrates, not only by the orders of Government, but by the High Court circulars and orders, the Lieutenant-Governor will accept no excuse for its non-performance. The attention of Commissioners will be directed to this important matter, and they will be instructed to bring to the notice of Government all cases of neglect on the part of District Magistrates.

23. *Reconvictions*.—The total number of persons reconvicted during the year was 1,442 against 1,577 in 1885 and 1,482 in 1884. Steps are now being taken to index all conviction registers, and to supply all Sub-divisional Officers with copies. When these are complete, the number of reconvictions is likely to increase.

24. The Lieutenant-Governor has to thank Mr. Veasey for his interesting and valuable report. The reports, figures, and returns from different divisions have been dealt with in an intelligent manner, and it is evident that they have been scrutinized with great care. Attention to mere figures has been discouraged, and sustained and steady work is singled out for praise. Sir Steuart Bayley has no doubt that all branches of the police administration have benefited by the interest evinced in it and by the searching supervision exercised by him. The names of the officers favourably mentioned by the Inspector-General in paragraphs 50 and 52 of his Report will be noted in the Appointment Department.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Inspector-General of Police and the Commissioner of Police, Calcutta.

Ordered also that a copy of the Resolution be forwarded to all Commissioners of Divisions for information.

Ordered also that a copy of the Resolution, and extract paragraphs 50 and 52 from the Report, be forwarded to the Appointment Department of this Office for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

J. WARE EDGAR,

Offg. Chief Secretary to the Govt. of Bengal.

QUARTERLY INSPECTIONS OF THE KIDDERPORE DOCK WORKS.

The sub-joined report is published for general information.

W. B. BESTIC,

*Under-Secretary to the Govt of Bengal,
P. W. Dept.*

TO THE SECRETARY TO THE GOVERNMENT OF BENGAL,
PUBLIC WORKS DEPARTMENT.

SIR,

WE have the honour to report that in compliance with the instructions contained in Public Works Department letter No. 1223M.P.I., dated 3rd August last, we made the first inspection of the works in progress at the Kidderpore Docks on the 14th instant.

The delay that has occurred in submitting this report is due to the recent serious illness of one of us (Mr. J. C. Verannes).

We understand the Kidderpore Dock scheme as at present authorised to be proceeded with to comprise:—(1) the acquisition of all land required for the construction of both Docks Nos. 1 and 2, and for the boat canal to Tolly's Nullah and the construction of the following works:— 2) sixty-foot lock, (3) eighty-foot entrance to tidal basin, (4) tidal basin with 60-ton shears, (5) double passage from basin to Dock No. 1, (6) Dock No. 1 with width of 600 feet, (7) boat canal from docks to Tolly's Nullah, (8) Graving Dock, (9) boat wharves, tramway with lifting bridge over Tolly's Nullah, and (10) the removal and re-construction of the buildings in the Government Dockyard.

The revised estimates relating to these works being under preparation, Mr. Apjohn, the Superintending Engineer in charge of the Dock Works, has not been able to give us definite information regarding the principal items of works which those estimates provide for; he has, however, submitted the accompanying index map and statement, which show the progress made on such works as have been taken in hand up to the end of the quarter under report. The condition of the works on 30th June may be described as below:—

TEMPORARY WORKS AND PLANT.

We understand that a want of locomotive power was felt, but that more engines and trucks for the removal of spoil were shortly expected, on the arrival of which work would proceed with greater facility.

It must be borne in mind, however, that in starting works of the nature of these under report, a considerable length of time must pass in making preliminary arrangements, collecting plant, &c., before a fair rate of actual progress can be attained. The season up to 30th June was a favourable one, and more work was executed than it was anticipated could have been done. The tramway to Akra, being 5.5 miles in length, was completed and opened for carriage of material in February last. Tramway lines, 9.4 miles in length, have been laid in the vicinity of the docks for the removal of earth, and are in use.

PERMANENT WORKS.

Acquisition of Land.—The land required for Docks Nos. 1 and 2, and for railways to Tolly's Nullah and Akra, had been acquired, but considerable delay to the work had been caused by some of the land required for the boat canal not having been handed over, and some inconvenience has been felt on account of all the buildings in the Government docks not having been vacated.

Tidal Basin.—Work of excavation in the foundations for the walls of this work was begun in January 1887, and brickwork started in March. By 30th June 38 lakhs of cubic feet of earthwork had been moved, and 418,000 cubic feet of brickwork executed in a length of 320 running feet of walling on either side of the basin.

Dock No. 1.—The diversions of the Garden Reach Road and of some minor roads on this dock site had been made. Of earthwork 202 lakhs of cubic feet had been done, and 1,241 running feet of walls had been founded and raised to a height of 19 feet. In this walling 721,370 cubic feet of brick-work had been executed.

Boat Canal and Dock.—The excavation of 18 per cent. of the estimated quantity of earth in the canal had been carried out, and the excavation of the boat dock, comprising 50 lakhs of cubic feet of earth, had been completed. More work in the boat canal could, we understand, have been done, but for the fact that all the land required for this work had not been handed over.

Boat Wharves, Tramway and Lifting Bridge.—The Strand Tramway between Calcutta and the docks, a length of 2·70 miles, had been completed, and the lifting bridge over Tolly's Nullah at Hastings constructed and was open.

Expenditure.—Up to end of June a total sum of Rs. 55,42,506 had been expended on the works connected with the dock scheme. It should be noticed, however, that Rs. 21,59,000 of this, or 38·9 per cent., represents the cost of acquiring land.

As the works executed during 1886 in connection with the dock scheme were merely of an experimental nature, the month of January 1887 should be taken as the time in which the works were started.

Taking this into consideration, we are of opinion that the progress made up to 30th June 1887 has on the whole been satisfactory, and we have every reason to believe that the character of the work and of the quality of the materials used are of the best description.

We have the honour to be,

SIR,

Your most obedient servants,

J. C. VERTANNES.

H. CLOETE.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 22nd October 1887.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
Western Districts.			
BURDWAN DIVS.	1 Burdwan, Oct. 22, '87	0.50	Weather—fine and dry for most part of week; getting cool. Prospects of rice crop now fair, but more rain would benefit it much. <i>Rubbi</i> preparations in progress. Sugarcane good. Price of rice slightly lower in Cutwa and higher in Raneegeunge and Burdwan. Fever prevalent.
	Culina ..	1.11	
	Cutwa ..	0.30	
	Raneegeunge ..	0.17	
	2 Bankoora „ 22, '87	0.99	
	3 Beerbhoom „ 22, '87	0.43	
Rampur Hant ..	1.72	Weather—mornings and evenings cool and cloudy. Last week's rainfall, though light, was almost general, and has considerably improved the prospects of <i>aman</i> rice in the Bishenpur sub-division, but has been of very little benefit in the Sudder. Plants have begun to flower. <i>Kelas</i> rice has been gathered. <i>Aman</i> is ripening. Prices continue stationary. Public health good.	
PRESIDENCY DIVS.	4 Midnapur „ 22, '87	Nil	Weather—unseasonably warm in the day time with cool nights. More rain is needed for <i>aman</i> paddy on uplands. The crop in other localities is fast ripening and promises well. Every effort is being used to induce the ryots to irrigate this crop where necessary. Prices have fallen slightly. Public health is extremely bad, and fever is rife to a degree unknown since the epidemic years.
	5 Hooghly „ 22, „	0.16	Weather—rather warm for the time of year. Crops generally doing well. Prospects in Ghatal improved by recent rain.
	Serampur ..	1.24	Weather—getting cooler at night; hot and bright during day. Prospects of winter rice fair. A 10 to 12-anna crop may be expected. More rain wanted.
	Jehanabad ..	0.67	Other crops doing well. Fever generally prevalent.
	Howrah „ 22, '87	Nil	Weather—bright sun with cool mornings and evenings. Preparation for <i>rubbi</i> going on. Prospect of sugarcane good. <i>Aman</i> looks well, but more rain wanted in the south. Public health fair.
	Central Districts.		
PRESIDENCY DIVS.	6 24-Perghs. „ 22, '87	0.35	Weather—cool and fine. Prospect of <i>aman</i> paddy fair since the recent rain. Sugarcane continues favourable. Public health generally good, but fever prevalent as usual in this season.
	7 Nuddea „ 22, „	0.03	Weather—seasonable. State and prospects of <i>aman</i> and sugarcane good. Cultivation for cold-weather crops in progress. Fever prevalent, also some cow-pox.
	Kushtea ..	1.84	Weather—seasonable. Prospects of <i>aman</i> favourable. Ploughing for winter crops going on. Some fever prevails. General health good.
	Moherpur ..	1.94	
	Chudanga ..	1.22	
	Ranghat ..	0.11	
8 Khoolna „ 22, '87	Nil	Weather—hot and dry. Prospects of <i>aman</i> good. Winter crops hopeful, though some will have to be re-sown. Public health generally good.	
9 Jessore „ 22, „	0.44		
RAJSHAHIE DIVS.	Jhenidah ..	3.06	Weather—hot during the day and cool at dead of night. <i>Aman</i> paddy in ear. Prospects good. <i>Kalai</i> and <i>moong</i> are still being sown. <i>Til</i> and <i>rahar</i> progressing. Fever reported from Lalbagh.
	Magurahi ..	0.92	
	Narail ..	0.66	
	Bongo g ..	1.29	
	10 Moorsheadabad „ 22, '87	1.01	
	Lalbagh ..	2.38	
Kandi ..	1.10	Weather—fine and clear. Prospects of <i>aman</i> crop favourable. Public health good.	
Jungipur ..	0.05		
11 Dinagepur „ 22, '87	3.41		
Thakurgaon ..	1.35		
12 Rajshahye „ 22, '87	0.25		
Nattore ..	2.15		
Nowgong ..	2.09	Weather—clear and cool. State and prospects of crops very satisfactory. Public health fair.	
13 Rungpur „ 22, '87	1.80		
Nilphamari ..	Nil		
Kurigram ..	1.42		
Gaibanda ..	3.00		
14 Bogra „ 22, '87	1.08		
Dacca Divisions.	Nowkhilla ..	2.28	Weather—still warm and cloudy. Prospects of crops good.
	15 Pubna „ 22, '87	1.18	
	Serajgunge ..	3.90	
	16 Darjeeling „ 22, '87	0.27	
	17 Julpigoree „ 22, „	1.42	
	Eastern Districts.		
Dacca Divisions.	18 Dacca, Oct. 22, '87	0.47	Weather—days hot, nights cool. Recent rain has done much good to standing crops. Pulses being sown on high lands. Prospects of crops and public health good.
	Manickgunge ..	2.21	
	Munshigunge ..	3.71	
	Narsinggunge ..	3.8	
	19 Farreedpur „ 22, '87	1.52	
	Goalundo ..	0.40	
Dacca Divisions.	Madaripore ..	1.17	Weather—seasonable. State of all crops satisfactory. A certain amount of fever prevalent; otherwise public health good.
	20 Backergunge „ 21, '87	2.44	
	21 Mymensingh „ 21, '87	4.28	
	Jamalpur ..	4.10	
	Kishoregunge ..	4.11	
	Attea ..	4.01	
Netrokona ..	6.22	Weather—hot. State and prospects of crops good. Rain has done much good.	

No.	District and date of return	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL—contd.			
<i>Eastern Districts—contd.</i>			
CHITTAGONG DIVN.	22 Chittagong, Oct. 25, '87	Nil	Weather—seasonable. <i>Amun</i> in ear. Sugarcane doing well. Prospects fair. Lands being prepared for winter crop. Cholera still reported. Public health good. Prices steady.
	23 Noakholly „ 25, „	0.16	Weather—seasonable. Prospects of <i>amun</i> crop very fair. Public health fair.
	24 Tipperah „ 20, „	5.25	Weather—seasonable. The late rain has saved the paddy, and a fair average crop of winter rice may now be expected throughout the district.
	Brahmanbariah „ „	4.49	
	Chandpur „ „	2.77	
CHITTAGONG HILL TRACTS.	Chittagong Hill „ 18, „	2.70	Weather—cloudy during the latter part of the week. Harvesting of jum paddy nearly over. Cotton doing well and in pod. Lands are being ploughed for mustard and other cold-weather crops. Plough-paddy doing well.
	25 Hill Tipperah „ 19, „	0.14	Weather—nights and mornings cool; days not so hot as before. Prospects of <i>amun</i> and sugarcane fair. Tobacco and chillies being transplanted. Public health good.
BEHAR.			
PATNA DIVN.	26 Patna Oct. 22, 87	0.52	Weather—cool. Recent rain has improved prospects of paddy. <i>Rubbi</i> sowings are being pushed on. Public health good.
	27 Gya „ 22, „	0.03	Weather—seasonable. Paddy crop has suffered much for want of rain. It is still withering in uplands. <i>Rubbi</i> being sown. Fever reported from several thanas.
	28 Shahabad „ 22, „	Nil	Weather—seasonable. Paddy crop continues to promise well. <i>Rubbi</i> sowings have commenced. Public health fair; some fever reported from Sasseram.
	29 Sasseram „ 22, „	1.85	Weather—mornings cold; days still hot. Prospects of rice crop very favourable. <i>Rubbi</i> sowings commenced. Tobacco coming up well. Prices remain stationary. Public health generally good.
	30 Durbhunga „ 22, „	1.55	Weather—rainy on 15th; since then rainless, but sky cloudy and weather seems uncertain. Prospects of all crops good. <i>Rubbi</i> cultivation in progress. Public health fair for the season.
BHAULPORE DIVN.	31 Mozufferpur „ 22, „	0.78	Weather—fine. Prospects of crops very much improved. Public health good.
	Hajipur „ „	1.84	
	Sitamarhi „ „	3.20	
	32 Samat „ 22, „	1.62	Weather—nights cool. <i>Rubbi</i> sowings progressing but slowly on account of recent rain. Prospects of rice favourable. Prices stationary. Public health good.
	Sewan „ „	5.62	
BHAULPORE DIVN.	33 Gopalgunge „ 22, „	1.65	Weather—days hot; nights and mornings tolerably cool. Recent rain has much benefited winter rice. <i>Rubbi</i> sowings going on and prospects generally improved. Public health good. Prices show a downward tendency.
	34 Chumparun „ 22, „	2.50	Weather—clear and fair. Mornings and evenings cool. <i>Rubbi</i> sowings going on. Prospects of <i>aghani</i> paddy much improved by recent rain.
	Bettiah „ „	1.18	Weather—hot for the time of year. <i>Aghani</i> crops doing well. <i>Rubbi</i> crops being planted. <i>Tori</i> sowings in progress. <i>Kurti</i> doing well.
	35 Monghyr „ 22, „	3.00	Weather—fine and warm latterly. Prospects of crops generally favourable. Common rice selling at an average of 23 seers per rupee. Fever prevalent.
	Begusarai „ „	2.40	
BHAULPORE DIVN.	36 Jamui „ 22, „	2.07	Weather—still warm. Sky slightly clouded. Prospects of rice crop materially improved by the rain of last two weeks. More rain wanted in Godda. Public health fair.
	37 Bhagalpur „ 22, „	Nil	
	Purneah „ 22, „	2.37	
	Kishengunge „ „	2.45	
	Arrareah „ „	1.98	
ORISSA DIVN.	38 Maidah „ 22, „	0.33	Weather—seasonable. Second weeding of <i>sarad</i> crop in progress. <i>Rubbi</i> is being sown. Common rice 20 seers 13 chittacks per rupee in the Sudder sub-division and 20 seers in the Khoorda sub-division. Cases of cholera reported from the interior of the district.
	39 Chanchal „ „	2.17	Weather—seasonable. <i>Sarad</i> paddy coming into ear. Prospects of crops generally good; but a little more rain is wanted in some parts. Public health generally good except some cases of fever.
	Shibgunge „ „	2.11	
	Guzol „ „	1.0	
	40 Southal Pergha „ 22, „	Nil	
CHOTA NAGPORE.	41 Deoghur „ „	1.71	
	Godda „ „	0.66	
	Rajmehal „ „	1.08	
	Pakour „ „	2.28	
	42 Hazaribagh Oct. 21, '87	1.06	Nights cool. Sky cloudy to-day (21st). <i>Laghu sarad</i> flowering and in some places ripening. <i>Garu sarad</i> coming into ear. Prospects continue good. Prices remain unchanged. Fever prevails; public health otherwise good.
CHOTA NAGPORE.	43 Lehmardaga „ 22, „	0.53	Weather—seasonable. Second weeding of <i>sarad</i> crop in progress. <i>Rubbi</i> is being sown. Common rice 20 seers 13 chittacks per rupee in the Sudder sub-division and 20 seers in the Khoorda sub-division. Cases of cholera reported from the interior of the district.
	Palamow „ „	2.9	Weather—seasonable. <i>Sarad</i> paddy coming into ear. Prospects of crops generally good; but a little more rain is wanted in some parts. Public health generally good except some cases of fever.
	44 Singhbhum „ 22, „	0.74	
	Manbhum „ 22, „	0.65	
	Govindpore „ „	0.75	
<i>South-West Frontier Agency.</i>			
CHOTA NAGPORE.	41 Hazaribagh Oct. 21, '87	1.06	Weather—fine. Cloudy again to-day (21st). Recent rain has improved prospects, but more would do good. Upland rice has suffered considerably. General health good.
	42 Lehmardaga „ 22, „	0.53	Weather—cool. Rain has fallen throughout the Palamow sub-division, but very slightly at head-quarters. More rain urgently wanted at head-quarters, where the prospects of crops are not favourable. Prices stationary. Public health good.
	43 Singhbhum „ 22, „	Nil	Cold weather seems to have set in; occasionally cloudy with promise of rain. Rain has fallen in some places, but more rain is wanted. Prospects not absolutely bad. Moderate outturn expected. General health good.
	44 Manbhum „ 22, „	0.65	Weather—cool at night, warm by day; clouds still hanging about. Early cessation of the rains has greatly injured the upland paddy, the outturn of which is reported to be from 4 to 8 annas. Prospects of winter paddy on low lands and <i>rubbi</i> crops are excellent. Public health good.
	Govindpore „ „	0.75

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, the 25th October 1887.

**SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS
TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 21ST, OF
OCTOBER 1887.**

The meteorology of the previous week ending 14th October had been very important from the fact that a small cyclonic storm had formed in the south of the Bay, which crossed the coast a little to the north of Madras and travelled across the Peninsula into the Arabian sea. The indraught following in the path of the storm caused the humid south-west monsoon winds to again advance over the northern half of the Bay, and they then slowly spread over the whole of Bengal. Rain had therefore been general in Bengal in the previous week, and particularly during the last two days, very general and decidedly heavy rain was received in all districts of the Province. It was, however, evident at the close of that week, that this burst of monsoon winds and rain was rapidly diminishing in strength and retreating, for on Friday, the 14th, winds were becoming decidedly irregular in direction over the northern districts of the Province. On Saturday, 15th October, or the first day of the present week, wind directions over the north of the Province continued decidedly irregular, and at some of the western stations winds had become westerly; so that it was clear the wind systems were changing, and that the moist south-easterly and easterly current was being driven back by a dry westerly and north-westerly current. On the 16th of October the easterly element in the wind directions had almost disappeared, and winds had become northerly and north-westerly at many stations. These conditions developed further on the following day, and for the greater part of the remainder of the week a light northerly wind current has obtained over the Province, though there were slight oscillations during which southerly winds were reported at some stations, but only to be again driven back by the northerly current. The moist monsoon current therefore only affected the Province during the first day or two of the present week, and thus rainfall was only general on the 15th. On the 16th a considerable number of showers were reported in South-West, East and North Bengal, but for the remainder of the week the Province has been practically rainless, and at the close of the week conditions appeared to be becoming decidedly favourable for the setting in of the north-east monsoon or the cold-weather conditions in Bengal.

Pressure.—The retreat of the humid monsoon winds from the Province during the early part of the week was accompanied by a diminution of the air pressure. The falling barometer continued during the first-half of the week, and it was then succeeded by an equally steady rise. In the previous week pressure was rather considerably in excess of the normal; but as at the present season it is normal for pressure to increase, the general effect of the changes during the week has been to reduce the excess pressure. During the previous week pressure was in excess by 0.073 inch, and during the present week, taking into consideration only those stations which have recorded observations for many years, and which therefore furnish reliable averages, the mean pressure has been only 0.042 inch in excess of the normal. This excess pressure has been very equally divided over the whole Province of Bengal. In Assam also pressure has been in excess of the normal by 0.034 inch.

Temperature.—With the effects of the rather heavy rain of the previous week, and with the setting in of a cool northerly wind current during the present week, temperature has been below the normal over the whole of Bengal. The mean temperature for the week has been between 1° and 2° below the normal in each of the districts of Orissa, South-West, East and North Bengal; while in North and South Behar and in Chutia Nagpur the defect has been from 2° to 3°. The general mean temperature of the whole of Bengal has been 1.7° below the normal for the period. In Assam temperature has also been in defect by 0.7°.

Rainfall.—The only days on which rain was at all general were the 15th and 16th, but in many districts the falls were rather heavy. Thus, on the 15th, Bagaha in the Chumparun district reported 7.30 inches of rain, Netrokona in the Mymensingh district received 4.10 inches, Dinagepore 3.41 inches, and Monghyr three inches; while the following stations received between two and three inches:—In South-West Bengal, Bolpore (Beerbhoom district); in East Bengal, Mymensingh and Jamiālpore (Mymensingh district); in North Bengal, Bhowanigunge, and Bagdegra in the Rungpore district and Debigunge in the Julpigoree district; in North Behar, Purneah, Madhubani (Durbhanga district), Sitamarhi (Mozufferpore district) and Motihari; and in South Behar, Arrah, Barrh (Patna district), Sheikhpura (Monghyr district), and Pakour (Sonthal Pergunnahs district). The number of stations reporting amounts between one and two inches is rather considerable, and about 50 stations in addition to those abovenamed have thus received heavy falls. The average rainfall over the whole of East Bengal, North Bengal, and North Behar has averaged from one to one and a third inches; in South Behar the fall has averaged 0.88 inch; in South-West Bengal it has been 0.45 inch; and in Orissa and Chutia Nagpur it has equalled about a fifth of an inch. Compared with the normal fall for the period, and expressed as a percentage of that amount, the actual average falls received in the seven large meteorological districts became in Orissa 16 per cent., South-West Bengal 40 per cent., East Bengal 111 per cent., North Bengal 100 per cent., North Behar 471 per cent., South Behar 200 per cent., and in Chutia Nagpur 40 per cent. Taking each of these divisions having an equal value in the calculation, the average rainfall over the whole Province for the week has equalled 140 per cent. of the normal.

In Assam the following rainfalls have been recorded during the week—Dhubri 1·32 inches, Sibsagar 0·43 inch, and Silchar 0·17 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 21st of October 1887:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1887.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemometer.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, p passing temporary showers, fog, d dew.

Goddā Subdivision.

Name of thana containing number of villages.	NAME OF VILLAGE		Population by last Census.	SOURCES AND CHARACTER OF WATER-SUPPLY.									OWNERSHIP OR CONTROL						Is permanent supply adequate to population ?	REMARKS OF INSPECTING OFFICERS.
	Supplied from river, khal, or canal.	Supplied from tanks or wells.		Wholesome tanks.	Unwholesome tanks.	Total tanks.	Wholesome wells.	Unwholesome wells.	Total wells.	Perennial.	Intermittent.	Total sources.	Government.		Local.		Private.			
													Tanks.	Wells.	Tanks.	Wells.	Tanks.	Wells.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21
Godda (46 villages)	Tanks and wells for each vil- lage.	41,680	66	40	105	480	80	560	447	198	645	2	6	1	1	102	533	Yes.	
Mohaganis (23 vil- lages).	Do.	21,314	51	24	75	284	11	295	209	161	370	...	1	75	294	Do.	
Pasuri (17 villages)	Do.	25,945	68	21	89	189	11	200	194	85	289	...	1	89	199	Do.	
Damin-i-Koh (19 villages).	Do.	15,363	21	2	23	118	4	122	68	77	145	5	8	18	114	Do.	
		Total ...	104,172	206	87	299	1,071	86	1,167	918	531	1,449	7	16	1	1	284	1,140		

27. *Establishment.*—The following table shows the amount spent on establishment and the percentage of its cost on expenditure in Civil Works:—

YEAR.	Outlay on works and repairs.	Outlay on establishment.	Percentage.	REMARKS.
1	2	3	4	5
1903-1904	Rs. 57,071	Rs. 15,846	27.76	(a) Consists of land revenue 16,572 Civil Buildings ... 478 Communications ... 41,375
1904-1905	(a) 58,425	16,856	28.85	<u>58,425</u>

The percentage is high, as owing to heavy lapses on Civil Works the expenditure thereon had not been proportionately large enough to keep down the same. The total cost, however falls short of the limit laid down in the Cess Act, *i. e.*, one-fourth of the year's receipt excluding the opening balance thus:—

		Rs.
Administration	...	1,792
Civil Works	...	16,856
Total	...	<u>18,648</u>

which is less than one-fourth of Rs. 96,859 being the total receipts of the year.
